PRICE MOVEMENTS, OCTOBER, 1941.

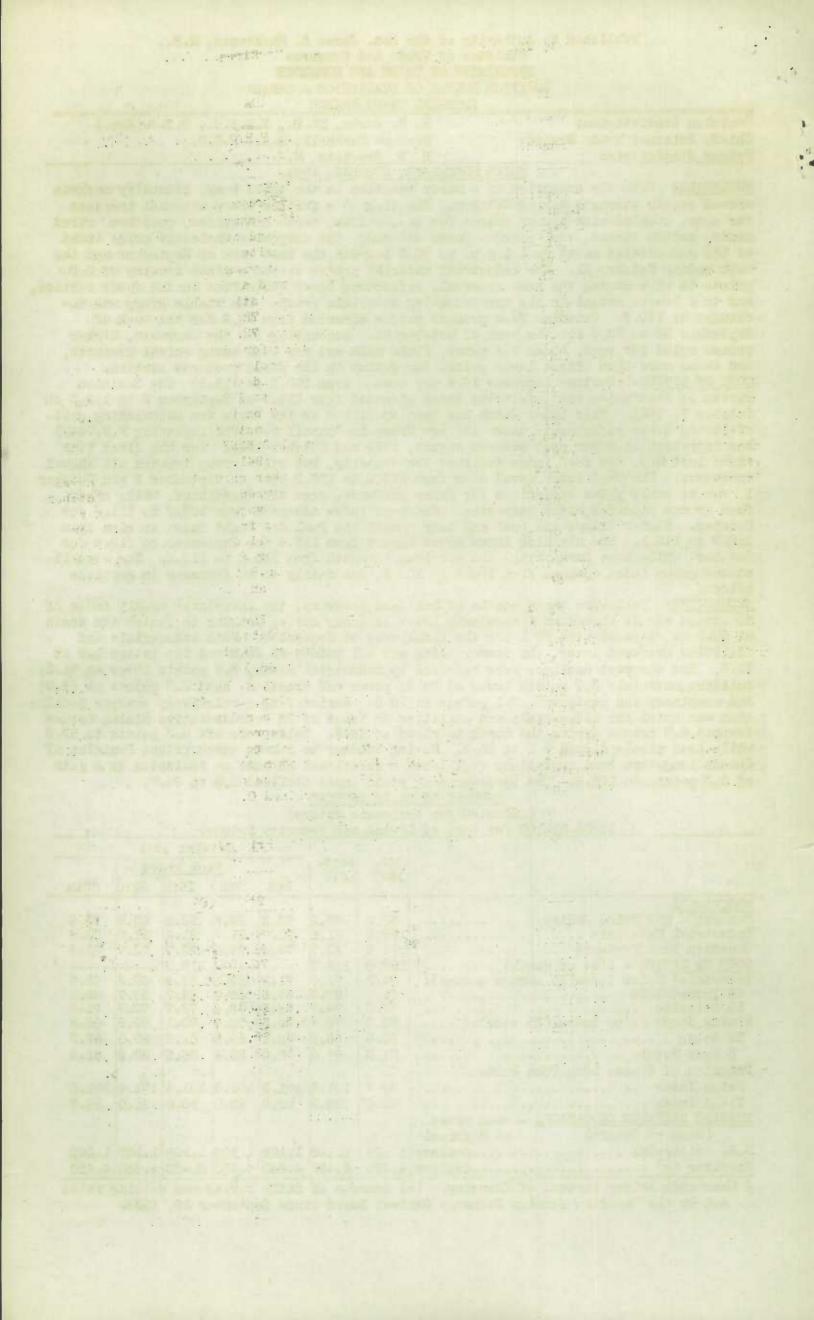

WHOLESALE: With the exception of a minor reaction in the third week, commodity markets showed steady strength during October. Reacting to a further sharp seasonal increase for eggs, coupled with higher prices for tea, coffee, cocoa and spices, potatoes, cured meats, cotton thread, wool worsted yarns and soap, the composite wholesale price index of 567 commodities moved up 1.1 p.c. to 93.8 between the last week of September and the week ending October 31. The Industrial material prices showed a minor decline of 0.6 points to 90.8 during the same interval, reflecting lower quotations in the foods section, and to a lesser extent in the manufacturing materials group. The stable group was unchanged at 110.6. Canadian farm product prices advanced from 72.9 for the week of September 26 to 73,4 for the week of October 31. Accounting for the increase, higher prices ruled for eggs, hides and skins, fluid milk and raw wool among animal products, and these more than offset lower prices for grains in the field products section. COST OF LIVING: (Wartime increase 14.6 per cent - from 100.8 to 115.5) The Dominion Bureau of Statistics cost-of-living index advanced from 114.7 on September 2 to 115.5 on October 1, 1941. This index which has been specified as the basis for calculating costof-living bonus adjustments under the new Order-in-Council P.C.8253(replacing P.C.7440) has increased 14.6 per cent between August, 1939 and October 1941. For the first time since last May, the food index declined fractionally, but other group indexes all showed increases. The