## Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Current Investment Indicators Section,  
Investment and Capital Stock Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9689) or to the Statistics Canada reference centre in:

|            |            |           |            |
|------------|------------|-----------|------------|
| St. John's | (772-4073) | Winnipeg  | (983-4020) |
| Halifax    | (426-5331) | Regina    | (780-5405) |
| Montréal   | (283-5725) | Edmonton  | (495-3027) |

## Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingué et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou tous les documents énumérés doivent être adressées à:

Section des indicateurs courants de l'investissement,  
Division de l'investissement et du stock de capital,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9689) ou  
au centre de consultation de Statistique Canada à:

|            |            |           |            |

## Note of Appreciation

*Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses and governments. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.*

## Note de reconnaissance

*Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises et les administrations canadiennes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.*

## Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- R revised figures.
- X confidential to meet secrecy requirements of the Statistics Act.

SA Seasonally Adjusted at monthly rate.

SAAR Seasonally Adjusted at annual rate.

## Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- R nombres rectifiés.
- X confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

### NOTE ON CANSIM

Data for most of the tables in this publication are available on CANSIM (Canadian Socio-Economic Information Management System). For further information, write to CANSIM, Electronic Data Dissemination Division, Statistics Canada, Ottawa K1A 0T6 or telephone (613)951-8200.

### NOTE CONCERNANT CANSIM

Pour la plupart des tableaux de cette publication, les chiffres sont disponibles sur CANSIM (Système canadien d'information socio-économique). Pour plus de renseignements, écrivez à CANSIM, Division de la diffusion informatique des données, Statistique Canada, Ottawa K1A 0T6 ou téléphonez à (613)951-8200.

### **IMPORTANT NOTICE**

Statistics Canada is aware that changes in boundaries, status or names of geographical entities have occurred in 1991. However, due to the 1991 Census, these changes, normally obtained from our Geography Division will not be available until mid 1992. Hence, geographical updates to tabulations in the monthly publication cannot be implemented this year. In order to maintain consistency and continuity in the monthly published data, all changes will be applied in January 1993.

