## Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

### How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Client Services Unit,  
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 1-613-951-9606) or to the Statistics Canada Reference Centre in:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)
Montréal	(1-514-283-5725)	Edmonton	(1-403-495-3027)
Ottawa	(1-613-951-8116)	Calgary	(1-403-292-6717)
Toronto	(1-416-973-6586)	Vancouver	(1-604-666-3691)
Winnipeg	(1-204-983-4020)		

Toll-free access is provided for all users who reside outside the local dialing area of any of the Regional Reference Centres.

National Enquiries Line	1-800-263-1136
National Telecommunications Device for the Hearing Impaired	1-800-363-7629
National Toll-free Order-only Line (Canada and United States)	1-800-267-6677

### How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Ave., Ottawa, Ontario, K1A 0T6.

(1-613-951-7277)  
Facsimile Number (1-613-951-1584)  
Toronto Credit Card Only (1-416-973-8018)

### Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and services to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

## Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordnolingue et le système d'extraction de Statistique Canada.

### Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée à la:

Sous-section du service à la clientèle,  
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 1-613-951-9606) ou au Centre de consultation de Statistique Canada à:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)
Montréal	(1-514-283-5725)	Edmonton	(1-403-495-3027)
Ottawa	(1-613-951-8116)	Calgary	(1-403-292-6717)
Toronto	(1-416-973-6586)	Vancouver	(1-604-666-3691)
Winnipeg	(1-204-983-4020)		

Un service d'appel interurbain sans frais est offert à tous les utilisateurs qui habitent à l'extérieur des zones de communication locale des Centres régionaux de consultation.

## Note of Appreciation

*Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.*

## Note de reconnaissance

*Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.*

**SYMBOLS**

The following standard symbols are used in Statistics Canada publications:

- .. figures not available
- ... figures not appropriate or not applicable
- nil or zero
- amount too small to be expressed
- p preliminary figures
- r revised figures
- x confidential to meet secrecy requirements of the Statistics Act

**NOTE ON CANSIM**

Most of the data published in *The Consumer Price Index* (Catalogue 62-001) and *Consumer Prices and Price Indexes* (Catalogue 62-010) is also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). In general, CANSIM provides a longer historical series. For further information on CANSIM call (613) 951-8200 or write to Electronic Data Marketing Division, Statistics Canada, R.H. Coats Building, Ottawa, K1A 0T6.

**Additional Information and Related Publications**

Detailed information on the methodology and concepts of the CPI is contained in *The Consumer Price Index Reference Paper, Updating Based on 1992 Expenditures*, (Occasional), Catalogue 62-553. Information regarding the Family Expenditure Surveys is contained in two volumes: *Family Food Expenditure in Canada, 1992*, Catalogue 62-554, and *Family Expenditure in Canada, 1992*, Catalogue 62-555.

Consumer Price Index series for Canada, the provinces, Whitehorse, Yellowknife and sixteen cities, in addition to other related price information are also available in *The Consumer Prices Indexes*, (Monthly), Catalogue 62-001. In addition, selected educational and promotional material is available. For these and further information, contact the Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 (613-951-9606).

**This publication was prepared under the direction of:**

Louis Marc Ducharme, Director, Prices Division

Margaret Parlor, Chief, Consumer Prices Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

**SIGNES CONVENTIONNELS**

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles
- ... n'ayant pas lieu de figurer
- néant ou zéro
- nombres infimes
- p nombres provisoires
- r nombres rectifiés
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret

**NOTE CONCERNANT CANSIM**

La plupart des données publiées dans *L'indice des prix à la consommation* (n° 62-001 au catalogue) et *Prix à la consommation et indices des prix* (n° 62-010 au catalogue) peuvent être obtenues, sous forme lisible par machine, de CANSIM (Système canadien d'information socio-économique). Les séries historiques sont généralement plus longues dans CANSIM. Pour plus d'information sur CANSIM, signaler (613) 951-8200 ou écrire à Division du marketing, Statistique Canada, Immeuble R.H. Coats, Ottawa, K1A 0T6.

**Renseignements supplémentaires et publications connexes**

Les méthodes et les concepts de l'IPC sont décrits en détail dans le *Document de référence de l'indice des prix à la consommation, Mise à jour fondée sur les dépenses de 1992*, (hors série), n° 62-553 au catalogue. Des renseignements au sujet des enquêtes sur les dépenses des familles se retrouvent dans deux volumes distincts: *Dépenses alimentaires des familles au Canada, 1992*, n° 62-554 au catalogue; et *Dépenses des familles au Canada, 1992*, n° 62-555 au catalogue.

Des séries d'indices des prix à la consommation pour le Canada, les provinces, Whitehorse, Yellowknife et seize villes, ainsi que d'autres renseignements sur les prix sont publiés dans *L'indice des prix à la consommation*, (mensuel), n° 62-001 au catalogue. De plus, certains documents éducatifs et publicitaires sont disponibles. Pour plus de renseignements, communiquer avec la Section des prix à la consommation, Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6 (613-951-9606).

**Cette publication a été rédigée sous la direction de:**

Louis Marc Ducharme, Directeur, Division des prix

Margaret Parlor, Chef, Section des prix à la consommation

Le papier utilisé dans la présente publication répond aux exigences minimales de l'American National Standard for Information Sciences – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

## Highlights

### Consumer Price Behavior

#### Third Quarter 1995

#### Trends in Consumer Prices

According to the Consumer Price Index (CPI), inflation continued to slow in the third quarter of 1995. Consumers paid 0.1% more for goods and services in September as compared to June. Prices rose 0.5% in the second quarter and 1.1% in the first quarter.

Movements of the seasonally adjusted CPI confirm a slower rate of price increase in the third quarter. The increase between June and September was 0.3%, lower than the rates of 0.5% in the second quarter and 0.7% in the first quarter.

While quarterly movements peaked in the first quarter, year-over-year movements peaked in the second quarter. The average of the annual increases for the months making up the third quarter was 2.4%, down from 2.7% in the second quarter. The smaller rise in the third quarter was associated with a slowing of price increases for food and transportation services.

#### Major Components (not seasonally adjusted)

Much of the upward pressure on the All-items index in the third quarter came from an increase in recreation, education and reading charges. Further pressures came from advances in clothing prices and in household operations and furnishings charges. A large part of this overall increase was offset by a decline in food prices. The heaviest weighted index, Shelter, remained unchanged.

The conspicuous 2.5% advance in the Recreation, Education and Reading index resulted chiefly from relatively large increases in charges for travelling accommodation (17.9%) and post-secondary tuition fees (7.3%).

Traveller accommodation rates rose sharply during the second and third quarters, the tourist season, as foreigners visited Canada in record numbers. The weakening of the Canadian dollar over the course of the year likely contributed to the increase in the number of non-resident visitors.