food index moved down from 123.3 to 123.2 between September 2 and October 1, due to small price reductions for dairy products, eggs and vegetables, while other food groups recorded minor increases. The rent index advanced from 109.7 to 111.2 for October. Higher prices for coal and coke caused the fuel and light index to rise from 110.9 to 112.1. The clothing index moved upward from 117.4 for September to 119.6 for October, while home furnishings and services advanced from 115.8 to 117.3. The miscellaneous group index changed from 106.4 to 106.5, due mainly to an increase in gasolene prices.

SECURITIES: Following three months of hesitant recovery, the Investors' weekly index of 95 common stocks showed an irregularly lower tendency during October to finish the month at 68.9 as compared with 70.1 for the final week of September. Both industrials and utilities averaged lower, the former being off 1.1 points at 65.5 and the latter 1.9 at 71.6. The sharpest declines were recorded by industrial mines, 3.7 points lower at 71.2; building materials 3.2 points lower at 78.3; power and traction, down 2.3 points at 65.9; and machinery and equipment, 2.1 points at 78.6. Registering a relatively sharper decline than was noted for industrials and utilities an index of 25 representative mining issues dropped 8.2 points during the month to close at 66.8. Golds were off 8.3 points to 57.2 while base metals dipped 8.1 to 85.9. Moving counter to common stock prices Dominion of Canada long-term bond quotations registered a fractional advance as indicated by a gain of 0.3 points to 101.6. The corresponding yield index declined 0.3 to 94.7.

