NEW RESIDENTIAL CONSTRUCTION

OCTOBER 1966

(Urban Centres of 5,000
population and over)Introduction

The statistics contained in this report are the results of nation-wide surveys carried out by the Central Mortgage and Housing Corporation. All Metropolitan Areas, Major Urban Areas and Urban Centres of 5,000 population and over are enumerated completely each month. The remainder of the country is covered on a sample basis four times a year - at the end of March, June, September and December.

The reports for March, June, September and December contain statistics referring to all areas. The tables in the reports for these months containing data for all areas carry a number preceded by the letter Q. In the remaining months, statistics are available only for the centres of 5,000 population and over (including the Metropolitan areas and Major Urban Areas). Tables containing data for these centres are identified by a number preceded by the letter M, and appear in all the reports for the 12 months. In the reports containing quarterly data for all areas, quarterly tables follow monthly tables.

Publication

The responsibility for this publication has been transferred as of January 1, 1963, from the Special Surveys Division to the Business Finance Division. The regular users of the statistical series of starts and completions will notice the change in the presentation of the data from the previous publications. It is possible that further changes will be introduced in the future keeping in mind the interest of the users.

The Metropolitan Areas, Major Urban Areas and Urban Centres of 5,000 population and over have been defined according to the 1961 Census. Although the Census does not classify them as such, the cities of Regina and Saskatoon have been included in this publication as Major Urban Areas.

CONSTRUCTION DOMICILIAIRE NEUVE

OCTOBRE 1966

(Agglomérations urbaines de 5,000
habitants et plus)Introduction

La statistique que fournit le présent rapport découle de relevés d'envergure nationale effectués par la Société centrale d'hypothèques et de logement. Toutes les zones métropolitaines, toutes les grandes agglomérations urbaines et toutes les agglomérations de 5,000 habitants et plus font l'objet d'un dénombrement complet tous les mois. Le reste du pays est examiné au moyen d'un sondage quatre fois l'an, soit à la fin des mois de mars, juin, septembre et décembre.

Les rapports pour mars, juin, septembre et décembre ont trait à toutes les régions. Les tableaux des rapports de ces mois-là, qui renferment des chiffres concernant toutes les régions, portent un numéro précédé de la lettre Q. Dans le cas des autres mois, la statistique ne vise que les agglomérations de 5,000 habitants et plus (y compris les zones métropolitaines et les grandes agglomérations urbaines). Les tableaux contenant des données relatives à ces agglomérations sont identifiés au moyen d'un chiffre précédé de la lettre M et paraissent dans chacun des douze rapports mensuels. Dans les rapports qui renferment des données trimestrielles portant sur toutes les régions, les tableaux trimestriels suivent les tableaux mensuels.

Publication

Le 1^{er} janvier 1963, la responsabilité de la présente publication est passée de la Division des enquêtes spéciales à celle des finances des entreprises. Les usagers habituels de la série portant sur les mises en chantier et les achèvements remarqueront que dans le présent rapport les données ne sont pas présentées exactement comme dans les publications antérieures. Il se peut que d'autres changements soient aussi apportés plus tard, dans l'intérêt même de l'usager.

Les zones métropolitaines, les grandes agglomérations urbaines et les agglomérations de 5,000 habitants et plus ont été définies d'après les normes du recensement de 1961. Même si le recensement ne les classe pas en tant que telles, les villes de Regina et de Saskatoon figurent dans le présent rapport comme grandes agglomérations urbaines.

The data published since January 1963 are on the basis of the 1961 Census. Therefore statistics on particular areas are not always strictly comparable with those presented in publications issued prior to 1963 which were using area delimitations and population data based on earlier Censuses.

Depuis janvier 1963, les données sont présentées dans les tableaux en conformité de la base du recensement de 1961. Il s'ensuit que les chiffres concernant certaines régions en particulier ne sont pas toujours strictement comparables à ceux fournis dans les publications antérieures à 1963, qui se fondaient sur les délimitations géographiques et les données démographiques des recensements précédents.

