Note:

Because index numbers cannot be calculated from preliminary data, those for the current month will be published in the report for the following month.

Price indexes are of the base-period weighted (Laspeyres) form. Volume indexes are derived by division of value indexes by the corresponding Laspeyres price indexes and are therefore of the moving-weighted (Paasche) form. They will differ from volume indexes calculated with fixed weights to the extent that they reflect changes in commodity weights as well as changes in volume of particular commodity flows.

Note:

Les indices pour le mois courant apparaîtront dans le bulletin du mois suivant puisqu'il n'est pas possible de les calculer à partir des chiffres préliminaires.

Les indices des prix sont pondérés avec des poids fixes, c'est-à-dire ils appartiennent au type Laspeyres. Les indices de volume sont obtenus en divisant les indices de la valeur par les indices de prix du type Laspeyres correspondants. Ils sont, par conséquent, indices du type Paasche à poids mobiles. Ils diffèrent des indices de volume calculés à partir d'une pondération fixe dans la mesure où ils reflètent des changements de poids des marchandises ainsi que des changements de volume dans les échanges de chaque marchandise individuelle.