Tuition fees have become a growing source of university financing. According to Statistics Canada's University Finances Surveys, tuition fees have risen from 14.5% of operating funds in 1983 to 22.7% in 1994. While fee increases averaged 7.3% this year, fees remained unchanged at Québec universities but rose by 10.0% and 11.0% at institutions in Ontario and Alberta.

The Clothing and Footwear index increased by 1.5% in the third quarter. Much of this comparatively strong performance came in late summer as prices fell in May, June and July. Prices of women's and men's clothing rose by 1.6% and 2.5% respectively. These price increases were partly attributable to rising prices of raw materials, especially cotton and wool. Further price increases were recorded for footwear (2.1%) and jewellery (3.3%). A small proportion of the overall effect was dampened by a drop of 4.3% in the prices of children's clothing.

An addition to the upward thrust came from an increase of 0.7% in charges related to household operations and furnishings. The main contributors were rising prices for paper supplies, furniture, certain household textiles and pet food. Prices of household paper supplies have risen in every month of 1995 with their levels in September standing 16.1% above those a year ago.

The Food index fell by 1.3% as prices of food from grocery stores declined by 2.0% and those for food from restaurants

## Faits saillants

### Comportement des prix à la consommation

#### Troisième trimestre de 1995

#### Tendances des prix à la consommation

Selon l'indice des prix à la consommation (IPC), l'inflation a continué de ralentir au troisième trimestre de 1995. Les consommateurs ont payé leurs biens et services 0,1% plus cher en septembre qu'en juin. Les prix ont progressé de 0,5% au deuxième trimestre et de 1,1% au premier.

Les mouvements de l'IPC désaisonnalisé confirment un ralentissement du taux de progression des prix au troisième trimestre. L'augmentation de juin à septembre a été de 0,3%, contre 0,5% au deuxième trimestre et 0,7% au premier.

Les mouvements trimestriels ont atteint leur sommet au premier trimestre alors que les mouvements d'une année à l'autre ont culminé au second trimestre. La moyenne des augmentations annuelles a été de 2,4% pour les mois du troisième trimestre, en baisse par rapport au 2,7% pour ceux du deuxième. Si la progression a été plus faible au troisième trimestre, c'est la conséquence d'un ralentissement de la progression de prix des aliments et des services de transport.

#### Composantes principales (indices non désaisonnalisés)

Une bonne part de l'effet d'entraînement qui s'est exercé sur l'indice d'ensemble au troisième trimestre est venue de l'augmentation qui a touché les loisirs, la formation et la lecture. D'autres pressions ont résulté de la majoration du prix de l'habillement et des frais consacrés aux dépenses et à l'équipement du ménage. Une bonne part de cette augmentation d'ensemble a été épongée par une diminution du prix des aliments. L'indice à la pondération la plus forte, soit celui du logement, est demeuré inchangé.

La hausse remarquable de 2,5% de l'indice des loisirs, de la formation et de la lecture est surtout la conséquence d'augmentations relativement considérables des frais pour l'hébergement des voyageurs (17,9%) et des frais de scolarité postsecondaire (7,3%).

Les tarifs d'hébergement des voyageurs ont subi une hausse marquée au deuxième et au troisième trimestre, avec la présence au Canada du nombre record de visiteurs étrangers. L'affaiblissement du dollar canadien au cours de l'année a vraisemblablement contribué à l'augmentation du nombre de visiteurs non résidents.

Les frais de scolarité sont une source croissante de financement des universités. Selon les enquêtes de Statistique Canada sur les finances des universités, les frais de scolarité formaient 22,7% des fonds de fonctionnement en 1994, contre 14,5% en 1983. Malgré une moyenne d'augmentations de 7,3% cette année, les frais sont demeurés inchangés dans les universités du Québec, mais ont augmenté de 10,0% et de 11,0% dans les établissements de l'Ontario et de l'Alberta.

L'indice de l'habillement et des chaussures s'accroît de 1,5% au troisième trimestre. Une bonne part de cette performance comparativement vigoureuse est survenue à la fin de l'été, car les prix ont chuté en mai, en juin et en juillet. Le prix des vêtements pour femmes et pour hommes a augmenté de 1,6% et 2,5% respectivement. Ces hausses sont en partie imputables aux augmentations du prix des matières brutes, et en particulier du coton et de la laine. Il y a eu d'autres augmentations de prix pour les chaussures (2,1%) et les bijoux (3,3%). L'effet d'ensemble a été tempéré dans une faible proportion par un repli de 4,3% du prix des vêtements pour enfants.

Un autre facteur qui a contribué à la poussée des prix a été l'augmentation de 0,7% qui a touché les dépenses et l'équipement du ménage. Les principaux facteurs ont été la hausse du prix des articles en papier, des meubles, de certains articles ménagers en matière textile et de la nourriture pour animaux domestiques. Le prix des articles ménagers en papier a monté chaque mois en 1995, et se situait en septembre à 16,1% de plus qu'il y a un an.

L'indice des aliments a baissé de 1,3%, à la faveur d'un repli de 2,0% du prix des aliments achetés à l'épicerie et d'une hausse de 0,6% de ceux

rose by 0.6%. Much of this decline in grocery store prices came from a substantial 33.5% drop in fresh vegetable prices. An above average supply of fresh vegetables from domestic sources contributed to this price decline. Higher prices for pork, chicken, processed meat and bakery products prevented a further decline in the prices of food purchased from grocery stores.

The Transportation index fell by 0.1% as the impact of a drop in gasoline prices (-4.0%) was effectively eroded by increases in auto insurance premiums, in fares relating to public modes of transportation and in the rental of auto vehicles. Gasoline prices fell steadily in the summer months (June, July and August) but rose slightly in September. Most of the decline was reflected in the frequent occurrences of price wars breaking out across the country. The domestic market was adjusting to a surplus of crude oil in the international market as indicated by a decline in crude oil prices since May of this year.

Auto insurance premiums rose by 1.6% in the third quarter. Automobile owners have seen unusually large increases in this category of spending over the past three years. Between September 1994 and September 1995, premiums have risen by 7.8%, more than three times the increase in the All-items CPI over the same period.

The consumer also paid more to travel by public modes of transportation. Local bus fares rose in some cities in Ontario as operating agencies anticipated a drop in provincial subsidies. Air fares rose also by a comparatively small 2.0% in the third quarter with most of this taking place in July when rates traditionally rise. Auto vehicle rental rates also registered a largely seasonal increase in September.

The Shelter index remained unchanged in the third quarter. Higher charges for rental accommodation and water were offset by a drop in owned accommodation charges mostly for mortgage interest, maintenance and repairs and new houses.

A fairly pronounced price increase was reported for wine purchased from stores. Prices dropped for personal care supplies.

