PRICE KOVENENTS, DECEMBER, 1935.

#### Abstract

COMMODITIES The Dominion Burcau of Statistics index moasuring the average level of commodity wholesale prices ended the year close to the high point of the current rocovery movement. at 72.6 for tho weak of December 27, it was only slightly below the peak of 73.2 reached in the socond wook of October 1935. The rocent advance in wholusale prices has been moderate, since the low point of the depression in February 1933 was only 63.5 . The greater part of the subsequent rise came in the last threc quarters of 1933 , the adi wace since that time being limited to $5.2 \mathrm{p} . \mathrm{c}$. It has been due largely to irregular improvement in prices for primary products. Basic commodity prices in Docember 1935 were generally stable with the notable exception of silver which declinud over 15 cents per ounce, following curtailment of buying on the London market by the United States Treasury. The advence in the basic domastic price of argentine wheat from 5.75 to 10.00 pesos oer quintal caused a temporary flurry in international wheat markets on December 13, but this quickly subsided.

The monthly wholesale price index fell fractionally from 72.7 in November to 72.6 in December.

## COST OF IJIVING

Woderate advances in food and fuel prices were responsible for a rise in the Dominicn Bureau of Statistics cost of living index from 80.6 in November to 80.8 in December. The food group moved up from 73.2 to 73.7 , firmer prices for eggs, butter, and potatoes being of more consequence than declines for meats and tea. An advance in the fuel index from 87.0 to 87.2 was due to higher prices for coal and coke. The general index of 80.8 compares with 78.9 for December 1934.

## SECURITIES

The upward sweep in industrial common stocks which commenced early in Cctober received its first check in the third week of December. An index of 87 industrial common stock prices mounted from 144.I to 180.5, during the preceding ten meek interval before any appreciable reaction occurred. The subsoquent docline was bricf and this index was again headed upward in the final week of the year, rising from 176.1 to 178.3 . An index of 20 utilities lost ground during December, declining from 50.9 in the first week to 49.8 in the final week. A small group of 5 companies abroad headed by International Petroleum also moved lower throughout this period, from 124. 3 to 121.4. A general index combining all the above mentioned groups, however, was urichanged at 111.4 , gains for industrials being counterbalanced by losses in utilitics and companios abrcad. Mining issues moved emewhat uncertainly, but rucorded a net advance for the month. An index of 19 gold stocks rose from 115.3 to 116.7 , while 4 base metals mounted from 197.4 to 200.4 . A gradual decline in long-term bond yields was indicative of slightly better prices for high grade bonds. The Bureau's index of Dominion long-term yields declined from 74.8 to 73.3 during Dec ember.

## FOREIGN RXCHANGE

A steady decline in stcrling rates has been the most outstanding foature of the C'anadian exchange market for December. Sterling fell from $\$ 4.9880$ to $\$ 4.9590$ during the month. The Canadian dollar was also stronger in terms of the United States dollar, on Which the Montreal premium decined from $1.125 \mathrm{p} . \mathrm{c}$. to $0.563 \mathrm{p} . \mathrm{c}$. , the greater part of this recession occurring in the final week of December. In spite of temporary weakness 1r. the lattor half of the month, the French franc gained strength and the outward flo:: of gold to New York was terminatod. The total amount of gold shippod from Europe to the United Statos 8 inco September 9, when the flow pommenced, has excoedod $\$ 820,000,000$. Chinese currencies showed littie reaction to the decline of over 15 cents per ounce in s ilverprices during December. flurry following the announcement on December 13 that the Argentino rould advance the producersi price of rew crop wheat from 5.75 to 10.00 pesos per 100 kilos, wheat price fluotuations during December were of small proportions. Canadian wheat was offered freely and considerable quantities were exported, although purchases from continental Europe remained uxtremely limited. Broomhall estimated that Canadian shipments from August 1 to December 31: have amounted to $112,500,000$ bushols, including 27,000,000 bushels shipped to the United States for wintor storage. Argentino and Rassian offerings in December were small, but Australia sold freely, particularly towards the close of the month.

FLOUR AND MILLED PRCDUCIS: Before the holiday lull in business settled upon the flour trade, domestic huying was in good volume, and exporters received substantial orders inmediately after the amouncement of the new Argentine domostic wheat price. In the final two weaks of December buying interest mas indifforont.

