CONSUMER PRICE INDEXES

TOTAL AND GROUPS

JANUARY 1952—JANUARY 1954

1949=100

1949=100

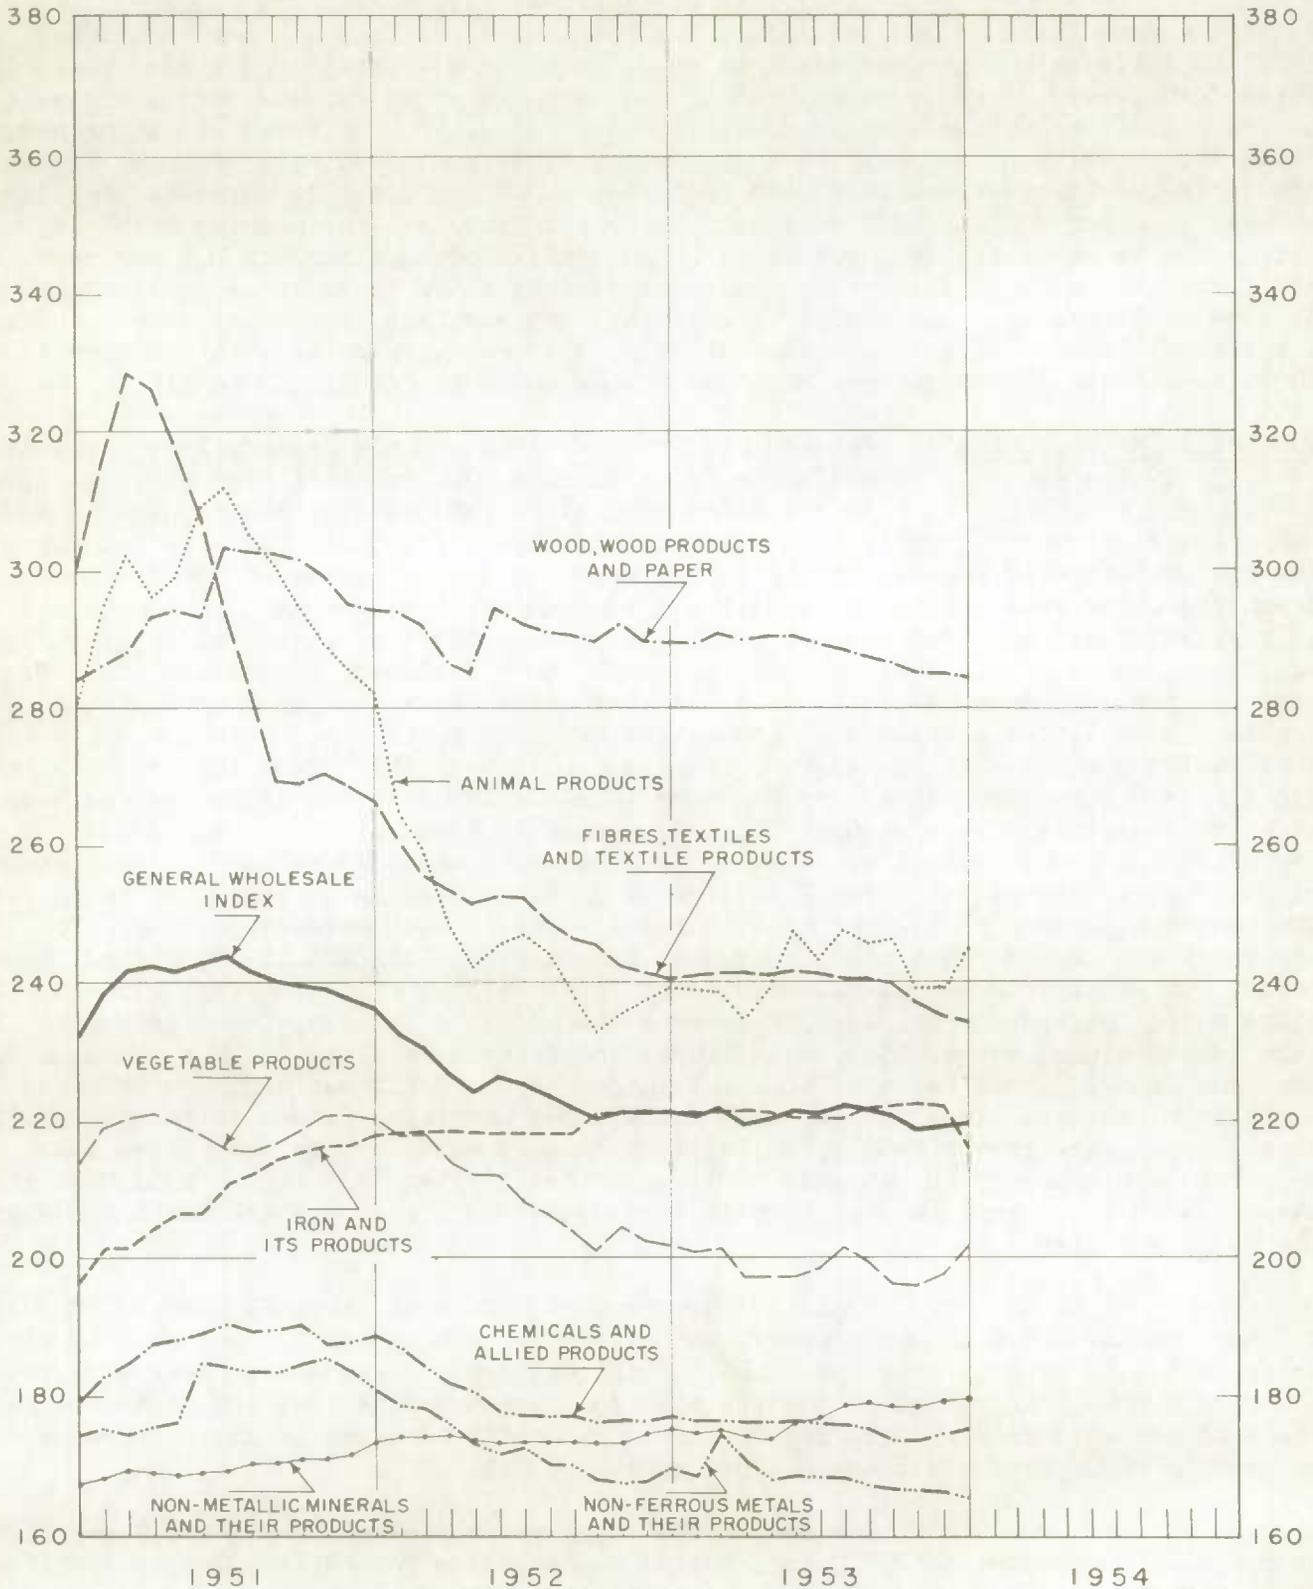

THE GENERAL WHOLESALE PRICE INDEX AND EIGHT COMPONENT GROUPS

MONTHLY, JANUARY 1951 - JANUARY 1954

1935-39=100

1935-39=100

NOTES ON PRICE INDEX NUMBERSTHE CONSUMER PRICE INDEX
(1949 = 100)

The Consumer Price Index remained practically unchanged between December 1 and January 2, moving from 115.8 to 115.7. As was the case last month, the January 2 index is at the same level as one year ago. The food index declined 0.4 per cent from 112.1 to 111.6 as further decreases in eggs, combined with scattered lower prices for other food items, proved more important than small advances for most meats and vegetables. Clothing prices were generally stable, but slight decreases affecting several items were sufficient to move the index down 0.1 per cent to 110.1. Changes in the household operation series were more pronounced with compensating increases for furniture, cleaning supplies and household help, and decreases for washing machines, cotton sheets and glassware, resulting in an overall advance of only 0.1 per cent to 117.5 for this group. The shelter index moved from 125.2 to 125.4 as rents continued to rise fractionally. Among other commodities and services, increases were recorded for several items of drugs and personal care, and newspaper rates were reported higher in three cities. These changes advanced the group index from 116.3 to 116.4.