### Goods and Services

The Goods index fell by 0.5% in the third quarter following increases of 1.4% and 0.5% in the first and second quarters respectively. The decline in the latest quarter was largely due to a drop of 1.3% in the prices of non-durables traceable mostly to lower prices of fresh vegetables, gasoline and personal care supplies. At the same time, the index for Semi-durables and Durables rose by 1.1% and 0.2% respectively. The Services index, on the other hand, moved up by 0.9% following increases of 0.6% reported for both the first and second quarter.

### Price Movements across Provinces

In the third quarter, the CPI fell in four provinces ranging from -0.3% to -0.1% and rose in the remaining six with increases ranging from 0.2% to 0.8%. The biggest declines (-0.3%) were registered in Newfoundland and New Brunswick. The largest increase was posted in Prince Edward Island. At the same time, increases in Whitehorse and Yellowknife were 0.9% and 1.1% respectively.

### International Comparisons

Among the seven most industrialised countries of the world (G7 countries), Canada's overall price performance (2.3%) between September 1994 and September 1995 ranked in the middle. Japan (0.2%), Germany (1.6%) and France (2.0%) posted lower rates. Over the second and third quarter, Canada's inflation was marginally lower than that of the United States. Canada has registered lower annual rates of inflation compared to the United States since the start of 1992 (see Table 12 of this publication).

des aliments achetés au restaurant. Une bonne part de ce recul du prix dans les épicereries vient d'une baisse considérable de 33,5% du prix des légumes frais. Des approvisionnements intérieurs supérieurs à la moyenne ont contribué à cette baisse de prix. La hausse du prix du porc, du poulet, de la viande traitée et des produits de boulangerie a empêché un recul encore plus prononcé du prix des aliments achetés à l'épicerie.

L'indice des transports s'est replié de 0,1%, l'incidence d'une baisse du prix de l'essence (-4,0%) ayant été effectivement érodée par l'augmentation des primes d'assurance automobile, des tarifs liés aux modes publics de transport et des frais de location des véhicules automobiles. Le prix de l'essence n'a pas cessé de diminuer tout au long de l'été (juin, juillet et août), mais il a augmenté légèrement en septembre. La plus grande partie du recul s'est reflétée dans de fréquentes guerres de prix qui ont éclaté dans tout le pays. Le marché intérieur s'ajustait à un surplus de pétrole brut sur le marché international, comme en témoigne la baisse du prix du pétrole brut depuis mai de cette année.

Les primes d'assurance automobile ont progressé de 1,6% au troisième trimestre. Les propriétaires d'automobile ont subi des augmentations inhabituellement fortes dans cette catégorie de dépenses au cours des trois dernières années. Entre septembre 1994 et septembre 1995, les primes ont monté de 7,8%, ce qui est plus du triple de la progression de l'IPC d'ensemble sur la même période.

Le consommateur a également dû déboursier davantage pour le transport public. Les tarifs d'autobus locaux ont augmenté dans certaines villes de l'Ontario, où les sociétés d'exploitation s'attendaient à une baisse des subventions provinciales. Les tarifs aériens ont aussi augmenté d'un pourcentage comparativement faible de 2,0% au troisième trimestre, le gros de l'augmentation ayant eu lieu en juillet, mois traditionnel pour les hausses de tarifs. Les taux de location de véhicules automobiles ont aussi accusé une augmentation essentiellement saisonnière en septembre.

L'indice du logement est demeuré inchangé au troisième trimestre. La hausse des frais du logement en location et des tarifs d'eau a été effacée par une chute des frais du logement en propriété, surtout pour ce qui est des intérêts hypothécaires, de l'entretien et des réparations, et des maisons neuves.

On a signalé une augmentation de prix assez prononcée pour le vin acheté au magasin. Le prix des articles de soins personnels a baissé.

### Biens et services

L'indice des biens a reculé de 0,5% au troisième trimestre, après des augmentations de 1,4% et de 0,5% au premier et au deuxième trimestre respectivement. Le recul du dernier trimestre est essentiellement le fait d'une baisse de 1,3% du prix des biens non durables, qui est essentiellement imputable à la diminution du prix des légumes frais, de l'essence et des articles de soins personnels. En même temps, l'indice des biens semi-durables et des biens durables a progressé respectivement de 1,1% et de 0,2%. L'indice des services, par contre, a augmenté de 0,9% après les gains de 0,6% signalés pour le premier et le deuxième trimestre.

### Mouvements de prix d'une province à l'autre

Au troisième trimestre, l'IPC a reculé dans quatre provinces, dans une fourchette de -0,3% à -0,1%, et augmenté dans les six autres, dans une fourchette de 0,2% à 0,8%. Les reculs les plus marqués (-0,3%) ont été observés à Terre-Neuve et au Nouveau-Brunswick. L'augmentation la plus forte a eu lieu à l'Île-du-Prince-Édouard. En même temps, les augmentations à Whitehorse et à Yellowknife ont été de 0,9% et de 1,1% respectivement.

### Comparaisons internationales

Le Canada s'est classé au milieu des sept pays les plus industrialisés du monde (les pays du G-7) pour la performance de ses prix (2,3%) entre septembre 1994 et septembre 1995. Le Japon (0,2%), l'Allemagne (1,6%) et la France (2,0%) ont affiché des taux plus faibles. Au premier et au troisième trimestre, l'inflation a été légèrement plus faible au Canada qu'aux États-Unis. Le Canada a enregistré de plus faibles taux annuels d'inflation que les États-Unis depuis le début de 1992 (voir le tableau 12 de la présente publication).

## Appendix 1

### THE CONSUMER PRICE INDEX TECHNICAL NOTES

#### Definition

The Consumer Price Index (CPI) is an indicator of the changes in consumer prices experienced by the target population. The CPI measures price change by comparing, through time, the cost of a fixed basket of commodities. This basket is based on the expenditures of the target population in a certain reference period, currently 1992. Since the basket contains commodities of unchanging or equivalent quantity and quality, the index reflects only pure price movements.

Separate CPI's are published for Canada, the ten provinces, Whitehorse and Yellowknife. Some CPI information is also available for an additional sixteen cities. Since the CPI is a measure of price change from one time period to another, it cannot be used to indicate differences in price levels between provinces or cities.

#### Population Coverage

The population targeted by the Consumer Price Index consists of families and individuals living in urban and rural private households. For practical reasons, residents of the Territories outside Whitehorse and Yellowknife are not represented by the index. Previous to January 1995, the target population consisted of private households in Canadian urban centres with a population of 30,000 or more.

#### Time Reference

The CPI compares, in percentage terms, prices in any given time period to prices in the official base period which, at present, is 1986=100. The official time base was changed from 1981=100 to 1986=100 starting with the CPI for June 1990. The change is strictly an arithmetic conversion which alters the index levels but leaves the percentage changes between any two periods intact, except for differences in rounding.