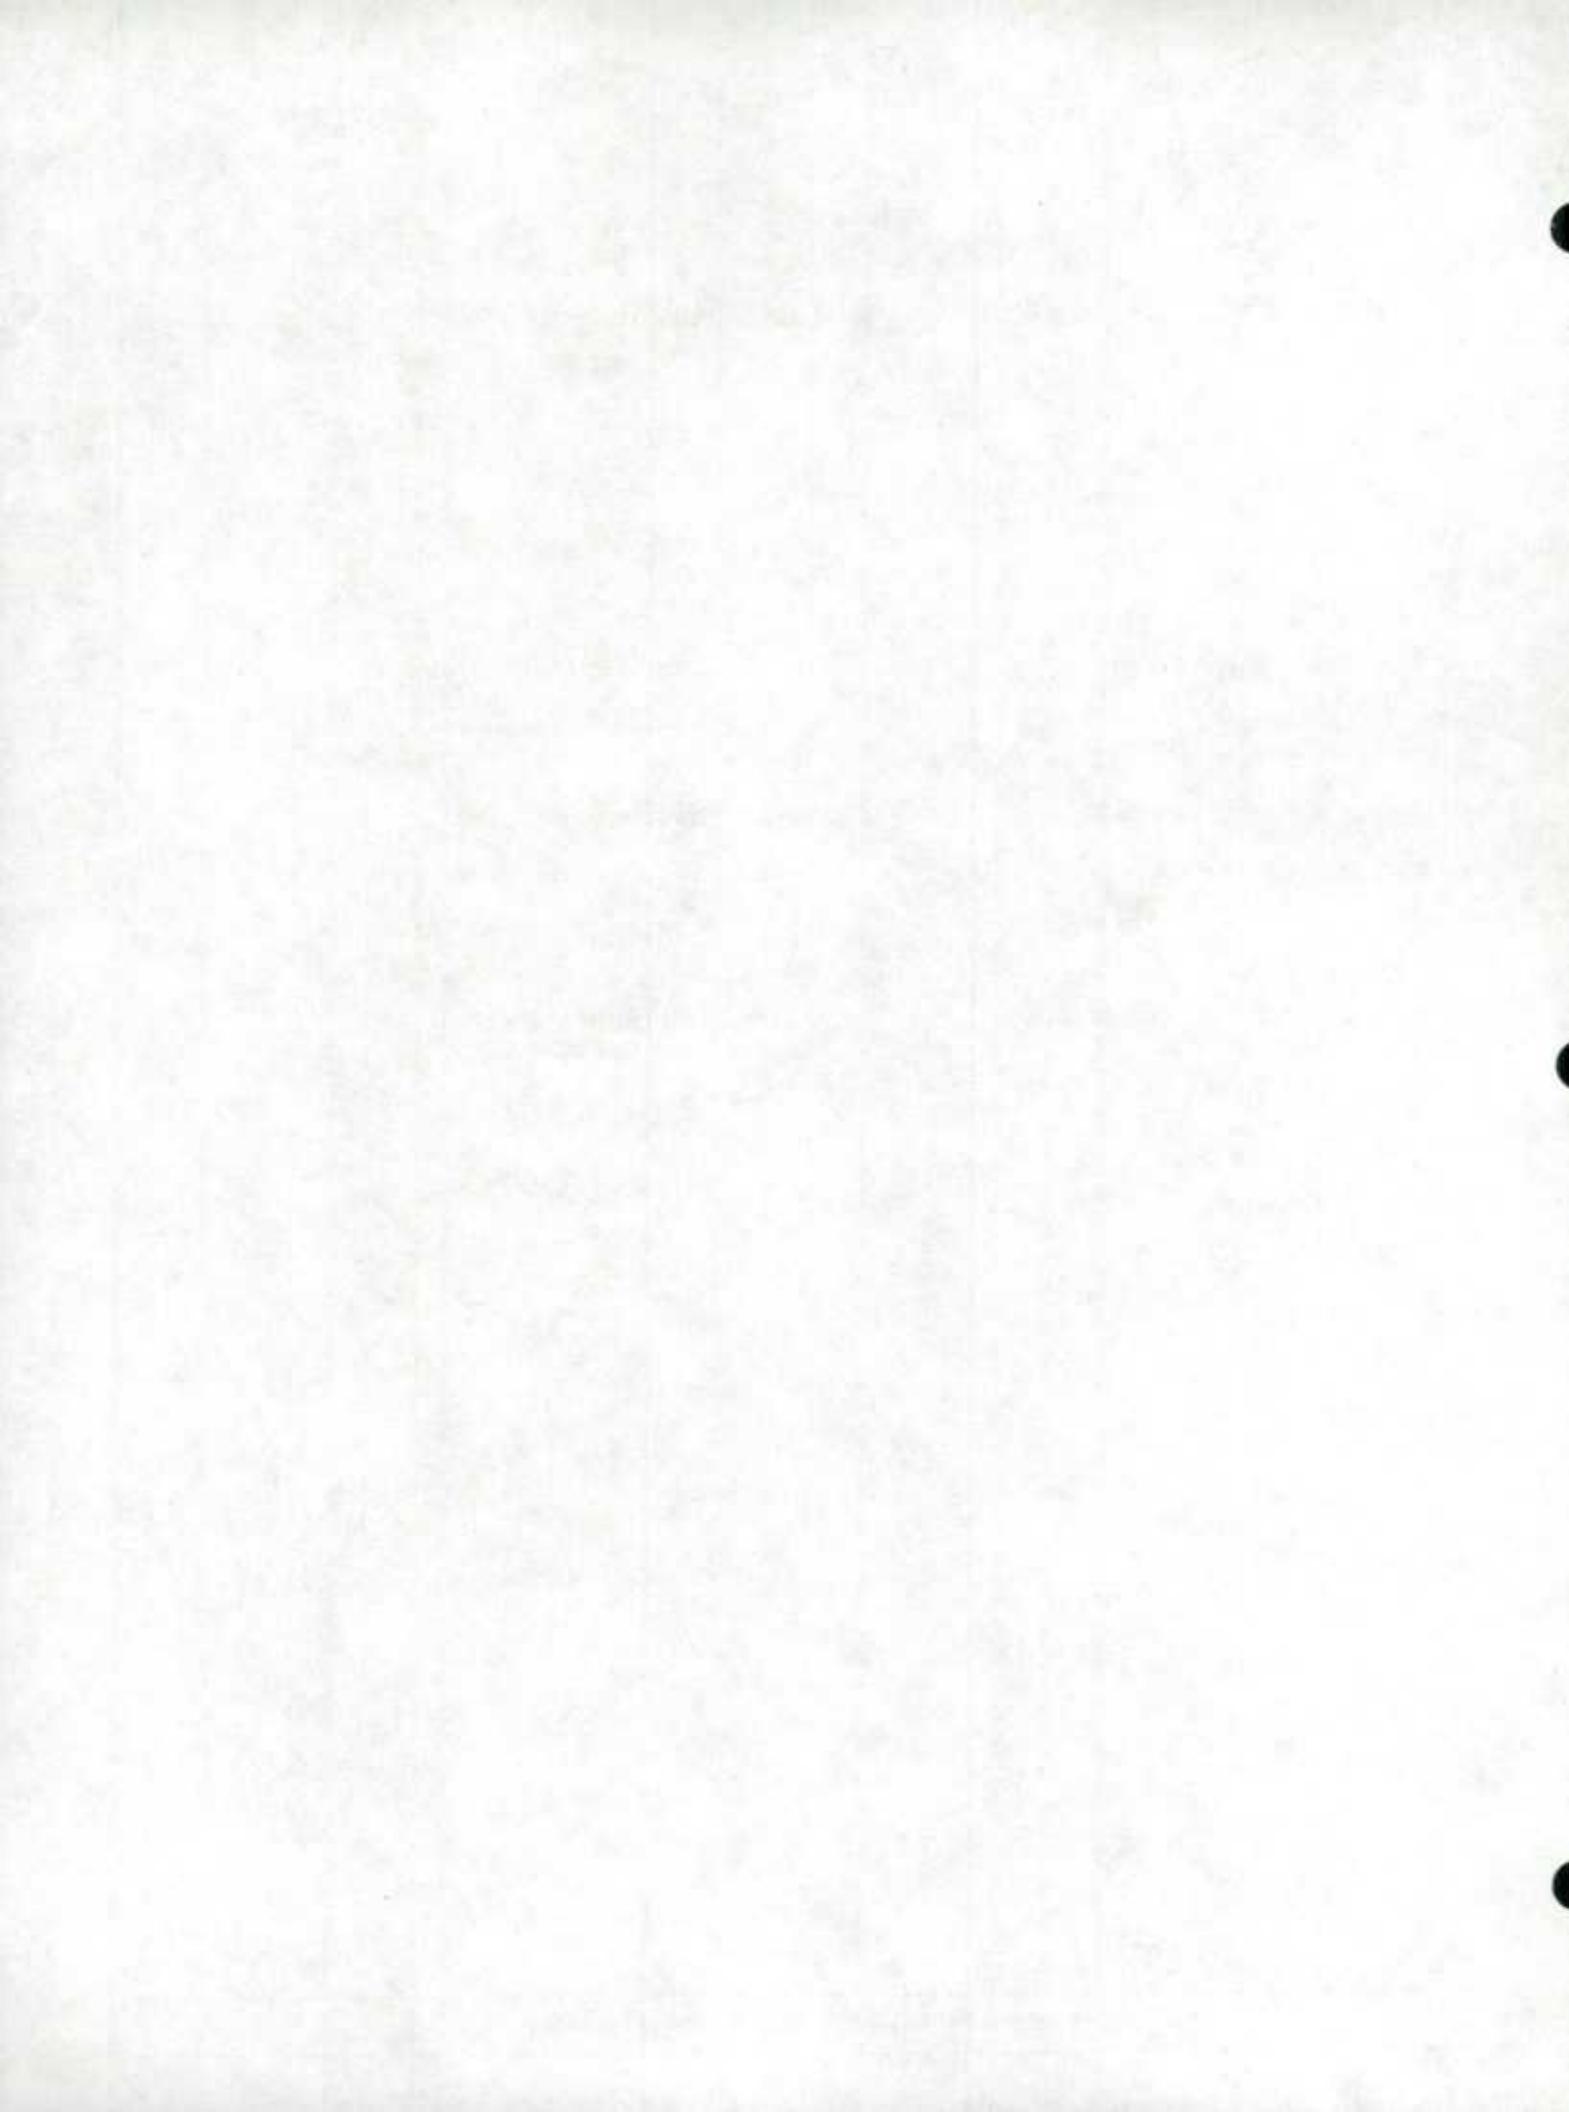

### **AVIS IMPORTANT**

Statistique Canada est au courant que des changements de limites territoriales, de statuts et de noms d'entités géographiques ont eu lieu en 1991. Toutefois, suite au recensement de 1991, les changements obtenus de notre division de géographie ne seront disponibles qu'au milieu de 1992. Par conséquent, aucun changement géographique sera apporté aux tableaux de la publication mensuelle cette année. Afin de maintenir la continuité et l'uniformité de nos séries, nous ne pourrons apporter les corrections avant le mois de janvier 1993.

## Highlights

## Faits saillants

### Building Permits

September 1992  
(Seasonally Adjusted Data)

- The preliminary value of building permits issued in Canada increased 1.8% to \$2,135 million in September, up from \$2,098 million in August. This increase was preceded by three consecutive decreases.
- The non-residential sector (+10.4%) was entirely responsible for this raise, while the residential sector reported a 2.3% decrease in the value of building permits.
- The regions of Ontario(+6.7%) and the Prairies(+16.8%) reported increases in the total value of building permits in September.

### Permis de bâtir

Septembre 1992  
(Données désaisonnalisées)

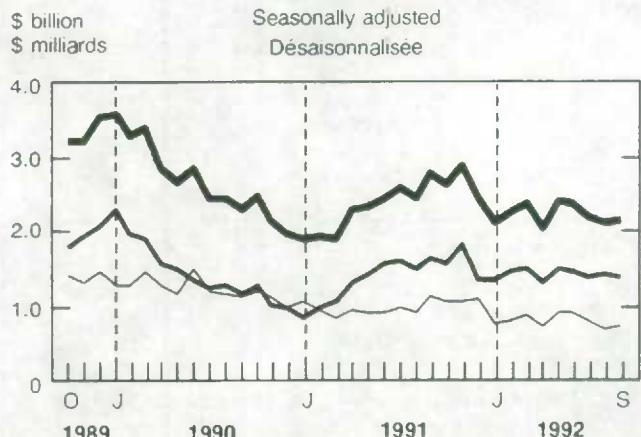

- La valeur préliminaire des permis de bâtir émis au Canada en septembre a augmenté de 1.8% pour se fixer à \$2,135 millions, en hausse comparativement aux \$2,098 millions d'août. Cette augmentation a été précédée par trois baisses consécutives.
- Le secteur non résidentiel (+10.4%) était entièrement responsable de cette hausse, alors que le secteur résidentiel affichait une diminution de 2.3% de la valeur des permis de bâtir.
- Les régions de l'Ontario (+6.7%) et des Prairies (+16.8%) ont enregistré des augmentations dans la valeur totale des permis de bâtir de septembre.

### September 1992

(Seasonally Adjusted Data)

#### Summary

The preliminary value of building permits issued in Canada increased 1.8% to \$2,135 million in September, up from \$2,098 million in August. This increase was preceded by three consecutive decreases. The non-residential sector (+10.4%) was entirely responsible for this raise, while the residential sector reported a 2.3% decrease in the value of building permits<sup>1</sup>. The regions of Ontario(+6.7%) and the Prairies(+16.8%) reported increases in the total value of building permits in September (see Chart 1).

#### Residential Sector

- The preliminary value of residential building permits continued to post an irregular pattern, with a decrease of 2.3% to \$1,390 million in September, following a 2.8% increase in August (see Chart 1).
- The value of building permits decreased in both the multi-family (-2.9% to \$409 million) and single-family (-2.1% to \$981 million) dwelling sectors in September.
- The regions of Atlantic(+11.0%) and the Prairies(+6.1%) reported increases in the value of residential building permits in this month. The region of British Columbia (which includes the Yukon and the Northwest Territories) reported the largest decline (-9.2%), followed by Quebec (-8.0%) and Ontario(-0.1%).
- The preliminary total number of dwelling units authorized in September decreased slightly to 167,000 units at an annual rate, down 0.2% from 168,000 units in August. The decrease in single-dwelling sector (-2.0% to 92,000 units) was partly offset by the increase in the multiple-dwelling sector (+2.1% to 75,000 units) (see Chart 2).

(Données désaisonnalisées)

#### Sommaire

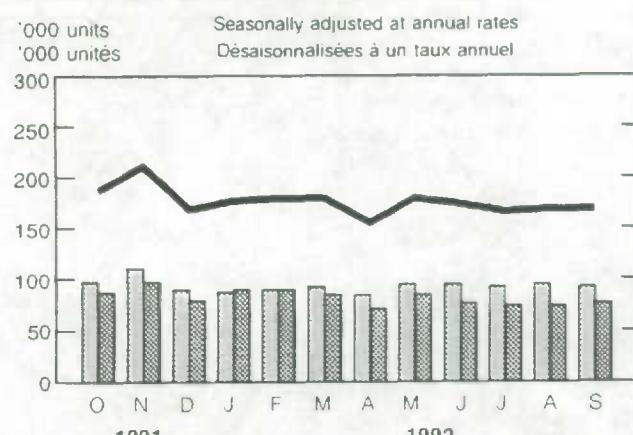

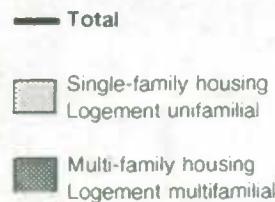

La valeur préliminaire des permis de bâtir émis au Canada en septembre a augmenté de 1.8% pour se fixer à \$2,135 millions, en hausse comparativement aux \$2,098 millions d'août. Cette augmentation a été précédée par trois baisses consécutives. Le secteur non résidentiel (+10.4%) était entièrement responsable de cette hausse, alors que le secteur résidentiel affichait une diminution de 2.3% de la valeur des permis de bâtir<sup>1</sup>. Les régions de l'Ontario (+6.7%) et des Prairies (+16.8%) ont enregistré des augmentations dans la valeur totale des permis de bâtir de septembre (graphique 1).

#### Secteur résidentiel

- La valeur préliminaire des permis résidentiels a continué d'afficher un comportement irrégulier, avec une diminution de 2.3% pour s'établir à \$1,390 millions en septembre, après une augmentation de 2.8% en août (graphique 1).
- La valeur des permis de bâtir du mois de septembre était en baisse de 2.9% dans le secteur multifamilial pour s'établir à \$409 millions et de 2.1% dans le secteur unifamilial pour atteindre \$981 millions.
- Les régions de l'Atlantique (+11.0%) et des Prairies (+6.1%) ont rapporté des hausses de la valeur des permis résidentiels dans ce mois. La région de la Colombie-Britannique (incluant le Yukon et les Territoires du Nord-Ouest) a rapporté la plus forte baisse (-9.2%), suivie du Québec (-8.0%) et de l'Ontario (-0.1%).
- Le nombre préliminaire de logements autorisés en septembre a atteint 167,000 unités à un taux annuel, ce qui représente une diminution de 0.2% par rapport aux 168,000 unités rapportées en août. La hausse dans le secteur multifamilial (+2.1% à 75,000 unités) a été contrebalancée par la baisse dans le secteur unifamilial (-2.0% à 92,000 unités) (graphique 2).

**Valeur des permis non résidentiels émis au Canada**

Note: Revised data for August, preliminary data for September.  
Nota: Données révisées pour août, données préliminaires pour septembre.

**Non-residential Sector**

- The preliminary value of non-residential building permits jumped 10.4% to \$745 million in September, up from \$675 million in August. This month's increase brought back the value to the level recorded in April 1992 (see Chart 1).
- The value of building permits for commercial projects jumped 27.9% to \$412 million in September, recovering from August's level of \$322 million which was the lowest to be recorded since March 1985. The regions of Quebec (+ 69.9%) and Ontario (+ 61.5%) were the principal contributors to this increase. In regard to the other non-residential sectors, the value of institutional projects was down 1.3% to \$220 million and the value of industrial projects decreased 12.8% to \$113 million (see Chart 3).
- The decreases in the value of non-residential building permits occurred in Atlantic (-25.1%) and British Columbia (-7.6%) regions, while the Prairies (+ 41.5%), Ontario (+ 22.3%) and Quebec (+ 7.5%) regions reported significant increases in September.