SUGAR: Prices on the Nen Youk sigga: narket showed little movement from the Weak position occupied at the beginning of December, until just before the month closed. Although the United States Supreme Couis was then deliberating upon A.A.A. logislation involving the legality of precessing tazes market sentiment improved and prices advanced briskly. An estimate of Euwopeas prociuction issued at the beginming of December by J.A. Licht, pointed to a moderate ciecine in oriput.

RUBBER: Rubber prices weakenod following the announcement of liboral quotas by the Intemational Rubber Regulaition Committec for the first half of 1936, on Decomber 3. However, continued favourabic consumption and low shipments from the Far East combined to produce a subsequent rally. Unitec States stocks were reduced approximately 15,000 tons in November, and fo-ecests of extremely low Decomber shipments from Malaya indicated that a furthor sinjla: reduction might be expected for the succeeding month. quotes for the first half of 1936 woun i permit shipments of about 3,000 tons per month more than fourth quarter 1935 ailonences.

## ZIVASTOCK: Quotations for livestuck averagen generally higher in December.

 Cattle markets were sumewhat dejresser at first, as the month opened with heavy waslyovers at most major contros and offerings in the second woek proved too heavy to be readily absorbed. Sharoly custailed receipts which included some choice lots, during the remainder of the month: ereatec a fimmer tone and prices unoved upward. Closing merkets showed considerable strengtin but the export movement to the United States conrinzod luw. Calves mere firm and domand was sufficient to take care of the limited rums.

EGGS: From firm positions in the early days of December, the majority of egg markets weakened gradually and prices declined moderately. Demand was quiet as consumer intorest centred chiefly on pouitry. Production was stimulated by milder weather conditions and receipts of fresh eggs giadually increased towards the close of the month. Storage stocks moved freely and some depletion of dealers' supplies was reported. The Agricultural Branch of the Dominion Bureau of Statistics showed storage holdings on December 1 at $3.404,024$ dozen, a decline of approximately 48 p.c. from November 1 figures.

BUTMER: Comparative quiet pervadod the Canadian buttor market and buyers were reported as interested chicily in supplying immediate requirements. Small declines occurred at major centres but these were wiped out latterly as indications pointed to a reduction in stocks and to inadequate fresh supplies at some points. Cold storage holdings of creamery butter on December 1 were calculated by the Agricultural Branch of the Dominion Bureau of Statistics at 39,236,460 pounds, as against 47,474,219 pounds on the first of the previous month.

COTION: Narrow fluctuations were reported in cotton prices on the New York market in December. Following a decline coinciding with the sharp break in silver, prices rallied and remained comparatively stable for the rest of the month. This recovery was attributed largely to the strength of the statistical position. The available supply of free cotton was regarded as insufficient for world needs, and stocks were estimated at the lowest level since 1929. Southern of ferings were limited and but jittlo of the government controlled stocks of over $6,000,000$ bales was releasod. The official crop report of December 1 at $10,734,000$ bales was filly 250,000 bales iess than general expectations. Forwardings of Anerican cotton to mills of the world feil from $1,212,000$ bales for the four wooks ondud Novomber 27 tis $1,182,000$ balos in the following four weeks. World visible stocks rosc from 6,836,000 baies on November 27 to 6,989,000 bales on December 29.

## SIIK: Reports of moderately heavy liquidation, limited trading and bearish

 statistics were cuoted as the main depressing factors in the New York spot and futures ailk market. American mill takings of raw silk droppod from 48,167 bales in Octobor to 37,012 bales in the following month. Statistics showed that Japanese exports fell from $50, \mathrm{C} 40$ bales to 40,235 bales in the same poriod.| Descriptions | $\begin{gathered} 1934 \\ \text { December } \\ 15 \end{gathered}$ | $1935$ <br> November 15 | $\begin{gathered} 1935 \\ \text { December } 15 \\ \hline \end{gathered}$ |

| Grand XX 83 p.c. $13-15$ deniers | 1.52 | 2.29 | 2.16 |

WCOL: well maintained sales of raw wool and tops and firm prices were features of the domestic wool situation. Stocks in dealers' hands were reported light and woollen and worsted mills operated ciose to capacity levels. Overseas markets mere also firm. Available supplies of raw wool in the importanc Southern femisphere countries were estimated at 8 p.c. less than a year ago.

