MONTHLY

BUILDING PERMITS

AUGUST 1962

Published by Authority of
The Honourable George Hees, Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS
Business Finance Division

October 1962
6602-506

Price \$6.00 per year

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

- (3) Formerly included in Niagara Area.
- (4) Formerly included in Upper Grand River Area.
- (5) Formerly included in Metropolitan Area.
- (6) Formerly included in Northeastern Area.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1963.

Abbreviations used -

C.	- City	Tp.	- Township
C.P.A.	- Community Planning Area	Twp.	- Township
D.	- District	SV.	- Summer Village
M.D.	- Municipal District	V.	- Village
T.	- Town		

Beginning in April, 1962, some minor revisions were made in the classification of non-residential construction. The classification "other" has been discontinued. Non-residential structures are divided into three major groups and are further subdivided into 17 principal categories pertaining to the intended use of the structure in each major group. The minor revisions in the non-residential classification were made to provide a greater degree of relationship between the classification used in building permits and other statistical publications. The table on Page 19 indicates the major groups and the principal categories of each major group.

An additional classification "Conversions" has been added for residential dwelling units in the monthly publication starting in May, 1962. This classification is used to describe the addition of self-contained dwelling units through conversion of existing structures. Dwelling units created by conversions are shown separately in annual publications, and up until May, 1962, were included with new residential units in the monthly publications. This change in residential dwelling units classification will provide more comparable data between building permits and starts for new residential construction.

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

Conversions include number of dwelling units added by conversions of existing structures.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada(1) and Private and Public Investment Outlook(2) which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

(1) Published by the Dominion Bureau of Statistics.

(2) A joint publication of the Economics Branch of the Department of Trade and Commerce and the Dominion Bureau of Statistics.

CLASSIFICATION OF NON-RESIDENTIAL BUILDINGS AND STRUCTURES

Buildings and structures used for:

Group 4 - Industrial

41. Manufacturing - factories, plants, workshops
42. Utilities - transportation, communication, hydro, gas and other utilities
43. Other industrial - agriculture, forestry, mines, quarries, oil wells

Group 5 - Commercial

51. Trade - retail and wholesale stores
52. Warehouses and storage
53. Motor vehicle service - garages, service stations
54. Office buildings
55. Recreation - theatres, arenas
56. Hotels, motels and restaurants
57. Personal services - funeral parlours, beauty salons, barber shops
58. Miscellaneous commercial services - heating and plumbing installations, display and temporary buildings

Group 6 - Government and Institutional

61. Education - schools, universities
62. Medical treatment - hospitals
63. Welfare services - home for the aged, incurables, blind, deaf and dumb
64. Religious services - churches, synagogues
65. Government offices
66. Law enforcement - public protection, national defence and public works