REVIEW OF IMPORTANT COMMODITY MARKETS

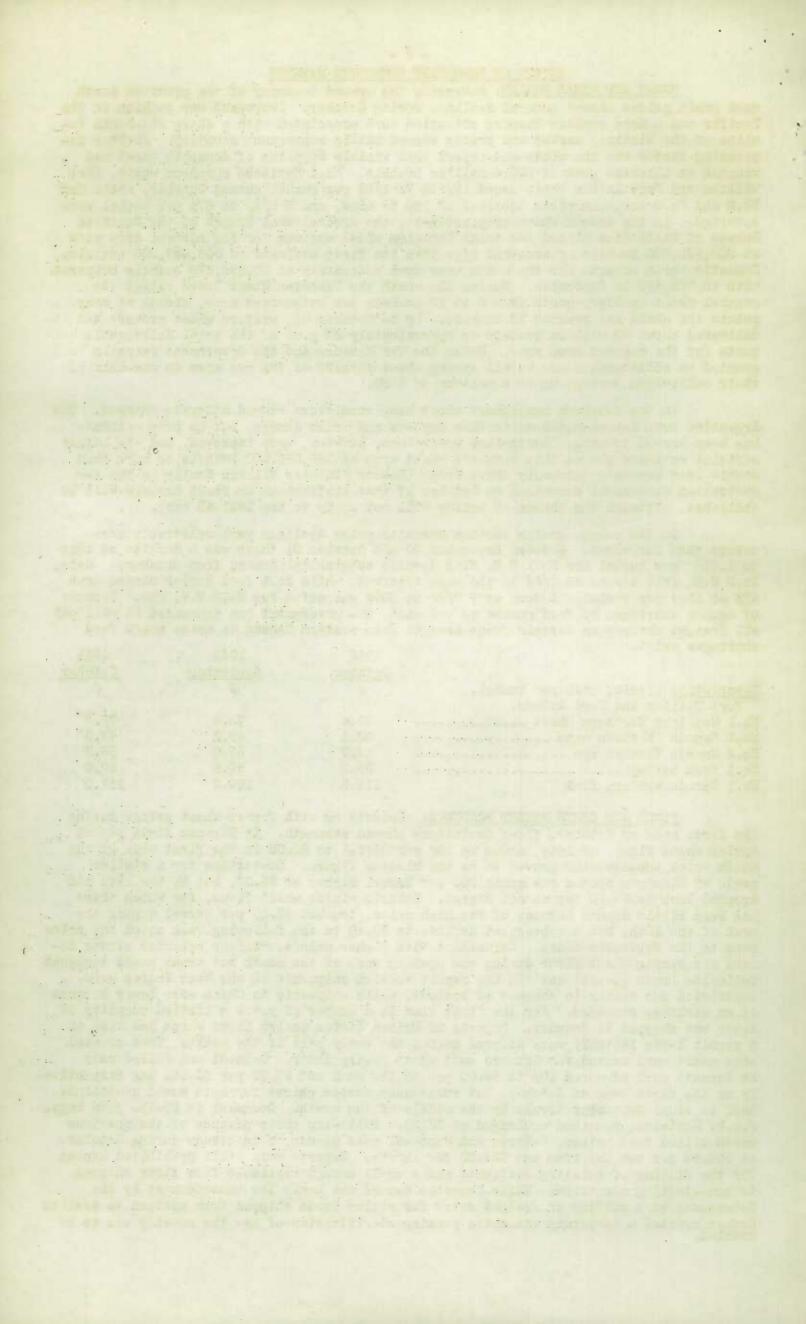

WHEAT AND OTHER GRAINS: Reversing the upward tendency of the previous month cash grain prices showed general declines during October. Increased war tension in the Pacific and a more serious Russian situation were associated with a sharp mid-month decline on the Winnipeg market and prices showed little subsequent recovery. Another depressing factor was the month-end report that visible supplies of domestic wheat had reached an all-time peak of 502.4 million bushels. No.1 Manitoba northern wheat, Fort William and Port Arthur basis eased $1\frac{3}{4}\phi$ to 72 1/8¢ per bushel during October, while for No.2 and No.3 northern price declines of 17¢ to 694¢, and 2 1/8¢ to 67¢ per bushel were recorded. In its second wheat crop estimate, the Agricultural Branch of the Dominion Bureau of Statistics placed the total Canadian wheat outturn for the current crop year at 302,626,000 bushels or somewhat less than its first estimate of 306,459,000 bushels. Domestic wheat exports for the month were down moderately at 10,656,675 bushels compared with 10,705,499 in September. During the month the Canadian Wheat Board raised the general wheat delivery quota from 8 to 12 bushels per authorized acre, though at many points the quota has reached 15 bushels. Up to October 24, western wheat growers had delivered about 82 million bushels or approximately 37 p.c. of the total deliverable quota for the current crop year. Under the War Measures Act the Government recently granted an additional bonus to all spring wheat farmers of 75¢ per acre on one-half of their cultivated acreage up to a maximum of \$150.

In the Southern hemisphere wheat crop conditions showed moderate changes. The Argentine crop deteriorated on further dryness and frost damage, but no crop estimate has been issued to date. Australian conditions, however, were improved, and the latest official estimate placed this season's wheat crop at 166,096,000 bushels or more than double last season's extremely short crop. Labour Minister William Scully in the new Australian Government announced on October 17 that limitations on wheat acreage will be abolished, although the change of policy will not upply to the 1941-42 crop.

In the coarse grains section domestic price declines were relatively more severe than for wheat. Between September 30 and October 31 there was a decline of $12\frac{\pi}{4}$ to $1.45\frac{3}{4}$ per bushel for No.1 C.W. flax despite substantial demand from crushers. Oats, No.2 C.W. fell $4\frac{1}{3}$ \$\psi\$ to 46 1/8\$\psi\$ in the same interval, while No.1 feed barley closed down $4\frac{3}{4}$ \$\psi\$ at $51\frac{1}{4}$ \$\psi\$ per bushel. A drop of 7 7/8\$\psi\$ to $55\frac{1}{2}$ \$\psi\$ was noted for No.2 C.W. rye. Because of several shortages of feed grains in the east, the government has announced it will pay all freight charges on certain feeds brought from western Canada to areas where feed shortages exist.

