CHANGES IN IMPORT STATISTICAL CLASSIFICATION EFFECTIVE APRIL 1, 1960

The Budget Resolutions of March 31, 1960, necessitated a few changes in the Fibres, Textiles and Textile Products group of the Import Statistical Classification.

The following list of changes is divided into three parts. The first deals with statistical classes which could not be continued after March 31, and which do not match closely any of the new classes established as of April 1. In this and subsequent reports for 1960 these classes will be presented under their former class numbers but statistics shown will be cumulative figures for the period January 1 - March 31, 1960. The second part of the list deals with cancelled classes which will be included in either new or pre-existing classes. These classes, as such, disappear entirely from this and subsequent reports, but cumulative totals are adjusted retroactively to January 1, for the classes indicated. The third part deals with the new classes established as of April 1. Cumulative figures for these classes (except class 3043) cover only the elapsed period of 1960 subsequent to April 1, and each of these classes (except class 3043) will bear an appropriate footnote reference in reports covering the last nine months of 1960.

1. Classes discontinued after March 31 (the cumulative figures for 1960 relate only to imports from January 1 - March 31, 1960):

<u>Class</u>	<u>Class</u>	<u>Class</u>
3011	3018	3021

CHANGES IN COVERAGE OF CANADIAN TRADE STATISTICS

In previous years export and import statistics differed in their treatment of such special transactions as tourist purchases and shipments of goods to Canadian diplomats abroad or foreign diplomats in Canada, and in addition both records included such non-commercial transactions as movements of settlers' effects and private donations and gifts. From the beginning of this year the two records have been adjusted as far as possible to have the same coverage, and most private non-commercial transactions are now excluded from both. From January 1, 1960, a new category has been established entitled "Special Transactions - Non-Trade". This category includes various commodity movements which either have no international financial implications or, for various reasons, are better considered separately from merchandise trade in economic analysis.

The former treatment of the classes of transaction included in "Special Transactions - Non-Trade" is as follows:-

<u>New Class No.</u>	<u>Description or Class Reading</u>	<u>Former Treatment in</u>	
		<u>Exports</u>	<u>Imports</u>
9905-9965	Gold and current coin.....	excluded	excluded
9980	Movements of goods for Canadian armed forces or diplomats abroad, or foreign armed forces or diplomats in Canada.....	excluded	largely included

CHANGES IN COVERAGE OF CANADIAN TRADE STATISTICS

In previous years export and import statistics differed in their treatment of such special transactions as tourist purchases and shipments of goods to Canadian diplomats abroad or foreign diplomats in Canada, and in addition both records included such non-commercial transactions as movements of settlers' effects and private donations and gifts. From the beginning of this year the two records have been adjusted as far as possible to have the same coverage, and most private non-commercial transactions are now excluded from both. From January 1, 1960, a new category has been established entitled "Special Transactions - Non-Trade". This category includes various commodity movements which either have no international financial implications or, for various reasons, are better considered separately from merchandise trade in economic analysis.

The former treatment of the classes of transaction included in "Special Transactions - Non-Trade" is as follows:-

New Class No.	Description or Class Reading	Former Treatment in	
		Exports	Imports
9905-9965	Gold and current coin	excluded	excluded
9980	Movements of goods for Canadian armed forces or diplomats abroad, or foreign armed forces or diplomats in Canada	excluded	largely included
9982	Settlers' effects	included	included
9984	Private donations and gifts	included	included
9986	Tourist purchases	partly included	included
9988	Movements of goods for exhibition or competition	excluded	excluded
9990-9992	Photographic film moving for exhibition or processing without sale	partly included	partly included

EXPLANATORY NOTES

1. **Source of Data.** Statistics of imports are based upon the declarations of importers (import entries) as subsequently checked by customs officials.

2. **Valuation.** The value of goods imported is usually the value as determined for customs duty purposes. In most cases this corresponds to the value shown on the invoice accompanying the goods, converted to Canadian dollars at authorized exchange rates (usually the commercial rate prevailing at the date on which the goods were actually despatched to Canada), and excluding such charges as freight, insurance, handling and taxes. In effect, therefore, import values are taken f.o.b. point of shipment in the country of export.

Effective with statistics for January, 1959, the statistical value of imports on which dumping duty has been collected is considered to be the value of the goods as declared by the importer (i.e. the value for duty less the amount of dumping duty). This change in procedure is to conform with the principle that trade statistics should show, whenever possible, the actual amount paid for imports. Previously the statistical value of such imports was considered to be the value for duty.

3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment, except in certain special cases otherwise defined in the Customs Tariff. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers, power, and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units imported, while the value includes also the value of any parts of the commodity imported. For such classes the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of imports include substantially all goods which enter Canada and are cleared by customs officials for domestic sale or use. The series therefore includes goods which are cleared by customs immediately on entry into the country, and goods cleared out of customs warehouses; but excludes goods placed in customs warehouses on entering the country. The technical phrase "Imports entered for consumption" which is sometimes used to describe Canadian import statistics does not imply that all imports will actually be consumed in Canada, but only that they are free to be so consumed without further customs formalities.

5. **Exclusions.** Import statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods for the use of United States forces stationed at treaty bases in Canada, ships of British construction and registry imported for use in Canada, ships purchased for use in foreign trade, bunker supplies and ships' stores purchased by Canadian vessels abroad, temporary imports for exhibition or competition, Canadian-owned military equipment returned to Canada, and, from January 1, 1960, goods imported for foreign armed forces or diplomats stationed in Canada, settlers' effects, private donations and gifts, and tourist purchases exempt from duty (see blue pages of the January, 1960, issue of this report).

6. **Countries Credited.** Imports are usually credited to the country from which the goods were consigned to Canada. The country of consignment is the country from which goods have come to Canada without interruption of transit except in the course of transfer from one means of conveyance to another.

An exception to this rule is made in the case of imports of goods originating in Central or South America (including the Antilles and Bermuda) which are consigned to Canada from the United States. These imports are credited to the country in which the goods originated.

7. **Time Periods.** Import statistics for any month include all goods declared on import entries received at the Bureau of Statistics during the calendar month in question.

8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in Volume III of the annual report "Trade of Canada". The letters "N.O.P." mean "not otherwise provided for", "N.E.S.", "not elsewhere specified".

9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.
