## SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

## SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

## NOTES ON PRICES AND PRICE INDEX NUMBERS

### Industry Selling Price Index: Manufacturing (1961 = 100)

The industry selling price index (Total Manufacturing) in March was 187.0, the same as the revised February figure. It was 14.9% higher than March 1974 index of 162.7.

In terms of the relative contribution to the overall change in the total manufacturing index, the most significant increases were in the petroleum and coal products group (5.0%) with petroleum refining up (5.1%). Advances also occurred in the wood products group due mainly to higher levels in sawmills and planing mills industry (1.8%). In the chemicals group higher prices were registered for the mixed fertilizers products.

Decreases were evident in the foods and beverages group (1.7%) with the sugar refineries down (19.9%) and the slaughtering and meat packing (2.1%). Prices from feed manufacturers (2.9%) continued a decline, begun in November 1974. Slight decreases also occurred in the paper and allied products and the textile industries group.

## NOTES SUR LES PRIX ET LES INDICES DE PRIX

### Indice des prix de vente dans l'industrie: industries manufacturières (1961 = 100)

L'indice des prix de vente dans l'industrie (ensemble des industries manufacturières) s'est établi en mars à 187.0, soit au même niveau que le chiffre rectifié de février. Il était de 14.9% supérieur à l'indice de mars 1974 (162.7).

En ce qui concerne l'apport relatif des groupes à la variation globale de l'indice des industries manufacturières, les hausses les plus sensibles se sont produites dans le groupe des produits du pétrole et du charbon (5.0%), avec une augmentation de 5.1% dans l'industrie de raffinage du pétrole. Des hausses se sont aussi produites dans le groupe des produits du bois, à la suite surtout des augmentations enregistrées dans les scieries (1.8%). Dans le groupe des industries chimiques, on a enregistré des hausses des prix des produits d'engrais mélangés.

On a observé des baisses dans le groupe des aliments et des boissons (1.7%), les raffineries de sucre ayant enregistré une diminution (19.9%) ainsi que l'abattage et le conditionnement de la viande (2.1%). La baisse des prix des aliments pour animaux amorcée en novembre 1974 s'est poursuivie (2.9%). De légères diminutions ont aussi été enregistrées dans les groupes de l'industrie du papier et produits connexes et des textiles.

\* These indexes are preliminary. — Ces indices sont provisoires.

## General Wholesale Price Index (135-39 = 100)

The general wholesale price index declined 1.2% in March to 477.6 from the revised February index of 483.3. It was 7.2% higher than a year earlier. Four of the eight major groups decreased while four increased.

The vegetable products group index declined 4.2% to 480.1 from the revised February index of 501.2 due to lower prices recorded for sugar and its products 21.6%, livestock and poultry feeds 3.5%, vegetable oil products 3.5%, tea, coffee and cocoa 3.0%, and potatoes 2.5%. The animal products group index declined 1.4% to 486.6 from the revised February index of 493.5 resulting from decreases in furs 9.7%, livestock 5.6%, lard and tallow 4.9%, fresh meats 2.9% and cured meats 2.0%. The textile products group index declined 1.0% to 397.8 from the February index of 401.8 due to decreases in miscellaneous fibre products 4.7%, cotton fabrics 1.7% and raw cotton 1.5%. The iron and steel products group declined 0.3% due mainly to a decrease in scrap iron and steel. The non-metallic minerals group index rose 0.6% to 382.9 from the revised February index of 380.5 due to an increase of 5.8% in asphalt and a 1.6% increase in petroleum and its products. The wood products group index rose 0.5% with increases in matches 7.3%, spruce 3.5%, hemlock 2.5%, fir 2.0% and cedar 1.6%. The non-ferrous metals group index rose 0.4% to 413.5 from the revised February index of 411.8. The chemical products group index also rose 0.4% to 384.3 from the revised February index of 382.8.

## Indice général des prix de gros (1935-39 = 100)

L'indice général des prix de gros a baissé de 1.2% en mars, passant de 483.3 (chiffre rectifié) en février à 477.6 en mars. Il était supérieur de 7.2% à celui de mars 1974. Parmi les huit groupes principaux, quatre ont diminué et quatre ont augmenté.

L'indice du groupe des produits d'origine végétale a diminué de 4.2%, passant de 501.2 en février (chiffre rectifié) à 480.1 en mars, en raison d'une diminution des prix du sucre et de ses produits (21.6%), des aliments pour le bétail et la volaille (3.5%), des produits de l'huile végétale (3.5%), du thé, du café et du cacao (3.0%), et des pommes de terre (2.5%). L'indice du groupe des produits animaux a enregistré une baisse de 1.4%, passant de 493.5 en février (chiffre rectifié) à 486.6 en mars; cette baisse est attribuable aux diminutions enregistrées par les fourrures (9.7%), le bétail (5.6%), le saindoux et le suif (4.9%), les viandes fraîches (2.9%) et les viandes salées (2.0%). L'indice du groupe des produits textiles a diminué de 1.0%, passant de 401.8 en février à 397.8 en mars, par suite de baisses dans les fibres textiles diverses (4.7%), les tissus de coton (1.7%) et le coton brut (1.5%). Le groupe des produits du fer et de l'acier a enregistré une baisse de 0.3%, surtout à cause d'une diminution des prix des déchets de fer et d'acier. Le groupe des minéraux non métalliques a connu une hausse de 0.6%, l'indice passant de 380.5 en février (chiffre rectifié) à 382.9 en mars; cette hausse est le résultat d'une augmentation de 5.8% des prix de l'asphalte et d'une augmentation de 1.6% des prix du pétrole et de ses produits. L'indice du groupe des produits du bois a augmenté de 0.5% avec des hausses pour les allumettes (7.3%), les épinettes (2.5%), les pruches (3.5%), les sapins (2.0%) et les cèdres (1.6%). Le groupe des métaux non ferreux a aussi connu une augmentation de 0.4%, l'indice passant de 411.8 en février (chiffre rectifié) à 413.5 en mars, ainsi que le groupe des produits chimiques, dont l'indice est passé de 382.8 en février (chiffre rectifié) à 384.3 en mars, soit une augmentation de 0.4%.

### Security Price Indexes (1961=100)

During March the investors' index of common stocks fell 1.9% to 150.4. Decreases were reported for the three major groups, industrials dropped 2.3% to 152.9, utilities 1.1% to 130.9 and finance 1.2% to 166.9. The thirteen industrial sub-groups registered seven decreases and six increases. Among these, beverages suffered the greatest loss (7.1%) to 194.6 followed by petroleum (4.2%) to 217.1. Textiles and clothing reported the greatest increase (4.3%) to 120.1. For the utilities index, there were three losses and two gains, ranging from an increase of 3.1% to 88.5 for electric power to a decrease of 5.1% to 144.6 for gas distribution. In the finance group, banks slid back 1.7% to 196.7, while investment and loans rose 0.6% to 120.5.

The index of mining stock prices also reported a slight decrease (0.7%) to 123.6 this month, reflecting a 2.1% loss for golds (208.9).

Of the two supplementary indexes, uranums fell 6.0% to 225.2, while primary oil and gas dropped 1.5% to 295.8.

The preferred stock index for March registered a loss of 2.2% to 61.2.

### Canadian Farm Products Price Index (1935-39=100)

The price index of Canadian farm products at terminal markets declined 1.0% to 453.5 in March from 458.1 in February. The animal products index declined 1.8% to 517.3 from 527.0 due to lower prices on both markets for calves and hogs, and for lambs, steers and cheesemilk in the East. Price increases were shown for raw wool, fluid milk and eggs on both Eastern and Western markets, for poultry and butterfat in the East and for lambs and steers in the West.

The field products index rose 0.1% to 389.7 from 389.2. Higher prices were shown for corn, wheat and tobacco in the East, for flax in the West, and for hay on both markets. Price decreases were shown for barley in the East, and for rye and potatoes on both markets.

### Thirty Industrial Materials Price Index (1935-39=100)

The price index of thirty industrial materials, calculated as an unweighted geometric average, declined 1.6% to 483.7 in March from the revised February index of 491.6. Prices were lower for thirteen commodities, higher for three and unchanged for fourteen. Principal changes included decreases for raw sugar, linseed oil, hogs, raw rubber, raw cotton, oats, steers, cottonseed oil, crude oil, iron ore, bleached sulphite pulp, tin and domestic wheat while increases were recorded for beef hides, spruce lumber and raw

### Indices des cours des valeurs mobilières (1961=100)

Au cours du mois de mars, l'indice des cours des actions ordinaires a baissé de 1.9%, pour se fixer à 150.4. Les trois grands groupes ont enregistré une baisse; les valeurs industrielles de 2.3%, l'indice étant passé à 152.9, les services publics de 1.1%, l'indice passant à 130.9, et les finances de 1.2%, l'indice se fixant à 166.9. Parmi les treize sous-groupes industriels, sept ont enregistré des diminutions et six des augmentations; la plus forte diminution (7.1%) s'est produite dans le sous-groupe des boissons, dont l'indice est tombé à 194.6, suivie de celui du pétrole (4.2%), dont l'indice s'est fixé à 217.1. En ce qui concerne les services publics, on signale trois baisses et deux augmentations, qui vont d'une hausse de 3.1% de l'indice de l'énergie électrique, qui est passé à 88.5, à une baisse de 5.1% de l'indice de la distribution du gaz, qui est tombé à 144.6. Dans le groupe des finances, les banques ont regressé de 1.7%, pour se fixer à 196.7, tandis que les placements et prêts ont connu une augmentation de 0.6%, pour atteindre 120.5.

L'indice des prix des titres miniers a aussi accusé une légère baisse (0.7%) et s'est fixé à 123.6 en mars, traduisant une baisse de 2.1% des aurifères dont l'indice s'est fixé à 208.9.

Pour ce qui est des deux indices de prix supplémentaires, on a observé une baisse de 6.0% dans le cas de l'uranium, qui s'est fixé à 225.2, tandis que le pétrole et le gaz ont baissé de 1.5% pour s'établir à 295.8.

L'indice des actions privilégiées a enregistré une perte de 2.2% en mars, pour passer à 61.2.

### Indice des prix des produits agricoles canadiens (1935-39=100)

L'indice des prix des produits agricoles canadiens sur les marchés terminaux a baissé de 1.0%, pour passer de 458.1 en février à 453.5 en mars. L'indice des produits animaux a connu une baisse de 1.8%, passant de 527.0 en février à 517.3, à la suite de diminutions des prix des veaux et des porcs, sur le marché de l'Est et de l'Ouest, ainsi que des prix des agneaux, des bouvillons et du lait de fromagerie, sur le marché de l'Est. Par contre, on a enregistré des hausses de prix pour la laine brute, le lait de consommation et les œufs, sur les deux marchés, pour la volaille, et les matières grasses dérivées du lait sur le marché de l'Est, et pour les agneaux et les bouvillons sur le marché de l'Ouest.

L'indice des produits de grande culture a augmenté de 0.1% pour passer de 389.2 à 389.7. On a enregistré une augmentation des prix du maïs, du blé et du tabac dans l'Est, du lin dans l'Ouest, et du foin sur les deux marchés. Par contre, on a enregistré des baisses des prix de l'orge dans l'Est et du seigle et des pommes de terre sur les deux marchés.

### Indice des prix de trente matières industrielles (1935-39=100)

L'indice des prix de trente matières industrielles, calculé comme moyenne géométrique non pondérée, a baissé de 1.6%, pour passer de 491.6 en février (chiffre rectifié) à 483.7 en mars. Les prix de treize de ces matières ou marchandises ont connu une baisse, ceux de trois ont augmenté et quatorze n'ont pas varié. Les principales variations comprennent des baisses de prix pour le sucre brut, l'huile de lin, les porcs, le caoutchouc brut, le coton brut, l'avoine, les bouvillons, l'huile de coton, le pétrole brut, le minerai de fer, la pâte blanchie au sulphite, l'étain et le blé

wool. This is the fifth consecutive decline in the index since October 1974, that is from 513.8 to 483.7.

### The Consumer Price Index

The Consumer Price Index for Canada (1961 = 100) rose 0.5% to 178.9 in March from 178.0 in February. Except for a similar rise two months earlier, this was the smallest month-to-month advance since the autumn of 1973. The latest increase was mainly due to higher retail prices for petroleum products, clothing, automobiles and tobacco items as well as to a rise in home ownership costs, all of which contributed to a 0.9% advance between February and March in the index for All-Items excluding Food. The Food index, in contrast, declined by 0.3% in the latest month. Between March 1974 and March 1975, the total CPI registered an advance of 11.3% with only about one-sixth of this rise occurring in the last three months.

For the first time since October 1973, the Food index moved downwards, declining 0.3% mainly as a result of a further drop of 8.6% in retail beef prices. Sugar prices also continued to decline, moving down by 12% in the latest month to a level about one-third below their peak late in 1974. Eggs and fresh vegetables also dipped in price between February and March, but fresh fruits advanced as is usual between these two months, moving up by nearly 4%. Soft drinks for home consumption climbed in price over 7% in the latest month.

Fuel oil prices, moving up for the first time since last June, as well as increased gasoline prices in most parts of the country, accounted for about one-fifth of the 0.9% rise in the index for All-Items other than Food. Higher clothing prices, some rebounding from sales in the preceding month, contributed to a similar extent. New car prices also rose between February and March with the termination of manufacturers' rebates on selected models, and higher quotations were recorded for all major and small appliances surveyed.

The Consumer Price Index reclassified by goods and services offers another view of the incidence of price change. Between February and March, both the goods and the services indexes advanced by 0.5%.

*On a seasonally adjusted basis,* the February to March rise in the All-Items Consumer Price Index was 0.5%, continuing to reflect the slowing down in recent months in the CPI rate of increase. In March, the *current* annual rate of CPI change, based on the seasonally adjusted movement since three months earlier, was 7.0%, having declined progressively in each successive month from a December 1974 rate of 14.6%, largely though not entirely because of sharply decelerating food prices.

canadien ainsi que des hausses de prix pour les peaux de bœuf, le bois (de sciage) d'épinette et la laine brute. Cette baisse constitue la cinquième chute consécutive de cet indice des prix depuis octobre 1974; au cours de cette période, l'indice est tombé de 513.8 à 483.7.

### L'indice des prix à la consommation

L'indice des prix à la consommation pour le Canada (1961 = 100) a augmenté de 0.5%, passant de 178.0 en février à 178.9 en mars. Si l'on exclut une augmentation semblable enregistrée il y a deux mois, il s'agit là de la plus faible hausse d'un mois sur l'autre depuis l'automne 1973. Cette augmentation est attribuable en majeure partie à la hausse des prix de détail des produits du pétrole, des vêtements, des automobiles et des produits du tabac ainsi qu'à la hausse des frais de propriété; toutes ces hausses ont entraîné un accroissement de 0.9% de l'indice d'ensemble (à l'exception de l'alimentation) entre février et mars. Par contre, l'indice de l'alimentation a enregistré une diminution de 0.3% au cours du mois dernier. Entre mars 1974 et mars 1975, l'indice d'ensemble des prix à la consommation a connu une augmentation de 11.3%; seulement, environ le sixième de cette hausse a été enregistré au cours des trois derniers mois.