	1940	1941	1941

No.2 Canada Western rye	43.7	62.0	56.7
No.1 feed barley	39.3	52.6	52.9
No.1 Canada Western flax	118.3	154.7	151.0

FLOUR AND OTHER MILLED PRODUCTS: Coinciding with firmer wheat prices during the first half of October, flour quotations showed strength. At Toronto first patent spring wheat flour, carlots, moved up 10¢ per barrel to \$5.05 in the first week of the month which subsequently proved to be the closing figure. Quotations for a similar grade at Winnipeg opened the month 20¢ per barrel higher at \$5.30, but by the 17th had dropped back to \$5.10 for no net charge. Ontario winter wheat flour, for which there has been little demand because of its high price, touched \$5.60 per barrel during the week of the 10th, but a subsequent decline to \$5.40 in the following week moved the price back to the September close. Coincident with higher prices, millers reported strong demand for spring wheat flour during the opening week of the month but trade eased somewhat following lower quotations. In the export section shipments to the West Indies were restricted due mainly to absence of bottoms, while shipments to China were lower because of an exchange shortage. For the first time in a number of years a limited quantity of flour was shipped to Ecuador. Imports of United States pastry flour which had been on a permit basis latterly were stopped during the early part of the month. This created some additional demand for Ontario soft wheat pastry flour. Oatmeal and rolled oats at Toronto each advanced 10¢ to \$4.00 per 98-1b. sack and \$3.35 per 80-1b. bag respectively in the first week of October, but subsequent easier prices for oats moved quotations back to final September levels by the middle of the month. Cornmeal in 98-1b. jute bags, f.o.b. Montreal, remained unchanged at \$3.30. Following their advance of the previous month milled feed prices, Ontario and Montreal rate points, held steady during October at \$28.50 per ton for bran and \$29.50 for shorts. Exports were still prohibited except for the filling of existing contracts and a small amount available from flour shipped to non-sterling countries. While domestic demand was heavy the announcement by the Government of a subsidy on freight rates for milled feeds shipped from western to eastern Canada created a temporary stalemate pending clarification of how the subsidy was to be handled.

LIVESTOCK: A 3 p.c. drop in cattle prices caused the October index number of livestock prices to move down from 115.2 in September to 113.2. Frequently cattle markets were over-supplied with a large percentage of inferior quality animals, and dealers found it difficult to dispose of these heavy supplied, particularly in eastern areas. Shipments to stockyards and plants totalled 146,993 head in October against 149,742 head in September and 151,889 head in October 1940. Good steers up to 1050 pounds at Toronto moved steadily down from \$9.06 for the week of October 3 to \$8.71 per cwt. by the week of the 31st. At Winnipeg, prices for this grade dropped 10¢ in the week of the 10th to 8.15 per cwt., held there till the 17th and then continued downward to close at \$8.00 per cwt. Gains ranging from 1 to 2 p.c occurred in calf, hog and lamb markets. Offerings of hogs were heavy but were readily absorbed.

(a) Bacon hogs live weight. Estimated at about 75 p.c. of dressed weight.

EGGS: October egg markets showed a 9 p.c. rise in price practically all of which occurred in the higher grades. An average of A's large at eight representative cities advanced from 40.9¢ in September to 47.6¢ per dozen in October. B's rose from 32.9¢ to 35.9¢ per dozen during this period while C's remained unchanged at 26¢ per dozen. Production continued to decline and receipts of fresh supplies of higher grades in many areas fell below demand. The situation was relieved at first in western areas and later in eastern sections by the increased offerings of pullet eggs. The movement of B's into channels for export had a strengthening influence on the market. Cold storage supplies on November 1 were calculated by the Agricultural Branch of the Dominion Bureau of Statistics at 3,023,000 dozen, less than half the October 1 figure of 7,355,000 dozen and 619,000 dozen smaller than November 1, 1940, holdings.

