NEW RESIDENTIAL CONSTRUCTIONCONSTRUCTION DOMICILIAIRE NEUVE

OCTOBER - 1970 - OCTOBRE

(Urban Centres of 10,000 population and over)

(Agglomérations urbaines de 10,000 habitants et plus)

Introduction

The statistics contained in this report are the results of nation-wide surveys carried out by the Central Mortgage and Housing Corporation. All Metropolitan Areas, Major Urban Areas and Urban Centres of 10,000 population and over are enumerated completely each month. The remainder of the country is covered on a sample basis four times a year, at the end of March, June, September and December.

The reports for March, June, September and December contain statistics referring to all areas. The tables in the reports for these months containing data for all areas carry a number preceded by the letter Q. In the remaining months, statistics are available only for the centres of 10,000 population and over (including the Metropolitan areas and Major Urban Areas). Tables containing data for these centres are identified by a number preceded by the letter M, and appear in all the reports for the 12 months. In the reports containing quarterly data for all areas, quarterly tables follow monthly tables.

Publication

The regular users of the statistical series of starts and completions will notice changes in the presentation of the data from the 1966 publications. In addition to changes resulting from the adoption of new definitions of Metropolitan and Major Urban Areas according to the 1966 Census, the basis of the monthly survey of starts and completions has been raised from a lower limit of 5,000 population to 10,000 population. This decision has been taken because, due to the upward trend towards urbanisation at the national level, it is still possible to enumerate on a monthly basis more than 80 per cent of the total housing starts. This is approximately 2 per cent less than the coverage of all incorporated centres of 5,000 population, yet it is substantially greater than in 1961 when all of these centres were included in the survey.

Introduction

La statistique que fournit le présent rapport découle de relevés d'envergure nationale effectués par la Société centrale d'hypothèques et de logement. Toutes les zones métropolitaines, toutes les grandes agglomérations urbaines et toutes les agglomérations de 10,000 habitants et plus font l'objet d'un dénombrement complet tous les mois. Le reste du pays est examiné au moyen d'un sondage quatre fois l'an, soit à la fin des mois de mars, juin, septembre et décembre.

Les rapports pour mars, juin, septembre et décembre ont trait à toutes les régions. Les tableaux des rapports de ces mois-là, qui renferment des chiffres concernant toutes les régions, portent un numéro précédé de la lettre Q. Dans le cas des autres mois, la statistique ne vise que les agglomérations de 10,000 habitants et plus (y compris les zones métropolitaines et les grandes agglomérations urbaines). Les tableaux contenant des données relatives à ces agglomérations sont identifiés au moyen d'un chiffre précédé de la lettre M et paraissent dans chacun des douze rapports mensuels. Dans les rapports qui renferment des données trimestrielles portant sur toutes les régions, les tableaux trimestriels suivent les tableaux mensuels.

Publication

Les usagers de la série portant sur les mises en chantier et les achèvements remarqueront que dans le présent rapport les chiffres ne sont pas strictement comparables à ceux fournis dans les publications antérieures à 1967. On notera qu'en plus des changements occasionnés par les nouvelles définitions des zones métropolitaines et des grandes agglomérations urbaines, établies aux fins du recensement de 1966, la base du relevé mensuel des mises en chantier et des achèvements a été modifiée de façon à n'inclure que les agglomérations urbaines de 10,000 habitants et plus. Cette décision a été prise parce que, compte tenu de la tendance à une plus grande urbanisation, il est possible de dénombrer chaque mois plus de 80 p. 100 de toutes les mises en chantier. Ce taux est à peine 2 p.c. moins élevé qu'au moment où les agglomérations constituées de 5,000 habitants étaient couvertes, bien qu'il soit de beaucoup supérieur à ce qu'il était en 1961.

While this change in coverage does not affect Metropolitan and Major Urban Areas which may contain fringe localities of less than 10,000 population, it is possible to obtain monthly data on house-building activity for virtually all the municipalities which have been dropped from the starts and completions survey, by referring to the publication "Building Permits" Catalogue No. 64-001.

Definitions

For the purpose of this report new residential construction activity is measured in terms of physical volume (as opposed to value) and the common unit of measurement is the "dwelling unit". For a given period the survey is designed to provide information on the number of dwelling units started, dwelling units completed and dwelling units under construction at the end of the period.

For Census purposes a dwelling unit is defined as a structurally separate set of living premises with a private entrance either outside the building or from a common hall, lobby, vestibule or stairway inside the building. The entrance must be one that can be used without passing through anyone else's living quarters.