Pour la première fois depuis octobre 1973 l'indice de l'alimentation a diminué; cette diminution de 0.3% provient surtout d'une nouvelle baisse (8.6%) du prix de détail du bœuf. Le prix du sucre a également continué à baisser, soit de 12% au cours du mois dernier, ce qui représente une baisse de près d'un tiers par rapport au niveau record atteint vers la fin de 1974. Les prix des œufs et des légumes frais ont aussi diminué entre février et mars mais, ceux des fruits frais ont monté de presque 4%, chose courante à cette période de l'année. Le prix de boissons gazeuses consommées à la maison a grimpé de plus de 7% au cours du mois observé.

La hausse du prix du mazout, la première depuis juin dernier, et celle du prix de l'essence un peu partout au pays représentent un cinquième environ de l'augmentation de 0.9% de l'indice d'ensemble (à l'exception de l'alimentation). La hausse du prix des vêtements, qui dans certains cas faisait suite aux soldes du mois précédent, a contribué dans la même proportion à cette augmentation. Le prix des automobiles neuves a aussi monté entre février et mars lorsque les fabricants ont mis fin aux rabais accordés pour certains modèles; enfin, on a aussi enregistré une hausse des prix de tous les gros et petits appareils ménagers.

L'indice des prix à la consommation reclassé par biens et services présente un autre aspect de la variation des prix. Entre février et mars, l'indice des biens et celui des services ont tous deux augmenté de 0.5%.

*Après désaisonnalisation* la hausse de l'indice d'ensemble des prix à la consommation s'est établie à 0.5% entre février et mars ce qui marque une poursuite du ralentissement du taux d'augmentation de l'I.P.C. depuis quelque mois. En mars, le taux annuel *courant* de la variation de l'I.P.C. basé sur le mouvement désaisonné des trois derniers mois, était de 7.0%; il a diminué progressivement chaque mois depuis décembre 1974 (14.6%), et ce, en raison surtout de la chute du prix des aliments.

| Primary oils and gas - Pétrole et gaz primaires . . . . .  | 295.8        | 300.4        | 487.4        | 488.6        | - 1.5                     | - 0.3        | - 39.3       |

(1) Gross weighted, including inter-industry shipments. For explanation see page 91. - Indice pondéré brut comprenant les livraisons inter-industrielles. Pour toute explication, voir page 91.

(2) Indexes for 1974 and 1975 are subject to revision. - Les indices pour 1974 et 1975 sont sujets à révision.

(3) Year to year percentage change not shown since these indexes are not comparable. Indexes subsequent to July 1974 are subject to revision. See notes page 92 for details of Western grain prices. - La variation proportionnelle d'une année à l'autre n'est pas indiquée étant donné que ces indices ne sont pas comparables. Les indices postérieurs à juillet 1974 sont sujets à révision. Voir les renvois de la page 92 pour les prix détaillés des grains de l'Ouest.

TABLE 2. Industry Selling Price Indexes by Industry and Selected Commodities

TABLEAU 2. Indice des prix de vente dans l'industrie par industrie et par certains produits

1961 = 100

| Industries and selected commodities[1]   | Month - Mois |       |       |       |       |       |       |       |       |       |       |       | Annual |       |
|--|--------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|--------|-------|
|  | J            | F     | M     | A     | M     | J     | J     | A     | S     | O     | N     | D     | Annuel |       |
| FOODS AND BEVERAGES INDUSTRIES - INDUSTRIES DES ALIMENTS ET BOISSONS                             | 1971         | 124.2 | 125.6 | 125.9 | 125.8 | 125.6 | 126.5 | 127.0 | 127.6 | 128.3 | 129.0 | 129.3 | 130.3  | 127.1 |

TABLE 2. Industry Selling Price Indexes by Industry and Selected Commodities

TABLEAU 2. Indice des prix de vente dans l'industrie par industrie et par certains produits

| 1961 = 100   |              |       |       |       |       |       |       |       |       |       |       |       |                  |       |
|--|--------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|------------------|-------|
| Industries and selected commodities(1)   | Month - Mois |       |       |       |       |       |       |       |       |       |       |       | Annual<br>Annuel |       |
|  | J            | F     | M     | A     | M     | J     | J     | A     | S     | O     | N     | D     |                  |       |
| Alloys, non-ferrous, all forms, solders - Alliages non ferreux, toutes formes, pour soudure.   | 1971         | 149.2 | 146.4 | 146.4 | 145.5 | 144.5 | 144.4 | 144.4 | 143.6 | 143.4 | 143.4 | 143.7 | 143.8            | 144.9 |
|  | 1972         | 143.8 | 147.6 | 152.2 | 152.6 | 158.4 | 155.4 | 153.8 | 153.3 | 152.6 | 152.6 | 152.4 | 151.5            | 152.2 |
|  | 1973         | 151.5 | 156.7 | 171.2 | 171.9 | 171.9 | 173.5 | 182.1 | 198.1 | 198.2 | 196.4 | 204.6 | 222.1            | 183.2 |
|  | 1974         | 222.3 | 247.8 | 289.0 | 303.9 | 317.5 | 318.9 | 317.0 | 314.6 | 314.3 | 306.8 | 284.8 | 284.8            |       |
| 12 2980 011  | 1975         | 282.7 | 283.4 | 283.0 |       |       |       |       |       |       |       |       |                  |       |
| Alloys, non-ferrous, all forms, type and type metals - Alliages non ferreux, toutes formes, pour caractères d'imprimerie et composition.                               | 1971         | 134.0 | 134.0 | 134.0 | 134.0 | 134.0 | 128.2 | 128.2 | 128.2 | 128.2 | 128.2 | 128.2 | 128.2            | 131.1 |
|  | 1972         | 128.3 | 128.3 | 128.3 | 128.3 | 128.3 | 128.3 | 128.3 | 128.3 | 128.3 | 128.3 | 128.3 | 128.3            | 128.3 |
|  | 1973         | 128.3 | 128.3 | 128.3 | 125.5 | 125.5 | 125.5 | 125.5 | 125.5 | 125.5 | 125.5 | 136.6 | 136.6            |       |
|  | 1974         | 145.1 | 148.0 | 148.0 | 149.4 | 154.5 | 154.5 | 154.5 | 154.5 | 154.5 | 154.5 | 154.5 | 154.5            | 154.5 |
| 12 2980 012  | 1975         | 154.5 | 154.5 | 154.5 |       |       |       |       |       |       |       |       |                  |       |
| Die castings zinc base alloy - Moulages mécaniques, alliage à base de zinc.  | 1971         | 147.2 | 147.3 | 147.3 | 147.3 | 147.3 | 148.2 | 149.2 | 149.3 | 150.7 | 152.5 | 152.5 | 152.5            | 149.3 |
|  | 1972         | 152.5 | 152.5 | 161.4 | 167.7 | 168.8 | 170.0 | 170.0 | 171.7 | 170.6 | 170.6 | 170.6 | 171.4            | 166.5 |
|  | 1973         | 172.3 | 183.9 | 187.3 | 188.7 | 191.1 | 196.0 | 200.7 | 207.5 | 215.6 | 229.9 | 230.4 | 235.2            | 201.0 |
|  | 1974         | 243.6 | 247.0 | 258.5 | 267.0 | 275.0 | 275.9 | 280.6 | 290.6 | 290.8 | 294.7 | 296.1 | 296.1            |       |
| 12 2980 015  | 1975         | 294.7 | 294.7 | 296.7 |       |       |       |       |       |       |       |       |                  |       |
| Lead, plate, sheet, and strip - Plomb, tôle forte, tôle mince et feuillard.  | 1971         | 133.3 | 133.3 | 133.3 | 133.3 | 133.3 | 133.3 | 133.3 | 133.3 | 133.3 | 133.3 | 133.3 | 133.3            | 133.3 |
|  | 1972         | 133.3 | 133.3 | 142.5 | 142.5 | 142.5 | 142.5 | 142.5 | 142.5 | 142.5 | 142.5 | 142.5 | 142.5            | 141.0 |
|  | 1973         | 142.5 | 142.5 | 142.5 | 149.8 | 149.8 | 159.8 | 163.4 | 163.4 | 163.4 | 166.8 | 166.8 | 166.8            | 156.2 |
|  | 1974         | 177.3 | 187.0 | 187.0 | 198.9 | 217.0 | 217.0 | 217.0 | 217.0 | 217.0 | 217.0 | 217.0 | 217.0            |       |
| 12 2980 023  | 1975         | 217.0 | 214.3 | 214.3 |       |       |       |       |       |       |       |       |                  |       |
| METAL FABRICATING INDUSTRIES (EXCL MACHINERY AND TRANSPORTATION EQUIP.) - INDUSTRIE DES PRODUITS METALLIQUES (A L'EXCLUSION DES MACHINES ET DU MATERIEL DE TRANSPORT). | 1971         |       |       |       |       |       |       |       |       |       |       |       |                  |       |
|  | 1972         |       |       |       |       |       |       |       |       |       |       |       |                  |       |
|  | 1973         |       |       |       |       |       |       |       |       |       |       |       |                  |       |
|  | 1974         |       |       |       |       |       |       |       |       |       |       |       |                  |       |
| Metal stamping, pressing and coating industry - Industrie de l'emboutissage, du matricage, et enduisage des métaux   | 1971         | 119.4 | 119.7 | 119.9 | 123.7 | 123.9 | 124.2 | 124.2 | 124.1 | 124.2 | 124.5 | 124.5 | 124.6            | 123.1 |
|  | 1972         | 125.4 | 125.8 | 126.1 | 128.8 | 128.8 | 128.9 | 129.0 | 129.0 | 129.0 | 129.1 | 129.5 | 129.6            | 128.2 |
|  | 1973         | 131.4 | 131.6 | 132.1 | 135.2 | 135.3 | 135.6 | 136.5 | 137.0 | 138.0 | 138.6 | 140.4 | 141.1            | 136.0 |
|  | 1974         | 144.6 | 145.9 | 147.0 | 152.1 | 152.5 | 154.9 | 156.0 | 157.2 | 158.5 | 166.0 | 168.2 | 172.1            |       |
| 13 3040  | 1975         | 174.6 | 177.1 | 176.6 |       |       |       |       |       |       |       |       |                  |       |
| Wire and wire products manufacturers - Industrie du fil métallique et ses produits.  | 1971         | 121.8 | 122.7 | 124.9 | 123.6 | 123.7 | 124.3 | 124.7 | 125.4 | 125.5 | 125.5 | 125.8 | 126.1            | 124.5 |
|  | 1972         | 127.1 | 128.2 | 128.5 | 128.5 | 128.6 | 129.0 | 129.0 | 129.0 | 129.0 | 130.3 | 132.9 | 135.1            | 129.6 |
|  | 1973         | 135.4 | 135.6 | 136.0 | 136.6 | 139.5 | 141.9 | 142.2 | 143.4 | 145.1 | 148.7 | 149.5 | 152.3            |       |
|  | 1974         | 154.4 | 158.6 | 164.0 | 165.5 | 170.2 | 175.9 | 180.0 | 181.1 | 181.5 | 181.9 | 181.8 | 182.2            |       |
| 13 3050  | 1975         | 182.2 | 189.3 | 194.2 |       |       |       |       |       |       |       |       |                  |       |
| Wire nails, iron and steel - Clous, fer et acier.  | 1971         | 124.2 | 124.2 | 124.2 | 124.2 | 125.0 | 128.1 | 128.1 | 128.1 | 128.1 | 128.1 | 128.1 | 128.1            | 126.5 |
|  | 1972         | 132.0 | 133.6 | 133.6 | 133.6 | 133.6 | 133.6 | 133.6 | 133.6 | 133.6 | 133.6 | 139.1 | 141.4            | 134.6 |
|  | 1973         | 141.4 | 141.4 | 141.4 | 141.4 | 153.4 | 153.4 | 153.4 | 153.4 | 153.4 | 164.1 | 164.1 | 166.9            | 152.3 |
|  | 1974         | 175.7 | 180.1 | 209.0 | 209.0 | 209.0 | 207.6 | 213.7 | 213.7 | 213.7 | 213.7 | 213.7 | 212.2            |       |
| 13 3050 006  | 1975         | 207.2 | 207.2 | 207.2 |       |       |       |       |       |       |       |       |                  |       |
| Wire, plain - Fil métallique, ordinaire  | 1971         | 133.1 | 133.1 | 133.1 | 133.1 | 133.1 | 133.1 | 134.1 | 135.9 | 135.9 | 135.9 | 135.9 | 135.9            | 134.4 |
|  | 1972         | 135.9 | 138.1 | 138.1 | 138.1 | 138.1 | 138.1 | 138.1 | 138.1 | 138.1 | 141.9 | 143.8 | 143.8            | 139.2 |
|  | 1973         | 143.8 | 144.5 | 144.5 | 144.5 | 144.5 | 149.3 | 151.1 | 151.1 | 151.1 | 153.9 | 153.9 | 153.9            | 148.8 |
|  | 1974         | 153.9 | 163.2 | 165.1 | 165.1 | 165.1 | 176.3 | 183.5 | 183.5 | 183.5 | 183.5 | 183.5 | 183.5            |       |
| 13 3050 012  | 1975         | 183.5 | 196.4 | 196.4 |       |       |       |       |       |       |       |       |                  |       |
| Welded or woven farm fencing - Grillages en fils soudés ou tressés   | 1971         | 123.9 | 123.9 | 123.9 | 123.9 | 123.9 | 123.9 | 123.9 | 123.9 | 123.9 | 123.9 | 123.9 | 125.2            | 124.0 |
|  | 1972         | 127.5 | 127.5 | 127.5 | 127.5 | 127.5 | 127.5 | 127.5 | 127.5 | 127.5 | 127.5 | 127.5 | 132.0            | 127.9 |
|  | 1973         | 134.2 | 134.2 | 134.2 | 134.2 | 134.2 | 136.2 | 136.2 | 136.2 | 136.2 | 145.8 | 145.8 | 152.7            | 138.3 |

| Industry selling price index manufacturing(2) - Indice de<br>prix de vente dans l'industrie industries manufac-<br>trières(3) | 1971         | 119.4 | 119.8 | 120.3 | 121.2 | 121.2 | 121.7 | 122.3 | 122.4 | 122.5 | 122.6 | 122.7 | 123.2            | 121.6 |
|   | 1972         | 124.5 | 125.3 | 125.9 | 126.5 | 126.7 | 126.9 | 127.4 | 127.8 | 128.5 | 129.0 | 129.7 | 130.9            | 127.4 |
|   | 1973         | 133.1 | 134.6 | 136.6 | 138.2 | 139.5 | 141.0 | 143.0 | 147.9 | 147.7 | 149.0 | 150.4 | 152.9            | 142.7 |
|   | 1974         | 157.4 | 160.1 | 162.7 | 165.5 | 167.9 | 169.9 | 173.1 | 175.9 | 178.0 | 179.7 | 182.6 | 182.7            |       |
|   | 1975         | 185.6 | 187.0 |       |       |       |       |       |       |       |       |       |                  |       |

(1) Indexes for 1974 and 1975 are subject to revision. - Les indices pour 1974 et 1975 sont sujets à révision.