#### Percent Versus Index Point Changes

The movements of the indexes from one month to another are expressed as percent changes rather than changes in index points. Index point changes are affected by the level of the index which, in turn, depends on the time base of the particular index. The percentage change between any two time periods can be readily calculated by dividing the index point difference between the two time periods by the index for the earlier period and multiplying the result by one hundred.

#### Price Coverage

The prices used in the CPI calculation are final prices, inclusive of excise and other indirect taxes paid by consumers. In particular, they include the Goods and Services Tax as well as provincial retail sales taxes wherever applicable. It follows that the CPI can change as a result of modifications to any of these taxes.

The selection of commodities and the outlets from which prices are collected is judgmental, other than for rents. The number of prices required for a given commodity depends on the importance and the nature of the commodity. The samples are

## Appendice 1

### L'INDICE DES PRIX À LA CONSOMMATION NOTES TECHNIQUES

#### Définition

L'indice des prix à la consommation (IPC) est un indicateur des variations des prix à la consommation payés par la population cible. L'IPC mesure la variation des prix en comparant, dans le temps, le coût d'un panier fixe de biens et de services. Ce panier est basé sur les dépenses de la population cible au cours d'une période de référence qui est actuellement 1992. Comme ce panier comprend des biens et des services dont la quantité et la qualité ne changent pas ou sont équivalentes, l'indice ne retrace que les mouvements de prix purs.

On publie des IPC distincts pour le Canada, les provinces, Whitehorse et Yellowknife. Certains renseignements sont aussi publiés pour seize autres villes. Comme l'IPC est une mesure de la variation de prix entre deux périodes, il ne peut servir à relever les différences de niveau des prix entre les provinces ou les villes.

#### Champ d'observation de la population

La population couverte par l'indice des prix à la consommation comprend les familles et les personnes vivant dans des ménages privés urbains et ruraux. Pour des raisons pratiques, les résidents des Territoires à l'extérieur de Whitehorse et de Yellowknife ne sont pas représentés. Avant janvier 1995, la population cible comprenait les ménages privés vivant dans les centres urbains du Canada dont la population était de 30 000 habitants ou plus.

#### Période de base

L'IPC compare, en pourcentage, les prix au cours d'une période donnée à ceux de la période de base officielle, qui est actuellement 1986 = 100. On a changé la période de base de 1981 = 100 à 1986 = 100 à compter de l'IPC du mois de juin 1990. Ce changement est uniquement une conversion arithmétique qui modifie le niveau des indices, mais laisse les variations en pourcentage entre deux périodes intactes, à l'exception des différences dues à l'arrondissement.

#### Changements en pourcentage versus changements en points d'indice

Les fluctuations des indices d'un mois à l'autre sont exprimées en pourcentage, plutôt qu'en point d'indice. Les variations en point d'indice sont en fonction du niveau de l'indice qui, à son tour, dépend de la période de base de l'indice en question. Par contre, il est facile de calculer la variation en pourcentage entre deux périodes en divisant la différence en point d'indice entre ces deux périodes par l'indice de la période antérieure, et en multipliant ensuite ce résultat par cent.

#### Champ d'observation des prix

Les prix qui entrent dans le calcul de l'IPC sont les prix finals, ce qui comprend les taxes d'accise et les autres impôts indirects que les consommateurs paient. En particulier, les prix comprennent la taxe sur les produits et les services, ainsi que les taxes de vente au détail provinciales, au besoin. L'IPC peut donc varier à cause des modifications apportées à ces taxes.

La sélection des biens et des services, ainsi que des points de vente où l'on recueille les prix, se fait au jugé, à l'exception des loyers. Le nombre de prix nécessaires pour un bien ou service donné dépend de l'importance et de la nature de celui-ci. L'échantillon est conçu de façon

designed to represent volume selling commodities and outlets. The principal objective of the sample design is to ensure an informative, reliable and impartial picture of consumer inflation at the national and provincial levels.

Price collection for a given month's index is carried out during the first three weeks of the month. Although prices for most CPI commodities are collected monthly, prices for commodities having less frequent price changes (e.g. property taxes and electricity rates) are collected at intervals longer than one month. Special pricings are carried out where there is evidence that significant price changes have occurred between scheduled pricing periods.

### Weights and Linking

The CPI maintains fixed quantitative proportions (weights) between commodities during the life of a given basket. The baskets are updated periodically to take into account changes in consumer expenditure patterns. In January 1995, the basket reflecting the 1992 expenditure patterns replaced the 1986 basket. The continuity of the CPI series is maintained by "linking" the corresponding indexes obtained from consecutive baskets.

The CPI is calculated as a weighted average of specified commodity price indexes. The weights are derived from Family Expenditure Survey data. Text Table 1 compares the expenditure shares of the two most recent CPI baskets, i.e. those of 1992 and 1986. Because both sets of weights are expressed in December 1994 or "link month" prices, the differences reflect the shifts in the relative quantities purchased between the two baskets. The differences are a result of changes in consumer expenditure patterns over time and of the expansion of the population coverage.

When reconstructing or re-aggregating published CPI series, the changes in weights and the linking procedures must be taken into account. For a description of the methodology required to reconstruct or re-aggregate CPI series, see the Consumer Price Index Reference Paper cat. 62-553 Occasional or contact Prices Division.

<sup>1</sup> The 1986 data were adjusted to be comparable with the classification system used for the 1992 basket.

<sup>1</sup> Les données de 1986 ont été modifiées de façon à correspondre au système de classification utilisé pour le panier de 1992

à représenter les produits et services ainsi que les établissements à fort volume de ventes. Le principal objectif du plan de sondage est d'obtenir une image précise, fiable et impartiale de l'inflation représentée par les prix à la consommation aux niveaux national et provincial.

La collecte des prix pour l'indice d'un mois donné se fait pendant les trois premières semaines du mois. Bien que les prix de la plupart des biens et services entrant dans l'IPC soient recueillis chaque mois, les prix des biens ou des services ayant des variations de prix moins fréquentes (impôts fonciers, tarifs de l'électricité, par exemple) sont recueillis à des intervalles dépassant un mois. Des relevés spéciaux de prix sont faits lorsqu'il est évident que des variations de prix appréciables se sont produites entre les périodes régulières de relevé de prix.

### Pondération et enchaînement

L'IPC maintient des proportions quantitatives fixes (pondérations) entre les biens et les services pendant la durée de vie d'un panier. Le panier est habituellement mis à jour régulièrement afin de prendre en compte les changements dans la composition des dépenses des consommateurs. En janvier 1995, le panier qui retrace la composition des dépenses de 1992 a remplacé le panier de 1986. La continuité des séries de l'IPC est assurée par un «enchaînement» des indices correspondants provenant de paniers consécutifs.