		Toronto	41.0	41.6	49.0

BUTTER: Declines in six regional cities, ranging from 1.7¢ at Montreal to 4.4¢ at Regina, brought the monthly average for butter to 33.6¢, 7.1 p.c. below the September average. Domestic disappearance increased about two million pounds to 28.3 millions during October, and at November 1st total stocks were 65.1 million pounds, 4.9 p.c. below the October 1st level, but 24.6 p.c. above the figure for November 1, 1940. Cold storage stocks fell 4.7 p.c. to 46.7 million pounds, which was 24.9 p.c. above last year's figure. Production, on the seasonal downswing fell from 32.3 million pounds in September to 24.9 millions in October. This was 10.2 p.c. above the same month last year. The uncertainties of the prospective government price control plans and of the export market kept the market unsteady with general downward tendencies during the month.

COTTON: Raw cotton prices at New York moved irregularly lower during October, reflecting a current cotton crop outturn larger than anticipated, and also the depressing market influence of Russian reverses. Based on October 1st conditions, a crop of 11,061,000 bales was forecast which was 351,000 bales above the September 1st estimate,

. at modern transmit and color and became the first and south and the first and an expension of the state of th 411 =.0. AND THE CHARLEST PROPERTY OF THE PARTY OF TH , E., 55

and about 500,000 bales above trade expectations. For upland middling 15/16" staple at New York spot quotations dropped 41 points during October to close at 17.07¢ per pound after touching a mid-month low of 16.59¢. Over the same interval the Bureau's weekly index of raw cotton prices eased from 117.7 to 112.9. There were further increases in imports of United States cotton during the month under the protection of the export subsidy plan. The subsidy was raised from $2\frac{1}{2}$ ¢ per pound net weight to 3¢ on October 24 in order to maintain United States competitiveness with Brazilian cotton. Up to October 15th the United States Department of Agriculture announced that 102,162 bales had been saipped under this plan. Consumption of raw cotton by Canadian mills touched a new peak record of 46,885 bales while with mills at capacity production the October total was expected to compare favourably with this figure.

LUMBER AND TIMBER: With the exception of a moderate decline in the export price of British Columbia cedar shingles which lowered the cedar lumber and timber section index 3.6 points to 156.0 during the week of October 24, there were no price changes in the Bureau's list of representative lumber quotations during October. Pine held at an index level of 126.7; spruce at 121.4; herdwoods 104.8, and hemlock 135.5. Restricting further price increases was the placement of a maximum price ceiling on practically all commodities and services as announced by the Prime Minister on October 18. The maximum ceiling to obtain was the highest price in effect for any commodity during the four-week period ended October 11. Export prices will not be affected by the order so that increased demand from the United States could put quotations in this section higher. According to the latest reports the amount of lumber required for 1942 will be about as great as for 1941, and already it is known that shortages exist for certain grades. This applies especially to certain hardwoods, notably birch and maple. British Timber Control purchases which were on a large scale during the mid-summer months dwindled in September, while October orders were expected to be even further limited. Of outstanding interest, however, was the placement by the Control of an order with the British Columbia industry for approximately 75 million board feet of sleepers and crossings to be delivered in the first six months of 1942.

MONTHLY WHOLESALE PRICE INDEX NUMBERS OF SINGLE COMMODITIES, 1940 - 1941 (1926=100)

x 1941 - Bl dressed.

INDEX NUMBERS OF LIVING COSTS IN CANADA, OCTOBER 1, 1941. (Calculations based on prices for the first business day of each month)

The Dominion Bureau of Statistics index number of living costs on the base 1935-1939=100, rose from 114.7 on September 2nd to 115.5 on October 1st. This increase of 0.8 points represents the smallest monthly advance recorded since May. All groups except foods contributed to the October advance.

An index for 46 food items moved down from 123.3 in September to 123.2 in October, declines for dairy products, eggs and vegetables influencing the index more than advances for meats, fruits, cereals and dry groceries. Higher quotations for coal and coke resulted in a rise in the fuel index from 110.9 to 112.1. The clothing index rose from 117.4 to 119.6, following substantial advances in women's clothing and yard materials, augumented by increases of lesser importance in men's apparel and footwear.

Higher prices for furniture, floor coverings, furnishing and textiles, hard-ware and cleaning supplies caused the homefurnishings and services group to advance from 115.8 to 117.3. The index for miscellaneous items moved up from 106.4 to 106.5, a one cent per gallon advance in gasoline prices for Eastern Canada being partially offset by declines in theatre entrance fees in a few localities.