(2) This industry was changed in commodity content, price sample and weights in accordance with significant changes within the industry. Figures are revised from January 1971 to date. - La composition en marchandises, les échantillons de prix et les mesures de poids ont changé dans cette industrie conformément à des changements importants survenus dans l'industrie même. Les chiffres sont révisés de janvier 1971 à aujourd'hui.

(3) Effective January 1973 changes have been made in the calculation of this index. For details see page 91. - A compter de janvier 1973, on a modifié le calcul de cet indice. Pour plus de détails, voir la page 91.

(4) An extensive revision of the weight and price sample (including the incorporation of goods purchased and resold in same condition as purchased) necessitated by developments in the industry's production pattern since 1961 have resulted in the introduction of new price indexes and a discontinuity in the industry price index. - Une révision approfondie de l'échantillon des pondérations et des prix (y compris l'intégration des biens achetés et revendus sans aucune modification), nécessitée par l'évolution du régime de production de l'industrie depuis 1961, a amené l'adoption de nouveaux indices des prix ainsi qu'une solution de continuité dans l'indice des prix industriels.

|                            | Old series     | New series     |
|----------------------------|----------------|----------------|
|                            | -              | -              |
|                            | Ancienne série | Nouvelle série |
| December - 1970 - Décembre | 95.1           | 92.3           |
| January - 1971 - Janvier   | 95.1           | 92.6           |
| Average - 1971 - Moyenne   | 95.2           | 91.8           |

(5) This series has been revised from January 1969 forward. An expanded list of establishments and commodities has been selected and prices for these have been aggregated to a total industry index using 1971 shipments data. The price quotations are, in general, of an improved quality. Selected commodity data on a 1971 time and weight base, are available on request. - Les chiffres de cette série ont été révisés à partir de janvier 1969. Une liste augmentée des établissements et des produits a été établie, et les prix de ces produits ont été agrégés pour former un indice total de l'activité économique à partir des données sur les livraisons de 1971. De manière générale, le calcul des prix est plus fiable. Les utilisateurs peuvent obtenir sur demande des données sur certains produits utilisant les facteurs de pondération de 1971 et dont la période de référence est 1971.

(6) Motor gasoline prices are 'List' and may not be a reflection of actual transaction prices. - Les prix de l'essence sont des prix de détail suggérés et peuvent ne pas traduire les prix réels à la transaction.

(7) Gross weighted, including inter-industry shipments. For explanation see page 91. - Indice pondéré brut comprenant les livraisons inter-industrielles. Pour toute explication voir page 91.

| All-items Consumer Price Index converted to 1961=100, March 1975 - L'indice des prix à la consommation de tous les éléments converti à 1961=100, mars 1975 ..... |                                |                  |                       |                         |                               |   |   | 231.1                                    |

(1) Indexes prior to May 1973 incorporate 1957 expenditure weights, those for May 1973 forward are based on 1967 expenditures. The revised series is linked to its predecessor at April 1973. For further explanation, see page 94. - Avant mai 1973 les indices étaient calculés à l'aide des pondérations fondées sur les dépenses de 1957; à partir de mai 1973 ils sont calculés à l'aide des pondérations fondées sur les dépenses de 1967. Les séries révisées sont raccordées aux précédentes en avril 1973. Pour plus de renseignements, voir page 94.

(1) Indexes prior to May 1973 incorporate 1957 expenditures weights, those for May 1973 forward are based on 1967 expenditures. The revised series is linked to its predecessor at April 1973. For further explanation see page 94. - Avant mai 1973 les indices étaient calculés à l'aide des pondérations fondées sur les dépenses de 1957; à partir de mai 1973 ils sont calculés à l'aide des pondérations fondées sur les dépenses de 1967. Les séries révisées sont raccordées aux précédentes en avril 1973. Pour plus de renseignements, voir page 94.

(2) Excludes accessories and notions. - Ne comprend pas les accessoires et menus articles.

(3) Includes clothing accessories and notions. - Comprend les accessoires et menus articles vestimentaires.

(4) Includes constant weighted food component. - Comprend l'élément aliments calculé à l'aide de pondérations constantes.

TABLE 11. Consumer Price Indexes, Regional Cities(1)

Note: (i) These indexes measure within each city the percentage change in consumer prices from the base period to the subsequent time periods. They cannot be used to compare levels of prices between cities. (ii) For inter-city indexes of retail price differentials refer to Table 14.

TABLEAU 11. Indices des prix à la consommation, agglomérations urbaines(1)

**Note:** (i) Les indices mesurent dans chaque ville le pourcentage de variation des prix à la consommation depuis la période de base jusqu'à des périodes subsequentes. Ils ne peuvent servir à comparer les niveaux des prix d'une ville à l'autre. (ii) Pour les indices comparatifs des prix de détail, se reporter au tableau 14.

(1) Indexes prior to May 1973 incorporate 1957 expenditure weights (1964 expenditure weights for Quebec and Thunder Bay); those for May 1973 forward are based on 1967 expenditures. The revised series are linked to their predecessors at April 1973. For further explanation see page 94.

(2) As of January 1975, the separate consumer price indexes for Saskatoon, Regina, Edmonton and Calgary supersede the combined-cities series. Users of the combined series are therefore advised to switch to the separate city indexes which are available only from April 1973. (The historical data for the combined-cities series are presented in Table 11A). Should users have any questions, contact the Retail Prices Section or consult the Retail Prices and Living Costs Service Bulletin, Catalogue 62-005, Volume 3, No. 5.

(3) Until April 1973, the shelter element of regional cities' housing indexes moved on the basis of changes in rents only. However, from May 1973 on, homeownership has been included in the shelter element of regional cities' housing indexes so that the Canada and regional city shelter indexes now contain the same elements. See also page 95.

(4) Includes shelter and household operation. Until April 1973, the shelter element of regional cities' housing indexes moved on the basis of changes in rents only. However, from May 1973 on, homeownership has been included in the shelter element of regional cities' housing indexes, so that the Canada and regional city shelter indexes now contain the same elements. See also page 95.

(1) Avant mai 1973, les indices étaient calculés à l'aide des pondérations fondées sur les dépenses de 1957 (pour Québec et Thunder Bay sur les dépenses de 1964); à partir de mai 1973 ils sont calculés à l'aide des pondérations fondées sur les dépenses de 1967. Les séries révisées sont raccordées aux précédentes en avril 1973. Pour plus de renseignements, voir page 94.

(2) A partir de janvier 1975, les indices séparés des prix à la consommation pour Saskatoon, Regina, Edmonton et Calgary remplacent les séries combinées. Nous conseillons donc aux utilisateurs des séries combinées d'utiliser les séries des indices séparés qui sont disponibles depuis avril 1973. (Les données historiques pour les séries combinées sont publiées au tableau 11A). Si il y a des questions, communiquez avec la section des prix de détail ou consultez le Bulletin de service sur les prix de détail et les coûts de la vie, no 62-005 au catalogue, volume 3, no 5.

(3) Jusqu'en avril 1973, l'élément logement des indices de l'habitation des agglomérations urbaines était basé uniquement sur les variations des loyers. Toutefois, depuis mai 1973, les frais de possession d'une maison ont été incorporés à l'élément logement des indices de l'habitation des agglomérations urbaines; il en résulte que les indices du logement pour le Canada et pour les agglomérations urbaines comportent maintenant les mêmes éléments. Voir aussi la page 95.

(4) Comprend le logement et l'entretien du ménage. Jusqu'en avril 1963, l'élément logement des indices de l'habitation des agglomérations urbaines était basé uniquement sur les variations des loyers. Toutefois, depuis mai 1973, les frais de possession d'une maison ont été incorporés à l'élément logement des indices de l'habitation des agglomérations urbaines; il en résulte que les indices du logement pour le Canada et pour les agglomérations urbaines comportent maintenant les mêmes éléments. Voir aussi la page 95.

(2) Indexes for 1974 and 1975 are subject to revision - Les indices pour 1974 et 1975 sont sujets à révision.

## EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR PRICE SERIES

### Industrial Price Indexes

#### Industry Selling Price Indexes (1961 = 100)

Industry selling price indexes are published for approximately 100 industries within manufacturing. Also published are approximately 425 commodity price indexes for the products of these industries. The Classification system is that of the 1960 standard industrial classification, thus permitting the joint use of price statistics with other data such as production and employment similarly classified.

The data upon which both the initial selection of commodities to be priced and responding firms are made are contained in the Census of Manufacturers, a series of annual surveys collecting statistics on shipments of commodities, employment and materials used. Prices are collected on the 15th of each month or the nearest transaction date for the commodity being priced; sales and excise taxes are excluded.

The industry classified price indexes are useful for analysis of price movements, for estimation of the constant dollar value of shipments, and for purposes of contract escalations.

A complete description of these indexes is contained in: Industry Selling Price Indexes 1956-68, Catalogue 62-528.

#### Industry Selling Price Index: Manufacturing

The index is gross weighted. It measures the movements of prices of gross shipments of manufacturing industries, including inter-industry shipments between individual industries within manufacturing. Therefore, it duplicates the movements of some prices in the sense that, for example, flour prices are given full weight as part of the shipments of the Flour Mills Industry and then are implicitly counted again through full weighting of the shipment prices of those manufacturing industries which use flour as an ingredient in their outputs, e.g., bread, biscuits, cakes, etc.

#### "Iron & Steel Mills:" 12-2910

The principal change in the index is as follows: From January 1973 forward prices collected from the various companies are, for any given commodity, weighted together in a way that reflects the relative importance of each company's shipments of the commodity to the total shipments of that commodity by all companies in the year 1971. In addition prices for stainless products were deleted from the series bars hot rolled etc. (12-2910-082), in September 1972 and from the series sheets and strip cold rolled etc. (12-2910-084) in October 1972. Prices for stainless products, however, are included in the price index for the iron and steel mills industry.

The concept of price change measured is net return to mill.

## EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES SÉRIES DE PRIX

### Indices des prix industriels

#### Indices des prix de vente dans l'industrie (1961 = 100)

Les indices des prix de vente dans l'industrie sont publiés pour environ 100 industries manufacturières. Près de 425 indices des prix des produits de ces industries sont également publiés. Les produits sont classés d'après la Classification type des industries de 1960, ce qui permet d'utiliser la statistique des prix avec d'autres données telles que la production et l'emploi classées de la même manière.

Les données sur lesquelles se fonde le choix initial des produits dont il faut déterminer le prix et des établissements enquêtés figurent dans le "recensement des manufactures", série de bulletins sur les enquêtes annuelles au cours desquelles on recueille des statistiques sur les expéditions de produits, sur l'emploi et sur les matières utilisées. La collecte des prix a lieu le 15 de chaque mois ou à la date de transaction la plus rapprochée pour le produit en question; les taxes de vente et droits d'accise ne sont pas pris en compte.

Les indices des prix classés par industrie servent à analyser les mouvements de prix, à estimer la valeur des expéditions en dollars constants et à indexer les contrats.

La description complète de ces indices est donnée dans "Indices des prix de vente dans l'industrie, 1956-68", (n° 62-528 au catalogue).

#### Indices des prix de vente dans l'industrie: Industries manufacturières

Il s'agit d'un indice pondéré brut. Il mesure les mouvements du prix des livraisons brutes des industries manufacturières, y compris les livraisons inter-industrielles des industries manufacturières. Il prend donc deux fois en compte les mouvements de certains prix: les prix de la farine, par exemple, font l'objet d'une pondération complète comme ayant trait aux livraisons des meuneries et ils sont comptés à nouveau implicitement du fait de la pondération complète des prix de livraisons des industries manufacturières qui utilisent de la farine comme ingrédient de leurs produits, tels que le pain, les biscuits ou les gâteaux.

#### "Sidérurgie:" 12-2910

Le principal changement apporté à l'indice est le suivant: depuis janvier 1973, les prix recueillis auprès des différentes sociétés sont, pour tout produit, pondérés de manière à refléter l'importance relative des livraisons de chaque société par rapport aux livraisons totales de ce produit par toutes les sociétés en 1971. En outre, les prix des produits en acier inoxydable ont été enlevés de la série "barres, laminés à chaud, etc." (12-2910-082) en septembre 1972 et de la série "tôles et feuillards, laminés à froid etc." (12-2910-084) en octobre 1972. Ils sont toutefois compris dans l'indice des prix de l'industrie de la sidérurgie.

Le concept de la mesure de la variation des prix se fonde sur le revenu net à l'usine.

**Purchase Price Indexes of Secondary Metals  
(1969=100)**

Ferrous and non-ferrous indexes are compiled from a series of input prices, inclusive of transportation and brokerage fees, submitted by a wide variety of purchasers from selected industries. Indexes for certain categories of metals cannot be published because of the confidentiality of the data under the Statistics Act.

**Canadian Farm Products Price Index  
(1935-39=100)**

Prices for Western grains used in the index are Canadian Wheat Board buying prices for grain in store at Vancouver or Thunder Bay.

Final payments for the crop year August 1973 - July 1974 were announced on December 24, 1974 and have been incorporated into the index. Estimates for the total 1974-75 payments are based on the initial payment plus half of the 1973-74 crop year final payment.

**Indices du prix d'achat des métaux de deuxième fusion  
(1969=100)**

L'indice des métaux ferreux et non ferreux est établi à partir d'une série de prix comprenant les frais de transport et de dédouanement; ces données sont fournies par un large éventail de clients de certaines industries. Confidentielles en vertu de la Loi sur la statistique, les indices de certaines catégories de métaux ne peuvent être publiés.

**Indice des prix des produits agricoles canadiens  
(1935-39=100)**

Les prix des céréales de l'Ouest utilisés dans l'indice sont les prix d'achat de la Commission canadienne du blé pour les céréales entreposées à Vancouver ou à Thunder Bay.

Les paiements finals pour la campagne agricole août 1973 - juillet 1974 ont été annoncés le 24 décembre 1974 et ont été incorporés à l'indice. Les estimations des paiements totaux de 1974-75 sont basées sur le paiement initial plus la moitié du paiement final de la campagne agricole 1973-74.

### General Wholesale Index (1935-39 = 100)

The General Wholesale Index is a commodity classified index of prices. The index is "general" inasmuch as it incorporates a diverse selection of both primary and processed commodities. It is called "wholesale" because its ingredient prices relate to that broad and heterogeneous area of commodity distribution which excludes only retail trade. In fact, the term "wholesale" has more of a connotation of bulk trading than of any homogeneous level of distribution. Thus, though the index mainly includes prices of producers, it also covers transactions of "middle men" who trade in commodities of a type or in quantities characteristic of primary marketing functions.

