FARM IMPLEMENT AND EQUIPMENT SALES

1956

Sales of farm implements and equipment in 1956 amounted to \$170,767,455, an increase of 11 per cent over the previous year's total of \$153,124,434. The values stated throughout this report are chiefly at wholesale prices. Information supplied by manufacturers and importer-distributors indicates an average retail mark-up of 23.7 per cent would produce a reasonably accurate estimate of expenditures by Canadian farmers on new implements and equipment during 1956. On this basis retail sales were estimated at \$211,239,000.

All but two regions of the country showed increased sales over 1955. The two exceptions were Ontario and British Columbia where sales dropped 2 per cent below 1955 levels. Sales in the Prairie Provinces contributed the largest portion of the overall Canadian increase with advances in the order of 26 per cent in Saskatchewan, 23 per cent in Manitoba and 16 per cent in Alberta. The highest rate of increase, however, occurred in Newfoundland at 28 per cent. Increases of 8 and 7 per cent were registered respectively for the Maritime Provinces and Quebec. Provincial figures from 1950 onwards are shown in Table 1 of this report.

The volume of sales by major groups of commodities decreased in five of the less important groups within a range of 1 per cent recorded for barn equipment to 29 per cent for miscellaneous

farm equipment. Poultry farm equipment, the smallest group by volume, obtained the largest percentage increase in value of sales at 50 per cent, while sales of tractors and engines, the largest group, increased only 8 per cent. Between these two extremes, noteworthy increases occurred in haying machinery with sales 37 per cent higher than 1955, harvesting machinery, and farm wagons, trucks and sleighs with 26 per cent each and dairy machinery and equipment with 21 per cent. The figures for these and other major groups of commodities will be found in Table 2 for Canada and the Prairie Provinces. It may be noted from this table that the Prairie sales represented 54 per cent of the total, up from 50 per cent in 1955. The 1956 sales by commodities will be found in Table 4 while Table 5 presents a historical series for selected commodity items only.

The sales of repair parts at \$31,824,672 were up 12 per cent in comparison with sales of \$28,451,964 in 1955. All provinces shared in this increase but particularly Quebec and Saskatchewan where sales increased 21 and 18 per cent respectively. On the basis of information supplied by reporting firms, an average retail mark-up of 36.6 per cent would produce a reasonable estimate of the amount spent by Canadian farmers on repair parts in 1956. Table 3 shows a distribution of sales of repair parts by provinces from 1950 to date.
