INTRODUCTION

National and provincial statistics on sales of new motor vehicles in Canada are presented in this monthly bulletin. These statistics are obtained from a survey of Canadian automobile manufacturers (for both Canadian and U.S. produced vehicles) and importers of vehicles manufactured elsewhere. Respondents to the survey provide consolidated totals of their dealers' monthly reports on sales of new motor vehicles. The value of sales reported by respondents is the estimated selling price to consumers. Table 3 contains seasonally adjusted data; the other tables contain accumulated monthly provincial data as well as Canada's totals in current dollar values.

In this report, the term "passenger vehicles" is used to refer to all passenger-carrying vehicles, including those used for commercial purposes, i.e., taxis, auto rentals and other fleets. "Commercial vehicles" include trucks and buses, regardless of the use for which they are intended. "Overseas manufactured vehicles" include only those imported (some by Canadian and U.S. manufacturers) in a fully assembled state from countries other than the United States; for Statistics Canada purposes, "foreign" cars and trucks assembled on this continent are considered as Canadian and United States' manufactured vehicles.

The data on the following pages are subject to minor revisions as a result of estimates made for respondents whose reports were submitted after the monthly deadline. Such revisions are included in the annual report, New Motor Vehicle Sales, Statistics Canada, Catalogue 63-208.

Le présent bulletin mensuel renferme des statistiques nationales et provinciales sur les ventes de véhicules automobiles neufs au Canada. Ces statistiques sont fondées sur une enquête effectuée auprès des fabricants d'automobiles canadiens (production canadienne et américaine) et auprès des importateurs de véhicules fabriqués ailleurs. Les enquêtés fournissent des totaux de consolidation des rapports mensuels de leurs concessionnaires sur les ventes de véhicules automobiles neufs. La valeur des ventes qu'ils déclarent est une estimation du prix de vente payé par le consommateur. Le tableau 3 contient des données désaisonnalisées; les autres tableaux présentent des données mensuelles cumulatives pour les provinces et des totaux en dollars courants pour le Canada.

On entend par "voitures particulières" tous les véhicules de transport de passagers, y compris ceux qui servent à des fins commerciales, c.-à-dire les taxis, les véhicules destinés à la location et autres parcs automobiles. Les "véhicules utilitaires" comprennent les camions et les autobus, quel que soit l'usage que l'on compte en faire. Les "véhicules fabriqués outre-mer" ne comprennent que ceux qui sont importés (certains par les fabricants canadiens et américains) tels quels de pays autres que les États-Unis; aux fins de Statistique Canada les voitures et les camions "étrangers" assemblés sur le continent américain sont considérés comme des véhicules fabriqués au Canada ou aux États-Unis.

Les données présentées dans les pages qui suivent sont sujettes à de légères rectifications du fait qu'on a dû faire des estimations dans le cas des enquêtés qui n'ont pas envoyé à temps leur déclaration du mois. Ces rectifications figurent dans le bulletin annuel de Statistique Canada intitulé Ventes de véhicules automobiles neufs (n° 63-208 au catalogue).