Though general wholesale price indexes have been calculated by many countries for years there is no precise answer to the question of what such an index measures. This is so because the index cannot be associated with any adequately definable value aggregate. Unlike a consumer price index which can be identified with expenditures of household consumers, a general wholesale index covers a host of overlapping transactions sometimes involving the same ingredient in as many as three different stages of processing. Yet, conceptually, it is not a measure of the purchasing power of money because it omits significant areas of monetary transactions such as prices of land, labour, securities and services, except in so far as prices of these things are implicit in commodity prices. As a conventional summary figure, its use has tended towards a reference level against which to observe the behaviour of particular price groups such as farm products, industrial materials, building materials and the various other groupings for which indexes are published. And as an indicator of general business conditions it is usually included in the group which is regarded as approximately coincident with the business cycle. However, its main attribute now lies in its long historical continuity.

For further details about the General Wholesale Index please consult: Wholesale Price Indexes 1913-50 (Reference Paper No. 24) Prices and Price Indexes 1949-52 (Vol. 23) (Catalogue 62-501).

### Thirty Industrial Materials, (1935-39 = 100)

The price index of thirty industrial materials is calculated as an unweighted geometric average of prices of the selected commodities. The formula is as follows:

$$\sqrt[30]{\frac{P^1}{tN} \times \frac{P^2}{tN} \times \frac{P^3}{tN} \times \dots \times \frac{P^{30}}{tN}}$$

$$\sqrt[30]{\frac{P^1}{t 35-39} \times \frac{P^2}{t 35-39} \times \frac{P^3}{t 35-39} \times \dots \times \frac{P^{30}}{t 35-39}}$$

### Indice général des prix de gros (1935-39 = 100)

L'indice général des prix de gros est un indice des prix classés par produit. Cet indice est "général" du fait qu'il comprend une variété de produits primaires et de produits transformés. Il est appelé "de gros" parce que les prix qui le composent se rapportent au domaine vaste et hétérogène de la distribution des produits dont seul le commerce de détail est exclu. En réalité, l'expression "de gros" fait penser plus au commerce de gros qu'au niveau homogène de distribution. Bien que l'indice comprenne surtout les prix établis par les producteurs, il englobe également les transactions des "intermédiaires" qui vendent des produits dont le genre et la qualité sont particuliers aux fonctions premières de la commercialisation.

De nombreux pays calculent l'indice général des prix de gros depuis des années; il n'en reste pas moins impossible de dire exactement ce que cet indice mesure, car on ne peut l'associer à une valeur globale que l'on puisse définir exactement. Contrairement à l'indice des prix à la consommation que l'on peut identifier grâce aux dépenses des ménages, l'indice général des prix de gros couvre une foule de transactions à double emploi impliquant parfois le même élément considéré jusqu'à trois étapes différentes de la transformation. Cependant, du point de vue conceptuel, cet indice ne constitue pas une mesure du pouvoir d'achat du dollar parce qu'il ne tient pas compte de transactions monétaires aussi importantes que le prix du terrain, du travail, des valeurs mobilières et des services, sauf si elles sont comprises dans le prix des produits. En tant que chiffre représentatif classique, on a eu tendance à s'en servir pour comparer le comportement de certains groupes de prix, par exemple, celui des produits agricoles, des matières industrielles, des matériaux de construction et de divers autres groupes pour lesquels on publie des indices. Comme indicateur de la situation générale du commerce, l'indice est habituellement intégré au groupe dont on considère qu'il correspond le plus exactement au cycle commercial. Sa qualité principale réside cependant dans sa longue continuité chronologique.

Pour plus de détails sur l'indice général des prix de gros, consulter *Wholesale Price Indexes 1913-50 (Reference Paper No. 24)* et *Prices and Price Indexes 1949-52 (Vol. 23)* (n° 62-501 au catalogue).

### Indice des prix de trente matières industrielles (1935-39 = 100)

L'indice des prix de trente matières industrielles est calculé comme moyenne géométrique non pondérée des prix de certaines marchandises. La formule est la suivante:

$$\sqrt[30]{\frac{P^1}{tN} \times \frac{P^2}{tN} \times \frac{P^3}{tN} \times \dots \times \frac{P^{30}}{tN}}$$

$$\sqrt[30]{\frac{P^1}{t 35-39} \times \frac{P^2}{t 35-39} \times \frac{P^3}{t 35-39} \times \dots \times \frac{P^{30}}{t 35-39}}$$

The selection of materials for pricing relates to groups such as "stable" prices, numbering 12, food prices, numbering 5 and "sensitive" prices, numbering 13. We plan to construct an index of industrial prices that will relate to current usage of materials and that will be of the more traditional Laspeyre's type in its construction. The presently published index contains prices for some materials that no longer constitute important industrial inputs.

#### **The Consumer Price Index for Canada (1961 = 100)**

The Consumer Price Index measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specified time period. The "basket" is an unchanging or equivalent quantity and quality of goods and services, consisting of items for which there are continually measurable market prices over time.

The index relates to a broad but specific group of urban families and reflects the price changes experienced by that "target group". The index may not represent closely the experience of any one specific family within the group, nor should it be expected to reflect price change for other population groups for which income, family size and place of residence are characteristically different. The target group to which the current index relates is composed of families -- (a) living in cities with over 30,000 population, (b) ranging in size from two to six persons and (c) with annual incomes in 1967 ranging from \$4,000 to \$12,000. To measure the influences of price change on the cost of goods and services purchased by such families, the Consumer Price Index reflects movements of some 300 items.

The history of consumer price indexes in Canada extends back to the early 1900's and encompasses periodic revisions of index base reference periods and weighting patterns. In January 1969, the time base was updated to 1961 = 100 from 1949 = 100; details are contained in the January 1969 issue of the monthly publication *Prices and Price Indexes*, Catalogue 62-002.

From March 1961 to April 1973 inclusive, the weights or relative importance of the items in the Consumer Price Index were based on 1957 family expenditure patterns; details of these weights can be found in *The Consumer Price Index for Canada (1949 = 100) (Revision Based on 1957 Expenditures)*, Catalogue 62-518. A subsequent weight revision to reflect 1967 family expenditure patterns (and within the food component, 1969 detailed spending habits) was introduced in May 1973. Full details of the latest weighting pattern and other background information on the Consumer Price Index is available in the occasional paper *The Consumer Price Index for Canada (1961 = 100) (Revision based on 1967 Expenditures)*, Catalogue 62-539.

Le choix des matières servant au prélèvement des prix et se rapportant à des groupes tels que prix "stables", (12 matières), prix des aliments (5 matières) et prix "variables" (13 matières). Nous projetons d'établir un indice des prix industriels qui se rapportera à l'utilisation courante des matières et dont la structure se rapprochera plus du type Laspeyres plus traditionnel. L'indice publié ici renferme les prix de certaines matières qui ne sont plus considérées comme intrants importants dans l'industrie.

#### **L'indice des prix à la consommation pour le Canada (1961 = 100)**

L'indice des prix à la consommation mesure le taux de variation dans le temps du coût à l'achat d'un "panier" constant de biens et de services représentant les achats d'un groupe déterminé de la population au cours d'une période donnée. Le "panier" est constitué par des biens et des services en quantité et de qualité constantes; il comprend uniquement les biens et services qui ont un prix et dont les prix peuvent être observés de façon continue.

L'indice se rapporte à un groupe vaste, mais délimité, de familles urbaines et rend compte des changements de prix auxquels ce "groupe cible" doit faire face. L'indice peut ne pas suivre de près les changements de prix touchant une famille en particulier de ce groupe, pas plus que les changements de prix touchant d'autres groupes de la population dont le revenu, la taille des familles ou les lieux de résidence diffèrent sensiblement. Le groupe cible auquel se rapporte l'indice actuel se compose de familles a) vivant dans des villes de plus de 30.000 habitants, b) dont la taille est comprise entre deux et six personnes, et c) dont les revenus annuels en 1967 étaient compris entre \$4,000 et \$12,000. Afin de mesurer les effets de changements de prix sur le coût des biens et des services achetés par ces familles, l'indice des prix à la consommation suit les mouvements de quelque 300 articles.

L'histoire des indices de prix à la consommation au Canada remonte au début des années 1900, et elle comprend des révisions périodiques des périodes de référence de base de l'indice ainsi que des schémas de pondération. En janvier 1969, on a aligné la base de temps de 1949 = 100 à 1961 = 100; d'autres renseignements figurent dans l'édition de janvier 1969 de la publication mensuelle *Prix et indices des prix* (n° 62-002 au catalogue).

De mars 1961 à avril 1973 inclusivement, les poids, ou l'importance relative des éléments de l'indice des prix à la consommation étaient basés sur les tendances de dépense des familles pour 1957; on peut trouver le détail de ces poids dans la publication *The Consumer Price Index for Canada (1949 = 100) (Revision based on 1957 Expenditure)*, (n° 62-518 au catalogue). En mai 1973, on a introduit une nouvelle révision des poids afin de prendre en compte les tendances de consommation des familles en 1967 (et, dans l'élément aliments, les habitudes détaillées de dépense en 1969). Le détail complet du dernier schéma de pondération et d'autres renseignements fondamentaux sur l'indice des prix à la consommation figurent dans la publication hors série *L'indice des prix à la consommation du Canada (1961 = 100) (Révision fondée sur les dépenses de 1967)*, (n° 62-539 au catalogue).

### The Consumer Price Index for Canada Reclassified by Goods and Services

A revised supplementary classification system, entitled "The Consumer Price Index reclassified by Goods and Services", was introduced in May 1973 with the revision of the weighting pattern of the Consumer Price Index to reflect 1967 expenditures.

This supplementary classification introduces an improved framework for regrouping the items which comprise the Index. In it, all items in the C.P.I. have been reclassified into two major categories — goods and services — according to their most characteristic or dominant attribute. The goods component has been sub-divided into three categories: durable, semi-durable, and non-durable goods, according to expected average useful lifetime criteria. Services, on the other hand, have been sub-divided according to broad functional categories.

Historical series conforming to the revised classification system replace the previously published supplementary indexes and are available, with explanatory notes, for the period January 1961 to April 1973 inclusive, in *Retail Prices and Living Costs Service Bulletin*, Catalogue 62-005, Vol. 2 No. 7.

### Consumer Price Indexes for Regional Cities (1961 = 100)

Consumer Price Indexes for Regional Cities are published monthly in this bulletin (Table 11). Except for their individual weighting systems, and the fact that they are based on fewer quotations, the regional city indexes are generally similar in concept and item coverage to the Consumer Price Index for Canada.

Prior to May 1973, the city indexes may have underestimated the degree of price movements occurring because the shelter component of the city indexes moved on the basis of changes in rents only, whereas changes in both rents and homeownership costs were, and continue to be, included in the Canada index. As a result of homeownership costs having increased more rapidly than rents, the housing and the all-items indexes for cities tended to underestimate somewhat the rates of price increase particularly over longer periods. From May 1973 forward, however, homeownership costs are included in the regional city consumer price indexes so that the Canada and the regional city indexes are consistent in terms of their content and treatment.

Each city index is designed to measure the influence of changes in retail prices taking place in the locality specified, upon the cost of a fixed basket of goods and services representing the level of consumption of a representative group of families in the particular area specified.

In using the city indexes, it should be remembered that *they do not in any way indicate whether price levels are higher or lower in one city than in another*. Rather, they measure, *within each city*, the percentage change in consumer prices from the base period to subsequent time periods.

### L'indice des prix à la consommation au Canada reclassé par biens et services

Un système révisé de classification supplémentaire, intitulé "L'indice des prix à la consommation au Canada reclassé par biens et services", a été introduit en mai 1973 en même temps que la révision des schémas de pondération de l'indice des prix à la consommation afin de rendre compte des dépenses de 1967.

Cette classification supplémentaire regroupe dans un cadre amélioré les éléments de l'indice. En effet, tous les éléments de l'I.P.C. ont été reclassés dans deux grandes catégories, soit la catégorie des biens et celle des services, suivant leur caractère le plus distinctif ou dominant. La catégorie des biens présente trois sous-catégories (biens durables, biens semi-durables, biens non durables) déterminées en fonction de la vie utile moyenne prévisible. D'autre part, on a réparti les services suivant quelques grandes catégories fonctionnelles.

Les séries historiques conformes au système révisé de classification remplacent les indices supplémentaires publiés auparavant, et on peut les trouver, avec des notes explicatives, pour la période janvier 1961 - avril 1973, dans la publication "Prix de détail et coût de la vie" - Bulletin de service, n° 62-005 au catalogue, vol. 2 n° 7.

### Indices des prix de la consommation dans certaines agglomérations urbaines (1961 = 100)

Ces indices sont publiés tous les mois dans la présente publication (tableau 11). À l'exception de leurs systèmes de pondération particuliers, et de ce qu'ils font appel à moins de prix, ces indices sont en général semblables par leur concept et par les éléments qui les composent à l'indice des prix à la consommation au Canada.

Avant mai 1973, les indices des agglomérations ont pu sous-estimer le degré de changement des prix, parce que l'élément logement des indices des agglomérations ne variait qu'en fonction de l'évolution des loyers, tandis que l'indice pour le Canada ne comprenait et ne comprend toujours que les changements des loyers et les coûts de propriété. Comme les coûts de propriété ont augmenté plus vite que les loyers, les indices du logement et l'ensemble pour les villes tendent à sous-estimer quelque peu les taux de croissance des prix, principalement sur des périodes plus longues. À partir de mai 1973, cependant, les coûts de propriété sont inclus dans les indices de prix à la consommation des agglomérations urbaines, de sorte que les indices pour le Canada et les agglomérations urbaines sont homogènes à la fois pour ce qui est de leur contenu et de leur traitement.

Chaque indice de ville est conçu de manière à mesurer l'effet des changements des prix de détail dans la ville en question sur les prix d'un panier constant de biens et de services représentant le niveau de consommation d'un groupe représentatif de familles dans cette ville.

Le lecteur devra toujours garder en mémoire que ces indices *n'indiquent en aucune façon si les prix sont plus élevés dans une ville que dans une autre*. Ils mesurent plutôt *dans chaque ville* le taux de variation des prix à la consommation à partir de la période de base et des périodes subséquentes.

For comparisons of retail price differentials between cities, see Table 14 of this publication and the relevant explanatory notes.

### Purchasing Power of the 1961 Consumer Dollar

As consumer prices rise, the sum of money required to purchase an unchanging or equivalent quantity and quality of goods and services increases, and the amount of these items that can be purchased with a fixed sum of money decreases. Conversely, as prices fall, the amount of goods and services that can be purchased with a fixed sum of money increases. Thus, rising prices are associated with declining purchasing power of money and falling prices are associated with its increasing purchasing power.

The purchasing power of the consumer dollar, in other words, bears an inverse relationship to the movement of the Consumer Price Index. For example, by January 1973, compared with their average level in 1961, consumer prices as measured by the C.P.I. were 44.5% higher, so that an equivalent basket of goods and services which could be purchased for \$100.00 in 1961 would cost the consumer \$144.50 in January 1973. Each consumer dollar in January 1973, therefore, buys less than in 1961, and the amount of its reduced value can be expressed in terms of the inverse consumer price movement. Thus, in January 1973 the purchasing power of the 1961 consumer dollar declined to approximately 69 cents ( $\$1.00 \times 100.0 / 144.5 = \$0.69$ ).