WHOLESALE PRICE INDEXES
(1935-1939 = 100)

Between mid December 1953 and mid January 1954 the General Wholesale Index advanced 0.4 per cent from 219.0 to 219.8. Increases and decreases were equally distributed in number among the eight major groups, with Animal Products and Vegetable Products recording the most substantial gains. In the Animal Products group, increases for livestock, fresh and cured meats, fishery products, cheese and tallow were mainly responsible for an advance of 2.5 per cent which brought the January index to 245.0; hides, fowl and eggs were the only animal product sub-groups to show declines. Vegetable Products rose 1.8 per cent from 197.7 to 201.3, as sharp gains in coffee and cocoa prices combined with lesser increases in feeds, grains, fruits, tobacco, onions and potatoes to outweigh decreases in raw rubber, flour and soya bean oil. Chemical Products, at 175.4, was 0.7 per cent above the December level of 174.2 as higher prices for soap and dyeing materials were stronger than decreases in formaldehyde, wood alcohol, glycerine and copper sulphate. Seasonal increases in sand, gravel and crushed stone slightly more than offset a small decline in United States anthracite coal to increase the Non-Metallics index 0.1 per cent to 179.3. The largest percentage change for any group was the decrease of 2.7 per cent recorded for Iron and its Products. Lower prices for scrap iron and steel, wire nails, most rolling mill products, wire and tinplate moved the index from 222.0 in December to 216.1 in January, the lowest point for this series since October 1951. The Fibres and Textile Products group edged down 0.3 per cent from 235.3 in December to 234.5 in January as declines in cotton fabrics, wool cloth, worsted yarns and raw wool outbalanced increases in raw cotton and woollen knit goods. Non-Ferrous Metals, at 165.6 in January were 0.3 per cent below the December level largely in response to lower prices for lead and zinc. Wood Products moved down 0.2 per cent to 284.5, reflecting decreases for spruce and hemlock lumber and cedar shingles.

Canadian farm product prices at terminal markets advanced 1.3 per cent to 209.4 in mid January. Animal Products moved up 1.8 per cent to 266.3 as increases in calves, hogs and lambs in both eastern and western markets were reinforced by small increases in eastern milk for cheese manufacture and eastern eggs; raw wool and western eggs recorded declines. Moderate advances in all sub-groups raised the Field Products index 0.4 per cent to 152.5.

Residential Building Materials prices eased 0.3 per cent from 278.2 in December to 277.3 in January, as decreases for certain lumber descriptions and wire nails proved of more importance than seasonal increases in sand and gravel.

Non-residential Building Materials prices, based on 1949 = 100, declined 0.3 per cent from 123.6 to 123.2, reflecting lower prices for wire nails, metal windows and other steel items as well as for some descriptions of lumber.

SECURITY PRICE INDEXES: Common stock prices generally presented a much firmer tone in January and the composite weekly index for 101 issues moved to higher levels as the month progressed. The January monthly average of 157.4 compared with a December figure of 153.6 and a final January weekly index level of 160.4.

All major groups advanced in January, the index for 80 industrials changing from 152.7 for December to 156.5 for the first month of 1954 while a similar index for 13 utilities moved from 146.4 to 149.1 and that for 8 banks from 180.2 to 185.5. Group changes were upward in most instances led by advances in oils, pulp and paper issues, beverages and transportation stocks. On the other hand, textiles and clothing issues averaged lower in January as also did industrial mines.

In the mining stocks section, firmer prices for golds were sufficient to advance the composite index for 27 representative issues from 79.9 in December to 81.9 in January. The index for 22 golds changed from 57.3 to 60.3 in the same interval while the base metals index reacted slightly from 131.5 to 131.2.

SUMMARY OF CURRENT PRICE MOVEMENTS

TABLE 1. - WHOLESALE PRICE INDEXES (1935-39 = 100)

(h) New Series, based on 1938 = 100.

