WHOLESALE PRICE INDEXES SELECTED COMMODITIES

JANUARY 1949—JUNE 1955

(1935—1939=100)

CONSUMER PRICE INDEXES
PRICE RELATIVES OF SELECTED BEEF AND PORK CUTS

MONTHLY JANUARY 1949 - JUNE 1955

1949=100

NOTES ON PRICE INDEX NUMBERSTHE CONSUMER PRICE INDEX
(1949 = 100)

The Consumer Price Index decreased 0.4 per cent from 116.4 to 115.9 between May 2nd and June 1st. Most of the change was attributable to a decline in the Food Index, although four of the five group indexes were lower. The Food series declined 1.2 per cent from 112.3 to 111.0, as sharply lower prices were registered for potatoes, followed by lesser price decreases for tea, coffee, and butter. Apples, grapefruit, and most cuts of meat were higher. The Clothing Index declined from 107.9 to 107.8 under the influence of small scattered decreases. Declines in coal, fuel oil and furniture were the principal factors accounting for the change in the Household Operation Index from 116.4 to 116.1. Other Commodities and Services receded from 118.3 to 117.8, largely as a result of further declines in automobiles. Shelter, the only group to advance, moved from 128.8 to 129.2, due mainly to higher rents, although home-ownership costs also moved up fractionally.

WHOLESALE PRICE INDEXES
(1935-1939 = 100)

In this group firmer quotations were noted for hogs and lambs which, in turn, were reflected in advances in fresh pork and lamb, and processed pork products. Eggs were substantially higher also while raw furs, dairy products, and lard receded slightly. Wood, Wood Products and Paper changed from 293.6 to 294.5 due to increases in spruce and fir lumber, and paperboard, which outweighed minor decreases in newsprint and wood pulp. An easier tone for the United States dollar in terms of Canadian funds contributed to lower export prices for the latter items. An increase in the index for Fibres, Textiles and Textile Products from 226.6 to 226.9 was due mainly to higher quotations for raw cotton and imported raw wool. Non-ferrous Metals moved from 184.2 to 184.5 when advances for zinc, tin and silver over-balanced a fractional decrease in the price of gold, while slight gains in coal and petroleum products were responsible for a change in the Non-metallic series from 173.3 to 173.4. Of the two groups which declined, Vegetable Products receded from 197.1 to 196.5, when sharp declines in potatoes and lesser decreases in grains, livestock and poultry feeds, and bakery products, outweighed advances in raw rubber, coffee beans, cocoa beans, flour, vegetable oils, and raw leaf tobacco. Iron and Its Products moved from 217.3 to 217.2 when tin plate, galvanized steel sheet, and castings and forgings declined slightly. No change was registered for Chemicals and Allied Products which remained at 176.5.

Canadian Farm Product prices at terminal markets decreased from 213.3 to 212.2 between May and June. Accounting for the relatively small change were diverse movements for Field and Animal Products. The index for the former series dropped from 183.2 to 174.3 when a sharp seasonal decline in potatoes, coupled with lesser changes in Eastern grains and hay, outweighed advances in Western grains and hay. Increases in livestock, notably hogs and lambs, in addition to eggs and fowl over-balanced lower prices for Eastern dairy products to advance the Animal Products series from 243.4 to 250.0.

Residential Building Materials moved from an index level of 123.2 to 124.3 as prices advanced for a number of lumber and millwork descriptions, cedar and asphalt shingles, building paper and some electrical equipment. Hot water heaters were lower.

On the base 1949 = 100 the price index for Non-residential Building Materials changed from 121.8 to 122.1 when increases in lumber, millwork, electrical equipment, and roofing materials outweighed a decline in plumbing and heating equipment.

SECURITY PRICE INDEXES
(1935-1939 = 100)

The Investors' Index for 99 issues advanced strongly again in June to average 237.1 compared to 222.1 in May. The index for 78 Industrials moved to 244.4 from 227.8; that for 14 Utilities to 202.9 from 191.7, and 7 Banks to 243.3 from 234.4. Weekly index changes indicated strength was concentrated mainly in the second week of the month at which point a plateau developed.

Sub-group indexes, without exception, were higher in the month under review, under the leadership of Machinery and Equipment issues, Industrial Mines, Transportation, and Oils.

Mining Stocks also advanced in June as the composite index moved to 121.5 from 114.2 in May. Golds and Base Metals respectively, rose 3.1 and 17.0 points over May to reach June levels of 75.9 and 226.0.

Preferred Stocks recorded a moderate increase as the composite index changed from the May level of 176.1 to 177.9 for June.

SUMMARY OF CURRENT PRICE MOVEMENTS

TABLE 1. - WHOLESALE PRICE INDEXES (1935-39=100)

All indexes are from official sources.

(a) Average from July 1953 to June 1954.

(b) Annual average June 1928 = 100 converted to 1938 base.

(c) Source - United Nations Monthly Bulletin of Statistics.

(d) Revised.

(e) December 1954 figure.

(f) 1953 average.

Appearing in this BulletinPRICES AND PRICE INDEXES, 1949-1952 (VOLUME 23)

This report, which covers in a comprehensive manner prices and price indexes over the four year period 1949-1952, has, in addition, considerable historical data. In this respect more complete records have been shown for the first time for the Consumer Price Index on the base 1949 = 100 and the Wholesale Price Index on the base 1935-1939 = 100.