On calcule l'IPC comme une moyenne pondérée d'indices de prix de biens ou de services précis. Les pondérations sont tirées des données de l'Enquête sur les dépenses des familles. Le tableau explicatif 1 compare les parts des dépenses des deux paniers les plus récents, ceux de 1992 et de 1986. Comme les deux ensembles de pondérations sont exprimés en prix de décembre 1994, qui est le «mois d'enchaînement», les différences reflètent les mouvements des quantités relatives achetées entre les deux paniers. Les différences s'expliquent par les variations de la composition des dépenses des consommateurs dans le temps et par l'extension du champ d'observation de la population.

Quand on reconstruit ou ré-agrège les séries publiées de l'IPC, il faut prendre en compte les changements de pondérations et les procédures d'enchaînement. Pour une description de la méthodologie à utiliser dans la reconstruction des séries de l'IPC ré-agrégées, consulter le document de référence sur l'indice des prix à la consommation portant le numéro de catalogue 62-553 (Hors série), ou s'adresser à la Division des prix.

## Whitehorse and Yellowknife Indexes

The relatively small size of the housing market in these two cities makes it difficult to construct reliable price indexes for new houses. To compensate, the price movements of rental accommodation are used to approximate the price movements of new houses. The rent information itself is collected using different pricing frequencies and collection methods than in the rest of the country. Because of these problems, the indexes for Rented Accommodation, Owned Accommodation and Shelter are not published for these two cities. Further, the All-items indexes published for these two cities are not strictly comparable with the same indexes for the provinces or the other sixteen urban centres.

### Calculation of City Indexes

With the introduction of the 1992 basket, emphasis was shifted from city data to provincial data. City All-items series were continued since many users had come to rely on this service, but the method of calculation was changed. Shelter indexes are calculated for each city. This recognizes the importance of Shelter in the basket, the significant and persistent differences in price movements between cities, and the availability of local data. For the other seven major components, the movement of the provincial counterpart (or, in the cases of Montréal, Toronto, and Vancouver, a sub-provincial counterpart) is used. The major components are aggregated using the city's expenditure pattern to arrive at each city's All-items index.

### Seasonal Adjustment

Seasonal adjustment is performed within each basket at the level of the eight major components. The seasonally adjusted All-items series is a weighted average of the eight seasonally adjusted major components. It was linked in December 1994 with the seasonally adjusted series calculated before then to form a continuous series starting in September 1978. Each month's data is fixed until the end of the year when the series is revised. Because the revision can lead to changes in both the levels and movements of the indexes, users employing the CPI for indexation purposes are advised to use the unadjusted indexes.

### The Purchasing Power of the Consumer Dollar

As prices rise, a dollar will buy fewer goods and services. Because the CPI measures changes in the general price level, it is often used to estimate changes in the purchasing power of the Canadian dollar. For example, between 1986 and 1994, the All-items Canada CPI rose from 100.0 to 130.7, indicating that consumers had to pay 30.7% more to buy the same quantity of goods and services. Looked at in terms of purchasing power, a dollar in 1994 would purchase the same amount as 76.5¢  $\{(100.0 / 130.7) * 100\}$  did in 1986. This process may be interpreted as the deflation of money or the adjustment of money values to eliminate price effects.

## Indices de Whitehorse et de Yellowknife

La taille relativement faible du marché de l'habitation de ces deux villes rend difficile la construction d'indices de prix fiables pour les maisons neuves. Pour corriger cette situation, on se sert du mouvement des prix du logement en location pour obtenir une approximation de celui des maisons neuves. Les renseignements sur les loyers proprement dits sont obtenus à des fréquences de relevé des prix et selon des méthodes de collecte qui diffèrent de celles utilisées ailleurs dans le pays. En raison de ces problèmes, les indices du logement en location, du logement en propriété et du logement ne sont pas publiés pour ces deux villes. Enfin, les indices d'ensemble publiés pour ces deux villes ne sont pas strictement comparables aux mêmes indices pour les provinces ou les seize autres centres urbains.

### Calcul des indices des villes

Avec la venue du panier de 1992, l'accent est passé des données des villes aux données des provinces. Les séries des indices d'ensemble pour les villes ont été conservées parce que de nombreux utilisateurs se sont habitués à ce service, mais la méthode de calcul a changé. Les indices du logement sont calculés pour chaque ville. Ainsi, on prend en compte l'importance du logement dans le panier, les différences appréciables et persistantes dans les mouvements des prix entre villes et la disponibilité de données locales. Pour les sept autres composantes principales, on utilise le mouvement de l'indice provincial (pour Montréal, Toronto et Vancouver, un indice infra-provincial). Les composantes principales sont agrégées à partir de la composition des dépenses de la ville pour donner, en fin de compte, l'indice d'ensemble de cette dernière.

### Désaisonnalisation

On effectue la désaisonnalisation pour chaque panier au niveau des huit composantes principales. La série désaisonnalisée de l'indice d'ensemble est une moyenne pondérée des huit composantes principales désaisonnalisées. Elle a été enchaînée en décembre 1994 à la série désaisonnalisée calculée auparavant pour donner une série continue qui commence en septembre 1978. Les données de chaque mois sont inchangées jusqu'à la fin de l'année, lorsque la série fait l'objet d'une révision. Comme cette dernière peut entraîner des changements dans les niveaux et dans les mouvements des indices, il est recommandé aux utilisateurs qui se servent de l'IPC à des fins d'indexation de prendre les indices bruts.

### Le pouvoir d'achat du dollar à la consommation

Lorsque les prix montent, le dollar achète moins de biens et de services. Parce qu'il mesure les variations du niveau général des prix, l'IPC sert souvent à estimer les variations du pouvoir d'achat du dollar canadien. Ainsi, entre 1986 et 1994, l'IPC d'ensemble pour le Canada est passé de 100,0 à 130,7 : les consommateurs ont donc dû débourser 30,7% de plus pour acheter la même quantité de biens et de services. Pour ce qui est du pouvoir d'achat, le dollar de 1994 achèterait la même quantité de biens et de services que 76,5 cents  $\{(100,0 / 130,7) * 100\}$  en 1986. Ce processus peut s'interpréter comme la déflation de l'argent ou l'ajustement des valeurs monétaires, pour la correction des effets de prix.

## Appendix 2

### Average retail prices

#### Average retail prices for food, household supplies, personal care items and cigarettes

Table 5 shows, for each month of the quarter, average prices for selected food, household supply and personal care items and for cigarettes.

Prices for these items are collected as part of the regular monthly CPI survey. Prices for the selected food, household supply and personal care items are observed in food supermarkets, while prices for cigarettes are collected in supermarkets, department stores, drug stores and tobacco shops. Average prices for each commodity are calculated as a weighted average of the average prices in the observed cities using the population of these cities as weights.

