## BUILDING PERMITS

JULY 1959

*Published by Authority of*  
The Honourable Gordon Churchill, Minister of Trade and Commerce

**DOMINION BUREAU OF STATISTICS**

Business Finance Division

Capital Expenditures Section

6602-506-79

Price \$6.00 per year

THE QUEEN'S PRINTER AND CONTROLLER OF STATIONERY  
OTTAWA, 1959

### EXPLANATORY NOTES

The figure "1" after the name of the municipality indicates that only annual totals are given in the memorandum covering the years 1951 to 1956.

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

The figure "3" after the name of the municipality indicates that the municipality was added to the survey in 1958.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1960.

#### Abbreviations used -

Twp. - Township	SV - Summer Village
Tp. - Township	Dist. - District
MD. - Municipal District	Reg. - Regulated

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada<sup>(1)</sup> and Private and Public Investment Outlook<sup>(2)</sup> which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

Other includes structures that are not classified elsewhere.