Explanation of Methods Used and Additional Sources for Price SeriesAppearing in this BulletinWHOLESALE PRICE INDEXESGeneral Wholesale

For an explanation of methods of construction and an historical record please refer to D.B.S. Reference Paper No. 24 - 1951. It is available from the Dominion Bureau of Statistics for the sum of seventy-five cents.

Canadian Farm Products

The wheat prices used in these indexes are prices currently effective for Manitoba 1, 2 and 3 Northern at Fort William. Participation payments are included and the series revised whenever such figures are announced. Between August 1945 and July 1950 the price included in the index for No. 1 Manitoba Northern was \$1.83 per bushel. For the crop year August 1, 1950 - July 31, 1951 the price included was \$1.85 per bushel. For the crop year August 1, 1951 - July 31, 1952 the price was \$1.83 per bushel. The initial payment per bushel of \$1.40 for the crop year beginning August 1, 1952 was increased to \$1.60, as announced in February 1953 and to \$1.72, as announced in September 1953. The initial payment for the current crop year is \$1.40 per bushel.

Commencing August 1, 1949, western oats and barley were brought under control of the Canadian Wheat Board. Prices used for Canadian farm products since that time have been initial payments to farmers with participation payments included whenever they are announced. Final payments for the crop year August 1, 1952 - July 31, 1953 were announced on October 30, 1953 for oats and on November 19, 1953 for barley.

The Residential Building Materials Price Index (1935-39 = 100)

This index, which was first published in 1949, was developed to meet the need for a measurement of the price change of that part of housing costs represented by materials. In addition to the composite index which measures the price change of all materials used in residential construction, price indexes are published for nine component material groups. The weights for individual material items and groups of items within the index were based on the estimated material requirement for a national housing target for the year 1946, and the index was calculated on the base 1935-1939 = 100. However, to facilitate comparisons of its movements with those of the new non-residential series, Table 6 shows it arithmetically converted to the base 1949 = 100. Additional information concerning this index may be found in the special bulletin "Price Index Numbers of Residential Building Materials, 1926 to 1948", obtainable for 10 cents on request to the Dominion Statistician.

The Non-Residential Building Materials Price Index (1949 = 100)

A second special purpose price index related to the construction industry titled "Non-Residential Building Materials Price Index" is shown in Table 7. This index has been constructed specifically to measure the price change of materials used in non-residential building construction. It supplements a price index applicable to materials used in residential construction which has been available for some years. The new index has been constructed on the base 1949 = 100, using weights obtained from data on cost of building materials provided by general and trade contractors for a sample of buildings constructed in Canada during the years 1948-1950.

The methods of constructing the index are explained in some detail in D.B.S. Reference Paper No. 43, entitled "Non-Residential Building Materials Price Index, 1935-1952", which was released on August 21, 1953 and which is available for the sum of 25 cents on request to the Dominion Statistician. This publication also comments on the uses and limitations of the index, and provides the total index by years from 1935 to 1952, and by months for the period January 1949-July 1953. Price indexes for twelve principal component material groups have been calculated by months from January 1949 to July 1953 and these indexes are also contained in the above mentioned publication.

RETAIL PRICE INDEXES

Consumer Price Index

Canada's new Consumer Price Index which has been constructed to replace the Cost-of-Living Index was released Oct. 23, 1952 by the Dominion Bureau of Statistics. The new index marks the fifth in a series of Canadian retail price indexes; it is the most comprehensive retail price index ever constructed for Canada.

While the Consumer Price Index is an entirely new index constructed from post-war expenditure patterns, it serves the same purpose as the Cost-of-Living Index. That is, it measures the average percentage change in retail prices of goods and services bought by a large and representative group of Canadian urban families. The change in title has been made to clarify the fact that the index is a measure of price change and is not affected by changes in standards of living.