The commodities which are priced can vary in quality between outlets or between cities. This is the reason why average prices are not published for each of those cities. Brands and outlets can also vary from month to month. Therefore, average prices may not necessarily be fully comparable from one month to another and should not be used as an appropriate measure of pure price change through time. A matched commodity and outlet sample is used for the CPI to determine the pure price movement of commodities through time.

## Appendice 2

### Prix de détail moyens

#### Prix de détail moyens pour les aliments, les produits d'entretien ménager, les produits de soins personnels et les cigarettes

Le tableau 5 présente, pour chaque mois du trimestre, des prix moyens pour certains produits alimentaires, ménagers et de soins personnels ainsi que pour les cigarettes.

Les données sur les prix utilisées dans le calcul sont celles qui ont été recueillies dans le cadre de l'enquête mensuelle régulière de l'IPC. Les prix des aliments et des produits d'entretien ménager et de soins personnels ont été relevés dans des supermarchés alimentaires, alors que les prix des cigarettes ont été observés dans des supermarchés, dans des magasins à rayons, dans des pharmacies et dans des débits de tabac. Les prix moyens pour chaque produit sont obtenus en effectuant une moyenne pondérée des prix moyens de chaque ville observée en utilisant la population de ces villes comme pondération.

Les produits dont on relève les prix peuvent varier en qualité d'un point et de vente ou d'une ville à l'autre. C'est la raison pour laquelle les prix moyens ne sont pas publiés pour chacune des villes. Les marques sélectionnées ainsi que les points de vente peuvent aussi varier d'un mois à l'autre. Les prix moyens ne sont donc pas nécessairement entièrement comparables d'un mois à l'autre et ne devraient pas être considérés comme une mesure appropriée des mouvements de prix purs à travers le temps. L'IPC utilise un échantillon apparié de produits et de points de vente pour calculer le mouvement de prix pur des produits dans le temps.

## Appendix 3

### INTERNATIONAL RETAIL PRICE COMPARISONS

Those concerned with a need for some comparative measure of the retail prices that a Canadian-based employee may encounter while serving outside Canada, will be interested to know that the Government Allowance Indexes Section, Statistics Canada, produces indexes relating retail prices in foreign countries to those prevailing in Ottawa. The "post indexes" as they are called have been developed primarily to regulate the allowance levels of expatriate Canadian Government civilian and military personnel and because of this, they are very specialized in purpose, and specific to the use for which they were designed. Nonetheless, organizations faced with compensating employees for foreign retail price conditions might well find them to be a useful building-block on which to develop and administer a viable foreign service allowance system.

A post index is, at any given point in time, the expression of the current spatial (or place-to-place) retail price relationship of a range of goods and services at a foreign location, with those prices prevailing in Ottawa, rounded to the nearest five points. Ottawa price levels are always expressed as 100. Thus, a post index of 110 for example, means that prices at the foreign location are estimated to be 10% above those in Ottawa, and specifically, that they have been calculated to fall within the index range 107.5 to 112.4, i.e., 7.5% to 12.4% above Ottawa. For reasons discussed later, the highest degree of accuracy claimed for post indexes, is inherent in their being rounded as described.

The post index encompasses price comparisons for such family expenditure categories as food consumed in the home, meals taken in restaurants, household maintenance, household supplies, communications, domestic help, clothing, transportation, health and personal care, reading and recreation, the prices of some 230 items being considered, as indicated in the table hereunder. Several important elements of expenditure are excluded. Since Canadian public servants pay Canadian income taxes regardless of their place of duty, income tax differentials are not considered. Shelter and fuel and utilities expenditures are excluded from the comparison because the federal government compensates for excess costs of these items by means of benefits separate from those regulated by statistical means. Finally, government employees serving abroad may be entitled to purchase liquor, cigarettes, gasoline, etc., at tax-free prices or they may have access to special purchasing facilities not available to the public at large. To the extent that these conditions prevail, they are reflected in post index calculations.

Accordingly, post indexes should not be automatically applied to general uses without regard to their possible limitations. Potential users of these indexes are advised to discuss the specifics of their needs with the Government Allowance Indexes Section, and they may also wish to familiarize themselves with the total foreign service benefit package provided by the Federal Government, details of which may be obtained from the Personnel Policy Branch, Treasury Board, Government of Canada.

## Appendice 3

### COMPARAISONS INTERNATIONALES DES PRIX DE DÉTAIL

Les personnes qui sont conscientes du besoin d'une mesure comparative des prix de détail auxquels peut faire face un employé canadien en poste à l'étranger seront intéressées d'apprendre que la Section des indices des indemnités de l'état de Statistique Canada produit des indices qui établissent le rapport entre les prix de détail dans les pays étrangers et ceux d'Ottawa. Les "indices de poste" ont été créés à l'origine afin de fixer le niveau des indemnités aux fonctionnaires et aux militaires canadiens postés à l'étranger; en conséquence, ils ont un but très spécialisé et ne s'appliquent qu'à l'utilisation pour laquelle ils ont été créés. Toutefois, les organismes qui doivent verser des indemnités à des employés en vertu des prix de détail à l'étranger pourraient trouver les indices comme une base utile pour élaborer et administrer un système viable d'indemnités pour service à l'étranger.

Un indice de poste est, à une période donnée, l'expression de la relation spatiale actuelle (ou d'un endroit à un autre) entre le prix de détail d'une variété de biens et services à un endroit à l'étranger et les prix à Ottawa, arrondis au plus proche multiple de cinq. Le niveau des prix à Ottawa est toujours 100. Ainsi, un indice de poste de 110 signifie que l'on évalue les prix à un endroit situé à l'étranger à 10% au-dessus de ceux d'Ottawa et plus précisément que l'on a calculé qu'ils tombaient dans la classe d'indice 107.5 à 112.4; c'est donc dire qu'ils sont de 7.5% à 12.4% supérieurs à ceux d'Ottawa. Pour les raisons ci-après, le plus haut degré de précision dont on puisse se prévaloir pour les indices de poste est fonction de ce qu'ils ont été arrondis comme il est dit ci-dessus.

L'indice de poste renferme des comparaisons de prix pour les catégories de dépenses des familles comme les aliments consommés à la maison, les repas pris au restaurant, l'entretien du ménage, les fournitures ménagères, les communications, le personnel domestique, les vêtements, le transport, les soins personnels et de santé, la lecture et les loisirs; on compare les prix de 230 articles environ, tels que présentés ci-dessous. Plusieurs éléments importants de dépenses sont exclus. Les fonctionnaires canadiens paient leur impôt sur le revenu au Canada, quel que soit le lieu de leur travail; les différences concernant l'impôt sur le revenu ne sont donc pas prises en considération. Les dépenses de logement, de chauffage et de services ne font pas partie de la comparaison parce que l'administration publique fédérale compense les dépenses excessives à cet égard à l'aide de prestations déterminées par des moyens autres que statistiques. Enfin, les fonctionnaires en poste à l'étranger ont parfois le droit d'acheter en franchise des boissons alcooliques, des cigarettes, de l'essence, etc., ou ils ont accès à des magasins spéciaux fermés au grand public. Ces conditions réapparaissent plus ou moins fortement lors du calcul des indices de poste.