Definitions

For the purpose of this report new residential construction activity is measured in terms of physical volume (as opposed to value) and the common unit of measurement is the "dwelling unit". For a given period the survey is designed to provide information on the number of dwelling units started, dwelling units completed and dwelling units under construction at the end of the period.

For Census purposes a dwelling unit is defined as a structurally separate set of living premises with a private entrance either outside the building or from a common hall, lobby, vestibule or stairway inside the building. The entrance must be one that can be used without passing through anyone else's living quarters.

Examples of dwelling unit are: each single house, each half of a double house, each section of a row or terrace, each self-contained apartment, flat or suite in an apartment block, duplex, double-duplex, row-duplex, triplex, maisonettes and garden-court type of multiple dwellings, each self-contained apartment adjoining a non-residential building such as a school, church, store, factory.

All the above examples of dwelling units fall within the confines of the Starts and Completions Survey except dwelling units created as a result of some structural change and normally referred to as "conversions". Alterations and extensions to existing buildings are also excluded from the Survey.

The Census definition of a dwelling unit includes such structures as summer cottages, cabins, shacks, trailers and boathouses if they were occupied at the time of the Census by persons with no other usual residence. However, these are excluded from the Starts and Completions Survey which covers only residential construction intended for year-round occupancy.

Définitions

Aux fins du présent rapport, l'activité dans le domaine de la construction domiciliaire neuve est mesurée en volume physique (par opposition à la valeur), et l'unité commune de mesure est l'"unité de logement". Pour toute période donnée, l'enquête vise à fournir des renseignements sur le nombre d'unités de logement mises en chantier, sur le nombre d'unités de logement achevées et sur le nombre d'unités de logement en construction à la fin de la période.

Au sens du recensement, l'unité de logement s'entend de tout ensemble de pièces d'habitation distinct quant à la structure, avec entrée privée donnant sur l'extérieur ou sur un endroit commun à l'intérieur (corridor, vestibule, escalier). L'entrée doit donner accès au logement sans obliger à passer par les locaux d'habitation d'une autre personne.

Voici des exemples d'unité de logement: toute maison simple, toute moitié de maison jumelée, toute section d'une rangée de maisons; tout appartement indépendant, tout plain-pied ou toute "suite" dans une maison d'appartements, dans un duplex, dans un duplex jumelé, dans une rangée de duplex, dans un triplex, dans des maisonnettes et jardins d'habitation à logements multiples; tout appartement autonome attenant à un immeuble non domiciliaire qui peut être une école, une église, un magasin, une fabrique, etc.

Tous les exemples précités rentrent dans les limites de l'enquête sur les mises en chantier et les achèvements, sauf les unités de logement créées par suite d'une modification de structure -- habituellement appelée "transformation". Modifications et rajouts n'entrent pas non plus dans le champ de l'enquête.

Par définition (recensement), l'unité de logement comprend des immeubles tels que chalets, cabines, huttes, remorques et bateaux qui, lors du recensement, étaient occupés par des personnes n'ayant pas d'autre résidence régulière. Toutefois, les bâtiments de ce genre sont exclus de l'enquête sur les mises en chantier et les achèvements, laquelle n'embrasse que les constructions domiciliaires habitées à l'année longue.

The broad definition of "dwelling unit" includes also special types of living quarters, such as health and welfare institutions, corrective and penal institutions, religious and educational institutions, hotels, lodging houses, camps, merchant vessels, diplomatic residences, etc. These are usually referred to as "collective-type dwellings" as opposed to private-type dwellings described earlier; the collective-type dwellings are excluded from the Starts and Completions Survey.

To sum up, the Starts and Completions Survey enumerates dwelling units in new structures only, such units being designed for non-transient and year-round occupancy.

A Start, for the purpose of this survey, is recorded when the footing has been installed, that is, when the concrete has been poured for the whole of the footing around the structure.

A Completion, for the purpose of this survey, is the stage at which all the proposed construction work on a dwelling unit has been performed.