In a special report entitled "The Consumer Price Index, January 1949-August 1952",* the Bureau published an explanation of the construction of the new index and a record of its movements from January 1949 to August 1952. This report contains detailed information on such aspects of the new index as purpose, family coverage, base period, and details of items included as well as their relative importance. It also gives the formula used in calculating the index, outlines methods of price collection and explains special features of the new index, such as the methods of incorporating seasonal variations in food consumption, and changes in the price element of home-ownership costs.

Nineteen forty-nine has been selected as a reference level or base period for the Consumer Price Index for a variety of reasons. It is the most satisfactory post-war reference year, not only for price index comparisons, but also for other economic indicators. In addition, prices during 1949 were relatively stable. Dating from the termination of World War II there has been a steady shift of interest from pre-war to post-war comparisons in all fields of economic activity. Conditions have changed greatly since 1935-1939 and concern with things as they existed at that time has steadily declined. These circumstances are similar to those which led to the abandonment of 1900, 1913, and 1926 as base periods.

The new index is based on goods and services reported purchased during the year ending August 31, 1948 by 1,517 families, representing all Canadian families with the following characteristics: (a) living in 27 Canadian cities with over 30,000 population; (b) ranging in size from two adults to two adults with four children; (c) with annual incomes during the survey year ranging from \$1,650 to \$4,050.

To measure the influence of price change on the cost of goods and services purchased by such families, the Consumer Price Index contains 224 items, nearly 40 per cent more than the Cost-of-Living Index. Additional items have been determined by a purely objective approach to the problem of measuring price movements of

goods and services purchased by families of the type described above. Thus, no attempt has been made to differentiate between "luxuries" and "necessities". This has led to the inclusion of additional items such as margarine, cake mix, chicken, lettuce, chocolate bars, fur coats, children's clothing, fuel oil, electric iron, lawnmower, household help, phonograph records, and carbonated and alcoholic drinks. Included in the Cost-of-Living Index but not given specific representation in the Consumer Price Index are such items as rice, dried beans, prunes, rayon hosiery, coke, oilcloth, and cigars. These items have been omitted because, on average, families did not report purchasing them in significant amounts.

Consumer Price Indexes for Regional Cities: Consumer Price Indexes are published monthly in this bulletin for the following cities or city combinations: St. John's, Halifax, Saint John, Montreal, Ottawa, Toronto, Winnipeg, Saskatoon-Regina, Edmonton-Calgary and Vancouver. With the exception of the index for St. John's, Newfoundland, which is constructed on the base June 1, 1951 = 100, all indexes are on the base 1949 = 100.

These indexes fulfil the same purpose as the cost-of-living series which they replace, viz.: each index is designed to measure the influence of changes in retail prices taking place in the localities specified upon the cost of a fixed basket of goods and services representing the level of consumption of a representative group of families in those particular areas. They are not designed to show whether it costs more or less to live in one city than another, and should not be used for that purpose.