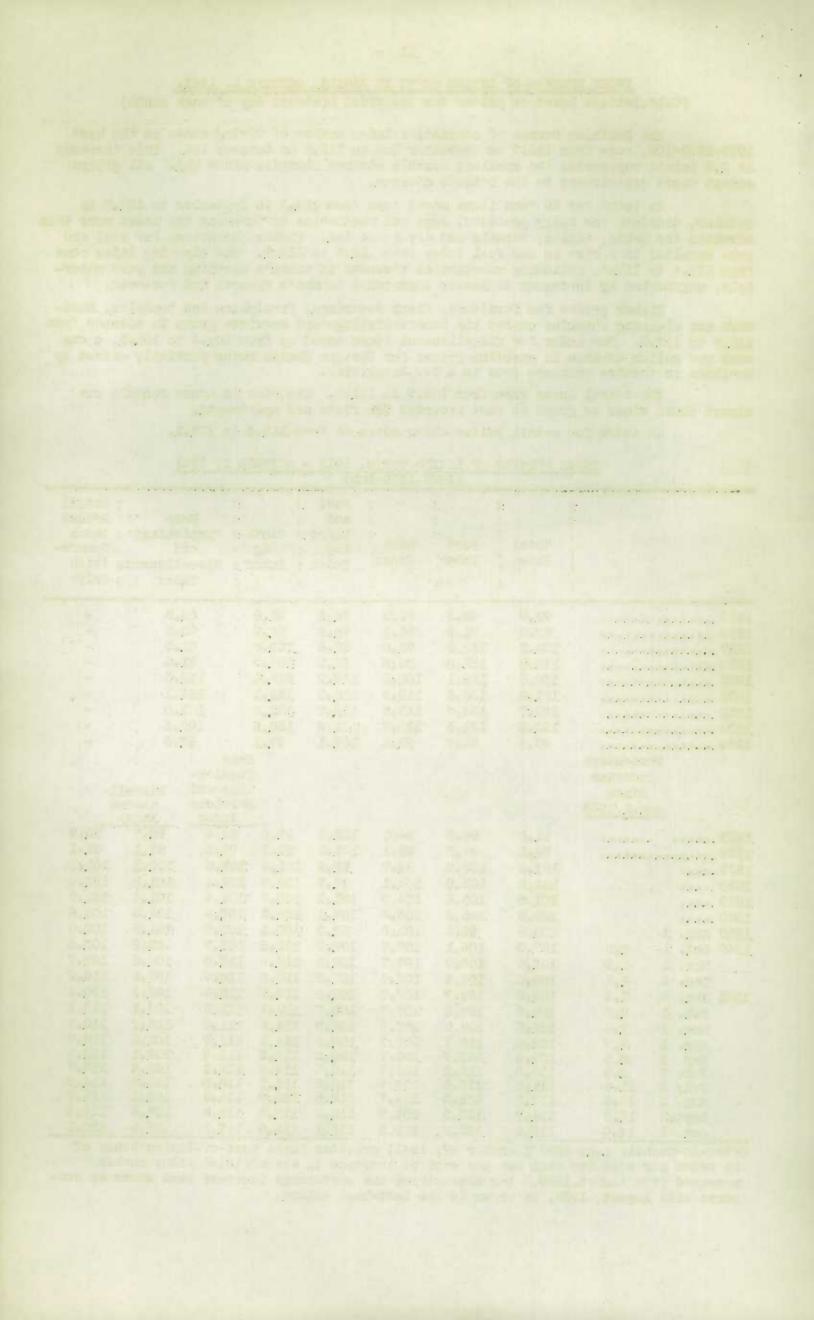

The rental index rose from 109.7 to 111.2. The rise in house rentals was almost three times as great as that recorded for flats and apartments.

An index for retail prices above advanced from 119.4 to 120.1.