For multiple-dwellings structures, the definition of a Start or Completion applies to the structure rather than to the individual dwelling units therein.

The number of units Under Construction at the end of a period as shown in this publication takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has been made, construction may cease, or a structure when completed may contain more or fewer dwelling units than were reported when construction commenced.

Comparison of Census Tabulations with Tabulations Presented in this Report

The 1961 Census classifies data on the housing stock according to the following types of dwelling:

Single detached: This type is commonly called a "single house". It contains only one dwelling unit which is completely separated on all sides from any other dwelling or structure.

Single attached: This category includes dwelling units separated by a common wall extending from ground to roof. Single attached dwellings in structures consisting of only two dwelling units are classified as Single attached (double). All other single attached dwellings whether in rows of three or more dwellings or

Dans son sens général, l'unité de logement comprend aussi certains genres particuliers de locaux d'habitation, notamment les institutions de santé et de bien-être, les institutions pénitentiaires et de réforme, les institutions religieuses et éducatives, les hôtels, les maisons d'hébergement, les camps, les navires marchands, les résidences diplomatiques, etc. Ces locaux sont habituellement appelés "logements collectifs" par opposition aux habitations privées décrites précédemment; les logements collectifs ne sont pas visés par l'enquête sur les mises en chantier et les achèvements.

En résumé, l'enquête dénombre uniquement les unités comprises dans les constructions neuves et devant être occupées de façon permanente et à l'année longue.

La mise en chantier, aux fins de l'enquête, est notée lorsque l'emplacement est installé, c'est-à-dire lorsque le béton a été coulé dans l'emplacement, tout autour de l'immeuble projeté.

L'achèvement, aux fins de l'enquête, correspond au stade où tous les travaux de construction projetés pour une même unité de logement ont été exécutés.

Dans le cas des immeubles à logements multiples, la définition de la mise en chantier ou de l'achèvement porte sur l'ensemble de la construction et non sur ses unités de logement prises en particulier.

Dans la présente publication, le nombre de logements en construction à la fin du mois tient compte de certains rajustements qui s'imposent pour des raisons diverses. Par exemple, une fois commencés, les travaux de construction d'un logement peuvent être interrompus; d'autre part, une fois achevée, une construction peut renfermer, soit plus, soit moins de logements qu'on ne l'avait d'abord déclaré au moment de la mise en chantier.

Comparaison des calculs du recensement avec ceux du présent rapport

Le recensement de 1961 classe les données relatives au stock de logements d'après les catégories suivantes:

Simples détachés: Ce genre de logement est communément appelé "maison simple". Il ne contient qu'un seul logement complètement isolé, de tous côtés, de tout autre logement ou construction.

Simples attachés: Cette catégorie comprend les logements séparés par un mur mitoyen s'élevant du sol au toit. Les logements simples attachés faisant partie de structures ne comptant que deux logements sont classés comme simples attachés (maison double). Tous les autres logements simples attachés, qu'ils fassent

simply a unit adjoining a store or other non-residential structure, are classified as Single attached (other).

Apartment and flats: These dwellings are also subdivided into two categories. Apartment, flat (duplex) refers to each dwelling in a structure originally designed, or structurally converted, to provide two dwelling units, one above the other and adjoining no other structure. Apartment, flat (other) includes all dwellings of the apartment, flat-type other than the duplex-type mentioned above.

Mobile: Refers to any dwelling designed for movement and actually movable, such as a trailer, railway car, or boat, if occupied by persons with no other usual residence at the Census date.

In this report dwelling units have been divided into four categories:

1. Single detached.
2. Two-family: which comprises Single attached (double) and Apartment, flat (duplex). Double-duplexes and row-duplexes are not included in this category.
3. Row: which comprises only single attached houses in a row of three or more dwellings. In the Census tabulations, these are included in Single attached (other). Row-duplexes are not included in the Row category.
4. Apartment and Other: which comprises Apartment, flat (other).

In other words this category includes:

- (i) double-duplex.
- (ii) triplex.
- (iii) row-duplexes.
- (iv) apartments as commonly known.
- (v) dwellings over, or at the back of, a store or other non-residential structure.