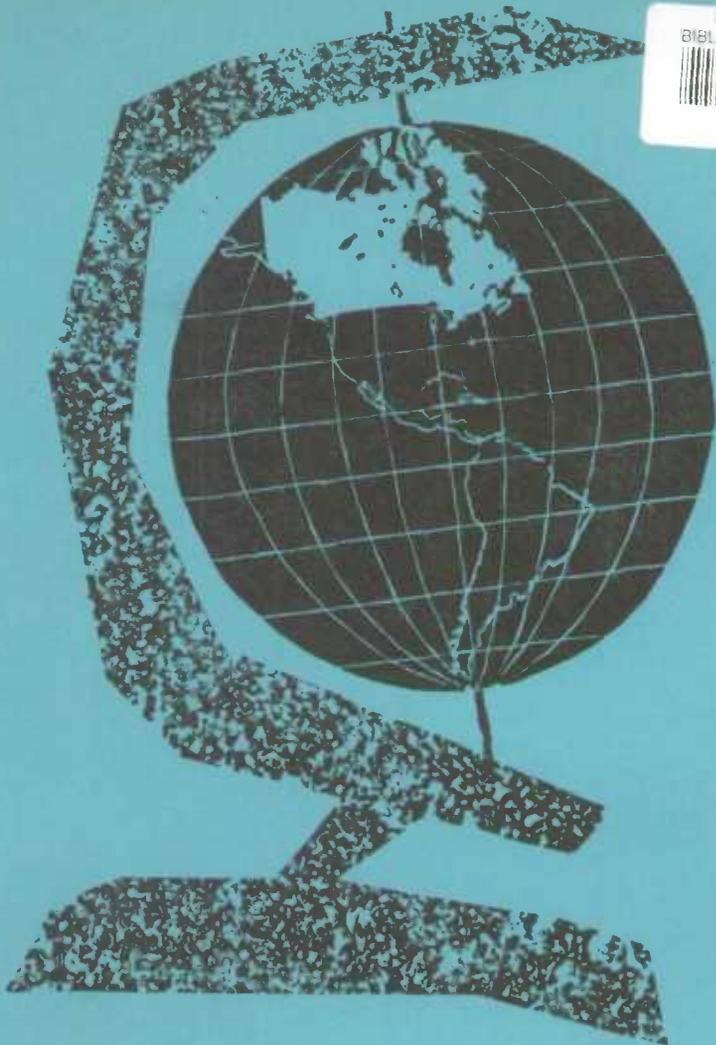

The regional indexes, with the exception of St. John's, are patterned after the Consumer Price Index for Canada. They are similar to this index in terms of family coverage, item content and weighting system. The construction of each index involved three main phases: 1) the conversion of an existing cost-of-living index from the base August 1939 to the base 1949, up to and including September 1, 1953; 2) the calculation of an entirely new index incorporating a revised weighting system and price sample on the base September 1, 1953 = 100; and 3) the linking of the new series to the converted series as at September 1, 1953 to form a continuous index on the base 1949 = 100.

Price Index Numbers of Commodities and Services Used by Farmers: The Index of Commodities and Services used by Farmers is designed to measure the change in retail prices of farm operating costs and farm living costs. It is calculated thrice yearly, viz.: January, April and August, and is on the base 1935-39 = 100. For an explanation of methods of construction and an historical record, please refer to "Price Index Numbers of Commodities and Services Used by Farmers, 1913 to 1948 (Revised 1948)." A special bulletin giving total and group index detail is released subsequent to each pricing date.

SECURITY PRICE INDEXES

Price index numbers of industrial, utility, bank and mining common stocks, and preferred stocks are calculated from Montreal and Toronto exchange quotations. The indexes are designed to reflect weekly and monthly changes of interest to the investor, rather than day-to-day changes of more speculative interest. Individual stock prices are weighted by the number of shares outstanding in January of each year. The list is reviewed completely in January of each year, when new series are introduced and series of declining importance are discontinued. The Investors' Index of 101 Common Stocks and the Mining Stocks Index are based on the average of the Thursday closing prices. The Preferred Stock Index is a monthly average of daily quotations.

* Available in French under the title "L'Indice des Prix à la Consommation Janvier 1949 - Aout 1952". (These reports obtainable for twenty-five cents each)

you know
how your
business
fits
into
the
Canadian
scene . . .

but what about the rest
of
the
world?

what do you know about your
competitors abroad? . . . possible new
sources of supply? . . . the overseas markets where there are chances for you to sell?

you'll find the answers to these and many other questions in *foreign trade*, weekly publication of the Department of Trade and Commerce. Canadian Trade Commissioners in some fifty offices around the world report to you through the pages of *foreign trade*.

in *foreign trade* you will find

- news about export opportunities
- reports on overseas markets
- leads on new sources of supply
- news about your foreign competition
- the latest foreign trade and tariff regulations
- up-to-date reports on business conditions around the world

Supervisor of Government Publications,
The Queen's Printer,
Ottawa, Canada.

Please send me *Foreign Trade* for one year. Enclosed is my cheque/money order for \$2.00* made payable to the Receiver General of Canada.