Users of the tabulation which shows the purchasing power of the 1961 consumer dollar at different points in time (Table 12) should note that, as in the case of the Consumer Price Index from which it is derived, it may not represent closely the experience of any one specific family within the large group to which the C.P.I. relates; nor should it be expected to reflect the experience of other population groups whose income, family size and place of residence are characteristically different. It should also be noted that, like the C.P.I., it is not directly affected by changes in income tax, unemployment insurance premiums and certain other security payments.

### Measuring the Purchasing Power of Wages

Changing consumer price levels affect the amounts of consumer goods and services which a dollar will buy, and average wages, insofar as they are spent on such items will, of course, be affected in the same way. A wage measurement which takes the change of consumer prices into account, can be calculated by reducing actual average wages by the percentage rise in consumer price levels, or increasing them by the amount price levels fall. Wages thus adjusted may be used to indicate the comparative purchasing power of average earnings if consumer price levels and consumption patterns had remained constant. The following illustration shows how this kind of an adjustment can be made.

Suppose that a series of average weekly wages rises from \$80.00 in week A to \$100.00 in week B, and that in the same interval a consumer price index advances from 100 to 110.0. Because of the 10% rise in consumer prices, \$1.00 will not buy as much in week B as it would in week A. On the

Pour étudier les différences de prix de détail entre les villes, il faut consulter le tableau 14 de la présente publication et les notes explicatives qui l'accompagnent.

### Pouvoir d'achat du dollar de consommation 1961

À mesure que les prix à la consommation montent, la somme nécessaire à l'achat d'une quantité et d'une qualité constantes ou équivalentes de biens et de services augmente, et la quantité de ces articles qui peut être acheté avec une somme d'argent fixe diminue. Inversement, à mesure que les prix baissent, la quantité de biens et de services qui peut être achetée avec une somme d'argent constante augmente. Ainsi, la hausse des prix est liée à la baisse du pouvoir d'achat de la monnaie, et la baisse des prix est liée à la hausse du pouvoir d'achat.

Le pouvoir d'achat du dollar de consommation, en d'autres termes, évolue en raison inverse du mouvement de l'indice des prix à la consommation. Ainsi, en janvier 1973, par rapport au niveau de 1961, les prix à la consommation mesurés par l'I.P.C. avaient progressé de 44.5%, de sorte qu'un panier équivalent de biens et de services qui coûtait \$100 à l'achat en 1961 aurait coûté \$144.50 en janvier 1973 au consommateur. Par conséquent, chaque dollar de consommation en janvier 1973 achète moins qu'en 1961, et l'on peut exprimer le montant de sa valeur réduite en fonction de l'inverse du mouvement des prix à la consommation. Ainsi, en janvier 1973, le pouvoir d'achat du dollar de consommation 1961 était tombé approximativement à 69 cents ( $\$1.00 \times 100.0 / 144.5 = \$0.69$ ).

Les utilisateurs du tableau qui indique le pouvoir d'achat du dollar de consommation de 1961 à différentes périodes (tableau 12) doivent noter que, comme dans le cas de l'indice des prix à la consommation dont il a été tiré, il peut ne pas suivre de près le cas d'une famille en particulier faisant partie du grand groupe auquel se rapporte l'I.P.C., pas plus qu'il ne rend nécessairement compte des dépenses d'autres groupes de la population dont les revenus, la taille des familles et les lieux de résidence diffèrent sensiblement. Il faut également noter que, tout comme l'I.P.C., il n'est pas touché directement par les changements de l'impôt sur le revenu, les primes d'assurance-chômage et certains autres paiements d'assistance.

### Mesure du pouvoir d'achat des salaires

Les changements du niveau des prix à la consommation affectent les quantités de biens et de services de consommation qu'un dollar peut acheter, et les salaires moyens, dans la mesure où ils sont consacrés à de tels articles, seront naturellement touchés de la même façon. Une mesure des salaires qui prendrait en compte les changements de prix à la consommation peut se calculer en réduisant les salaires moyens réels du taux d'accroissement des prix à la consommation, ou en les augmentant dans une proportion égale à la baisse des prix. Les salaires ainsi ajustés peuvent servir à indiquer le pouvoir d'achat comparatif des gains moyens si les prix à la consommation et les tendances de consommation étaient restés constants. L'exemple suivant montre comment on peut procéder à un ajustement de cette nature.

Supposons qu'une série de salaires hebdomadaires moyens passe de \$80 pendant la semaine A à \$100 au cours de la semaine B, et qu'au cours de la même période un indice des prix à la consommation passe de 100 à 110. Par suite de la hausse de 10% des prix à la consommation, \$1 n'achètera pas autant au cours de

other hand, the 25% rise from \$80.00 to \$100.00 will overstate the increase which has occurred in the purchasing power of average weekly wages. This overstatement can be removed by reducing the figure of \$100.00 by the amount of the consumer price index increase. The adjusted average is \$90.91 ( $(100.0/110.0) \times \$100$ ), which may be referred to as a weekly wage average for week B expressed in the dollars of period A; or it may be said to indicate the level of real weekly wages relative to week A.

The foregoing calculation can be carried a step further to express, in index number form, the relationship between the week A average of \$80.00 and the week B adjusted figure of \$90.91. Assuming the week A average of \$80.00 as an index equal to 100, the week B index becomes 113.6 ( $(90.91/80.00) \times 100$ ). Such an index may be called an index of average weekly real wages. It indicates that average wages for week B will buy 13.6% more goods and services than they did in week A, in spite of a 10% rise in consumer prices. This 13.6% increase in real wages compares with the 25% rise in money wages ( $(\$100.00 - \$80.00) / \$80.00 \times 100$ ).

In Table 13, the index numbers of average weekly wages in manufacturing in current dollar terms (1961 = 100) are calculated by dividing the weekly wages in current dollars by the 1961 average weekly wage in current dollars and multiplying the result by one hundred. For example, the weekly wage index for September 1972 in current dollars (1961 = 100) is 196.4 ( $(146.23/74.45) \times 100$ ). The weekly wages in 1961 dollar terms are determined by dividing the weekly wage in current dollars by the consumer price index for Canada for the month following the month to which the wages relate and multiplying the result by one hundred. Thus, the September 1972 weekly wage in 1961 dollars is \$102.98 ( $(146.23/142.0) \times 100$ ). (The wage and the price data both refer to generally similar time periods: current wages for a particular month relate to the last pay periods in that month, while most prices for the consumer price index of the following month are collected in the first week of that month.)

The index numbers of weekly wages in 1961 dollar terms (1961 = 100) are determined by dividing the weekly wages in 1961 dollars by the base (1961) average weekly wage and multiplying the result by one hundred. For example, the September 1972 weekly wage index in 1961 dollar terms (1961 = 100) is 138.3 ( $(102.98/74.45) \times 100$ ).

It should be noted that while the estimates of average real wages may reflect the experiences of broad groups of workers in manufacturing fairly well, their applicability to individual wage-earners depends upon a number of considerations. For example, individual earnings will differ significantly from the group average, depending upon occupation, industry, geographical location, or sex of the wage-earner. Moreover, individual spending habits differ widely, but the consumer price index which is used to adjust the earnings data refers only to the average consumption pattern of a particular population group. Group spending patterns change over periods of time. To the extent that this occurs, the wage data adjusted by the consumer price index (which has a "fixed" consumption pattern), will gradually be ren-

la semaine B qu'au cours de la semaine A. Par contre, la hausse de 25% (de \$80 à \$100) va surévaluer la hausse qui s'est produite dans le pouvoir d'achat des salaires hebdomadaires moyens. Cette surévaluation peut être réduite en réduisant le chiffre de \$100 du montant de l'accroissement de l'indice des prix à la consommation. La moyenne ajustée sera \$90.91 ( $(100.0/110.0) \times 100$ ), et que l'on peut désigner comme étant la moyenne du salaire hebdomadaire pour la semaine B exprimée en dollars de la période A; on peut aussi dire qu'elle indique le niveau réel des salaires par rapport à la semaine A.

On peut pousser ce calcul plus loin, en exprimant à l'aide d'un indice, la relation entre le salaire moyen de \$80 de la semaine A, et le salaire révisé de \$90.91 de la semaine B. En supposant que la moyenne de la semaine A soit un indice égal à 100, l'indice de la semaine B devient 113.6 ( $(90.91/80.00) \times 100$ ). On pourrait appeler un tel indice l'indice de la rémunération hebdomadaire effective. Il indique que le salaire moyen pour la semaine B permettra aux consommateurs d'acheter pour 13.6% de plus en biens et services que pendant la semaine A, et ceci, en dépit de l'augmentation de 10% des prix à la consommation. Cette augmentation effective de 13.6% se compare à l'augmentation de 25% des salaires ( $(\$100.00 - \$80.00) / \$80.00 \times 100$ ).

Au Tableau 13, les nombres indices des salaires hebdomadaires moyens dans les industries manufacturières en dollars courants (1961 = 100) s'obtiennent en divisant les salaires hebdomadaires en dollars courants par le salaire hebdomadaire moyen de 1961 en dollars courants et en multipliant le résultat par cent. Ainsi, l'indice des salaires hebdomadaires pour septembre 1972 exprimés en dollars courants (1961 = 100) est 196.4 ( $(146.23/74.45) \times 100$ ). Les salaires hebdomadaires en dollars de 1961 s'obtiennent en divisant les salaires hebdomadaires en dollars courants par l'indice des prix à la consommation pour le Canada pour le mois qui suit celui auquel se rapportent les salaires, et en multipliant le quotient par cent. Ainsi, le salaire hebdomadaire de septembre 1972 exprimé en dollars de 1961 est \$102.98 ( $(146.23/142.0) \times 100$ ). (Les données sur les salaires et les prix portent en général sur des périodes semblables: les salaires courants d'un mois donné sont généralement ceux des dernières périodes de paie du mois, alors que la plupart des prix pour l'indice des prix à la consommation du mois suivant sont recueillis au cours de la première semaine de ce mois.)

Les nombres indices des salaires hebdomadaires en dollars de 1961 (1961 = 100) s'obtiennent en divisant les salaires hebdomadaires en dollars de 1961 par les salaires hebdomadaires moyens de l'année de base (1961) et en multipliant le quotient par cent. Ainsi, l'indice des salaires hebdomadaires pour septembre 1972, exprimés en dollars de 1961 (1961 = 100), sera 138.3 ( $(102.98/74.45) \times 100$ ).

Il convient de souligner que, même si les estimations des salaires réels moyens résument assez bien la situation d'un large éventail de travailleurs dans les industries manufacturières, elles ne peuvent être appliquées aux individus sans quelques précautions. Ainsi, le revenu d'un salarié s'écartera sensiblement de la moyenne du groupe en fonction de sa profession, de l'industrie dans laquelle il travaille, de sa situation géographique ou de son sexe. De plus, les habitudes de consommation varient considérablement d'un individu à l'autre, alors que l'indice des prix à la consommation qui sert à redresser les données sur les gains porte uniquement sur la structure moyenne de consommation d'un groupe déterminé. De même, les habitudes de consommation changent avec le temps. Ainsi, les données sur les gains rajustées par l'indice des prix à la consommation (les habitudes de consom-

dered less valid; the consumer price index weighting pattern was last revised in May 1973, and prior to that, in 1961. Furthermore, some part of income may be saved, and it should be borne in mind that it is not appropriate to reduce savings to a constant dollar basis by using an index which reflects consumption patterns.

It should also be kept in mind that measures of change in real earnings calculated from averages of gross earnings may differ from changes in the purchasing power of "take-home" pay, due to such factors as changes in personal income tax and pay deductions for such things as social insurance and pension plans. Thus index numbers of real wages should not be interpreted as measuring fluctuations in the levels of consumption of wage-earners or wage-earners' families; they are intended to show only the trend in purchasing power of wages over the items covered by the price index, and in addition to the factors already mentioned, do not take into account other family income (including family allowances) or changes in the savings position of families.

The table in this report showing indexes of both actual (current dollar) and real (constant dollar) wages uses 1961 as a reference year. However, any reference period may be chosen as a base since percentage changes between any two periods will be the same regardless of the reference period selected.

Further information regarding Table 13 can be obtained from: Labour Division, Statistics Canada.

### Inter-City Retail Price Comparisons

Measurements of retail price differentials prevailing between a number of Canadian urban centres previously published to reflect inter-city comparisons as of May 1965, May 1968, May 1969 and May 1971 have been revised to February 1975.

In this new series of updatings inter-city price comparisons will be drawn for goods and services comprising most of the budget on which the Consumer Price Index for Canada is currently based.

Table 14 presents the first five components of goods and services to be updated in this series. Price indexes for additional budget elements will be published on a component-by-component basis as each stage of these results becomes available. The data base for this study was the wide range of retail price quotations collected in the course of production of the national Consumer Price Index in addition to supplementary information gathered in a special program of pricing undertaken for publication of City Average Retail Prices(1).

As previously, to facilitate price comparability between locations, differential price measurements are derived between separate pairs of cities in geographic proximity

(1) Retail Prices and Livins Costs Service Bulletin, Vol. 4, No. 2, February, 1975.

mation étant supposées "fixes") perdront graduellement de leur valeur; le schéma de pondération de l'indice des prix à la consommation a été révisé pour la dernière fois en mai 1973, et avant cela, en 1961. De plus, il ne faut pas oublier qu'une partie du revenu peut être épargnée et qu'il serait faux de recalculer cette épargne en dollars constants à partir d'un indice qui se rapporte à des habitudes de consommation.

De même, il faut se rappeler que l'évaluation des variations des gains effectifs calculées à partir de moyennes effectives peut différer de l'évaluation des variations du pouvoir d'achat du revenu disponible en raison de facteurs tels que l'évolution de l'impôt sur le revenu des particuliers et des retenues destinées à l'assurance sociale, aux régimes de pensions, etc. Ainsi, l'indice de la rémunération effective ne sert pas à mesurer les variations des niveaux de consommation des salariés ou de leurs familles, mais plutôt à montrer les tendances du pouvoir d'achat des salariés par rapport aux articles contenus dans l'indice; enfin, l'indice ne prend pas en compte les autres revenus des familles (tels que les allocations familiales) ou les variations de l'épargne des familles.

La période de référence du tableau qui présente les salaires tant réels (en dollars courants) qu'effectifs (en dollars constants) prend pour base l'année 1961. En fait, on peut choisir n'importe quelle période de référence comme base, puisque les taux de variation entre deux périodes seront les mêmes quelle que soit la période de référence choisie.

On peut obtenir plus de renseignements sur le tableau 13 en s'adressant à la Division du travail, Statistique Canada.

### Comparaisons entre les prix de détail d'une ville à l'autre

Les mesures de la disparité des prix de détail qu'on observe dans un certain nombre de centres urbains du Canada, déjà publiées afin de donner les comparaisons entre les villes aux mois de mai 1965, mai 1968, mai 1969 et mai 1971 ont été révisées en février 1975.