Examples of dwelling units are; each single house, each half of a double house, each section of a row or terrace, each self-contained apartment, flat or suite in an apartment block, duplex, double-duplex, row-duplex, triplex, maisonettes and garden-court type of multiple dwellings, each self-contained apartment adjoining a non-residential building such as a school, church, store, factory.

All the above examples of dwelling units fall within the confines of the Starts and Completions Survey except dwelling units created as a result of some structural change and normally referred to as "conversions". Alterations and extensions to existing buildings are also excluded from the Survey.

The Census definition of a dwelling unit includes such structures as summer cottages, cabins, shacks, trailers and boathouses if they were occupied at the time of the Census by persons with no other usual residence. However, these are excluded from the Starts and Completions Survey which covers only residential construction intended for year-round occupancy.

Tandis que ce changement n'affecte en aucune façon la couverture de l'enquête dans les zones métropolitaines et les grandes agglomérations urbaines, il est possible d'obtenir des chiffres sur l'activité de la construction domiciliaire dans presque toutes les municipalités qui ne sont plus soumises à notre enquête mensuelle. Pour cela il suffit de consulter la publication: "Permis de bâtir", n° de catalogue 64-001.

Définitions

Aux fins du présent rapport, l'activité dans le domaine de la construction domiciliaire neuve est mesurée en volume physique (par opposition à la valeur), et l'unité commune de mesure est l'unité de logement". Pour toute période donnée, l'enquête vise à fournir des renseignements sur le nombre d'unités de logement mises en chantier, sur le nombre d'unités de logement achevées et sur le nombre d'unités de logement en construction à la fin de la période.

Au sens du recensement, l'unité de logement s'entend de tout ensemble de pièces d'habitation distinct quant à la structure, avec entrée privée donnant sur l'extérieur ou sur un endroit commun à l'intérieur (corridor, vestibule, escalier). L'entrée soit donner accès au logement sans obliger à passer par les locaux d'habitation d'une autre personne.

Voici des exemples d'unité de logement: toute maison simple, toute moitié de maison jumelée, toute section d'une rangée de maisons; tout appartement indépendant, tout plain-pied ou toute "suite" dans une maison d'appartements, dans un duplex, dans un duplex jumelé, dans une rangée de duplex, dans un triplex, dans des maisonnettes et jardins d'habitation à logements multiples; tout appartement autonome attenant à un immeuble non domiciliaire qui peut être une école, une église, un magasin, une fabrique, etc.

Tous les exemples précédés rentrent dans les limites de l'enquête sur les mises en chantier et les achèvements, sauf les unités de logement créées par suite d'une modification de structure -- habituellement appelée "transformation". Modifications et rajouts n'entrent pas non plus dans le champ de l'enquête.

Par définition (recensement), l'unité de logement comprend des immeubles tels que chalets, cabines, huttes, remorques et bateaux qui, lors du recensement, étaient occupés par des personnes n'ayant pas d'autre résidence régulière. Toutefois, les bâtiments de ce genre sont exclus de l'enquête sur les mises en chantier et les achèvements, laquelle n'embrasse que les constructions domiciliaires habitées à l'année longue.

The broad definition of "dwelling unit" includes also special types of living quarters, such as health and welfare institutions, corrective and penal institutions, religious and educational institutions, hotels, lodging houses, camps, merchant vessels, diplomatic residences, etc. These are usually referred to as "collective-type dwellings" as opposed to private-type dwellings described earlier; the collective-type dwellings are excluded from the Starts and Completions Survey.

To sum up, the Starts and Completions Survey enumerates dwelling units in new structures only, such units being designed for non-transient and year-round occupancy.

A Start, for the purpose of this survey, is recorded when the footing has been installed, that is, when the concrete has been poured for the whole of the footing around the structure.

A Completion, for the purpose of this survey, is the stage at which all the proposed construction work on a dwelling unit has been performed.

For multiple-dwelling structures, the definition of a Start or Completion applies to the structure rather than to the individual dwelling units therein.

The number of units Under Construction at the end of a period as shown in this publication takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has been made, construction may cease, or a structure when completed may contain more or fewer dwelling units than were reported when construction commenced.

Comparison of Census Tabulations with Tabulations Presented in this Report

The 1966 Census classifies data on the housing stock according to the following types of dwelling:

Single detached: This type is commonly called a "single house". It contains only one dwelling unit which is completely separated on all sides from any other dwelling or structure.