**Secteur non résidentiel**

- La valeur préliminaire des permis non résidentiels a bondi de 10.4% en septembre pour s'établir à \$745 millions, comparativement aux \$675 millions d'août. La hausse du présent mois a permis d'établir la valeur au niveau enregistré en avril 1992 (graphique 1).
- La valeur des permis de bâtir destinés aux projets commerciaux a bondi de 27.9% pour se fixer à \$412 millions, en nette hausse comparativement au niveau de \$322 millions en août, lequel représentait le plus bas niveau depuis mars 1985. Les régions du Québec (+ 69.9%) et de l'Ontario (+ 61.5%) ont contribué le plus à cette hausse. En ce qui concerne les autres secteurs non résidentiels, la valeur des projets institutionnels a diminué de 1.3% pour atteindre \$220 millions et la valeur des projets industriels a diminué de 12.8% pour se situer à \$113 millions (graphique 3).
- Les diminutions de la valeur des permis de bâtir non résidentiels sont survenus dans les régions de l'Atlantique (-25.1%) et de la Colombie-Britannique (-7.6%), alors que les régions des Prairies (+ 41.5%), de l'Ontario (+ 22.3%) et du Québec (+ 7.5%) ont rapporté des hausses significatives en septembre.

### Building Permits Indices Indices des permis de bâtir

- Trend-cycle<sup>2</sup>  
Tendance-cycle<sup>2</sup>
- Seasonally adjusted  
Désaisonnalisés

- <sup>1</sup> This series is deflated by using the construction input price index which includes costs of material and labor.  
<sup>1</sup> Cette série est dégonflée à l'aide de l'indice des prix des intrants dans le secteur de la construction, soit le coût du matériel et de la main-d'œuvre.  
<sup>2</sup> The trend-cycle shows the seasonally-adjusted value of Building Permits without irregular influences which can obscure the short-term trend. In order to reduce the number of false signals in the construction activity series, the trend-cycle is published with a two month lag.  
<sup>2</sup> La tendance-cycle exprime la valeur désaisonnalisée des permis de bâtir, nette de toutes variations irrégulières qui peuvent masquer la tendance à court terme. Afin de minimiser le nombre de faux signaux dans l'activité de la construction, la tendance-cycle est publiée avec deux mois de retard.

July 1992<sup>1</sup>

- The short-term trend (excluding engineering projects) continued to fall during the month of July with a 1.2% drop to 96.2 (see Chart 4).
- The short-term trend declined 2.6% in the non-residential sector to 79.3 and fell 0.5% in the residential sector to 108.6 in July.

<sup>1</sup> For further details on this methodology see the Index of Building Construction section in part III of the Publication.

Juillet 1992<sup>1</sup>

- La tendance à court terme (à l'exception des projets d'ingénierie) a continué sa chute au mois de juillet en diminuant de 1.2% pour s'établir à 96.2 (graphique 4).
- En juillet, la tendance à court terme était en baisse de 2.6% dans le secteur non résidentiel pour se fixer à 79.3 et de 0.5% dans le secteur résidentiel pour se situer à 108.6.

<sup>1</sup> Pour plus de renseignements au sujet de cette méthodologie, voir la section Indices de la construction à la partie III de la publication.

<sup>1</sup> The indices are based on the value of the building permits issued and comprise the following three stages: deflation (1986 = 100), seasonal adjustment and filtering of data (based on Henderson 23 terms moving average) to produce a trend-cycle. For more details on methodology see section III of publication.

<sup>1</sup> Les indices sont basés sur la valeur des permis de bâtir et comprennent les trois étapes suivantes: dégonflement (1986 = 100), désaisonnalisation et lissage (basé sur la méthode de moyenne mobile d'Henderson 23 termes) afin de produire une tendance-cycle. Pour plus de détails concernant la méthodologie, consultez la section III de la publication.

<sup>1</sup> The list of urban centres used in this table includes three more centres (Chibougamau, Flin Flon, Whitehorse) than the Canada Mortgage and Housing Corporation in its monthly survey of "Housing Starts and Completions".

<sup>1</sup> La liste des centres urbains utilisée dans ce tableau montre trois agglomérations de plus (Chibougamau, Flin Flon, Whitehorse) que dans l'enquête "Logements mis en chantier et parachevés" de la Société Canadienne d'hypothèque et de logement.

<sup>2</sup> Included in this category are the following types of dwellings: single-detached and mobile homes.

<sup>2</sup> Les types de logements suivant sont compris dans cette catégorie: maison individuelle et maison mobile.

<sup>3</sup> Urban Centres comprised in C.M.A. are not included in this table.

<sup>3</sup> Les centres urbains faisant partie des R.M.R. n'apparaissent pas dans ce tableau.

<sup>4</sup> Building Permits issued for Port Elgin village and the town of Sackville are included in Dorchester village.

<sup>4</sup> Les permis de bâtir émis pour le village de Port Elgin et pour la ville de Sackville sont compris dans le village de Dorchester.

<sup>1</sup> The observed coverage rate is arrived at by dividing the population of reporting municipalities by the total population of each respective geographic entity listed. The population statistics used are derived from the 1986 Census.

<sup>1</sup> Le pourcentage de couverture observée est obtenu en divisant la population des municipalités déclarantes par la population totale de chaque entité géographique citée. Les données de population utilisées proviennent du recensement de 1986.

<sup>2</sup> Included in this category are the following types of dwellings: single-detached and mobile homes.

<sup>2</sup> Les types de logement suivant sont compris dans cette catégorie: maison individuelle et maison mobile.

<sup>3</sup> Cottages are included in the total number of dwelling units.

<sup>3</sup> Le nombre total d'unités de logement comprend les chalets.

<sup>4</sup> The list of urban centres used in this table includes three more centres (Chibougamau, Flin Flon, Whitehorse) than the Canada Mortgage and Housing Corporation in its monthly survey of "Housing Starts and Completions".

<sup>4</sup> La liste des centres urbains utilisée dans ce tableau montre trois agglomérations de plus (Chibougamau, Flin Flon, Whitehorse) que dans l'enquête "Logements mis en chantier et parachevés" de la Société Canadienne d'hypothèques et de logement.

Tableau 14

<sup>1</sup> Building Permits data being generally subject to varying degree of under valuation, users should be cautious in making comparison from one area to another. It is however believed that average building (excluding land) cost trend within any area is reliable.

<sup>1</sup> Les données sur les Permis de bâtir étant sujettes à divers niveaux de sous-évaluation doivent être utilisées avec prudence lorsqu'il s'agit d'établir des comparaisons d'une région à une autre. Cependant le mouvement de la valeur moyenne des bâtiments (à l'exclusion du terrain) pour une région s'avère fiable.

## Introduction

The purpose of the monthly survey of building permits issued by Canadian municipalities is to collect data on construction intentions. The results of this survey are used by C.M.H.C.<sup>1</sup> as a reference base for conducting a monthly survey of housing starts and completions in accordance with its mandate. The statistics on building permits are also essential for the computation of capital expenditures. Furthermore, since the issuance of a building permit is one of the first steps in the construction process, these statistics are widely used as a leading indicator of building activity.

## Survey Methodology

The Building Permits Survey covers all Canadian municipalities that issue permits. The number of Canadian municipalities currently surveyed exceeds 2,400, representing all the provinces and territories. They account for 92% of the Canadian population. Participation to the survey being voluntary, the survey does not use a predetermined sample of municipalities. In practice, all urban agglomerations are represented in the survey, as well as a fair percentage of rural municipalities. With certain exceptions, the minimum coverage corresponds to the municipalities already included in the Housing Starts and Completions Survey. Non-responding municipalities that issue permits are urged on a regular basis to respond to the survey. Therefore, the number of municipalities covered is increasing continually.

## Collection of Data

The survey is usually conducted by mail, although certain municipalities have the option of responding by telephone. The municipal officer responsible for issuing permits is asked to fill out a form<sup>2</sup> each month describing all major construction projects. The value of the permits reported includes the following expenditures: materials, labour, profit and overhead. The cost of land is never included in the estimated value of the permit while acquisition costs (legal fees, surveying fees and accrued interest) may be included at times.

The municipalities forward a copy of their completed report to the nearest regional office of Statistics Canada and another copy to the local office of the Canada Mortgage and Housing Corporation (C.M.H.C.). To reduce their overhead, an increasing number of respondents are producing a computerized report.

Reports from municipalities with a population of 10,000 and over must be received within 20 days following the month of reference. The other municipalities have 30 days to produce their reports. Only those municipalities that are late in reporting and that are included in the above-mentioned C.M.H.C. survey are subject to follow-up by telephone. The others are contacted once a year.

<sup>1</sup> Canada Mortgage and Housing Corporation

<sup>2</sup> A sample of the Building Permit Form is shown in annex at the end of this section.

## Introduction

L'enquête mensuelle sur les permis de bâtir menée auprès des municipalités canadiennes vise à recueillir des informations sur les intentions de construction. Les résultats de cette enquête servent d'une part de base de référence à la S.C.H.L.<sup>1</sup> dont l'un des mandats est d'effectuer le relevé mensuel du nombre de logements mis en chantier et parachevés. D'autre part, la statistique sur les permis de bâtir constitue un élément essentiel dans le calcul des dépenses d'immobilisation. De plus l'émission du permis de bâtir étant l'une des premières étapes du processus de construction, cette statistique est grandement utilisée comme indicateur avancé de cette activité.

## Méthodologie de l'enquête

L'enquête "Permis de bâtir" vise toutes les municipalités canadiennes émettant des permis. Celles-ci au nombre de 2,400 en provenance de toutes les provinces et territoires regroupent 92% de la population canadienne. Elles ne font pas l'objet d'un échantillon prédéterminé, elles participent plutôt à cette enquête sur une base volontaire. En pratique, toutes les agglomérations urbaines y sont représentées ainsi qu'un bon pourcentage des municipalités rurales. Sauf exception, l'enquête couvre au minimum les municipalités déjà incluses dans l'enquête "Logements mis en chantier et parachevés". Sur une base régulière les municipalités non-répondantes et émettant des permis sont incités à répondre à l'enquête. De ce fait, le nombre de municipalités couvertes s'accroît continuellement.

## Collecte de données

L'enquête est généralement menée par la poste bien que certaines municipalités puissent choisir de répondre par téléphone. L'agent municipal responsable de l'émission des permis rempli mensuellement un formulaire<sup>2</sup> sur lequel chacun des projets de construction d'envergure doit être décrit. La valeur des permis rapportés comprend les dépenses suivantes: matériaux, main d'oeuvre, profits et frais généraux. Le coût du terrain n'est jamais inclus dans la valeur estimative du permis tandis que les frais d'acquisition (actes notariés, frais d'arpentage, intérêts encourus) peuvent à l'occasion y être intégrés.

Après avoir rempli leur rapport, les municipalités en acheminent une copie au bureau régional de Statistique Canada le plus proche et l'autre au bureau local de la Société canadienne des hypothèques et du logement (S.C.H.L.). Afin de réduire leur fardeau, de plus en plus de répondants produisent un rapport informatisé.