Les indices de poste ne doivent donc pas être généralisés automatiquement sans tenir compte de leurs limites éventuelles. Nous conseillons à tous ceux qui utiliseraient cet indice de discuter leurs besoins spécifiques avec la section des indices des indemnités de l'état; ceux-ci peuvent également désirer se familiariser avec l'ensemble complet des bénéfices accordés par le gouvernement fédéral pour le service à l'étranger; ils pourront obtenir cette information en s'adressant à la Direction de la politique du personnel, Conseil du Trésor, gouvernement du Canada.

The primary sources of data used in post index construction are periodic retail price and living cost surveys conducted at foreign locations by the foreign service personnel stationed there. The survey data is analyzed by Statistics Canada. In addition to a variety of price information gathered from retail outlets patronized by Canadian personnel at the post, data are also obtained regarding their spending patterns, along with information on the availability of any special local purchasing facilities, and the extent to which staffs make direct importation of consumer goods from other countries.

The general aim is for full-scale surveys to be carried out at about three-year intervals. However, specific studies may be undertaken more or less frequently than this, depending on the volatility of retail price conditions in each particular country, the instability of exchange rates and the extent to which close monitoring of changes in the local retail price situation being faced by Canadian personnel can be achieved through reference to other statistical indicators.

Once established, every post index is subjected to a monthly review, the object being to assess its continuing validity in the light of exchange rate movements, as well as on the basis of price and other economic intelligence obtained from various sources. Statistics Canada is in monthly receipt of an extensive range of price data from foreign governments, international agencies, and world-wide commercial enterprises. The purpose of the data collection is to assess and apply the most accurate possible measurement of price movements at each foreign post since the time of the last survey. In parallel, Ottawa price movements for the same period are also taken into account. Furthermore, since post indexes relate to personnel whose emoluments are expressed in Canadian dollars, shifts in the Canada foreign country currency exchange rate are an integral part, and in some cases the major element, in the review. If the comparative retail price relationship expressed by an existing post index should appear to have changed by five index points, a new post index level may be brought into effect without necessarily undertaking another complete survey.

In developing any place-to-place statistics of retail price differentials, very difficult problems arise from geographic variations in consumers' buying habits and differences in the quality and availability of goods and services. These problems are magnified in international comparisons. By and large, however, conventions and techniques have been developed which attempt to overcome these problems in the context of the specific uses that these indexes are meant to serve. As measures designed to meet a particular administrative need, post indexes achieve their goal if they fairly reflect, in a general way, the price differentials between locations being encountered by those to whom they are applicable.

Table 14 shows a selection of the approximately 250 post indexes currently being maintained, the effective date of their validity for government allowance purposes, and the exchange rates upon which they are predicated.

Readers should bear in mind that these indexes are shown as examples only, and that any one of them may have changed by the time it could be published.

Les principales sources de données qui servent à la création de l'indice de poste sont des enquêtes périodiques sur les prix de détail et le coût de la vie menées dans les divers postes par le personnel du service extérieur. Les résultats de ces enquêtes sont analysés et compilés par Statistics Canada. Non seulement on recueille divers renseignements sur les prix auprès des points de vente au détail où le personnel canadien en poste à l'étranger s'approvisionne, mais encore on se procure des données sur les habitudes de dépenses, des renseignements relatifs à l'existence de points d'achat spéciaux sur place et au volume des importations directes de biens à la consommation effectuées par le personnel dans d'autres pays.

On se propose généralement de mener une enquête exhaustive une fois tous les trois ans environ. Toutefois des études spécifiques peuvent être menées à intervalles plus ou moins rapprochés en fonction, du degré d'instabilité des conditions des prix de détail dans chaque pays et des taux de change compte tenu de ce qu'une surveillance étroite des changements de la situation locale des prix de détail peut être exercée au moyen d'autres indicateurs statistiques.

Une fois établi, chaque indice de poste est révisé tous les mois afin de s'assurer qu'il est encore valable compte tenu des variations des cours de change, des prix et d'autres renseignements d'ordre économique obtenus de diverses sources. Statistique Canada reçoit chaque mois une grande variété de données sur les prix provenant des gouvernements étrangers, des organismes internationaux et des entreprises commerciales du monde entier. La collecte de ces données doit permettre de calculer avec le plus de précision possible l'évolution des prix à chaque poste étranger depuis la dernière enquête. Parallèlement, on tient compte de l'évolution des prix à Ottawa pour la même période. De plus, comme les indices de poste concernent un personnel dont le traitement est exprimé en dollars canadiens, les variations du cours du change canadien dans le pays étranger en question font partie intégrante de la révision et en sont, dans certains cas, l'élément le plus important. Lorsqu'il apparaît que la relation comparative des prix de détail, exprimée par l'indice actuel du poste a changé de cinq points d'indice, un nouvel indice de poste peut être adopté sans que l'on décide nécessairement de mener une nouvelle enquête complète.

Lors de l'élaboration de statistiques comparatives des prix de détail en divers endroits, des problèmes très difficiles surgissent en raison des variations géographiques dans les habitudes d'achat à la consommation et dans les différences de qualité et de disponibilité des biens et services. Les problèmes se compliquent encore lorsqu'il s'agit de comparaisons internationales. Dans une très large mesure cependant, des conventions et des techniques ont été mises au point en vue de résoudre ces problèmes dans le contexte même de l'usage spécifique auquel ces indices sont destinés. En tant que mesures destinées à satisfaire un besoin administratif particulier, les indices de poste joueront leur rôle s'ils rendent généralement bien compte des différences de prix entre différents endroits auxquelles font face des personnes à qui ces indices s'appliquent.

Le tableau 14 présente une sélection des quelques 250 indices de poste, leur date d'entrée en vigueur dans le cadre du programme des indemnités de l'état, et les taux de change sur lesquels ils ont été établis.

Le lecteur devra noter que ces indices ne sont fournis qu'à titre d'exemple seulement, et que chacun d'entre eux a pu changer au temps où on a pu le publier.

Further information regarding post indexes is available on request from the Government Allowance Indexes Section, Prices Division, Statistics Canada, telephone: (613) 951-9598.

On peut obtenir d'autres renseignements au sujet des indices de poste en s'adressant à la section des indices des indemnités de l'état, division des prix, Statistique Canada, téléphone: (613) 951-9598.

