

CATALOGUE No.

64-001

MONTHLY

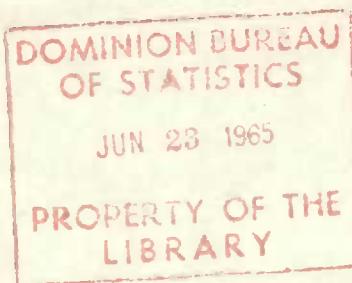

BUILDING PERMITS

FEBRUARY 1961

AND

ANNUAL TOTALS, 1960

Published by Authority of
The Honourable George Hees, Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS
Business Finance Division

6602-506-21

Price \$6.00 per year

ROGER DUHAMEL, F.R.S.C., Queen's Printer and Controller of Stationery, Ottawa, 1961

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1962.

Abbreviations used -

C.	- City	Tp.	- Township
C.P.A.	- Community Planning Area	Twp.	- Township
D.	- District	SV.	- Summer Village
M.D.	- Municipal District	V.	- Village
T.	- Town

BUILDING PERMITS ISSUED IN CANADA

17

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada⁽¹⁾ and Private and Public Investment Outlook⁽²⁾ which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

Other includes structures that are not classified elsewhere.

(1) Published by the Dominion Bureau of Statistics.

(2) A joint publication of the Economics Branch of the Department of Trade and Commerce and the Dominion Bureau of Statistics.

BUILDING PERMITS

1960

(Annuals Totals)

The following summary of building permits provides for over 1,000 municipalities, annual totals of data published during the year, 1960. In addition to information for individual municipalities, totals are provided for metropolitan areas, economic areas in Quebec, Ontario and Manitoba, and for the provinces.

During the year 1960, building permits were issued for over \$2.0 billion of construction work, 14.9 per cent less than in the previous year. New residential construction declined by 24.8 per cent, industrial and commercial construction declined by 4.4 and 15.0 per cent respectively while institutional and government construction increased by 9.8 per cent. Building permits issued declined in all provinces between 1959 and 1960, except in Nova Scotia and Manitoba where gains of 12.1 and 4.0 per cent were made. While commercial building permits declined in total, theatres, arenas and other recreational buildings increased by 16.1 per cent and hotels and motels increased by 21.6 per cent. The gain in institutional building was concentrated in hospital construction which increased from \$56.1 million in 1959 to \$118.1 million in 1960, a gain of 110.5 per cent. Provinces sharing in this increase in hospital construction include Newfoundland, Nova Scotia, Quebec, Ontario, Manitoba and Alberta, with the other provinces continuing at about the same level as in the previous year.

Table 1. Building Permits Issued in Canada, 1954-1960.

Table 2. Building Permits Issued in Canada, 1960, for each province and monthly for Canada.

Table 3. Building Permits Issued in Canada, 1960, by type of structure. The table gives the following detail: Residential - the number and value of new units, units added by conversion and value of repair permits for single dwellings, double dwellings and apartments. Industrial - factories, utilities (1) and other (2). Commercial - stores, warehouses, garages and service stations, office buildings, theatres and arenas (3), hotels and motels, restaurants and other commercial structures. Institutional and Government - schools and seminaries, hospitals, government garages and office buildings, churches, other government buildings (4) and other institutional buildings (5).

- (1) Utilities include buildings for electric, telephone and railway companies, waterworks, broadcasting stations, grain elevators and passenger terminals.
- (2) Other includes construction workshops, oil refineries and greenhouses.
- (3) Theatres and arenas include all recreational buildings.
- (4) Other government buildings include courthouses, gaols, fire and police stations.
- (5) Other institutional buildings include residences, social and welfare buildings, and public halls.