Les rapports des municipalités de 10,000 habitants et plus doivent nous parvenir dans les 20 jours suivant le mois visé. Les autres municipalités ont 30 jours pour produire leur rapport. Seules les municipalités retardataires, incluses dans l'enquête de la S.C.H.L. ci-haut mentionnée, font l'objet d'un suivi téléphonique. Les autres ne sont sollicitées qu'une fois par année.

<sup>1</sup> Société Canadienne d'hypothèques et du logement.

<sup>2</sup> Un spécimen du formulaire "Permis de bâtir" est montré en annexe à la fin de cette section.

The reports received at our regional offices are verified, coded and processed; the data is then forwarded to Statistics Canada Head Office.

#### Types of Errors

Since the building permit data are extracted from municipal administrative documents, two types of response errors are possible: errors attributable to the permit applicant and errors in transcription by the responding municipality. However, experience has shown that transcription errors are not very common and the increasing number of municipalities producing computerized reports tends to reduce the frequency of this type of error. Errors attributable to a false statement of the cost of construction are more probable. A qualitative survey conducted among major Canadian municipalities has revealed an underestimation of the declared value of buildings for which permits are issued. Since permit fees are in most cases based on the value of the construction, this leads unquestionably to underestimation of project values. The results of that survey also reveal that, in half of the municipalities covered, the value submitted by the applicant is not subject to any verification by municipal officers.

#### Quality Control

Strict quality control procedures are applied to ensure that collection, coding and data processing are as accurate as possible. In addition to the usual checks to ensure that the forms are fully completed, quality control procedures established by the Business Survey Methods Division are applied to the coded and processed data. Checks are also performed on totals and the magnitude of data. Reports that fail to meet the quality standards are subject to verification and are corrected as required.

#### Reliability

The data presented in this publication are solely those supplied by the respondents. No imputation is done for lack of coverage, concealment or the underevaluation of permits issued. For this reason, the sampling error cannot be computed.

Comparison of data must be done with reservation considering that the methods of issuing permits and the methods of estimating building values can differ from one municipality to another. Also, comparisons involving different periods must take into account the constant increase in the number of municipalities participating in the survey.

The monthly statistics are not corrected for cancelled or expired permits. According to the municipal officers, the proportion of cancelled and unused permits is below 5%.

A leur réception dans nos bureaux régionaux, les rapports sont vérifiés, codés et saisis; l'information est par la suite acheminée au bureau central de Statistique Canada.

#### Types d'erreurs

Les données sur les permis de bâtir étant extraites de documents administratifs municipaux, deux types d'erreurs de réponse sont possibles: les erreurs imputables au demandeur de permis et les erreurs de transcription faites par la municipalité répondante. L'expérience prouve que les erreurs de transcription sont peu fréquentes. De plus, du fait qu'un nombre croissant de municipalités produisent des rapports automatisés la fréquence de ce type d'erreur tend à diminuer. Toutefois, les erreurs provenant d'une déclaration erronnée du coût du projet de construction sont toujours probables. Une enquête sur "La qualité des données permis de bâtir" tenue auprès des principales administrations municipales canadiennes a révélé que la valeur déclarée des bâtiments pour lesquels un permis est émis est généralement sous-évaluée. Le mode de tarification des permis qui, dans la plupart des cas, est établi en fonction de la valeur de construction mène indubitablement à une sous-évaluation de la valeur des projets. De plus, les résultats de cette enquête révèlent que pour la moitié des municipalités enquêtées, la valeur soumise par le demandeur ne fait l'objet d'aucune vérification de la part des agents municipaux.

#### Contrôle qualitatif

Des procédures de contrôle qualitatif rigoureuses sont utilisées afin de s'assurer que la collecte, la codification ainsi que le traitement des données sont effectués avec le plus de précision possible. En plus des vérifications habituelles visant à s'assurer que les formulaires sont complètement remplis, les données codées et saisies sont soumises à un contrôle qualitatif établi par la Division des méthodes d'enquêtes-entreprises. Des vérifications sont également exercées sur les totalisations et l'ordre de grandeur des données. Chaque rapport qui ne répond pas aux critères de qualité retenus fait l'objet d'une vérification et est corrigé au besoin.

#### Fiabilité

Les données présentées dans cette publication sont uniquement celles fournies par les répondants. Aucune imputation n'est faite pour le manque de couverture, la clandestinité ou la sous-évaluation des permis émis. Pour cette raison, l'erreur d'échantillonnage ne peut être calculée.

Toute comparaison de données doit être faite avec réserve étant donné que les modalités d'émission de permis ainsi que les méthodes d'estimation des valeurs peuvent différer d'une municipalité à l'autre. De plus, puisque le nombre de municipalités participant à l'enquête s'accroît constamment, on doit tenir compte de ce fait lors de comparaisons touchant des périodes différentes.

Les statistiques mensuelles ne font pas l'objet de correction pour les permis annulés ou périmés. D'après les agents municipaux, le volume d'annulation ou d'inutilisation est inférieur à 5%.

## Survey Coverage

The observed monthly rate of coverage is shown in table 14 on a provincial and infraprovincial basis (economic region, CMA, CA, rural area). For any given geographical entity, it is obtained by dividing the population of reporting municipalities by the total population of the area under study. The reference base for these computations is the population as determined by the 1986 Census.

## Nature of and Basis for Classification

The classification used in this publication deals strictly with **structures** for which a building permit was issued. Permits are generally issued for the following: construction of new buildings, alterations, additions, renovations, etc. Minor repair jobs such as painting, tiling, roofing, etc., for which no permit is required, and engineering work (such as dams, roads, pipelines, etc.), which, by definition, is not a building, are not included in the building permit series. Estimates of such work may be obtained from the publications Construction in Canada (cat. no 64-201) and Private and Public Investment in Canada Intentions (cat. no 61-205).

The description given by the municipalities as to the **type of building** (box #6 of Section A on the form) and the **type of work** involved (box #7 of Section A on the form) forms the basis for classification. The classification of buildings into major groups and subgroups is based on the following: intended use in the case of new buildings; present or intended use of buildings to which improvements are to be made; present use of the existing structure where the proposed construction is intended to provide additional facilities; principal use of the structure where the proposed construction has more than one intended use; however, where the building contains dwellings, the value of the construction is divided between residential and non-residential use.

## Building Categories

This publication, uses the following classification for the **value of permits issued** for construction of new buildings or for improvements: residential, industrial, commercial, institutional and government.

**Residential.** Includes all buildings intended for private occupancy whether on a permanent basis or not. Dwellings are divided into the following types: single-family, mobile, cottage, semi-detached, row house and apartment building.

**Industrial.** Includes all buildings used for manufacturing and processing; transportation, communication and other utilities, and agriculture, forestry and mining.

## Couverture observée

Le taux de couverture observé paraît mensuellement au tableau 14 et est donné sur une base provinciale et infraprovinciale (région économique, RMR, AR, région rurale). Il est obtenu en divisant la population des municipalités rapportantes par la population totale des entités géographiques représentées. La base de référence de ces calculs est la population telle que dénombrée au recensement de 1986.

## Nature et fondement de la classification

La classification utilisée dans la présente publication porte strictement sur les **bâtiments** pour lesquels un permis de bâtir a été émis. Généralement les permis émis correspondent aux travaux suivants: construction de nouveaux bâtiments, transformation de logement, ajout structurel, rénovation, etc. Les travaux de réparation (peinture, réfection de plancher, de toiture, etc.) pour lesquels aucun permis n'est requis et les travaux de génie (tels les barrages, les routes, les oléoducs, etc.), qui par définition ne sont pas des bâtiments, ne sont pas compris dans la présente statistique. Des estimations de ces travaux sont toutefois disponibles en consultant "La Construction au Canada" (no 64-201 au catalogue) et "Investissements privés et publics" (no 61-205 au catalogue).

La description fournie par les municipalités concernant le **type de bâtiment** (case #6 de la Section A du formulaire) ainsi que le **type de travail** à effectuer (case #7 de la Section A du formulaire) constitue le fondement de la classification. La classification des bâtiments en groupes ou sous-groupes principaux se fondent sur les éléments suivants: la destination prévue, dans le cas des immeubles nouveaux; l'utilisation réelle ou prévue des bâtiments auxquels des améliorations sont effectuées; affiliation de l'immeuble où la construction envisagée a pour objet d'assurer des commodités accessoires; la principale utilisation de l'ensemble lorsque la construction projetée est destinée à plus d'une fin, toutefois lorsque le bâtiment abrite des logements on procède à la répartition de la valeur des travaux entre l'usage résidentiel et non résidentiel.

## Catégories de bâtiments

Dans cette publication la **valeur des permis émis** soit pour l'érection de nouveaux édifices ou pour l'exécution de travaux d'amélioration sont regroupés d'après les genres de bâtiments suivants: résidentiel, industriel, commercial, institutionnel et gouvernemental.

**Construction résidentielle.** Comprend tout bâtiment destiné à l'occupation privée soit sur une base permanente ou non. Les logements sont regroupés sous les types suivants: les logements unifamiliaux, mobiles, chalets, semi-détachés, en rangée ainsi que les appartements.

**Construction industrielle.** Englobe tout bâtiment destiné à la fabrication ou à la transformation de produits; au transport, aux communications et autres services d'utilité publique, à l'agriculture, à la sylviculture ainsi qu'à l'exploitation minière.

**Commercial.** Includes all buildings used to house activities related to the tertiary sector, such as stores, warehouses, garages, office buildings, theatres, hotels, funeral parlours, beauty salons and miscellaneous commercial installations such as signs, billboards, etc.

**Institutional and Government.** Includes expenditures made by the community, public and government for buildings and structures - schools, universities, hospitals, clinics, churches, homes for the aged.

The **number of dwelling units** indicates the number of self contained dwelling units created. This should not be confused with the number of structures. For example, an apartment building containing six dwellings will be shown as six dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. This publication uses the following classification for dwelling units:

**Single-family.** Refers to dwellings commonly called "single house". It includes single dwellings that are completely isolated on all sides, including single dwellings linked to other dwellings below ground. Included are bungalows, split levels, two-storey single-family homes built by conventional methods or prefabricated.

**Mobile homes.** Refers to houses designed and constructed to be transported on their own chassis and for easy moving.

**Cottage.** Refers to dwellings that cannot be occupied year-round or on a permanent basis because the facilities required for comfort are inadequate.

**Double or Semi-detached.** Refers to dwellings in which each of the two dwellings are side by side and joined by a common wall or garage, but not attached to any other building and surrounded by open space.

**Row House.** Refers to a row of three or more dwellings attached to each other without dwellings above or below.

**Apartment Building.** Includes dwellings in a variety of buildings such as duplexes, semi-detached duplexes, triplexes, row duplexes, apartments as such and dwellings adjacent to non-residential structures.