Single attached: This category includes dwelling units separated by a common wall extending from ground to roof. Single attached dwellings in structures consisting of only two dwelling units are classified as Single attached (double). All other single

Dans son sens général, l'unité de logement comprend aussi certains genres particuliers de locaux d'habitation, notamment les institutions de santé et de bien-être, les institutions pénitentiaires et de réforme, les institutions religieuses et éducatives, les hôtels, les maisons d'hébergement, les camps, les navires marchands, les résidences diplomatiques, etc. Ces locaux sont habituellement appelés "logements collectifs" par opposition aux habitations privées décrites précédemment; les logements collectifs ne sont pas visés par l'enquête sur les mises en chantier et les achèvements.

En résumé, l'enquête dénombre uniquement les unités comprises dans les constructions neuves et devant être occupées de façon permanente et à l'année longue.

La mise en chantier, aux fins de l'enquête, est notée lorsque l'empattement est installé, c'est-à-dire lorsque le béton a été coulé dans l'empattement, tout autour de l'immeuble projeté.

L'achèvement, aux fins de l'enquête, correspond au stade où tous les travaux de construction projetés pour une même unité de logement ont été exécutés.

Dans le cas des immeubles à logements multiples, la définition de la mise en chantier ou de l'achèvement porte sur l'ensemble de la construction et non sur ses unités de logement prises en particulier.

Dans la présente publication, le nombre de logements en construction à la fin du mois tient compte de certains rajustements qui s'imposent pour des raisons diverses. Par exemple, une fois commencés, les travaux de construction d'un logement peuvent être interrompus; d'autre part, une fois achevée, une construction peut renfermer, soit plus, soit moins de logements qu'on ne l'avait d'abord déclaré au moment de la mise en chantier.

Comparaison des calculs du recensement avec ceux du présent rapport

Le recensement de 1966 classe les données relatives au stock de logements d'après les catégories suivantes:

Simples détachés: Ce genre de logement est communément appelé "maison simple". Il ne contient qu'un seul logement complètement isolé, de tous côtés, de tout autre logement ou construction.

Simples attachés: Cette catégorie comprend les logements séparés par un mur mitoyen s'élevant du sol au toit. Les logements simples attachés faisant partie de structures ne comptant que deux logements sont classés comme simples attachés (maison double). Tous les autres logements simples

attached dwellings whether in rows of three or more dwellings or simply a unit adjoining a store or other non-residential structure, are classified as Single attached (other).

Apartment and flats: These dwellings are also subdivided into two categories. Apartment, flat (duplex) refers to each dwelling in a structure originally designed, or structurally converted, to provide two dwelling units, one above the other and adjoining no other structure. Apartment, flat (other) includes all dwellings of the apartment, flat-type other than the duplex-type mentioned above.

Mobile: Refers to any dwelling designed for movement and actually movable, such as a trailer, railway car, or boat, if occupied by persons with no other usual residence at the Census date.

In this report dwelling units have been divided into four categories:

1. Single detached
2. Two-family: which comprises Single attached (double) and Apartment, flat (duplex). Double-duplexes and row-duplexes are not included in this category.
3. Row: which comprises only single attached houses in a row of three or more dwellings. In the Census tabulations, these are included in Single attached (other). Row-duplexes are not included in the Row category.
4. Apartment and Other: which comprises Apartment, flat (other).

In other words this category includes:

- (i) double-duplex.
- (ii) triplex.
- (iii) row-duplexes.
- (iv) apartments as commonly known.
- (v) dwellings over, or at the back of, a store or other non-residential structure.

As mentioned earlier Mobile dwellings although covered by the 1966 Census are not enumerated in the Starts and Completions Survey.

attachés, qu'ils fassent partie d'une rangée de trois logements ou plus ou qu'il s'agisse simplement d'un logement attenant à un magasin ou à une autre construction non domiciliaire, sont classés comme simples attachés (autres).

Appartements et plein-pied: Ces logements se subdivisent eux aussi en deux catégories. Appartements, plein-pied (duplex): ce sont les logements d'une structure construite ou transformée de façon à donner deux logements situés l'un au-dessus de l'autre sans autre construction attenante. Appartements, plein-pied (autres): ce sont tous les logements du genre appartement ou plein-pied et qui ne sont pas de la catégorie des duplex.

Mobiles: Il s'agit de tout logement destiné à être transporté et réellement transportable (remorque, wagon, ou bateau) s'il était occupé par des personnes sans autre résidence ordinaire au moment du recensement.