## Pick a topic... any topic

The **1994 Statistics Canada Catalogue** is your guide to the most complete collection of facts and figures on Canada's changing business, social and economic environment. No matter what you need to know, the **Catalogue** will point you in the right direction.

From the most popular topics of the day – like employment, income, trade, and education – to specific research studies – like mineral products shipped from Canadian ports and criminal victimization in urban areas – you'll find it all here.

... the **1994 Statistics Canada Catalogue** will help you get your bearings...

The **Catalogue** puts all this information at your fingertips. With the expanded index, you can search by subject, author or title – even periodical articles are indexed. There's also a separate index for all our electronic products.

The **Catalogue** has everything you need to access all Statistics Canada's products:

- descriptions of over 25 new titles, plus succinct abstracts of the over 650 titles and 7 map series already produced;
- a complete guide to finding and using statistics;
- electronic products in a variety of media, and

advice on getting expert assistance on electronic products and on-line searches;

- tabs to each section -- so you can immediately flip to the information you need.

### ... time and time again

To make sure that the **Catalogue** stands up to frequent use, we used a specially coated cover to prevent broken spines, tattered edges and dog-eared corners.

Order today – you'll be lost without it.

### 1994 Statistics Canada Catalogue

Only \$15 (plus GST and applicable PST) in Canada (US\$18 in the U.S. and US\$21 in other countries). Quote Cat. no. 11-2040XPE.

## Choisissez un sujet... n'importe lequel

Le **Catalogue de Statistique Canada 1994** est votre guide pour la collection la plus complète de faits et de chiffres dans les domaines, en constante évolution, du commerce, de la société et de l'économie du Canada. Peu importe ce que vous voulez savoir, le **Catalogue** vous mettra sur la bonne piste.

Des sujets actuels les plus populaires – comme l'emploi, le revenu, le commerce et l'éducation – à des études de recherche spécialisées – comme les produits minéraux expédiés des ports canadiens et la victimisation dans les régions urbaines – vous trouverez tout dans ce document.

### Le Catalogue de Statistique Canada 1994 vous aidera à vous orienter...

Le **Catalogue** vous met tous ces renseignements sous la main. L'index augmenté vous permet de chercher par sujet, auteur ou titre – les articles de périodiques sont même indexés. On a aussi ajouté un index séparé pour tous nos produits électroniques.

Le **Catalogue** a tout ce qu'il vous faut pour vous procurer les produits de Statistique Canada :

- descriptions de plus de 25 nouveaux titres et courts résumés des 650 titres et plus et des 7 séries de cartes déjà disponibles;
- guide complet pour obtenir et utiliser les données statistiques;
- produits électroniques sur supports divers et conseils sur l'obtention d'aide d'experts pour

les produits électroniques et les recherches en direct;

- système d'onglets pour chaque section - pour que vous puissiez immédiatement repérer les renseignements qui vous intéressent.

### ...maintes et maintes fois

Pour garantir que le **Catalogue** puisse résister à une utilisation fréquente, nous avons utilisé une couverture avec un revêtement spécial conçue pour éviter les dos cassés, les bords abîmés et les coins de page pliés.

Commandez aujourd'hui – vous ne pourrez plus vous en passer.

✓ **Identify  
Emerging Trends**

✓ **Define New  
Markets**

✓ **Pinpoint Profit  
Opportunities**

✓ **Dégagez les  
nouvelles tendances**

✓ **Définissez les  
nouveaux marchés**

✓ **Déterminez les  
possibilités de profit**

**T**o safeguard your place in tomorrow's marketplace, you have to be able to anticipate trends today. To do that, you're going to need some insight into the purchasing trends in the Canadian marketplace.

With a complete profile of Canadian consumers, plus an indepth analysis of Canadian industries, the **Market Research Handbook** gives you the most thorough coverage of purchasing trends. This valued bestseller can lead you to new markets by giving you details on:

- ▶ how much money Canadians are earning and what they're spending on cars, rent, home entertainment and household appliances;
- ▶ the level of sales in retail chain and department stores;
- ▶ what goods are being traded between Canada, U.S., and other countries;
- ▶ census data such as: age/sex, schooling, households, unemployment, interprovincial and international migration

...and much, much more!

With over 600 pages, the **Handbook** includes more than 200 statistical tables that give you instant access to provincial and national market data. Featured are important economic indicators such as the **Gross Domestic Product**, **Labour Force Productivity**, **Private and Public Investment** and the **Consumer Price Index**.

Order your copy of the **Market Research Handbook** (Catalogue #63-2240XPB) today for only \$110 in Canada plus \$7.70 GST, US\$132 in the United States, and US\$154 in other countries.

**CALL TOLL-FREE 1-800-267-6677 OR FAX (613)951-1584** and use your VISA or MasterCard. **OR MAIL** your order to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Office listed in this publication.

**P**our maintenir votre place sur le marché de demain, vous devez être en mesure de prévoir les tendances aujourd'hui. Pour ce faire, vous devrez comprendre les habitudes d'achat sur le marché canadien.

Renfermant un profil complet des consommateurs canadiens ainsi qu'une analyse approfondie des industries canadiennes, le **Recueil statistique des études de marché** brosse un tableau exhaustif des habitudes d'achat. Ce précieux best-seller peut vous faire découvrir de nouveaux marchés en vous fournissant les détails suivants :

- ▶ les revenus des Canadiens et leurs dépenses pour la voiture, le loyer, les appareils de divertissement et les appareils ménagers;
- ▶ le niveau des ventes dans les magasins de détail à succursales et les grands magasins;
- ▶ les biens échangés entre le Canada, les É.-U. et d'autres pays;
- ▶ les données du recensement telles que l'âge, le sexe, le niveau de scolarité, les ménages, le chômage, la migration interprovinciale et internationale

...et bien plus encore!

Le **Recueil**, contenant plus de 600 pages et au delà de 200 tableaux statistiques, vous permettra d'accéder instantanément aux données provinciales et nationales sur le marché. Il traite d'indicateurs économiques importants tels que le **produit intérieur brut**, la **productivité de la population active**, les **investissements privés et publics** et l'**Indice des prix à la consommation**.

Procurez-vous votre exemplaire du **Recueil statistique des études de marché** (n° 63-2240XPB au catalogue) dès aujourd'hui pour seulement 110 \$ au Canada plus 7,70 \$ de TPS, 132 \$ US aux États-Unis et 154 \$ US dans les autres pays. Commandez votre exemplaire **PAR TÉLÉPHONE EN COMPOSANT SANS FRAIS le 1-800-267-6677 OU PAR TÉLÉCOPIEUR** au (613) 951-1584 et utilisez votre carte VISA ou MasterCard, **OU PAR LA POSTE** à l'adresse suivante : Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le bureau régional de Statistique Canada le plus près dont la liste figure dans la présente publication.