**Conversion.** Refers to the number of dwellings added by conversion of existing structures.

**Construction commerciale.** Il s'agit de tout bâtiment destiné à abriter des activités se rattachant au secteur tertiaire. Par exemple: les magasins, entrepôts, garages, immeubles à bureaux, théâtres, hôtels, salons funéraires, salons de beauté, ainsi que des installations commerciales diverses tel que les enseignes, affiches, etc.

**Construction institutionnelle et gouvernementale.** Comprend les dépenses faites par les collectivités, les corps publics et les gouvernements pour la construction d'immeubles ou bâtiments; par exemple, écoles, universités, hôpitaux, cliniques, églises, foyers de vieillards.

Le **nombre d'unités de logements** correspond au nombre de logements indépendants créés. Il ne faut pas confondre avec le nombre de structures. Par exemple, dans le cas d'un édifice à appartements comptant six logements on fera référence à six unités de logement. Dans le cas de transformation de bâtiments en unités de logement additionnelles, on tient compte du nombre de nouvelles unités créées. Dans cette publication les unités de logements sont regroupées de la façon suivante:

**Maison unifamiliale.** Ce genre de logement est communément appelé "maison simple". Il comprend les logements individuels complètement isolés de tout côté, y compris les maisons individuelles liées à un autre logement uniquement sous le sol. Sont inclus les unifamiliales à deux étages, les bungalows, split level, qu'ils soient construits de façon conventionnelle ou préfabriquée.

**Maison mobile.** Maison conçue et construite pour être transportée sur son propre châssis et qu'on peut déplacer sans grand délai.

**Chalet.** Logement qui ne peut être habité à l'année ou en permanence puisque les installations nécessaires au confort sont insuffisantes.

**Maison double ou semi-détachée.** Correspond à toute maison d'habitation où chacun des deux logements sont côte à côté réunis soit par un mur commun ou un garage, mais non attenants à une autre construction et entourés d'espaces libres.

**Maison en rangée.** Il s'agit d'une rangée d'au moins trois logements réunis côte à côte sans autre logement au-dessus ou au-dessous.

**Maison d'appartements.** Cette catégorie inclut les logements compris dans une variété de bâtiments tels que: les duplex, les duplex jumelés, les triplex, les duplex en rangée, les appartements proprement dit et les logements adjacents à tout édifice non domiciliaire.

**Transformation.** Il s'agit du nombre de logements ajoutés par suite de la transformation d'un bâtiment déjà existant.

## Geographic Classification

Geographic entities are classified according to Standard Geographical Classification (SGC) used by Statistics Canada. Each reporting entity is assigned a twelve-digit SGC code for identification according to the following geographic levels:

- **Province and Territory (PR)** : There are ten provinces and two territories.
- **Economic Region (ER)**: Refers to infraprovincial regions established by the Standards Division of Statistics Canada in 1976. There are sixty-three ERs.
- **Census Division (CD)**: Refers to a group of census subdivisions established by provincial law. There are two hundred and sixty-six CDs (data on this geographic group is available on request).
- **Census Metropolitan Area (CMA)**: Its delineation corresponds to the 1986 Census definition. The term CMA refers to the main labour market area of an urban area (the urbanized core) of at least 100,000 population, based on the Census population figures. The twenty-five CMAs are shown in this publication. Although the 1986 Census defines the Ottawa-Hull area as a single CMA, the area is shown in this publication as two separate entities since it is located in two different provinces.
- **Census Agglomeration (CA)**: Refers to the smaller labour market area of an urbanized core of at least 10,000 population, as defined by the 1986 Census. There are one hundred and fourteen CAs in Canada. When a CA overlaps the boundaries of two provinces, it is shown partly in each province. The Lloydminster agglomeration is an exception to this rule. It is treated as if it was totally located in Alberta.
- **Other Municipalities of at Least 10,000 Population**: Refers to municipalities not included in census agglomerations but with populations of at least 10,000 inhabitants. The distinction is made between these municipalities and CAs in order to permit comparison between the Building Permits Survey and the Housing Starts and Completions Survey which refers to this geographical concept.
- **Rural Area**: Refers to all geographic entities not included in a CMA or CA and not identified as an urban centre by the Canada Mortgage and Housing Corporation.

## Classification géographique

Les entités géographiques sont classifiées selon la Classification Géographique Type (CGT) en usage à Statistique Canada. Un code (CGT) de douze chiffres a été attribué à chaque entité rapportante afin de pouvoir les classifier selon les niveaux géographiques suivants:

- **Province et territoire (Pr)**: On compte dix provinces et deux territoires.
- **Région économique (RE)**: Il s'agit des régions infra-provinciales de Statistique Canada établies par la Division des normes en 1976. On en compte soixante-trois.
- **Division de recensement (DR)**: L'expression division de recensement signifie un regroupement de subdivision de recensement établie par une loi provinciale. On en dénombre deux cent soixante-six (des données sous un tel regroupement géographique sont disponibles sur demande).
- **Région métropolitaine de recensement (RMR)**: Leur délimitation correspond à la définition du recensement de 1986. Le terme (RUR) désigne la principale zone du marché du travail d'une région urbaine (noyau urbanisé) comptant 100,000 habitants ou plus, d'après les chiffres de population du recensement. Les vingt-cinq (RMR) figurent dans cette publication. Toutefois, bien que le recensement de 1986 définisse Ottawa-Hull comme une seule (RMRI), elle est présentée ici en deux entités distinctes étant donné qu'elles sont situées dans des provinces différentes.
- **Agglomération de recensement (AR)**: Elle correspond aux zones des marchés de travail moins vastes des noyaux urbanisés comptant 10,000 habitants ou plus, tel que défini au recensement de 1986. On compte cent quatorze (AR) au Canada. Lorsqu'une (AR) chevauche deux provinces elle est présentée partiellement dans chacune de celles-ci. L'agglomération de Lloydminster fait toutefois exception à cette règle, paraissant en totalité en Alberta.
- **Autres municipalités de 10,000 de population et plus**: Il s'agit de municipalités ne faisant pas partie d'agglomérations de recensement dont la taille est d'environ 10,000 habitants. On distingue ces municipalités afin de rendre possible la comparaison entre l'enquête sur les permis de bâtir et celle sur les mises en chantier qui utilise ce concept.
- **Partie rurale**: Sont regroupés sous cette rubrique toutes les entités géographiques ne faisant pas partie d'un (RMR) ou d'une (AR) et n'étant pas non plus un centre urbain identifié par la Société Canadienne d'hypothèques et de logement.

- Census Subdivision (CSD):** Refers to the general term applying to municipalities, Indian reserves, Indian settlements and unorganized territories. However, since Indian reserves and settlements do not issue building permits, they are not included in this publication.
- Non-standard Geographic Unit:** The geographic units shown in this publication do not all satisfy the above definition of census subdivision. Some provincial or municipal administrations producing monthly reports do not correspond to the official geographic entities; they are nevertheless shown in this publication under the geographic entity used by these administrations. These so-called non-standard geographic units are few in number and are mostly concentrated in the Maritime provinces; e.g. 'Commission d'urbanisme de Madawaska', Cape Breton Planning Commission, Greater Moncton District, Acadian Peninsula, etc.
- Sub-division de recensement (SDR):** L'expression subdivision de recensement se rattache aux municipalités, aux réserves indiennes, aux établissements et aux territoires non organisés. Toutefois étant donné que les établissements et les réserves indiennes n'émettent pas de permis de bâtir elles ne sont pas comprises dans cette publication.
- Unité géographique non-standard:** Les unités géographiques qui apparaissent dans cette publication ne correspondent pas toutes à la définition de subdivision de recensement tel que défini ci-haut. Certaines administrations provinciales ou municipales étant dans l'impossibilité de produire des rapports mensuels conformes aux entités géographiques officielles, nous les publions selon l'entité géographique utilisée par ces administrations. Ces unités géographiques dites non-standards ne sont cependant pas très nombreuses et sont surtout concentrées dans les provinces maritimes. Exemples: Commission d'urbanisme de Madawaska, 'Cape Breton Planning Commission', 'Greater Moncton District', Péninsule Acadienne, etc.

## Territorial Revisions

Territorial boundaries were established according to the 1986 Census definitions. Changes in boundaries, status or name of census subdivisions between censuses are introduced in this publication on a quarterly basis. Changes affecting the other geographic units (CMAs, CAs, CDs and ERs) are introduced every five years, eighteen months following the census.

## Revision of Data

Two types of revisions can affect the results of the Building Permits Survey:

**(1) Revisions Due to the Correction of Coding Errors**  
These types of revisions are done on a monthly basis only to the data pertaining to the month preceding the reference period.

**(2) Revisions Due to the addition of Late Reports**  
Late reports for the month preceding the reference period are incorporated into the survey results on a continuing basis. However, reports received after the two-month deadline following the reference month are introduced only at the end of the year. As a result, the data for the last twelve months are subject to revision.

## Révisions territoriales

Les limites territoriales ont été établies conformément aux définitions du recensement de 1986. Durant les périodes intercensitaires les changements de limites, de statuts et de noms des (SDR) sont introduits dans cette publication sur une base trimestrielle. Les changements affectant les autres unités géographiques (RMR, AR, DR, RE) sont pour leurs parts incorporés sur base quinquennale dix huit mois après la tenue du recensement.

## Révision des données

Les révisions pouvant affecter les résultats de l'enquête sur les permis de bâtir sont de deux natures:

**(1) Révisions dues à la correction d'erreurs de codage**  
Mensuellement, seules les données du mois précédent la période de référence peuvent être affectées par de telles révisions.

**(2) Révisions dues à l'addition de rapports tardifs**  
Les rapports tardifs se rapportant au mois précédent la période de référence sont incorporés aux résultats de l'enquête sur une base courante. Cependant les rapports reçus après la limite de deux mois suivant le mois de référence ne sont introduits qu'à la fin de l'année. Par conséquent, les données des douze derniers mois sont sujettes à révision.

## **Adjustment for Seasonality**

Seasonally adjusted data for the total number of housing units as well as for the aggregate value of building permits are obtained indirectly, i.e., by adding their components. The total number of dwelling units is obtained by summing the seasonally adjusted data for single-family and multiple-use units; the total value of building permits is obtained by summing the following elements: residential, industrial, commercial and institutional. However, in the interest of continuity and reliability of the Canadian chronological series, the regional data adjusted for seasonality are reconciled with the Canadian totals.

