CHANGES IN COVERAGE OF CANADIAN TRADE STATISTICS

Effective with statistics for January, 1960, certain changes have been made in the types of transaction included in published totals of Canadian exports and imports. Most of the transactions included in these totals have always been commercial trade, but in addition various non-commercial and special transactions have also been included, and some types of special and non-commercial transactions have not received uniform treatment in both records. Especially in the last ten years there have been sizable differences between the balance of trade calculated from unadjusted export and import totals, and that calculated from data adjusted to exclude special and non-commercial transactions.

From January 1, 1960, a new category has been established in both export and import statistics entitled "Special Transactions - Non-Trade". This category includes various commodity movements which either have no international financial implications or, for various reasons, are better considered separately from merchandise trade in economic analysis. The value of transactions of these types will be excluded entirely from published totals of Canadian merchandise trade, but statistics for the classes of this category will be compiled and published in the regular monthly export and import reports for the convenience of users of this information. As a result of these changes, the export and import totals will now have substantially the same coverage, and will provide a much truer picture of the merchandise trade component of the balance of payments.

The former treatment of the classes of transaction included in "Special Transactions - Non-Trade" is as follows:-

<u>New Class No.</u>	<u>Description or Class Reading</u>	<u>Former Treatment in</u>	
		<u>Exports</u>	<u>Imports</u>
9905-9965	Gold and current coin	excluded	excluded
9980	Movements of goods for Canadian armed forces or diplomats abroad, or foreign armed forces or diplomats in Canada	excluded	largely included
9982	Settlers' effects	included	included
9984	Private donations and gifts	included	included
9986	Tourist purchases	partly included	included
9988	Movements of goods for exhibition or competition	excluded	excluded
9990-9992	Photographic film moving for exhibition or processing without sale	partly included	partly included

(ii)

Totals of Canadian exports published on the new basis will be some \$30,000,000 per year less than on the former basis, those of Canadian imports some \$150,000,000 per year less. Revisions in comparative figures for 1946-1959 published in reports for 1960 and subsequently will be made on the following basis:

Former Class No.	Class Reading
---------------------	---------------

I. Deducted from export totals:

- 9470 Canadian army, navy and air force stores n.o.p. (to Dec.31, 1949).
- 9530 Settlers' effects.
- 9550 Gifts and donations.

II. Deducted from import totals:

- 9000 Film imported for the purpose of reproduction, and re-exported.
- 9051 Bequests of personal effects or furniture.
- 9068 Clothing and books, donations of, for charitable purposes, and photos (3) sent by friends.
- 9193 Articles for the Governor-General or for British or foreign representatives (also class 9192 to Dec.31, 1957).
- 9196 Arms, military stores, munitions and other goods, to remain the property of a British Commonwealth country or of a country that is a party to the North Atlantic Treaty (also class 9194 to April 9, 1951).
- 9201 Casual donations, sent by friends, the value of which does not exceed ten dollars in any case; personal gifts, not exceeding \$25.00 in value from members of Canadian forces serving abroad.
- 9228 Tourist purchases exempt from duty.
- 9241 Articles presented from abroad in recognition of the saving of human life (to Dec.31, 1957).
- 9264 Settlers' effects.

It is not possible to adjust out of former export records such tourist purchases as were included, since these are lost in various commodity class totals, and in so far as non-commercial film transactions are concerned these also can not be isolated. However the residual inaccuracy of comparative totals calculated in this way will be statistically insignificant. The residual error of comparative import totals calculated as described will be altogether negligible.

In addition to the abovementioned adjustments one further adjustment has been made to comparative import figures for 1946. In that year substantial amounts of Canadian military equipment were returned to Canada from the United Kingdom, Newfoundland and Australia. Such shipments accounted for almost all of the Canadian goods returned totals (class 9195) for these three countries in that year. The value for class 9195 for these three countries has therefore been deducted from the adjusted total. The residual overadjustment to the 1946 import total is believed to be statistically insignificant.

The following tables present revised totals of Canadian trade with All Countries, the United States and the United Kingdom, calculated as described above, for the period 1946-1959:-

NEW CLASSIFICATION OF COUNTRIES FOR EXTERNAL TRADE STATISTICS

A new classification of countries has been introduced for export and import statistics as of January 1, 1960. The new classification is basically geographical: for this purpose the world had been divided into nine geographic regions, and within each region the countries are listed alphabetically in two sub-groups, the first for Commonwealth countries in the region, the second for other countries. In future trade reports all basic statistics on trade by country will be presented according to the new classification of countries.

The regions used in the new classification, and the order in which they are listed, are as follows:

- Western Europe
- Eastern Europe
- Middle East
- Other Africa
- Other Asia
- Oceania
- South America
- Central America and Antilles
- North America

The countries included in each area, and the definition of each used for statistical purposes, are shown on the following pages.

The order in which the various regions are arranged was determined by the convenience of listing the United Kingdom first when presenting statistics of commodities by countries, the United States last, directly above the commodity totals. This arrangement of country detail is traditional in Canadian trade reports, and has proven useful in permitting ready reference to details of trade with Canada's two most important trading partners.