CITY COST OF LIVING INDEX NUMBERS, OCTOBER 1, 1941. (August 1939=100)

Eight regional city cost-of-living index numbers advanced by amounts ranging from 0.7 to 2.6 points between August 1, and October 1, 1941. In the same interval the Dominion cost-of-living index rose 1.8 points, and its October level of 115.5 was 14.6 .c.: p.c. above that for August 1939. The eight city indexes recorded wartime increases ranging from 11.4 p.c. to 16.3 p.c. Prices for foods, clothing, and home furnishings were mainly responsible for index advances between August and October. Small increases in rent and fuel and light were frequent but did not occur in all cities. Fractional advances in miscellaneous indexes were general.

RETAIL FOOD PRICE CHANGES, SEPTEMBER 2 TO OCTOBER 1, 1941.

Retail food price movements between September 2nd and October 1st were varied. The Halifax index declined one per cent and Saint John and Toronto were fractionally lower. Montreal recorded a slight advance. In the west, two city indexes recorded small increases and two moved slightly downward. Among the principal food groups, dairy products and vegetables were generally lower, while fruits and dry groceries showed consistent gains. Eggs displayed slight losses in the east, but tended to be considerably higher in the west, except in Vancouver, where they declined more than nine per cent. October indexes ranged between a high of 126.6 for Montreal and a low of 119.9 for Saint John, relative to the base period 1935-39=100.

INVESTORS' INDEX NUMBERS OF COMMON STOCK PRICES

During October, Canadian common stocks moved irregularly lower, cancelling about half of the gains registered in the preceding three months. The Investors' price index of 95 common issues declined 3.2 p.c. to 68.9 from October 2 to October 30. Textiles alone opposed the downward drift. Utilities suffered more severely than industrials during the month receding 5.2 p.c. to 71.6 on October 30, while the loss in the latter issues amounted to 3.1 p.c. to 65.5. The greatest losses were recorded by the transportation issues down 7.6 p.c. to 66.0 followed by the power stocks down 5.3 p.c. to 65.9, building materials 5.0 p.c. to 78.3, industrial mines 4.8 p.c. to 71.2, milling issues also declined 4.8 p.c. to 75.0, communication and beverage issues 3.1 p.c. to 95.8 and 99.1 respectively. Banks were off 0.4 p.c. to 90.9. The Bureau's monthly price index for common stocks fell from 71.0 in September to 69.1 in October, with industrials receding 2.0 points to 65.5, utilities 2.2 to 72.5 and banks 0.4 to 90.8.

MINING STOCK PRICES

Mining issues were decidedly weak during October and the Bureau's price index of twenty-five mining stocks dropped 10.3 p.c. to 66.8 on October 30, the lowest level touched this year. In contrast to their usually steady trend golds showed pronounced declines. The sectional index fell from 65.1 on October 2 to 57.2 on the 30th, for a drop of 12.1 p.c. Losses in base metals were also cuite heavy as indicated by an index decline of 7.6 p.c. to 85.9 on October 30. These occurred mainly in the first two weeks of the month. A monthly price index for mining issues receded from 75.4 in September to 69.7 in October. Golds fell 5.2 points to 60.8 and base metals 6.6 to 87.4.

PREFERRED STOCKS

The Bureau's preferred stock price index declined approximately 1 p.c. to 102.2 in October. Greatest recessions occurred in the machinery and equipment group down 2.8 p.c. followed by pulp and paper down 2.5 p.c. Milling, beverages and miscellaneous issues each showed a loss of 1.5 p.c. Declines in other groups were mainly fractional.

INDEX NUMBERS OF DOMINION OF CANADA LONG-TERM BOND PRICES AND YIELDS

Dominion of Canada long-term bond prices continued firm during October and the Bureau's index, on the base 1935-1939=100, rose from 101.3 for September to a new two-year high of 101.4. From 101.3 at the end of September, the daily index rose to 101.4 on the 14th, then made a further gain of 0.4 between the 25th and 30th, and closed the month at 101.8, to show a net increase of 0.5. Provincials, generally, declined and some of the Alberta maturities moved 3.00 to 4.00 points lower. An index of representative Province of Ontario bond yields, computed from information furnished by Wood, Gundy and Company, Limited, advanced from 90.9 to 91.8, and the averago yield of the issues included in the index rose from 3.21 to 3.23.

British Consols fluctuated between 82 and 84 1/4, but closed 3/16 lower at 82 3/8, while the Dow-Jones average of selected United States bonds mounted from 90.02 to 90.44