At the end of the year, the chronological series adjusted for seasonality are revised to take into account the most recent seasonal fluctuations. These revisions apply only to the last three years in the series. The revised data are introduced into the CANSIM databank and was for the first time incorporated into the 1989 annual publication on building permits (64-203), which was available at the beginning of 1990.

## **Index of Building Construction**

Building permits represent one of the first steps of the construction process. They express investment intentions of various economic agents and therefore lead any labour and material expenditures. However, due to the existence of seasonality and extreme building permit values, it is difficult to infer from raw data any real changes in the behaviour of economic agents. In table 8, deflated and adjusted data for seasonality already enable a better interpretation of construction activity because they reflect the real level of intentions. Price indexes used to deflate building permit values are the residential and non-residential construction input price indexes. These composite price indexes are derived from union wage rate indexes and construction material indexes, which are available from the CANSIM databank, matrices 400 and 423. In table 9, a filter is applied to the seasonally adjusted permit values in order to eliminate irregular movements. This allows us to identify major movement in the series. With this filtering, the building permits series then becomes a more reliable trend indicator of the economic activity. Unfortunately, such filtering entails a loss of timeliness.

## **Désaisonnalisation**

Les données désaisonnalisées portant sur le total des unités et la valeur agrégée des permis de bâtir sont obtenues indirectement, c'est-à-dire par l'addition de leurs composantes. On obtient les unités totales de logement par l'agrégation des données désaisonnalisées de type unifamilial et multiple; la valeur totale des permis résulte pour sa part de la somme des éléments suivants: résidentiel, industriel, commercial et institutionnel. Cependant par souci de continuité et de fiabilité des séries historiques canadiennes, les données régionales désaisonnalisées sont réconciliées aux totaux canadiens.

À la fin de l'année, les séries chronologiques désaisonnalisées sont revisées afin de tenir compte des plus récentes fluctuations saisonnières. Seules les trois années de fin de série sont affectées par ce processus de révision. Les données revisées sont introduites à la banque de données CANSIM et ont été incorporées pour la première fois à la publication annuelle de 1989 sur les permis de bâtir (64-203) laquelle était disponible au début de 1990.

## **Indice de la construction**

Les permis de bâtir représentent une des premières étapes du processus de construction. Ils expriment les intentions d'investissement des différents agents économiques et par conséquent devancent les dépenses en main d'oeuvre et en matériaux. Cependant, dû à la présence de la saisonnalité et des valeurs extrêmes à l'intérieur des séries, les données brutes ne permettent pas de distinguer tout changement d'attitude des agents économiques. Au tableau 8, les données désaisonnalisées et dégonflées de l'effet de prix permettent déjà une meilleure interprétation de la valeur des permis puisqu'elles reflètent le niveau réel des intentions. Les indices de prix employés pour le dégonflement de la valeur des permis de construire sont les indices de prix des entrées dans la construction résidentielle ou non résidentielle. Ces indices synthétiques sont calculés à partir des indices des salaires syndicaux et des matériaux de construction obtenus de la banque de données CANSIM, matrices 400 et 423. Au tableau 9, un filtre est appliqué aux permis de bâtir afin d'éliminer les valeurs extrêmes. Ce procédé permet d'identifier les mouvements fondamentaux des séries. En lissant le mouvement de la série, celle-ci devient donc un indicateur de tendance beaucoup plus fiable de l'activité économique. Il est à noter qu'une meilleure tendance ne peut être obtenue qu'en sacrifiant un peu d'actualité et c'est la raison pour laquelle les séries sont publiées avec deux mois de retard.