| Descriptions | $1934$ <br> December 15 | $\begin{array}{r} 1935 \\ \text { November } 15 \\ \hline \end{array}$ | $\begin{gathered} 1935 \\ \text { December } 15 \end{gathered}$ |

| staple or 58's - 60's | 14.0 | 19.0 | 19.0 |

LUMBER AND TIMBEF: Canaiav Lumber markets showed some improvement. A better ¿emand particularly for British Cnlumbia fir and cedar existed and prices stiffened. Supozts were fairiy well maintained and foreign shipments of coards and planks were 121.444 in bd.ft. in Novemoer as against 138.118 k bd.ft. in October. Rail shipments were 10 as inquiry from Prairies and Eastern Canada was weak subsequent to increased freight rates.

| Descriptions (Pric | Index Numbers 1926=100) | 1934 | 1935 | 1935 |

COPPFR: Copper, delivered Connecticut Valley basis, remained unchanged at $\rho \frac{1}{\lambda} \phi_{\text {per }}$ pound. Hilhough the muropean market was reported quiet, an early advance was recorded owing to the growing belief that United States domestic price world be advancec? at least $\frac{1}{6} \phi$ per pound. Talk of higher prices lessened following the sharp break in silver, although the statistical position appeared strong. World stocks of refined metal dropped from 496,500 tons in Octojer to 476,200 tons in November. Sales in the United States were estimated in the neighbourhood of 40,000 tons in Deceraber as compared with 32,000 tons in the previous month.

THOLESALE PRICES, YEARS 1934 AND 1935 (1926=100)

The index number of retail prices, rents and costs of services, on the base $1926=100$, rose from 80.6 in November to 80.8 in December, owing to slightly higher prices for foods and certain fuels.

An index for retail prices alone, including foods, coal, coke, clothing, household requirements, etc., advanced from 76.0 to 76.3 . When foods were removed from this index it was 78.8 as compared with 78.7 in November.

For 46 food 1 tems an index rose from 73.2 to 73.7 , higher prices for butter, eggs, and potatoes more than offsetting declines for meats and tea. Creamery butter rose from $28.6 \phi$ to $30.3 \phi$, and dairy butter from $24.9 \phi 26.5 \phi$ per pound. Grade "A" eggs moved up from $41.5 \phi$ to 43.4 per dozen, while an average of Grade "B" and "C" eggs was $34.7 \phi$ in December as against $33.4 \phi$ in November. Potatoes rose from $22.0 \phi$ to $23.6 \phi$ per peck. Meats declined as follows: Sirloin beef from $22.5 \phi$ to $22.3 \phi$, shoulder beef from $12.3 \phi$ to $12.1 \phi$, fresh pork from $21.9 \phi$ to $20.8 \phi$, bacon from $31.2 \phi$ to $29.9 \phi$, and cooked ham from $52.4 \phi$ to $51.7 \phi$ per pound. Tea receded from $52.3 \phi$ to $51.9 \phi$ per pound.

Higher prices for coke, and to a lesser extent for coal, were responsible for an upward movement in the fuel and lighting index from 87.0 to 87.2.

An increase in motor operating costs from 91.8 to 91.9 , was not of sufficient importance to affect the sundries group index, which remained unchanged at 92.5 .

## MONTHUY INDEX NUMBERS OF LONG-TERM BOND YIELDS

The Dominion Bureau of Statistics monthly index number of Dominion of Canada long-term bond yields on the base $1926=100$ rose from 74.5 for the month of November to 75.5 for the month of December. Yields during the first weok of the month were steady but speculation as to the possible outcome of intorest rate discussions by the Dominion - Provincial Conference influenced a sharp rise in the scoond week. This flurry was of short duration, however, and within the week yields fell to slightly below previous levels. For the last ten days of the month there was a gradual decrease until an average of six leading issues stood at 3.38 on December 31 as compared with 3.47 on November 30. The highest average daily yiold for Docember was 3.52 and the low point for the month was 3.38 .

In reviewing the year just ended, it is interesting to observe that the index touched a low for the current century in January. During the following soven months little of an unusual nature happened and fluctuations were narrow, without definite trend. In Septomber, however, a sharp rise occurred when confidonce in the market was temporarily shaken but this was followod by a docline which continued into December. At this time a second flurry of shorter duration and smaller proportions occurred as noted above.

The index for Province of Ontario bond yield advanced from 80.8 for November to 82.7 for December, and popular issues sold on a $3.96 \mathrm{p} . \mathrm{c}$. basis during the latter month. Moverents during the year wero in sympathy, genorally, with those of Dominion bonds although a stronger upward trend was in evidence during the first eight months.
