FARM IMPLEMENT AND EQUIPMENT SALES

1964

The gross selling value of new farm implements and equipment continued to increase rapidly and reached a new high of \$326,976,324 in 1964, an increase of 13.6 per cent over the \$287,839,732 reported in 1963. Sales of repair parts amounted to \$53,156,394 as compared with \$49,721,863 in 1963, an increase of 6.9 per cent. The combined sales of new implements, equipment and repair parts at \$380,132,718 were 12.6 per cent higher than the 1963 figure of \$337,561,595.

All regions of Canada reported increased sales of farm implements and equipment, except Quebec which recorded a decrease of 4.4 per cent. The Western Provinces reported large increases, especially Manitoba and British Columbia which had increased sales of 22.9 per cent and 20.7 per cent respectively. Alberta had a more modest increase of 9.0 per cent. In the East, Atlantic Provinces showed the largest increase, i.e., 19.6 per cent.

All categories of machinery, except haying machinery and pumps and irrigation equipment and miscellaneous farm equipment, indicated increases. Sales of haying machinery and of pump and irrigation equipment and miscellaneous farm equipment decreased between 1963 and 1964 by 1.8 per cent and 7.9 per cent respectively. The largest increases occurred in farm dairy machinery and equipment, 87.1 per cent, and farm wagons, boxes and sleighs, 36.8 per cent. Planting, seeding and fertilizing machinery had a large increase in sales of 27.0 per cent. Please refer to Table 3 for further detail on the increase in sales of the various types of machinery.

The change made in 1957 (reporting unit sales to user by provinces) is continued in this report. Dollar sales are mainly at the wholesale level, i.e. cost to dealer. To avoid disclosure of an individual firm's figures, certain items are not shown. In some cases a figure representing three or more firms is also omitted in order to "cover" one of less than three firms. This report does not include the sales of used machinery, motor trucks, binder twine, export sales of Canadian manufacturers or industrial machinery and tractors not sold primarily for farm use.

Data on major groups, or main line implements, indicate the total goods manufactured and sold in Canada and goods imported and sold in Canada. Data on minor groups such as barn equipment, spraying and irrigation equipment indicate only the sales of such items made by companies primarily engaged in the farm trade; they do not include sales of companies whose major activity lies outside the farm equipment field but who may produce or sell such equipment.