## Availability of Data

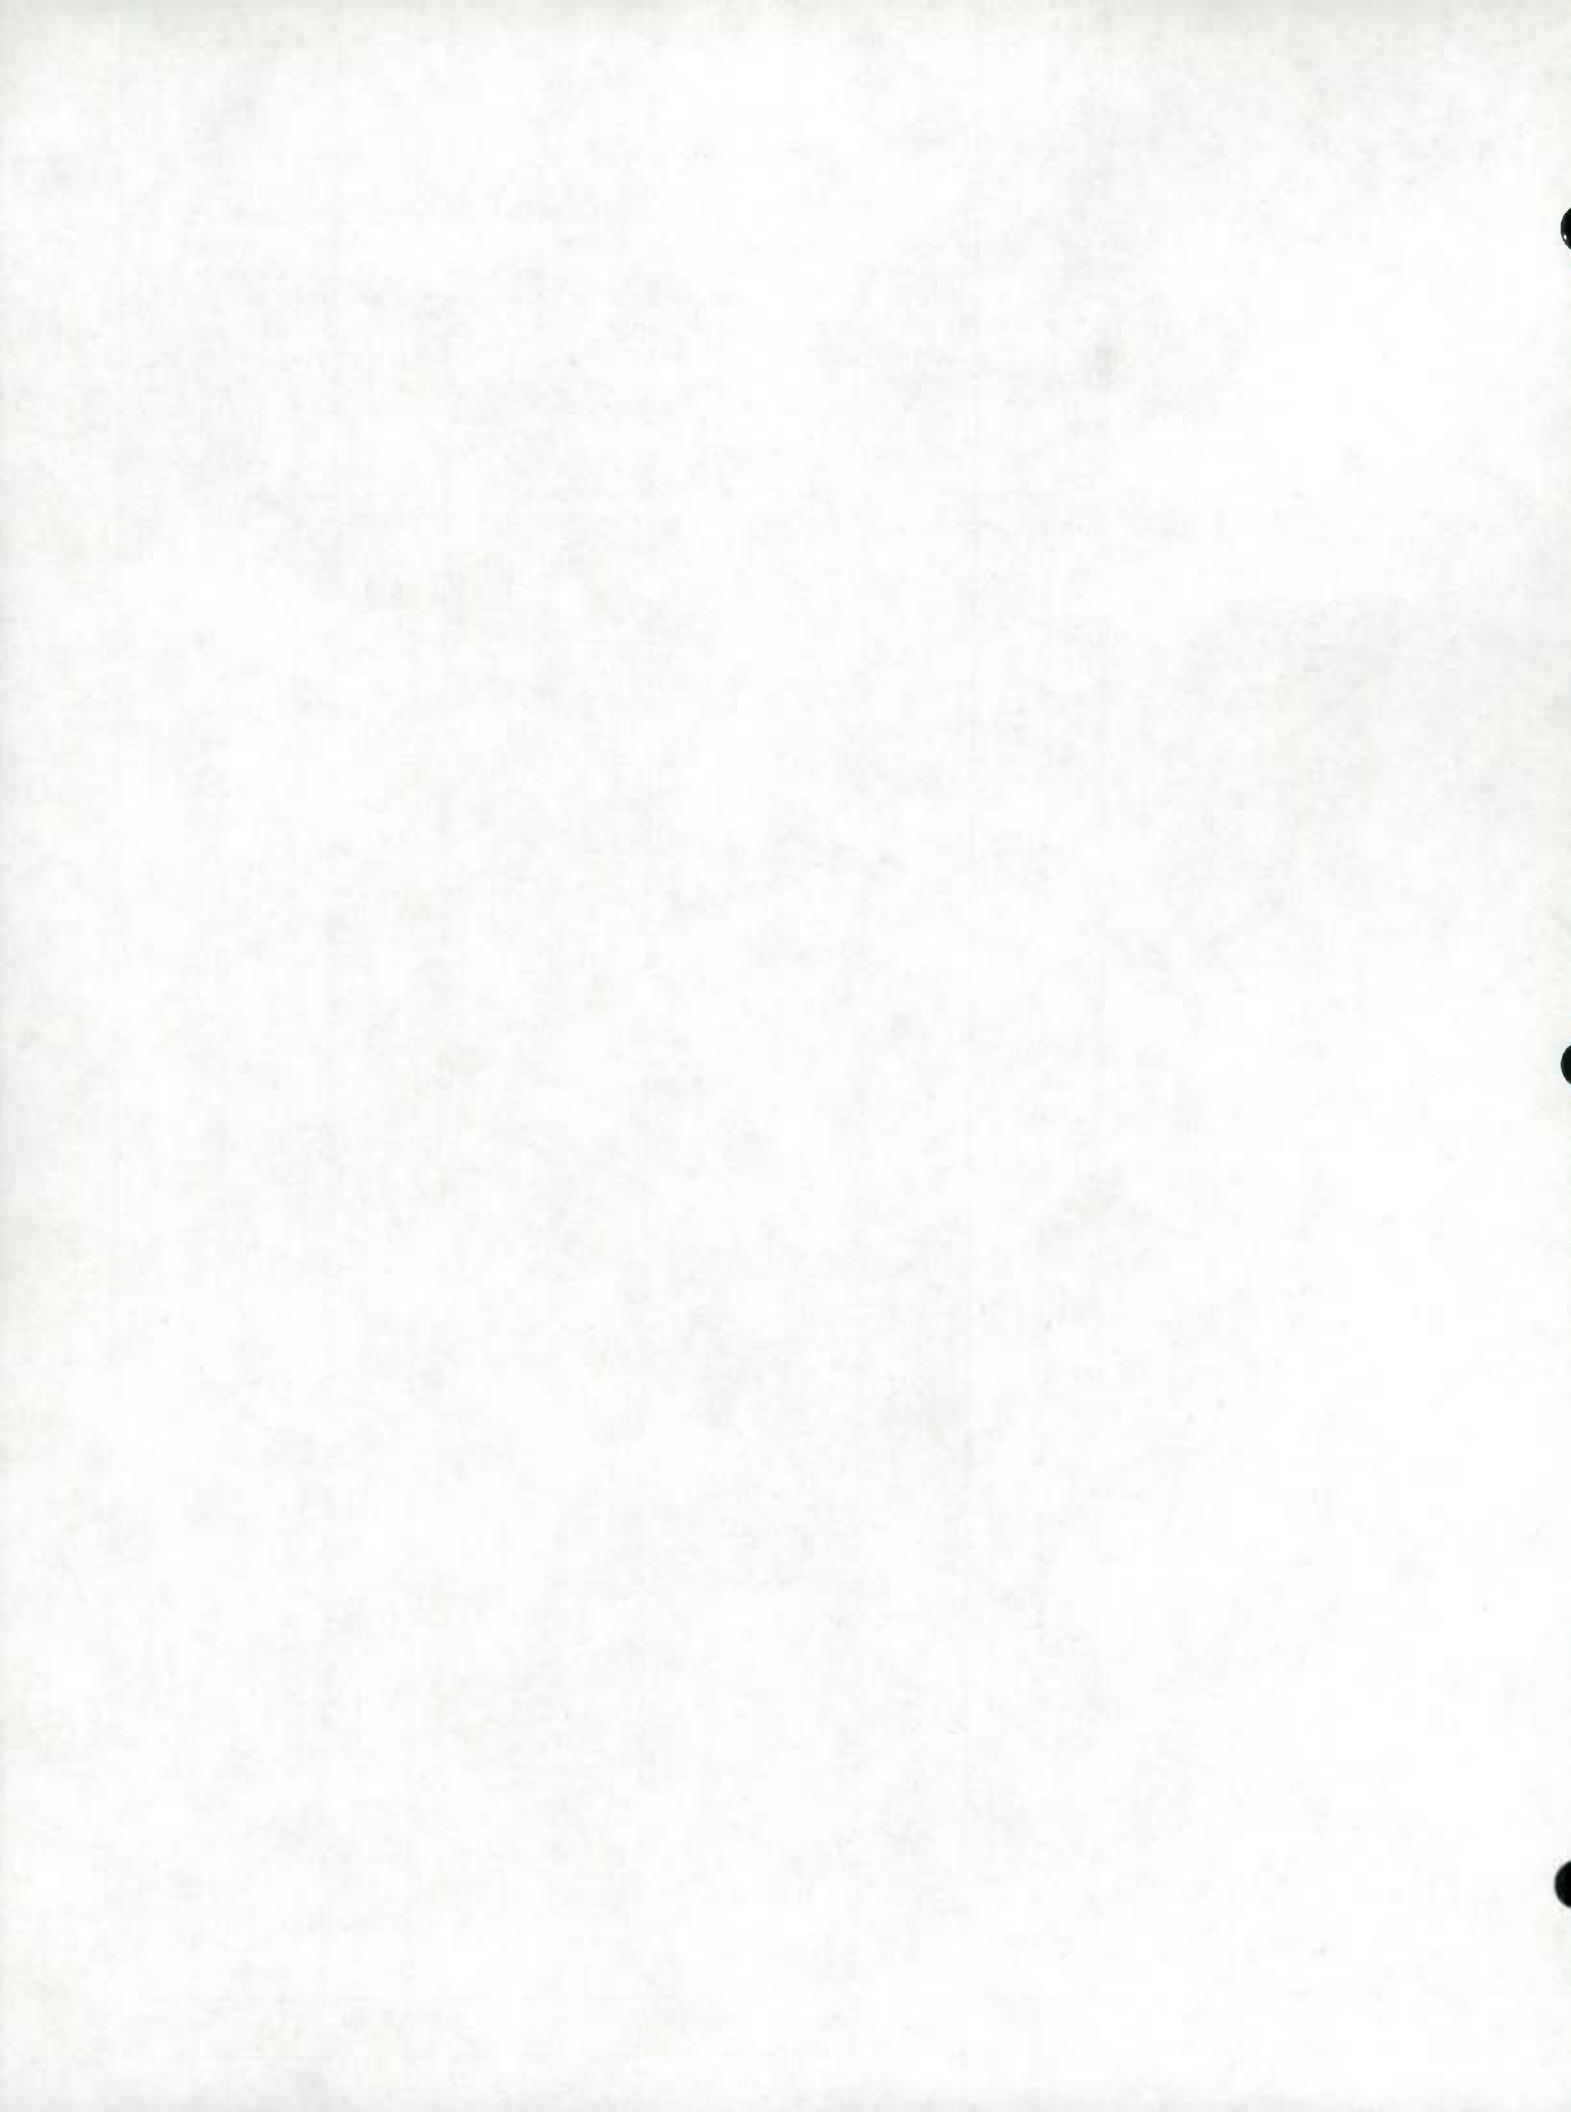

This publication contains only part of the data produced on building permits. However, you may order unpublished tables<sup>3</sup> or address special requests, now available on diskette, to the **Current Investment Indicators Section ((613) 951-9689, call collect)**. The majority of the series presented here is also available on CANSIM in matrices 80 (levels 3-7, 16-22), 129, 137, 443, 989-992, 994, 995 and 4073.

## Disponibilité des données

La présente publication ne renferme qu'une partie des données produites sur les permis de bâtir. On peut cependant en s'adressant à la section des **Indicateurs courants de l'investissement ((613) 951-9689, frais virés)** commander soit des tableaux non-publiés<sup>3</sup> ou soumettre des requêtes spéciales. Ces dernières sont maintenant disponibles sur disquette. La plupart des séries présentées ici sont aussi disponibles sur CANSIM dans les matrices 80 (niveaux 3 à 7 et 16 à 22), 129, 137, 443, 989-992, 994, 995 et 4073.

<sup>3</sup> A list of these tables is available from Statistics Canada Head Office or from the regional offices.

<sup>3</sup> La liste de ces tableaux peut être obtenue en s'adressant soit au bureau central ou aux bureaux régionaux de Statistique Canada.

## NON-STANDARD GEOGRAPHIC UNITS:

### Prince Edward Island

**Queens, UCR:** This area includes the following census sub-divisions:

Brackley com, Clyde River com, Eliot River com  
Hillsborough Park com, Lot 24 lot,  
Lot 30 lot, Lot 31 lot, Lot 33 lot,  
Lot 34 lot, Lot 35 lot, Lot 36 lot,  
Lot 48 lot, Lot 49 lot, Lot 65 lot,  
Meadowbank com, North Rustico com,  
Queens Royalty lot,  
ScotchFort 4 r, Union Road com,

### Nova Scotia

**Cape Breton, CR:** This area includes the following census sub-divisions:

Cape Breton, subd. A scm, Cape Breton,  
subd. B scm, Cape Breton, subd. C scm,

### New Brunswick

**Greater Moncton, PDR:** This area includes the following census sub-divisions:

Coverdale par, Dorchester par, Moncton par,

### British Columbia

**Capital, RDR:** This area includes the following census sub-divisions:

Capital, subd. A srd, Capital, subd. B, srd,  
Capital, subd. C srd., Sooke 2, r.

**Central Okanagan, RDR:** This area includes the following census sub-divisions:

Central Okanagan, subd. A srd,  
Central Okanagan, subd. B srd,

## UNITÉS GÉOGRAPHIQUES NON STANDARD:

### Île-du-Prince-Édouard

**Queens, UCR:** Ce territoire comprend les sub-divisions de recensement suivantes:

Brackley com, Clyde River com, Eliot River com,  
Hillsborough Park com, Lot 24 lot,  
Lot 30 lot, Lot 31 lot, Lot 33 lot,  
Lot 34 lot, Lot 35 lot, Lot 36 lot,  
Lot 48 lot, Lot 49 lot, Lot 65 lot,  
Meadowbank com, North Rustico com,  
Queens Royalty lot,  
ScotchFort 4 r, Union Road com,

### Nouvelle-Écosse

**Cape Breton, CR:** Ce territoire comprend les sub-divisions de recensement suivantes:

### **Related Public-use Microdata Tapes**

A public use microdata tape linking 1987 Shelter Cost Survey data with Household Income Facilities and Equipment data is available. Copies of each tape and associated documentation are priced at \$1,000. This tape is available from the Income and Housing Surveys Section, Household Surveys Division, Statistics Canada, K1A 0T6, (613)951-9775 or 951-9778.

Tapes based on the Survey of Family Expenditures are also available; contact the Family Expenditure Surveys Section.

### **Special Tabulations**

Special tabulations can be produced to your specifications on a cost recovery basis. Inquiries should be directed to the Current Investment Indicators Section.

Further information on these products and other aspects of the surveys can be obtained from the Investment and Capital Stock Division, Statistics Canada, K1A 0T6, (613)951-9689.

### **Bandes de microdonnées connexes à grande diffusion**

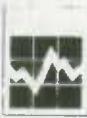

Il existe une bande de microdonnées à grande diffusion assurant le couplage des données de l'Enquête sur les frais de logement de 1987 et des données sur le revenu des ménages et sur l'équipement ménager. Le prix demandé pour chaque exemplaire de la bande et la documentation connexe est de \$1,000. On peut se procurer cette bande auprès de la Section des enquêtes sur le revenu et le logement, Division des enquêtes-ménages, Statistique Canada, K1A 0T6, (613)951-9775 ou 951-9778.

On peut également se procurer des bandes portant sur l'Enquête sur les dépenses des familles auprès de la Section des enquêtes sur les dépenses des familles.

### **Totalisations spéciales**

Il est également possible de produire, sur la base de recouvrement des coûts, des totalisations spéciales établies conformément à vos spécifications. Veuillez adresser vos demandes de renseignements à cet égard à la Section des Indicateurs courants de l'investissement.

Vous pourrez obtenir de plus amples renseignements sur ces produits et sur d'autres aspects des enquêtes auprès de la Section des Indicateurs courants de l'investissement, Division de l'investissement et du stock de capital, Statistique Canada, K1A 0T6, (613)951-9689.

#### GENERAL INFORMATION

The collection of this information is authorized by the Statistics Act, Revised Statutes of Canada, 1985, Chapter S19.

The purpose of the survey is mainly twofold. First, the results enable Statistics Canada (STC) to estimate residential and non-residential construction activity at various geographical levels. Secondly, it serves to identify new housing projects for enumeration in the Housing Starts and Completions Survey conducted by Canada Mortgage and Housing Corporation (CMHC). For this reason, the survey is conducted in co-operation with CMHC.

Results of this survey are published monthly in Building Permits Catalogue 64-001 and annually in Building Permits — Annual Summary, Catalogue 64-203.

**PLEASE REFER TO THE SURVEY REPORTING GUIDE WHEN COMPLETING YOUR REPORT.** Additional copies of this guide are available from our STC regional representative.

#### RENSEIGNEMENTS GÉNÉRAUX

La collecte de cette information est autorisée par la Loi sur la statistique, Lois révisées du Canada, 1985, chapitre S19.

L'enquête vise deux objectifs principaux. Tout d'abord, ses résultats permettent à Statistique Canada (SC) de mesurer l'activité dans le domaine de la construction tant au niveau municipal que provincial. Deuxièmement, elle permet à la Société canadienne d'hypothèques et de logement (SCHL) d'identifier tout nouveau projet de construction résidentielle et de l'inclure au programme d'énumération dans le cadre de l'enquête sur les "logements mis en chantier et parachevés". En raison de ces besoins, Statistique Canada mène cette enquête en coopération avec la SCHL.

Les résultats de cette enquête sont publiés mensuellement dans Permis de bâti, n° 64-001 au catalogue et annuellement dans Permis de bâti — Sommaire annuel, n° 64-203 au catalogue.

**VEUILLEZ CONSULTER LE GUIDE DE DÉCLARATION DE L'ENQUÊTE POUR COMPLÉTER VOTRE RAPPORT.** Des copies supplémentaires sont disponibles auprès du représentant régional de SC.