Dans le présent rapport, les logements sont répartis en quatre catégories:

1. Simples détachés.
2. Bi-familiaux: qui comprennent les simples attachés (maison double) et les appartements, plein-pied (duplex). Les doubles duplex et les duplex en rangée ne font pas partie de cette catégorie.
3. Rangées: qui ne comprennent que les maisons simples et attachées en rangée d'au moins trois habitations. Dans les chiffres du recensement, ces genres d'habitations sont compris dans simples attachés (autres). Les duplex en rangée n'entrent pas dans la catégorie des "Rangées".
4. Appartements et autres: comprennent les maisons d'appartements et les plein-pied (autres).

Autrement dit, cette catégorie inclus:

- (i) les doubles duplex.
- (ii) les triplex.
- (iii) les duplex en rangée.
- (iv) les maisons d'appartements au sens courant du terme.
- (v) les logements situés au-dessus ou à l'arrière d'un magasin ou de tout autre construction non domiciliaire.

Comme on l'a signalé précédemment, les logements mobiles, dont le recensement de 1966 tenait compte, ne sont pas dénombrés aux fins de l'enquête sur les mises en chantier et les achèvements.

TABLE M-1. Coverage of the Starts and Completions Survey Expressed in Percentages
of the 1966 Census Population, by Province

TABLEAU M-1. Couverture de l'enquête sur les mises en chantier et les achèvements, exprimée
en pourcentages de la population du recensement de 1966, par province

| Province | Total population 1966 census -- Population totale recensement de 1966 | Urban centres of 10,000 population and over | | | | Other locali- ties(3) -- Autres aggloméra- tions(3) | |
|---|--|---|--|---|-------|---|------|
| | | Agglomérations urbaines de 10,000 habitants et plus | | | | | |
| | | Metropolitan areas(2) -- Zones métropolitaines(2) | Major urban areas(2) -- Grandes aggloméra- tions urbaines(2) | Other urban centres -- Autres aggloméra- tions | Total | | |
| per cent -- pourcentage | | | | | | | |
| CANADA(1) | 100.0 | 48.1 | 7.9 | 6.8 | 62.8 | | 37.2 |
| Newfoundland -- Terre-Neuve | 100.0 | 20.5 | - | 5.5 | 26.0 | | 74.0 |
| Prince Edward Island -- Île-du-Prince-Édouard | 100.0 | - | - | 17.0 | 17.0 | | 83.0 |
| Nova Scotia -- Nouvelle-Écosse | 100.0 | 26.2 | 14.1 | 4.5 | 44.8 | | 55.2 |
| New Brunswick -- Nouveau-Brunswick | 100.0 | 16.4 | 9.7 | 12.1 | 38.2 | | 61.8 |
| Québec | 100.0 | 51.2 | 8.7 | 6.8 | 66.7 | | 33.3 |
| Ontario | 100.0 | 53.4 | 12.9 | 5.9 | 72.2 | | 27.8 |
| Manitoba | 100.0 | 52.8 | - | 5.5 | 58.3 | | 41.7 |
| Saskatchewan | 100.0 | 25.9 | - | 10.4 | 36.3 | | 63.7 |
| Alberta | 100.0 | 50.0 | - | 6.9 | 56.9 | | 43.1 |
| British Columbia -- Colombie-Britannique | 100.0 | 56.9 | - | 7.8 | 64.7 | | 35.3 |

(1) Excluding the Yukon and Northwest Territories. -- A l'exclusion du Yukon et des Territoires du Nord-Ouest.

(2) Metropolitan and Major urban areas include the population living in the fringe areas even though these areas are under 10,000 population. -- Les zones métropolitaines et autres grandes agglomérations urbaines incluent la population résidant dans les banlieues, même si celles-ci ont une population inférieure à 10,000 habitants.

(3) While urban centres of 10,000 population and over are enumerated completely each month, other localities are covered on a sample basis four times a year, at the end of March, June, September and December. -- Tandis que les agglomérations urbaines de 10,000 habitants et plus font l'objet d'un dénombrement complet chaque mois, les autres agglomérations sont examinées au moyen d'un sondage quatre fois l'an, soit à la fin de mars, juin, septembre et décembre.

TABLE M-2. Summary of Starts and Completions in Centres of 10,000 Population and Over,
by Province

TABLEAU M-2. Sommaire des mises en chantier et des achèvements dans les agglomérations de
10,000 habitants et plus, par province

(Dwelling units -- Unités de logement)