As mentioned earlier Mobile dwellings although covered by the 1961 Census are not enumerated in the Starts and Completions Survey.

partie d'une rangée de trois logements ou plus ou qu'il s'agisse simplement d'un logement attenant à un magasin ou à une autre construction non domiciliaire, sont classés comme simples attachés (autres).

Appartements et plain-pied: Ces logements se subdivisent eux aussi en deux catégories. Appartements, plain-pied (duplex): ce sont les logements d'une structure construite ou transformée de façon à donner deux logements situés l'un au-dessus de l'autre sans autre construction attenante. Appartements, plain-pied (autres): ce sont tous les logements du genre appartement ou plain-pied et qui ne sont pas de la catégorie des duplex.

Mobiles: Il s'agit de tout logement destiné à être transporté et réellement transportable (remorque, wagon, ou bateau) s'il était occupé par des personnes sans autre résidence ordinaire au moment du recensement.

Dans le présent rapport, les logements sont répartis en quatre catégories:

1. Simples détachés.
2. Bi-familiaux: qui comprennent les simples attachés (maison double) et les appartements, plain-pied (duplex). Les doubles duplex et les duplex en rangée ne font pas partie de cette catégorie.
3. Rangées: qui ne comprennent que les maisons simples et attachées en rangée d'au moins trois habitations. Dans les chiffres du recensement, ces genres d'habitations sont compris dans simples attachés (autres). Les duplex en rangée n'entrent pas dans la catégorie des "Rangées".
4. Appartements et autres: comprennent les maisons d'appartements et les plain-pied (autres).

Autrement dit, cette catégorie inclus:

- (i) les doubles duplex.
- (ii) les triplex.
- (iii) les duplex en rangée.
- (iv) les maisons d'appartements au sens courant du terme.
- (v) les logements situés au-dessus ou à l'arrière d'un magasin ou de tout autre construction non domiciliaire.

Comme on l'a signalé précédemment, les logements mobiles, dont le recensement de 1961 tenait compte, ne sont pas dénombrés aux fins de l'enquête sur les mises en chantier et les achèvements.

TABLE M-1. Coverage of the Starts and Completions Survey Expressed in Percentages
of the 1961 Census Population, by Province

TABLEAU M-1. Couverture de l'enquête sur les mises en chantier et les achèvements, exprimée
en pourcentages de la population du recensement de 1961, par province

| Province | Total population 1961 census -- Population totale recensement de 1961 | Urban centres of 5,000 population and over | | | | Other localities -- Autres aggloméra- tions(3) | |
|---|--|--|--|---|-------|---|--|
| | | Agglomérations urbaines de 5,000 habitants et plus | | | | | |
| | | Metropolitan areas(2) -- Zones métropoli- taines(2) | Major urban areas(2) -- Grandes agglomé- rations urbaines(2) | Other urban centres -- Autres agglomé- rations | Total | | |
| per cent -- pourcentage | | | | | | | |
| Canada(1) | 100.0 | 44.8 | 8.2 | 9.7 | 62.7 | 37.3 | |
| Newfoundland -- Terre-Neuve | 100.0 | 19.8 | - | 12.5 | 32.3 | 67.7 | |
| Prince Edward Island -- Île-du-Prince-Édouard .. | 100.0 | - | - | 25.7 | 25.7 | 74.3 | |
| Nova Scotia -- Nouvelle-Écosse | 100.0 | 24.9 | 14.4 | 7.2 | 46.5 | 53.5 | |
| New Brunswick -- Nouveau-Brunswick | 100.0 | 16.0 | 9.3 | 13.1 | 38.4 | 61.6 | |
| Québec | 100.0 | 48.8 | 8.1 | 9.0 | 65.9 | 34.1 | |
| Ontario | 100.0 | 51.2 | 11.2 | 10.1 | 72.5 | 27.5 | |
| Manitoba | 100.0 | 51.6 | - | 7.3 | 58.9 | 41.1 | |
| Saskatchewan | 100.0 | - | 22.4 | 12.6 | 35.0 | 65.0 | |
| Alberta | 100.0 | 46.3 | - | 7.7 | 54.0 | 46.0 | |
| British Columbia -- Colombie-Britannique ... | 100.0 | 58.0 | - | 9.5 | 67.5 | 32.5 | |

(1) Excluding the Yukon and Northwest Territories -- À l'exclusion du Yukon et des Territoires du Nord-Ouest.

