BUILDING PERILTS REPORTS FOR HOVELDER, 1924, WITH COMPARATIVE STATELENTS FOR OCTOBER, 1924, and NOVELDER 1923.

According to reports tabulated by the Dominion Bureau of According to reports tabulated by the Dominion Bureau of Statistics, there was a seasonal decline in the value of the building permits issued in 56 cities during Movember as compared with October, but there was an increase over Movember, 1923. As was pointed out in the last report, the comparison in any one month with the same month of previous years is more significant than is that between succeeding months in a country where the seasonal element is as important as in Canada. The total for Movember, 1924, stood at \$\times 9.555,472\$; this was 17.1 p.c. lower than the total of \$\times 11.533,111\$ for October, 1924, but 18.9 p.c. higher than the November, 1923, aggregate of \$\times 8.035,466\$.

Reports in some detail were furnished by 46 cities which issued nearly 1,000 permits for dwellings estimated to cost approximately 4,800,000 and about 2,000 permits for other buildings valued at over 4,650,000.

Nova Scotia was the only province to show an increase as compared with October; the permits during November were 128 per cent higher than in the former month. The decline registered in Ontario of (1,158,830 or 22.4 p.c. was the largest actual loss, while Hanitoba, with a reduction of (188,045 or 58.4 p.c., recorded the greatest proportional reduction.

As compared with Hovember, 1923, Hove Scotia, Quebec, Alberta and British Columbia issued permits of a higher valuation; the remaining provinces showed declines. The most pronounced gain, of 01.779,732 or 69.6 p.c., was in Quebec. Manitoba reported the largest decrease, of 0323,150, or 70.7 p.c.

The permits issued in Montreal, though lower in value than in October, were over twice as large as in Movember of last year. In Toronto there were minor gains in both comparisons, while Vinnipeg registered losses. Vancouver recorded a rather greater total of building authorized than in October, 1924, but a decline as compared with Movember, 1923. Sydney, Owen Sound, St. Catharines, Sarnia, Moodstock, St. Doniface, Calgary, Prince Rupert and Victoria showed increases over both October, 1924, and Movember, 1923.

The value of the building permits issued during the first eleven months of 1924 was 7.2 p.c. lower than in 1923 and 15.8 p.c. lower than in 1922. It was, however, 4.8 p.c. higher than the January-November total for 1921. The eleven-month aggregate for 1924 is \$\infty\$114,106,014, for 1923, \$\infty\$122,994,546, for 1922, \$\infty\$135,543,521 and for 1921, \$\infty\$108,929,544.

The table on the back of this sheet shows the value of the building permits issued during November and October, 1924, and November, 1923. The 35 cities for which records are available since 1910 are marked thus "N". Estimated Cost of Building Work as Indicated
