APPENDIX A

Construction of dwelling units in other major urban areas	24
---	----

NEW RESIDENTIAL CONSTRUCTION

October, 1962

(Urban centres of 5,000 population and over)

Introduction

The statistics contained in this report are the results of a nationwide survey, the field work for which is carried out by the Central Mortgage and Housing Corporation. All Metropolitan Areas and urban centres of 5,000 population and over, as well as other areas of high building activity, are enumerated completely each month. The remainder of the country is covered on a sample basis four times a year - at the end of March, June, September and December.

The reports for March, June, September and December contain statistics referring to all areas. The tables in the reports for these months containing data for all areas are numbered Q-1 to Q-6, inclusive. In the remaining months, statistics are available only for the urban centres of 5,000 population and over (including the Metropolitan Areas of the larger cities). Tables containing data for these centres only are identified as M-1 to M-10 and Appendix A and appear in all the reports for the 12 months. In the reports containing quarterly data for all areas, these monthly tables follow the quarterly tables.

Adjustments

A column headed "Adjustments" appears in Table M-1. These adjustments can arise in various ways. For example, after a start on a dwelling has been made construction may cease, or a structure when completed may contain more or fewer dwelling units than were reported when construction commenced.

Definitions

The count of dwellings which are started, completed, and under construction includes only new residential construction intended for year-round occupancy. Seasonal dwellings such as summer cottages, ski shacks, etc., are not counted. Dwellings which are occupied even if unfinished are regarded as completed for the purposes of this survey.

Types of dwelling:

- (i) 1-family detached - a one-family house open on all four sides, i.e., not joined to other buildings;
- (ii) 2-family detached - a two-family house which contains only two dwelling units, either one above the other open on all four sides, or two units side by side each open on three sides, sometimes known as a semi-detached house;
- (iii) Row or terrace - a one-family or two-family house in a row of three or more attached houses with common or adjacent walls;

- (iv) Apartment or flat - an apartment or flat is (a) a dwelling in a residential structure containing three or more dwelling units, or (b) a dwelling in a structure used for business purposes which contains one or more dwelling units (e.g., living quarters in an office building or factory, living quarters over a store, etc.).

A dwelling unit is defined as a structurally separate set of living quarters having its own entrance from outside of the building, or from a common passage inside. The number of dwelling units in a structure will be the number of households the structure is intended to accommodate.

Metropolitan Areas

Some cities in Canada have reasonably well-defined suburban areas and the largest of these have been included in Table M-2 under the name of the principal city. Data for the individual components of these Metropolitan Areas are given in Table M-3.

Since January 1, 1956, the Metropolitan Areas used are those set up for the 1956 Census. From 1952 to 1955 the 1951 Census Metropolitan Areas were used. The composition of the Metropolitan Areas in use prior to 1952 is detailed in Appendix 3 of the May 1951 report.

Other Major Urban Areas

In addition to the Metropolitan Areas, other large urban centres also have suburban areas. Data for these other major urban areas are given in Appendix A. It should be noted that in Table M-2, the urban components of these areas having populations of 5,000 and over are listed individually and that the remaining municipalities are excluded from any tables or totals referring to urban centres of 5,000 population and over.

Note: Statistics for urban centres are included in these tables if the population was 5,000 or over in the latest census. Thus, the basis for 1948 to 1951, inclusive, was the 1941 Census; for 1952 to 1956, inclusive, it was the 1951 Census; and for 1957 to date, it was the 1956 Census. For purposes of comparison with 1956, figures for 1957 adjusted to cover the same municipalities included in 1956 are shown in parentheses above the actual 1957 figures.

Table M-5. - Monthly completions in urban centres of 5,000 population and over, summarized by region