Les nouvelles séries de mises à jour seront faites pour la plupart des biens et services servant actuellement à établir l'indice des prix à la consommation du Canada.

On trouvera au tableau 14, les résultats de la mise à jour des cinq premières composantes. Pour ce qui est des autres éléments du budget à la consommation, on publiera des indices de prix différentiels, composante par composante, au fur et à mesure que les résultats d'enquête seront disponibles. Les données de base pour cette étude ont été constituées par l'importante collection recueillie pour la production de l'indice national des prix à la consommation en plus de l'information supplémentaire obtenue dans le cadre d'un programme spécial de relevé des prix, dont les résultats permettent de publier les prix de détail moyens par ville(1).

Comme par le passé, afin de faciliter la comparaison des prix entre les différents endroits, les mesures différentes de prix ont été calculées séparément pour des paires de villes géographi-

(1) Bulletin de Service; Prix de détail et Coût de la Vie, Vol. 4, No 2, février 1975.

to each other. Within each city pair, price quotations were matched at the item level on the basis of identical specifications, including brand names wherever possible, and also having regard for comparability of retail outlets and merchandising practises. By means of a linking procedure, paired city indexes are initially related to a common base city and subsequently compared with a weighted average of the combined 11 cities equalling 100. This is a departure from previous such studies which were based on Winnipeg price levels equalling 100. Item price relationships are aggregated by application of the 1967 combined cities weighting diagram updated for price change to February 1975.

Further information regarding Table 14 can be obtained from: Comparative Living Costs Section, Prices Division, Statistics Canada.

#### Farm Input Price Indexes (1961 = 100)

Farm Input Price Indexes measure, through time, changes in prices of commodities and services used in Canadian farming operations. The item content and weights are based on data from the 1958 Farm Income and Expenditure Survey, the most recent source of sufficiently detailed data. These data have been modified to reflect 1961 prices and conditions. Farm Input Price Indexes are calculated quarterly for Eastern, Western and all Canada on a 1961 = 100 time base.

Farm Input Price Indexes replace one of the two major component indexes of the previously published series, Price Index Numbers of Commodities and Services used by Farmers, 1935-39 = 100. The latter index was composed of a Farm Family Living Index and a Composite Index Exclusive of Living Component. The Farm Input Price Indexes replaces the Composite Index Exclusive of Living Component from 1961 forward.

A detailed description of concepts, methods and data sources is contained in the occasional paper, *Farm Input Price Indexes, 1961 = 100*, Catalogue 62-534, and is reproduced in the September 1971 issue of *Prices and Price Indexes*, Catalogue 62-002. The foregoing publications also contain total and component price indexes for Eastern, Western, and all Canada, from 1961 to and including the third quarter 1971.

Current price indexes will be published on a regular basis in the quarterly publication, *Farm Input Price Indexes, 1961 = 100*, Catalogue 62-004, and in the monthly publication *Prices and Price Indexes*, Catalogue 62-002.

The Farm Family Living component of the 1935-39 series has not been replaced by an updated counterparts, and publication has been suspended.

quement proches. A l'intérieur de chaque paire de villes, les prix ont été assortis au niveau de l'article, c'est-à-dire en s'assurant que les spécifications étaient semblables, y compris la marque lorsque cela était possible, et aussi en tenant compte de la similitude des points de vente au détail et des méthodes de vente. En utilisant la méthode de couplage, les indices couplés des villes ont d'abord été reliés à une ville de base commune, puis comparés à une moyenne pondérée (la combinaison de 11 villes étant égale à 100). Ceci constitue une différence entre cette étude et les études précédentes qui posaient le niveau des prix de Winnipeg comme étant égal à 100. Les relations de prix des articles ont été regroupées en appliquant le schéma de la pondération de 1967 des villes combinées mis à jour en fonction des variations de prix observées en février 1975.

De plus amples renseignements, concernant le tableau 14 peuvent être obtenus de: la Section des coûts comparatifs de la vie, Division des Prix, Statistique Canada.

#### Indices de prix des entrées dans l'agriculture (1961 = 100)

Les indices de prix des entrées dans l'agriculture mesurent l'évolution dans le temps du prix des produits et des services utilisés dans l'exploitation agricole au Canada. Les articles qui y sont compris, ainsi que leurs poids, sont fondés sur l'enquête de 1958 sur les revenus et les dépenses des agriculteurs, qui constitue la source la plus récente dont les données soient suffisamment détaillées. Ces données ont été adaptées de manière à rendre compte des prix et des conditions constatées pour 1961. Les indices des prix des entrées dans l'agriculture sont calculés chaque trimestre pour l'Est, l'Ouest et l'ensemble du Canada sur la base 1961 = 100.

Les indices des prix des entrées dans l'agriculture remplacent l'un des deux principaux éléments d'indices de la série précédente sur l'indice de prix des produits et services utilisés par les agriculteurs, (1935-39 = 100). Cet indice comprenait l'indice du coût de la vie pour les familles agricoles et l'indice synthétique sans le coût de la vie. Les indices des prix des entrées dans l'agriculture remplacent l'indice synthétique sans le coût de la vie à partir de 1961.

Le bulletin hors série *Farm Input Price Indexes, 1961 = 100* (n° 62-534 au catalogue) contient une description détaillée des concepts, des méthodes et des sources de données qui est reprise dans *Prices and Price Indexes* de septembre 1971 (n° 62-002 au catalogue). Ces deux bulletins contiennent également les indices des prix totaux et partiels pour l'Est et l'Ouest du Canada et pour l'ensemble du Canada, de 1961 au troisième trimestre de 1971 inclusivement.

Les indices des prix en cours seront publiés régulièrement dans le bulletin trimestriel *Farm Input Price Indexes, 1961 = 100* (n° 62-004 au catalogue) et dans le bulletin annuel *Prices and Price Indexes* (n° 62-002 au catalogue).

On n'a pas remplacé l'indice du coût de la vie pour la famille agricole des séries de 1935-39 par un équivalent à jour et on a cessé de la publier.

## Security Price Indexes

Security price indexes measure through time the effect of price change on the value of a portfolio of stocks bought and held by a hypothetical investor (as opposed to the more speculative trader). The portfolio represents stocks of Canadian companies listed on Toronto and Montreal stock exchanges.

The number of shares held for each issue is in proportion to the total number of shares outstanding. Prices in the investor's mining and supplementary stock indexes are Thursday's closing quotations from the exchange (Montreal, Toronto, Vancouver or Calgary) with the highest volume for a particular stock, as reported in the Daily Canadian Data Bank of the Financial Post Computer Services Department. For preferred stocks, prices are monthly weighted averages of the daily closing price in which weights are daily total volume. The price reference base for the indexes is the year 1956, and the indexes express prices as a percentage of price in 1956, arithmetically converted to the 1961 = 100 base.

Revised indexes on the base 1956 = 100 were first presented in the June 1962 issue of this publication. The most important change in the revision of the indexes, apart from the shift in the price reference base, was the classification of stocks according to the Standard Industrial Classification. In the continuing major group Industrials, 4 sub-groups (Mill-ing and Grains, Food and Allied Products, Machinery and Equipment, and Building Materials) were replaced by 8 new sub-groups (Foods, Printing and Publishing, Primary Metals, Metal Fabricating, Non-metallic Minerals, Chemicals, Construction and Retail Trade). The remaining 5 sub-groups of the former index, viz., Industrial Mines, Beverages, Textile and Clothing, Pulp and Paper, and Oils (renamed Petroleum) were continued. The major group utilities was continued but the Pipelines index was added as a sub-group and the previous Power and Traction sub-group was replaced by two new sub-groups, viz., Electric Power and Gas Distribution. A major group Finance was composed of the former major group Banks and the former supplementary index Investment and Loan. Constant weights which were previously limited to major groups, were extended to sub-groups. Weights in the index continue to be based on shares outstanding.

A revision of the Security Price Indexes to the 1971 = 100 base is under development.

For the list of stocks currently included in the Investors Index and Preferred Index, see *Prices and Price Indexes* for March 1974.

## Price Indexes of Machinery and Equipment

In response to the need of users wishing either to correct expenditure data of machinery and equipment for price change or to make comparison of commodity movement, a system of machinery and equipment indexes has been under development for a number of years. This is a system of industry indexes relating to types of equipment purchases made by establishments belonging to industries as defined by the 1960 Standard Industrial Classification.

## Indices des cours des valeurs mobilières

Les indices des cours des valeurs mobilières mesurent dans le temps l'incidence du mouvement des prix sur la valeur d'un portefeuille de titres achetés et détenus par un actionnaire hypothétique (par opposition au spéculateur). Le portefeuille comprend des actions de sociétés canadiennes cotées à la Bourse de Toronto et de Montréal.

Le nombre d'actions détenues pour chaque émission est proportionnel au nombre total d'actions en circulation. Les indices des prix des titres miniers et les indies supplémentaires sont les cours de fermeture de jeudi (Montréal, Toronto, Vancouver et Calgary) affichant le volume le plus élevé pour une valeur en particulier, d'après la Banque des données canadiennes quotidiennes du Service de l'informatique du *Financial Post*. Pour les actions privilégiées, les prix sont les moyennes pondérées mensuelles des cours de clôture de chaque jour et les poids, le volume quotidien total. La période de référence pour les indices est l'année 1956 et les indices représentent les prix exprimés en pourcentage des prix de 1956 recalculé sur la base 1961 = 100.

Les indices révisés sur la base 1956 = 100 ont été publiés pour la première fois dans la livraison de juin 1962 de cette publication. La modification la plus importante à la révision de l'indice, à part le changement de la période de référence, a été le classement des actions d'après la Classification des activités économiques. Dans le cas du grand groupe des valeurs industrielles, 4 sous-groupes (minoterie et céréales, aliments et produits connexes, machines et matériel et matériaux de construction) ont été remplacés par 8 nouveaux sous-groupes (aliments, imprimerie et édition, métaux primaires, produits métalliques, minéraux non métalliques, produits chimiques, construction et commerce de détail). On a conservé les 5 autres sous-groupes de l'ancien indice: mines industrielles, boissons, textiles et habillement, pâtes et papiers, et huiles (sous la désignation de pétrole). Le grand groupe de services d'utilité publique a été conservé mais l'indice des pipelines a été ajouté comme sous-groupe et l'ancien sous-groupe d'énergie et traction a été remplacé par deux nouveaux sous-groupes: l'énergie électrique et la distribution du gaz. Le nouveau grand groupe "Finances" est composé de l'ancien grand groupe banques et de l'ancien indice supplémentaire investissements et prêts. Les facteurs constants de pondération qui étaient autrefois limités aux grands groupes s'appliquent maintenant aux sous-groupes. Les facteurs de pondération de l'indice continuent à être basés sur les actions en circulation.

On prépare actuellement une révision des Indices des cours des valeurs mobilières sur la base 1971 = 100.

La liste des titres repris actuellement dans les indices des valeurs de placements et dans les indices des valeurs privilégiées se trouve dans *Prix et indices des prix* de mars 1974.

## Indices des prix des machines et du matériel

Afin de répondre au besoin des utilisateurs qui désirent réviser les données sur les dépenses en machines et en matériel en fonction des changements de prix ou établir une comparaison du mouvement des marchandises, on prépare depuis un certain nombre d'années un système d'indies des prix des machines et du matériel. Il s'agit d'un système d'indices par industrie ayant trait aux genres d'achats de matériel des établissements qui font partie des industries définies dans la Classification type des industries de 1960.

The base-weighted indexes give an estimate of how much more, or less, it would cost today to purchase a group of machines specified for a particular base period.

The interim time base for the indexes is 1968=100 and most of the data from which weighting patterns were derived came from 1968 or nearby years. Such data were usually supplied by major purchasers.

Conceptually purchasers' prices should be utilized in such indexes but because of a number of practical problems, manufacturers' selling prices were usually used. Such prices were then corrected as relevant for duty, exchange and federal sales tax.

Foreign prices utilized in the index are either U.S. Bureau of Labour Statistics commodity indexes or Prices Division collections from manufacturers most of whom reside in the United States.

The first industry index was released mid-1971 and related to purchases by the construction industry. Indexes for other industries will be released from time to time as they become available. In the interim preliminary indexes for a number of other industries are available on request. Certain commodity indexes which exclude adjustments for exchange, duty and federal sales tax can also be provided on request.