**CONFIDENTIALITY**

**CONFIDENTIALITÉ**

Statistics Canada is prohibited by law from publishing any statistics which would divulge information obtained from this survey that relates to any identifiable business, without the previous written consent of that business. The data reported will be treated in strict confidence, used for statistical purposes and published in aggregate form only. The confidentiality provisions of the Statistics Act are not affected by either the Access to Information Act or any other legislation.

La loi interdit à Statistique Canada de publier des statistiques recueillies au cours de cette enquête qui permettraient d'identifier une entreprise sans que celle-ci en ait donné l'autorisation par écrit au préalable. Les données déclarées resteront confidentielles, serviront exclusivement à des fins statistiques et seront publiées uniquement sous forme agrégée. Les dispositions de la Loi sur la statistique qui traitent de la confidentialité ne sont modifiées d'aucune façon par la Loi sur l'accès à l'information ou toute autre loi.

**CORRESPONDENCE**

**CORRESPONDANCE**

If you require assistance in the completion of the report or have any questions regarding the survey, please call (collect) the nearest Statistics Canada Regional Office.

Si vous avez besoin d'aide pour remplir le rapport ou si vous avez des questions ayant trait à l'enquête, veuillez téléphoner (à frais virés) au bureau régional de Statistique Canada le plus près.

# HIRE OUR TEAM OF RESEARCHERS FOR \$53 A YEAR

Subscribing to **Perspectives on Labour and Income** is like having a complete research department at your disposal. Solid facts. Unbiased analysis. Reliable statistics.

But **Perspectives** is more than just facts and figures. It offers authoritative insights into complex labour and income issues, analysing the statistics to bring you simple, clear summaries of where the labour market and income distributions are headed.

Our team of experts is working to bring you the latest labour and income data. Each quarterly issue has:

- topical articles on current labour and income trends
- more than 50 key labour and income indicators
- a review of ongoing research projects
- information on new survey results

As a special bonus, twice a year you will also receive a Labour Market Review, giving you up-to-the-minute analysis and data of how the labour market has performed over the last six months or year.

## And all for only \$53.00.

Thousands of Canadian professionals turn to **Perspectives** to discover new trends in labour and income and to stay up-to-date on the latest research findings. As a subscriber, you will get the inside story.

We know you'll find **Perspectives** indispensable. GUARANTEED. If you aren't convinced after reading your first issue, we'll give you a FULL REFUND on all outstanding issues. Order your subscription to **Perspectives** today.

### ORDER NOW!

For only \$53 (plus \$3.71 GST) you will receive the latest labour and income research (4 issues per year). Subscription rates are US\$64 for U.S. customers and US\$74 for customers outside North America. Fax your Visa or MasterCard order to: 613-951-1584

# NOTRE ÉQUIPE DE CHERCHEURS EST À VOTRE SERVICE POUR 53\$ PAR ANNÉE

S'abonner à **L'emploi et le revenu en perspective**, c'est disposer d'une division entière de chercheurs à votre service. Des faits solides. Des analyses objectives. Des statistiques fiables.

La publication n'a pas que des faits et des chiffres. Elle offre également des analyses de fond sur des questions complexes touchant l'emploi et le revenu, de façon à fournir des indications claires et précises sur les tendances actuelles du marché du travail et de la répartition des revenus.

Notre équipe de spécialistes travaille activement afin de mettre à votre disposition des données actuelles sur l'emploi et le revenu. Dans chacun des numéros trimestriels, vous trouverez

- des articles de fond rédigés par des spécialistes de l'emploi et du revenu;
- plus de 50 indicateurs clés de l'emploi et du revenu;
- un aperçu des projets de recherche en cours;
- de l'information provenant des nouvelles enquêtes.

En plus, vous recevrez une revue du marché du travail, un supplément publié deux fois par année.

### Tout cela pour 53 \$ seulement!

Des milliers de professionnels au Canada consultent **Perspective** pour connaître les tendances de l'emploi et du revenu, ainsi que les plus récents résultats de recherche. Votre abonnement vous permettra de connaître tous les faits.

Nous savons que **L'emploi et le revenu en perspective** deviendra pour vous un outil indispensable. Nous le garantissons. Si vous n'êtes pas satisfaits après avoir lu le premier numéro, nous vous REMBOURSERONS le montant payé pour les numéros à venir. Abonnez-vous à **Perspective** dès aujourd'hui.

### ABONNEZ-VOUS DÈS MAINTENANT!

Pour 53 \$ seulement (plus 3,71 \$ de TPS), vous recevrez les plus récentes recherches sur l'emploi et le revenu (quatre numéros par année).

L'abonnement est de 64 \$ US aux États-Unis et de 74 \$ US à l'extérieur de l'Amérique du Nord. Faites parvenir votre commande par télécopieur (Visa ou MasterCard) : 613-951-1584

# CANADA'S ENVIRONMENT

# L'ENVIRONNEMENT DU CANADA

**E**very day you read news items about recycling, water pollution, industrial emissions or the depletion of the ozone layer. Unfortunately, these reports are often fragmented, making it difficult to get a complete picture of Canada's physical environment.

*Human Activity and the Environment* is written to help you understand the links between our population, socio-economic activities and our environment. You'll see, for example, how the purple loosestrife and zebra mussels are spreading throughout inland waters and the effect they have.

**CASE STUDY:** A statistical profile of an Ontario river basin is also included as a case study to demonstrate how socio-economic information can be linked with physical data at a local level.

**V**ous lisez tous les jours des articles traitant de recyclage, de la pollution de l'eau, des émissions de gaz industrielles ou de la diminution de la couche d'ozone. Malheureusement, ces rapports sont trop souvent fragmentés et il devient difficile de se faire une parfaite idée de l'environnement physique du Canada.

*Activité humaine et l'environnement* est écrit afin de vous aider à comprendre les liens entre notre population, nos activités socio-économiques et notre environnement. Vous verrez, par exemple, comment les salicaires et les dreissna sont réparties à travers les eaux intérieures et quels en sont leurs effets.

**ÉTUDE DE CAS :** un profil statistique du bassin hydrographique de l'Ontario est également présenté comme étude de cas, en vue de montrer comment l'information socio-économique peut être mise en rapport avec les données physiques à un endroit donné.

Organized in three, easy-to-read sections: Population, Socio-Economic Systems, and Environmental Conditions, this publication examines our activities from a number of perspectives:

- resource consumption
- waste generation
- monitoring the conditions of land, water, air and living organisms

This unique bestseller highlights such fascinating details as:

- purchases of potential pollutants by Canadian households
- the importance of natural resources to the Canadian economy
- energy consumption by industry

L'ouvrage est divisé en trois parties importantes : la population, les réseaux socio-économiques et l'état de l'environnement, qui examine nos activités sous différents angles:

- la consommation des ressources naturelles
- la production des déchets
- la surveillance de l'état des terres, de l'eau, de l'air et des organismes vivants

Ce best-seller unique met en relief des détails aussi fascinants que :

- les achats de polluants potentiels par les grandes maisons canadiennes
- l'importance des ressources naturelles pour l'économie canadienne
- la consommation d'énergie par industrie

# Now More Than Ever, Strategic Planning Requires Reliable Trade Information . . .

## . . . And We've Got It.

At the International Trade Division, Statistics Canada, we edit, compile and analyse data from hundreds of thousands of Customs documents each month. Available on tape, printouts, microfiche, diskettes or publications, these statistics can serve to:

- ✓ determine market shares
- ✓ identify domestic and foreign market trends
- ✓ forecast inventory and plan production
- ✓ describe merchandise trade

### Do You Need A Special Report Designed To Meet Your Specific Needs? We've Got It.

If you are interested in one commodity or a certain country you may wish a monthly, quarterly or annual report on exports/imports. We can tailor a report just for you. Data variables include:

- ✓ U.S. state of destination
- ✓ quantity shipped
- ✓ mode of transport
- ✓ HS class
- ✓ country origin/destination
- ✓ value of commodity shipped

### Do You Need Comprehensive World Trade Data? We've Got It!

Our World Trade Database presents a complete matrix of country to country trade flows for 160 countries, 600 commodities and 300 industries. That's the most comprehensive database of comparable trade data available today.

### Do You Need a Complete Database of Timely Trade Statistics?

#### We've Got It!

TIERS, our new software package provides data on over 15,000 commodities for 200 countries at the most detailed level for imports and exports. It is updated monthly, just 48 hours after the data are released and allows you immediate access to quantity, value, province, year and U.S. state code variables.

### Put Our Data To Work For You!

To receive a free copy of the Catalogue of Products and Services available from the International Trade Division or to talk with a technical consultant about how we can help you, please contact:  
Trade Information Unit  
International Trade Division  
9-B2 Jean Talon Building

# Aujourd'hui plus que jamais, la planification stratégique nécessite des renseignements fiables sur le commerce . . .

## . . . Et nous les avons.

À la Division du commerce international de Statistique Canada, nous vérifions, rassemblons et analysons chaque mois les données de centaines de milliers de documents douaniers. Les statistiques sur bande, sur sortie imprimée, sur microfiche, sur disquette ou sous forme de publications peuvent servir à:

- ✓ déterminer les parts de marché
- ✓ dégager les tendances sur les marchés intérieurs et étrangers
- ✓ gérer les stocks et planifier la production
- ✓ décrire le commerce de marchandises

### Avez-vous besoin d'un rapport spécial répondant parfaitement à vos besoins? Nous l'avons!

Si vous vous intéressez à une marchandise ou à un pays particulier, un rapport mensuel, trimestriel ou annuel sur les exportations/importations vous serait peut être utile. Nous pouvons vous produire un rapport sur mesure. Les données peuvent être présentées en fonction des variables:

- ✓ état américain de destination
- ✓ quantité expédiée
- ✓ valeur des marchandises expédiées
- ✓ classe du SH
- ✓ pays d'origine/de destination
- ✓ mode de transport

### Avez-vous besoin de données sur l'ensemble du commerce mondial?

#### Nous les avons!

Notre Base de données sur le commerce mondial donne accès à une matrice complète de données sur les flux des échanges pour 160 pays, 600 groupes de marchandises et 300 branches d'activité. Cette base de données comparables sur le commerce est la plus complète qui soit.

### Avez-vous besoin d'une base de données complète offrant des statistiques actuelles sur le commerce?

#### Nous l'avons!

TIERS est notre nouveau logiciel donnant accès à des données très détaillées sur les importations et les exportations, et ce pour 200 pays et plus de 15,000 marchandises. Les mises à jour s'effectuent mensuellement, à peine 48 heures après la diffusion des données, ce qui vous permet d'accéder sans délai aux variables quantité, valeur, province, année et code d'état américain.

### Mettez nos données à votre service!