The adoption of a new country classification facilitated extensive changes in the country detail shown in Canadian trade statistics. The drafting of these changes was guided by two criteria, which will also be used to guide future revisions to the classification:

- (1) Total trade between Canada and each country specified should exceed \$100,000 per year.
- (2) Available documentation must be adequate to compile accurate statistics of trade between Canada and each country specified.

In addition the names used for various countries have been brought up-to-date.

Details of the significant changes made in the classification of countries are as follows (comparative figures presented in future reports will be adjusted as far as possible to conform with these changes):

I. Countries Deleted

<u>Former Description</u>	<u>Trade Now Included With</u>
Aden	British Middle East n.e.s. (note that most of the trade with this territory is with Aden)
Azores and Madeira	Portugal
British East Africa	Kenya (for 1960 and future years trade with Tanganyika and Uganda will be shown separately, and that with British Somaliland included with British Middle East n.e.s.)
Canary Islands	Spanish Africa
Estonia	Union of Soviet Socialist Republics
French Africa	French Africa n.e.s. (for 1960 and future years trade with Algeria, French Equatorial Africa, French West Africa, Guinea and Tunisia will be shown separately)
Gambia	British Africa n.e.s.
Hawaii	United States
Indo-China	Viet-Nam (for 1960 and future years trade with Cambodia and Laos will be shown separately)
Latvia	Union of Soviet Socialist Republics
Lithuania	Union of Soviet Socialist Republics
Madagascar	French Africa n.e.s.
Other British South Africa	Union of South Africa
Other British West Africa	British Africa n.e.s.
Portuguese Asia	Portuguese Asia n.e.s. (for 1960 and future years trade with Portuguese India will be shown separately)
Portuguese West Africa	Portuguese Africa n.e.s. (for 1960 and future years trade with Angola will be shown separately)

CLASSIFICATION OF COUNTRIES FOR EXTERNAL TRADE STATISTICS
(In effect January 1, 1960)

Note: For any country the area included coincides with the geographical area of the country unless otherwise stated; that is, the area includes both the customs area of the country and also any free zones or free areas in which customs control may not be exercised. Countries with which Canada's trade is small are grouped with contiguous or related areas.

EXPLANATORY NOTES

1. **Source of Data.** Statistics of imports are based upon the declarations of importers (import entries) as subsequently checked by customs officials.

2. **Valuation.** The value of goods imported is usually the value as determined for customs duty purposes. In most cases this corresponds to the value shown on the invoice accompanying the goods, converted to Canadian dollars at authorized exchange rates (usually the commercial rate prevailing at the date on which the goods were actually despatched to Canada), and excluding such charges as freight, insurance, handling and taxes. In effect, therefore, import values are taken f.o.b. point of shipment in the country of export.

Effective with statistics for January, 1959, the statistical value of imports on which dumping duty has been collected is considered to be the value of the goods as declared by the importer (i.e. the value for duty less the amount of dumping duty). This change in procedure is to conform with the principle that trade statistics should show, whenever possible, the actual amount paid for imports. Previously the statistical value of such imports was considered to be the value for duty.

3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment, except in certain special cases otherwise defined in the Customs Tariff. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers, power, and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units imported, while the value includes also the value of any parts of the commodity imported. For such classes the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of imports include substantially all goods which enter Canada and are cleared by customs officials for domestic sale or use. The series therefore includes goods which are cleared by customs immediately on entry into the country, and goods cleared out of customs warehouses; but excludes goods placed in customs warehouses on entering the country. The technical phrase "Imports entered for consumption" which is sometimes used to describe Canadian import statistics does not imply that all imports will actually be consumed in Canada, but only that they are free to be so consumed without further customs formalities.

5. **Exclusions.** Import statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods for the use of United States forces stationed at treaty bases in Canada, ships of British construction and registry imported for use in Canada, ships purchased for use in foreign trade, bunker supplies and ships' stores purchased by Canadian vessels abroad, temporary imports for exhibition or competition, Canadian-owned military equipment returned to Canada, and, from January 1, 1960, goods imported for foreign armed forces or diplomats stationed in Canada, settlers' effects, private donations and gifts, and tourist purchases exempt from duty (see blue pages of the January, 1960, issue of this report).

6. **Countries Credited.** Imports are usually credited to the country from which the goods were consigned to Canada. The country of consignment is the country from which goods have come to Canada without interruption of transit except in the course of transfer from one means of conveyance to another.

An exception to this rule is made in the case of imports of goods originating in Central or South America (including the Antilles and Bermuda) which are consigned to Canada from the United States. These imports are credited to the country in which the goods originated.

7. **Time Periods.** Import statistics for any month include all goods declared on import entries received at the Bureau of Statistics during the calendar month in question.

8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in Volume III of the annual report "Trade of Canada". The letters "N.O.P." mean "not otherwise provided for", "N.E.S.", "not elsewhere specified".

9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.