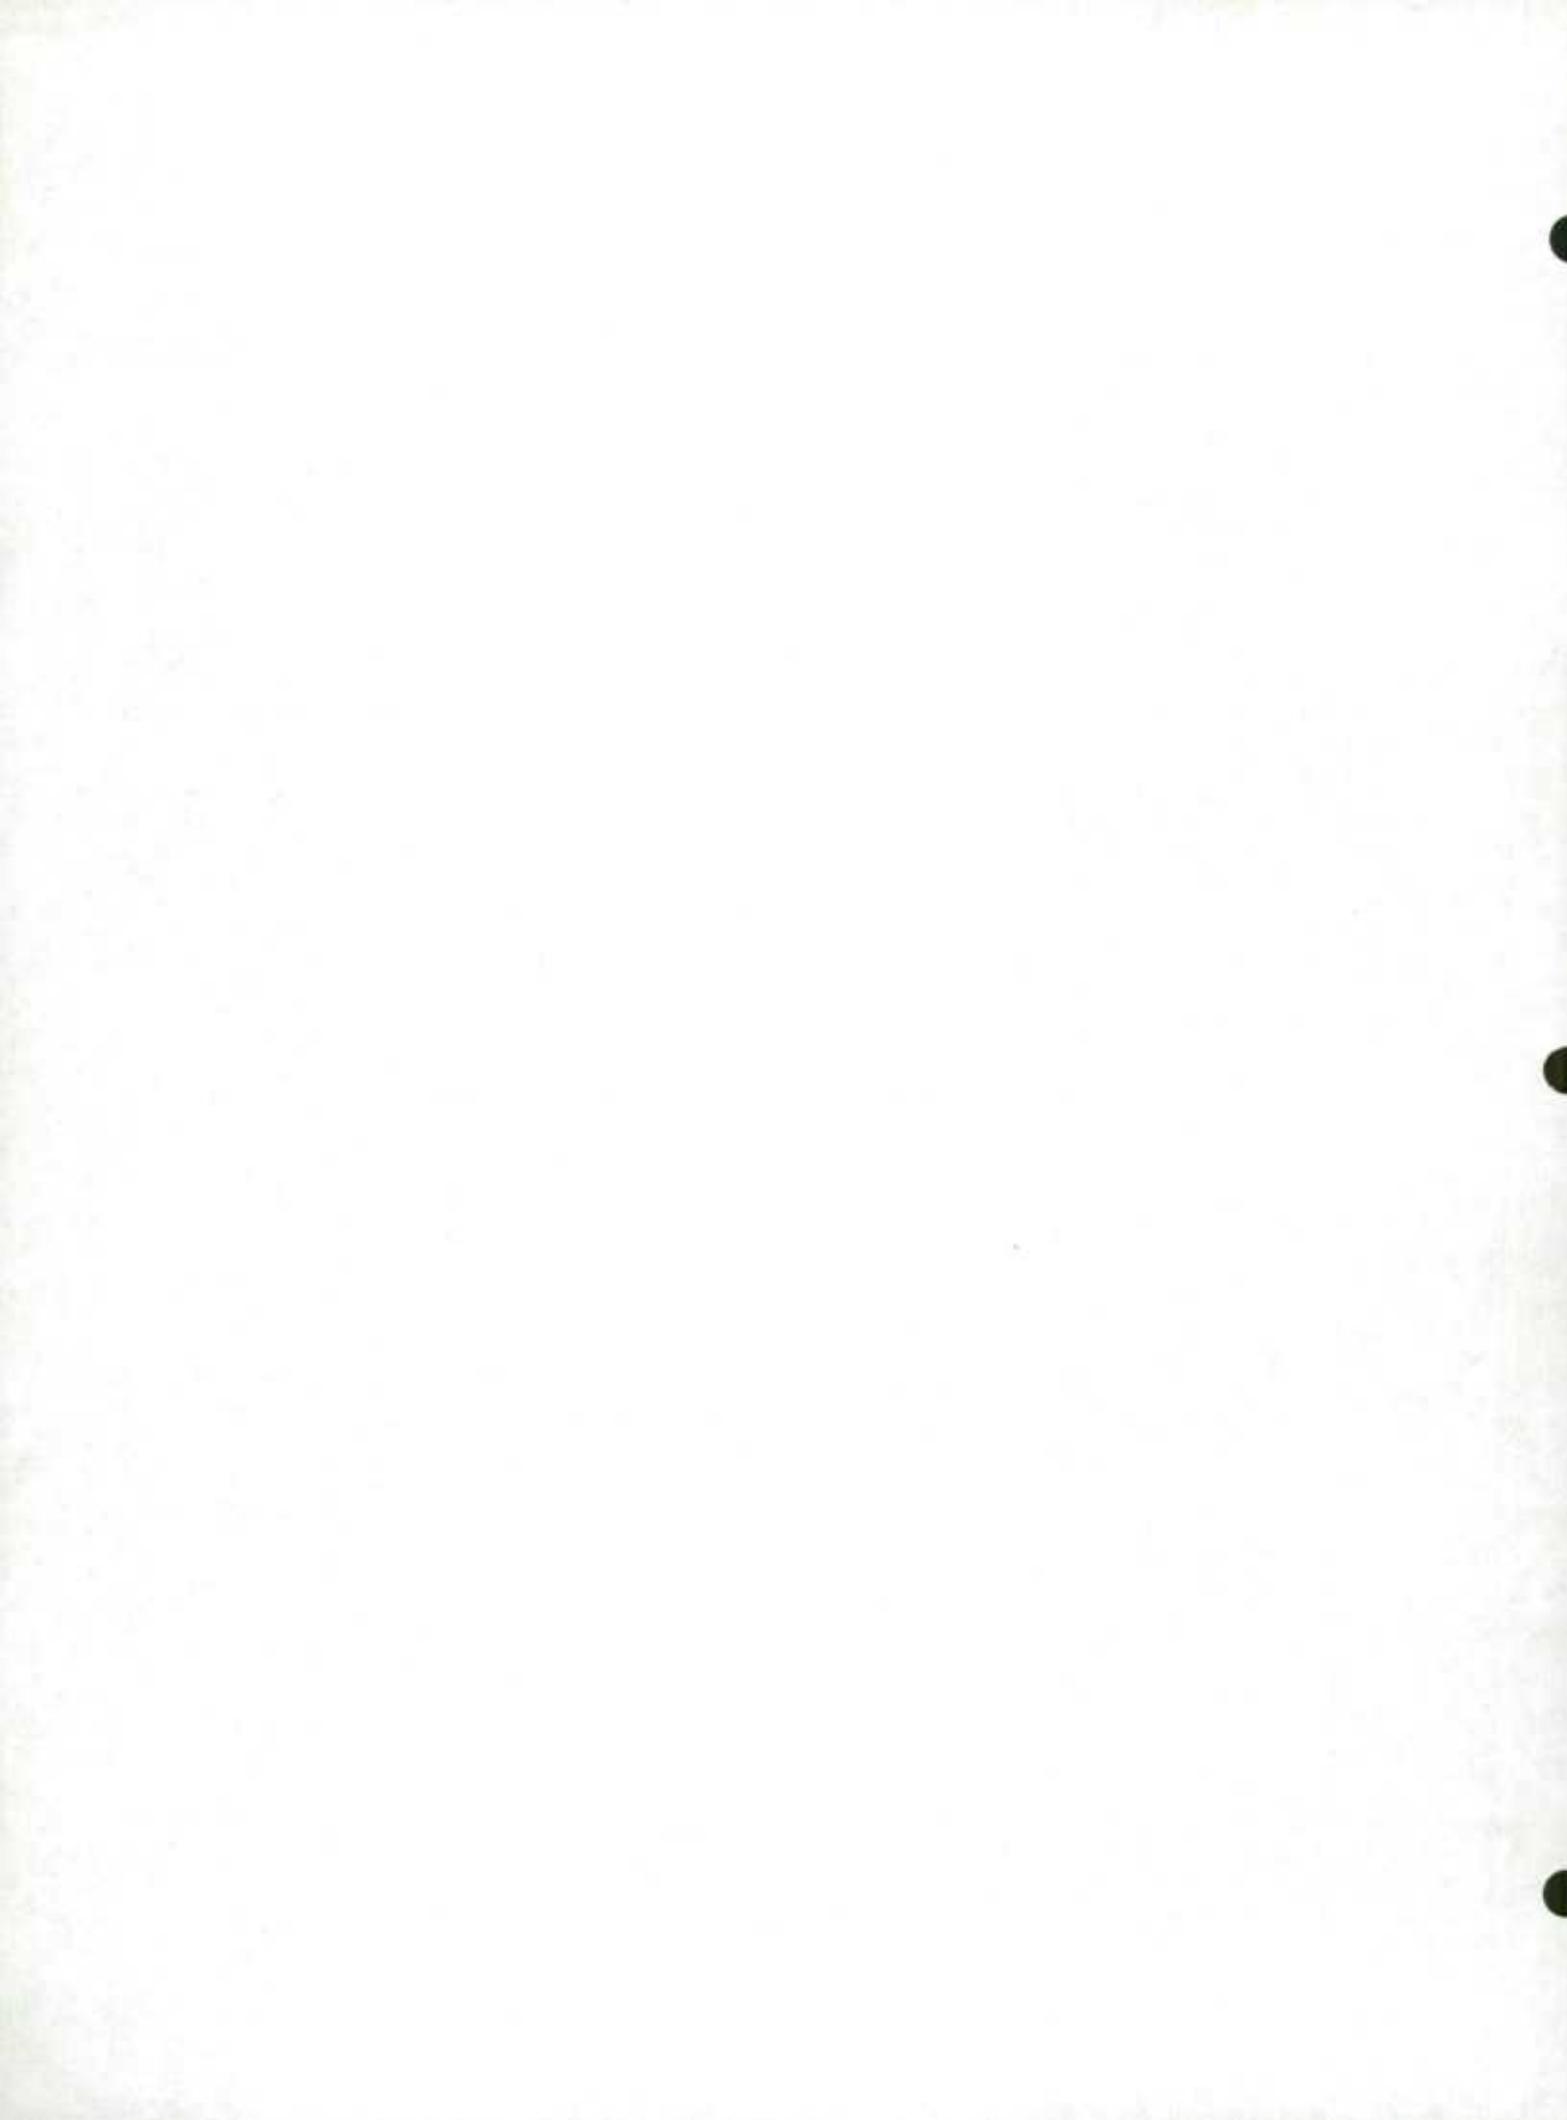

Les indices pondérés en fonction de la base donnent une estimation de la différence du prix d'achat d'un groupe de machines déterminé pour une période de base donnée.