(2) Metropolitan and Major urban areas include the population living in the fringe areas even though these areas are under 5,000 population -- Les zones métropolitaines et autres grandes agglomérations urbaines incluent la population résidant dans les banlieues, même si celles-ci ont une population inférieure à 5,000 habitants.

(3) While urban centres of 5,000 population and over are enumerated completely each month, other localities are covered on a sample basis four times a year - at the end of March, June, September and December -- Tandis que les agglomérations urbaines de 5,000 habitants et plus font l'objet d'un dénombrement complet chaque mois, les autres agglomérations sont examinées au moyen d'un sondage quatre fois l'an, soit à la fin de mars, juin, septembre et décembre.

TABLE M-2. Summary of Starts and Completions in Centres of 5,000 Population and Over,
by Province

TABLE M-16. Summary: Starts, Completions and Under Construction, Metropolitan, Major Urban and Other Areas, January - October 1966

TABLEAU M-16. Sommaire: Mises en chantier, achèvements et logements en construction dans les zones métropolitaines, les grandes agglomérations urbaines et autre agglomérations, janvier - octobre 1966
(Dwelling units -- Unités de logement)

| Area -- Zone | Single detached -- Simple détachés | Two-family -- Bi-familiaux | Row -- Rangées | Apartment and other -- Appartements et autres | Total |
|--|--|----------------------------------|----------------------|---|---------|
| <u>Starts -- Mises en chantier</u> | | | | | |
| Metropolitan areas -- Zones métropolitaines | 26,580 | 3,365 | 3,390 | 37,417 | 70,752 |
| Major urban area -- Grandes agglomérations urbaines(1) | 5,551 | 565 | 44 | 2,077 | 8,237 |
| Other centres of 5,000 population and over -- Autres agglomérations de 5,000 habitants et plus | 5,772 | 653 | 240 | 2,240 | 8,905 |
| All centres of 5,000 population and over -- Toutes agglomérations de 5,000 habitants et plus | 37,050 | 4,565 | 3,674 | 41,715 | 87,004 |
| <u>Completions -- Achèvements</u> | | | | | |
| Metropolitan areas -- Zones métropolitaines | 30,555 | 4,480 | 4,567 | 53,922 | 93,524 |
| Major urban areas -- Grandes agglomérations urbaines(1) | 6,668 | 590 | 63 | 3,625 | 10,946 |
| Other centres of 5,000 population and over -- Autres agglomérations de 5,000 habitants et plus | 6,477 | 744 | 204 | 2,568 | 9,993 |
| All centres of 5,000 population and over -- Toutes agglomérations de 5,000 habitants et plus | 42,878 | 5,795 | 4,834 | 60,075 | 113,582 |

(1) Major urban areas include data corresponding to the areas as shown in table M-13 for these centres; this includes house-building activity in the fringe areas of major urban centres, even though these areas are under 5,000 population. The data for these fringe areas under 5,000 population are excluded from total shown for all centres of 5,000 population and over. Consequently this last total is smaller than the sum of the three preceding totals -- Les grandes agglomérations urbaines incluent les données correspondant aux zones telles que présentées dans le tableau M-13 pour ces agglomérations; ceci comprend la construction domiciliaire dans les banlieues, même si ces zones ont une population inférieure à 5,000 habitants. Les données pour les banlieues de moins de 5,000 habitants sont exclues du total indiqué pour toutes les agglomérations de 5,000 habitants et plus. Par conséquent, ce dernier total est inférieur à l'addition des trois totaux précédents.