Interested users may obtain a copy by writing to the Dominion Statistician. There is a charge of \$1.50 per copy.

WHOLESALE PRICE INDEXESCanadian Farm Products

Wheat prices used in this index are buying prices of Canadian Wheat Board, for Nos. 1, 2 and 3, Manitoba Northern at Fort William-Port Arthur. The initial payment price is first used and revised as further payments are announced.

For the crop year 1953-1954, the initial price for No. 1 of \$1.40 was used until November 1954, when the index was revised for the crop year on the basis of a price of \$1.50 as announced November 6, 1954. Final payments were announced May 19, 1955 and the price for No. 1 Manitoba Northern, for example, was adjusted from \$1.50 to \$1.563 per bushel. For the crop year 1954-55, the index is based on an initial payment of \$1.40 for No. 1, and is subject to revision.

Commencing August 1, 1949, western oats and barley were brought under control of the Canadian Wheat Board. Prices used for Canadian farm products since that time have been initial payments to farmers with participation payments included whenever they are announced. Final payments for the 1953-54 crop year were announced October 12, 1954 for barley, and October 29, 1954 for oats. Interim payments for the 1954-55 crop year were announced March 14, 1955 for barley, and March 18, 1955 for oats.

The Residential Building Materials Price Index (1935-1939 = 100)

This index, which was first published in 1949, was developed to meet the need for a measurement of the price change of that part of housing costs represented by materials. In addition to the composite index which measures the price change of all materials used in residential construction, price indexes are published for nine component material groups. The weights for individual material items and groups of items within the index were based on the estimated material requirement for a national housing target for the year 1946, and the index was calculated on the base 1935-1939 = 100. However, to facilitate comparisons of its movements with those of the new non-residential series, Table 6 shows it arithmetically converted to the base 1949 = 100. Additional information concerning this index may be found in the special bulletin "Price Index Numbers of Residential Building Materials, 1926 to 1948", obtainable for 10 cents on request to the Dominion Statistician.

The Non-Residential Building Materials Price Index (1949 = 100)

A second special purpose price index related to the construction industry titled "Non-Residential Building Materials Price Index" is shown in Table 7. This index has been constructed specifically to measure the price change of materials used in non-residential building construction. It supplements a price index applicable to materials used in residential construction which has been available for some years. The new index has been constructed on the base 1949=100, using weights obtained from data on cost of building materials provided by general and trade contractors for a sample of buildings constructed in Canada during the years 1948-1950.

The methods of constructing the index are explained in some detail in D.B.S. Reference Paper No. 43, entitled "Non-Residential Building Materials Price Index, 1935-1952", which was released on August 21, 1953 and which is available for the sum of 25 cents on request to the Dominion Statistician. This publication also comments on the uses and limitations of the index, and provides the total index by years from 1935 to 1952, and by months for the period January 1949-July 1953. Price indexes for twelve principal component material groups have been calculated by months from January 1949 to July 1953 and these indexes are also contained in the above mentioned publication.

RETAIL PRICE INDEXES

Consumer Price Index

The Consumer Price Index was constructed to replace the Cost-of-Living Index and was first published October 23, 1952.

While the Consumer Price Index is an entirely new index constructed from post-war expenditure patterns, it serves the same purpose as the Cost-of-Living Index. That is, it measures the average percentage change in retail prices of goods and services bought by a large and representative group of Canadian urban families. The change in title was made to clarify the fact that the index is a measure of price change and is not affected by changes in standards of living.

In a special report entitled "The Consumer Price Index, January 1949-August 1952",* the Bureau published an explanation of the construction of the new index and a record of its movements from January 1949 to August 1952. This report contains detailed information on such aspects of the new index as purpose, family coverage, base period, and details of items included as well as their relative importance. It also gives the formula used in calculating the index, outlines methods of price collection and explains special features of the index, such as the methods of incorporating seasonal variations in food consumption, and changes in the price element of home-ownership costs.

Nineteen forty-nine was selected as a reference level or base period for the Consumer Price Index for a variety of reasons. It is the most satisfactory post-war reference year, not only for price index comparisons, but also for other economic indicators. In addition, prices during 1949 were relatively stable. Dating from the termination of World War II there has been a steady shift of interest from pre-war to post-war comparisons in all fields of economic activity. Conditions have changed greatly since 1935-1939 and concern with things as they existed at that time has steadily declined. These circumstances are similar to those which led to the abandonment of 1900, 1913, and 1926 as base periods.

The index is based on goods and services reported purchased during the year ending August 31, 1948 by 1,517 families, representing all Canadian families with the following characteristics: (a) living in 27 Canadian cities with over 30,000 population; (b) ranging in size from two adults to two adults with four children; (c) with annual incomes during the survey year ranging from \$1,650 to \$4,050.

To measure the influence of price change on the cost of goods and services purchased by such families, the Consumer Price Index contains 224 items.

Consumer Price Indexes for Regional Cities: Consumer Price Indexes are published monthly in this bulletin for the following cities or city combinations: St. John's, Halifax, Saint John, Montreal, Ottawa, Toronto, Winnipeg, Saskatoon-Regina, Edmonton-Calgary and Vancouver. With the exception of the index for St. John's, Newfoundland, which is constructed on the base June 1, 1951 = 100, all indexes are on the base 1949 = 100. The regional indexes with the exception of the one for

* Available in French under the title "L'Indice des Prix à la Consommation Janvier 1949-Août 1952". (These reports obtainable for twenty-five cents each).