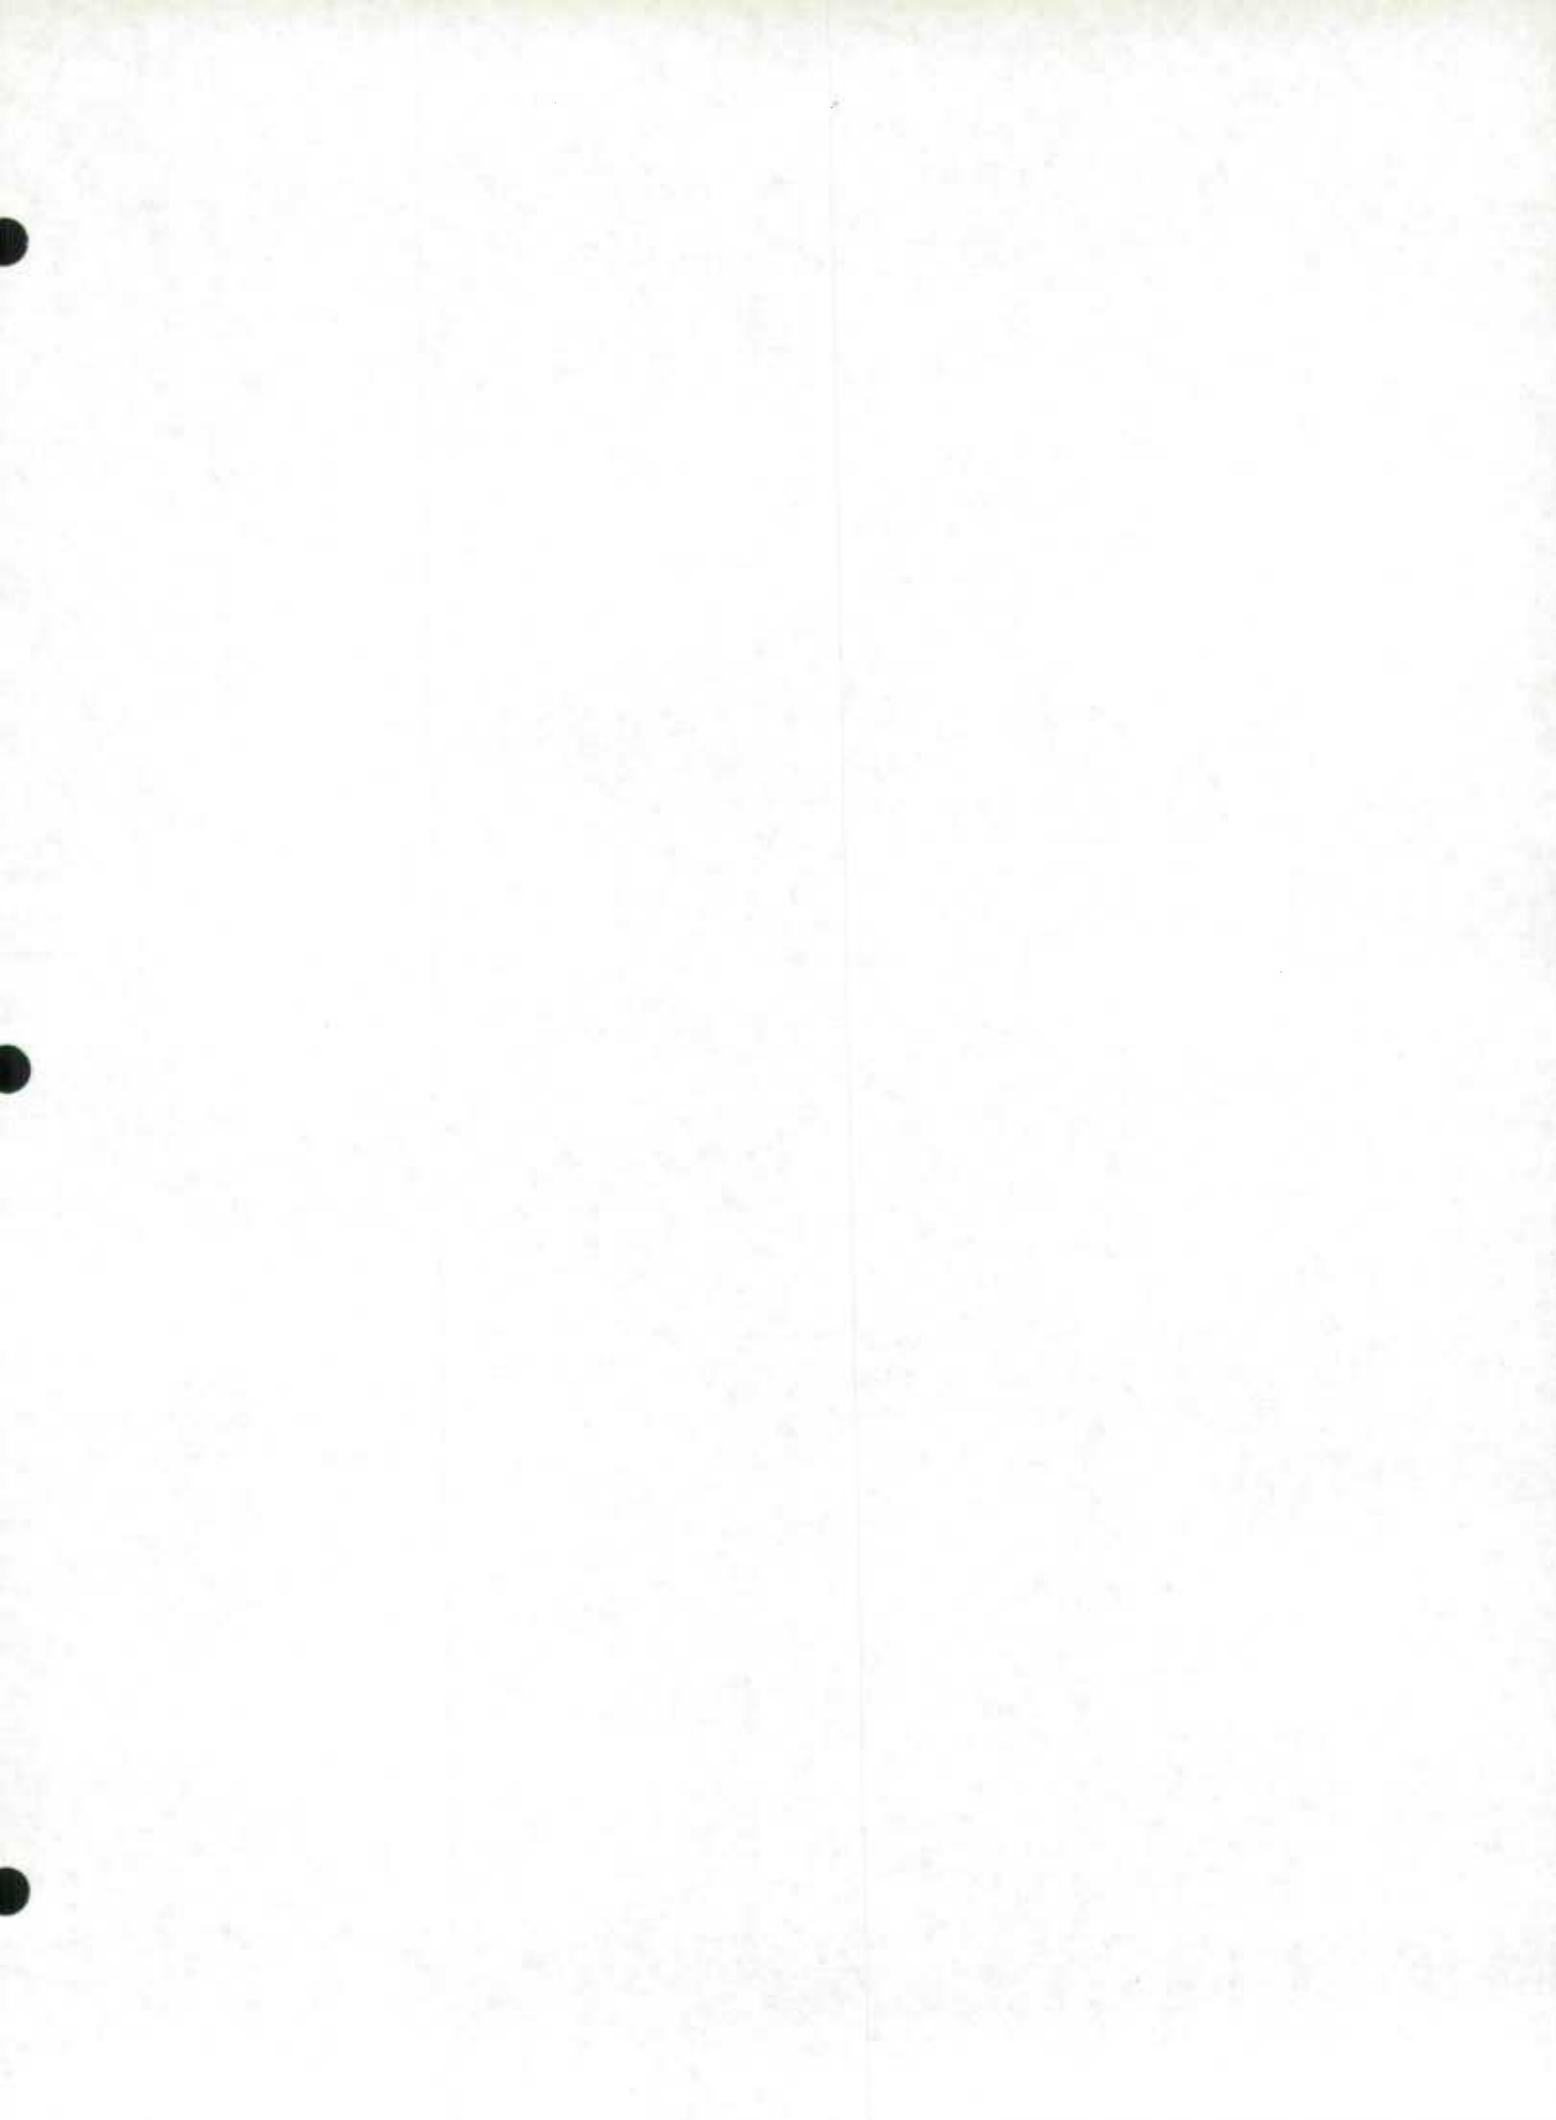

La base provisoire pour les indices est 1968=100. La plupart des données dont on a extrait les facteurs de pondération dataient de 1968 environ. D'habitude, ces données étaient fournies par les principaux acheteurs.

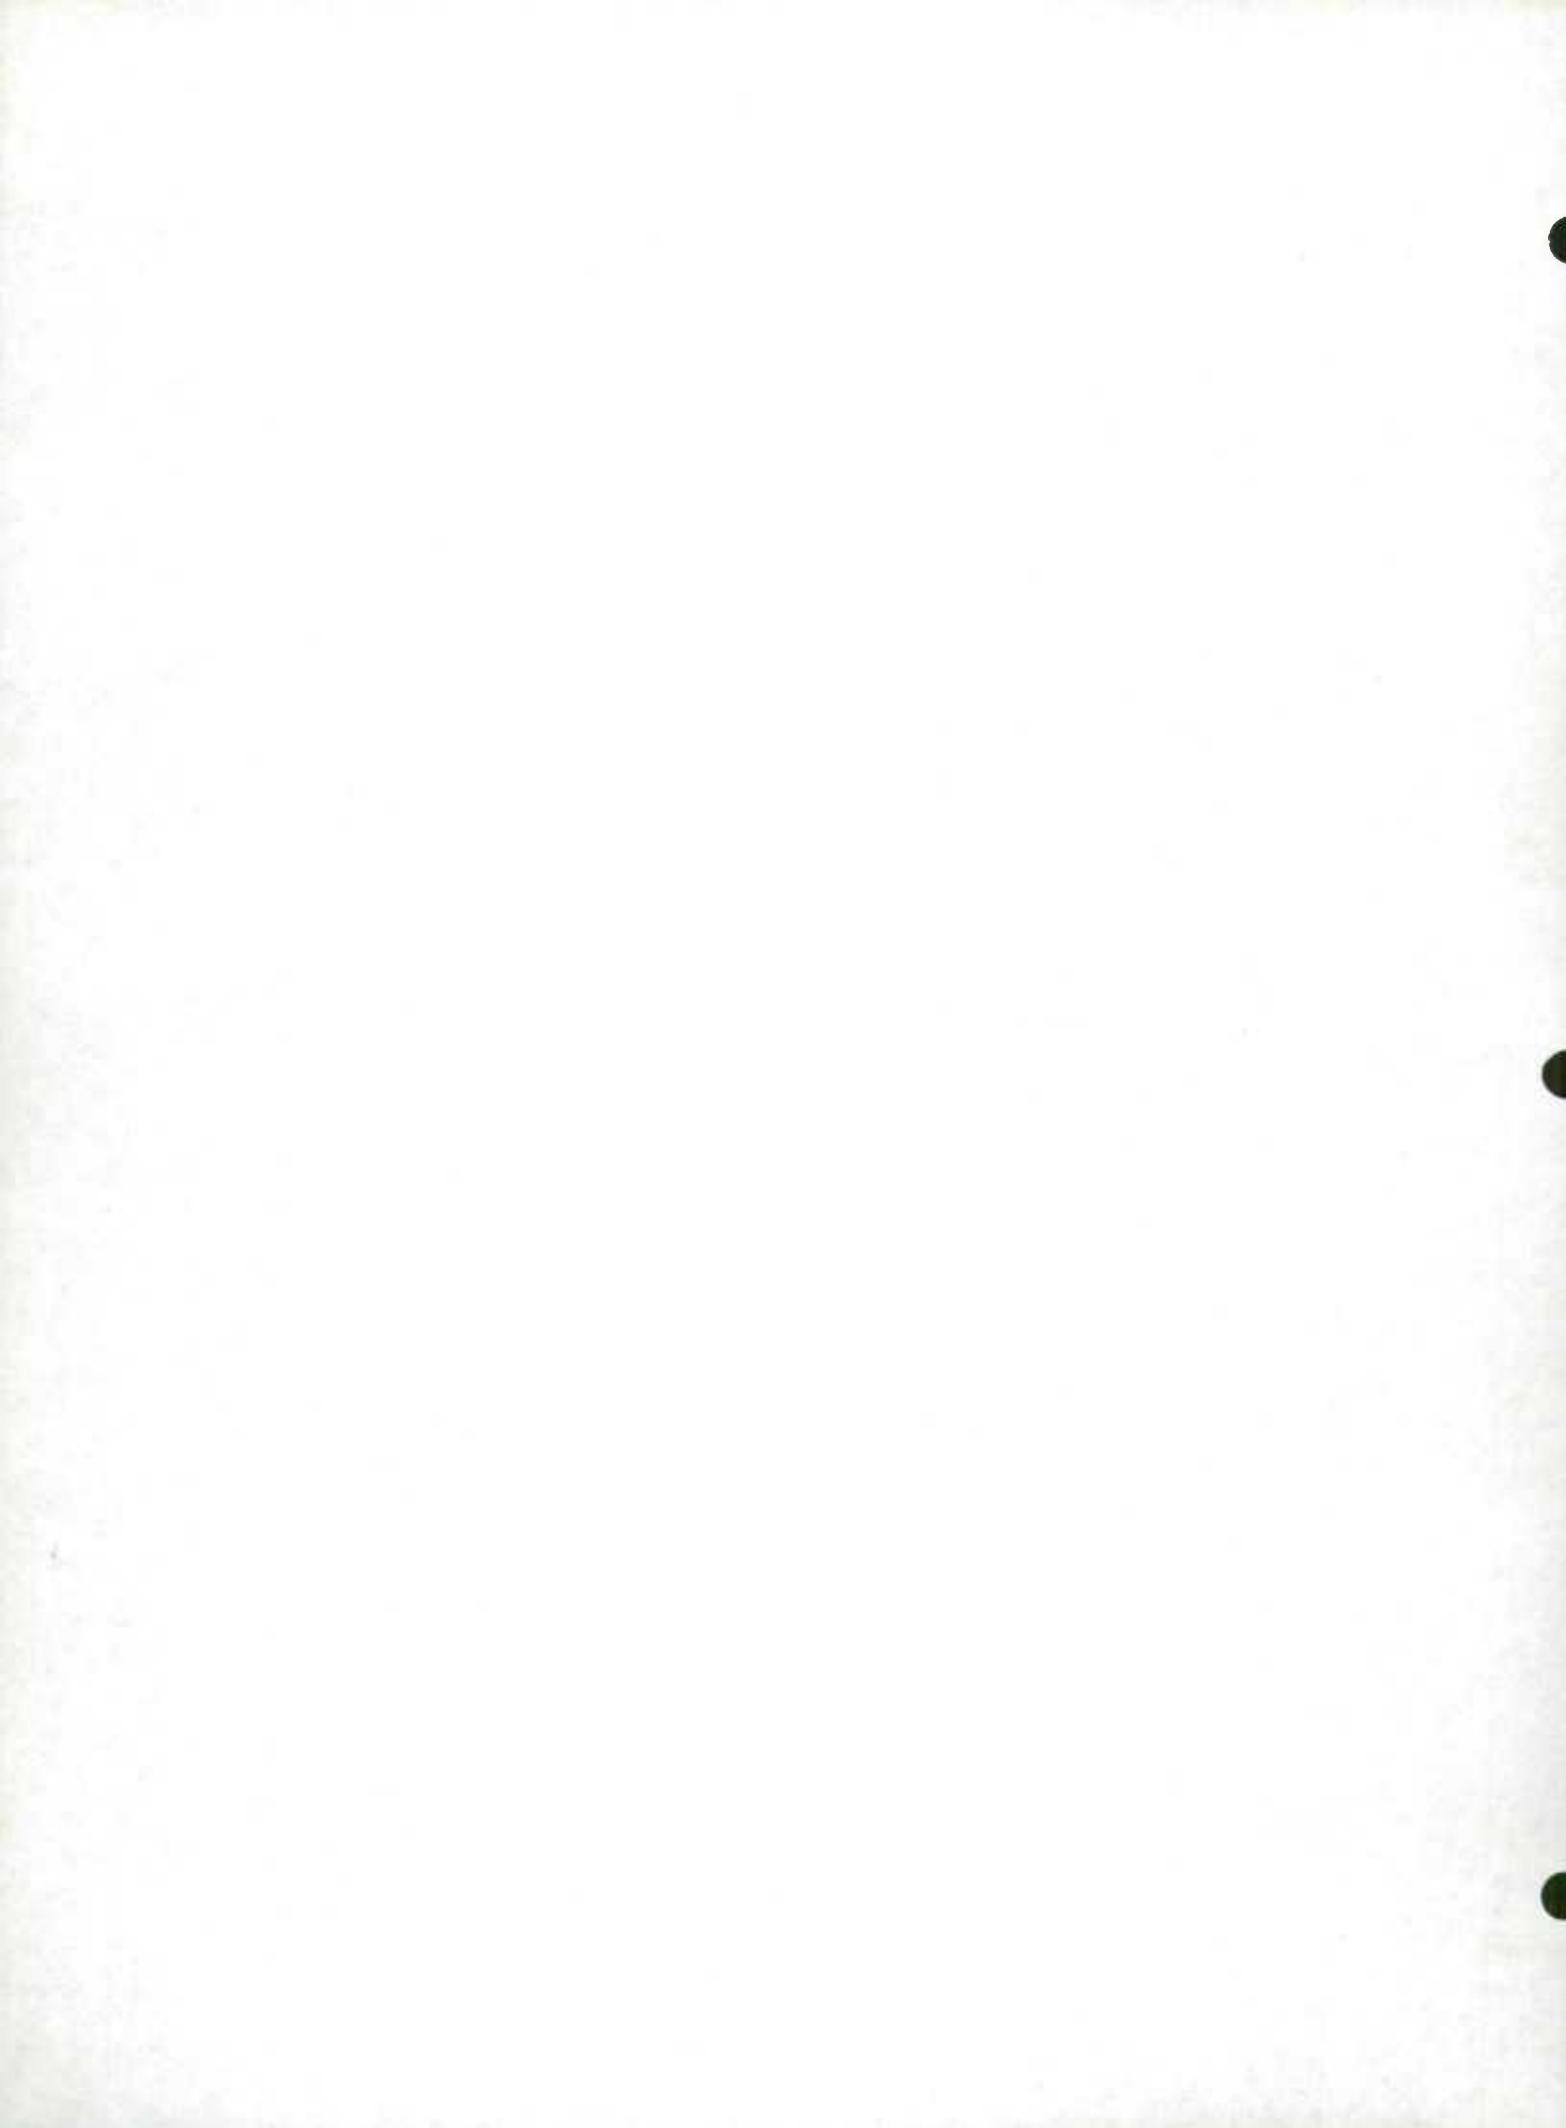

Du point de vue conceptuel, on devrait utiliser les prix des acheteurs dans ce genre d'indices, mais on a habituellement employé les prix de vente de fabricants pour des questions d'ordre pratique. On a ensuite apporté à ces prix les corrections appropriées pour les droits de douane, le change et la taxe de vente fédérale.

Les prix étrangers utilisés dans l'indice sont les indices de prix des marchandises du *U.S. Bureau of Labour Statistics* ou ceux que la Division des prix a recueillis auprès des fabricants dont la majorité réside aux États-Unis.

Le premier indice par industrie a été publié au milieu de 1971; il se rapporte aux achats de l'industrie de la construction. Les indices des autres industries seront publiés de temps à autre, à mesure qu'ils seront disponibles. En attendant, on peut obtenir sur demande les indices préliminaires pour un certain nombre d'autres industries. Il en est de même pour certains indices de prix de marchandises, compte non tenu des ajustements pour le change, les droits de douane et la taxe de vente fédérale.
