TREATMENT IN 1961 QUARTERLY REPORTS OF CLASSES DISCONTINUED AFTER DECEMBER 31, 1960

In order to prepare comparative statistics for the quarterly report Trade of Canada - Commodities Imported From Each Country (Catalogue No.65-006) it was necessary to fit into the 1961 classification the import classes which were deleted after December 31, 1960. In some cases the former class number was retained, in others the class was re-numbered. The following list of deleted classes is divided into three distinctive parts. The first deals with former classes which can be converted directly to one existing or one new class. The second part deals with former classes that are now included in two or more existing or new classes; in these cases statistics for 1960 can not be compared directly with those for 1961, and the class number remains as in 1960. The third part deals with former classes that are included in two or more new classes in the new sub-group "Apparel and apparel accessories". These former classes are re-numbered by using the dummy codes 3850 to 3899. Former classes with less than \$100,000 are grouped together in dummy class no. 3899. Totals for this sub-group (3850 - 3999) are comparable as between 1960 and 1961, although individual classes are generally not comparable.

1. Former classes now included in one existing or new class:-

EXPLANATORY NOTES

1. **Source of Data.** Statistics of imports are based upon the declarations of importers (import entries) as subsequently checked by customs officials.
2. **Valuation.** The value of goods imported is usually the value as determined for customs duty purposes. In most cases this corresponds to the value shown on the invoice accompanying the goods, converted to Canadian dollars at authorized exchange rates (usually the commercial rate prevailing at the date on which the goods were actually despatched to Canada), and excluding such charges as freight, insurance, handling and taxes. In effect, therefore, import values are taken f.o.b. point of shipment in the country of export.

Effective with statistics for January, 1959, the statistical value of imports on which dumping duty has been collected is considered to be the value of the goods as declared by the importer (i.e. the value for duty less the amount of dumping duty). This change in procedure is to conform with the principle that trade statistics should show, whenever possible, the actual amount paid for imports. Previously the statistical value of such imports was considered to be the value for duty.

3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment, except in certain special cases otherwise defined in the Customs Tariff. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers, power, and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units imported, while the value includes also the value of any parts of the commodity imported. For such classes the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of imports include substantially all goods which enter Canada and are cleared by customs officials for domestic sale or use. The series therefore includes goods which are cleared by customs immediately on entry into the country, and goods cleared out of customs warehouses; but excludes goods placed in customs warehouses on entering the country. The technical phrase "Imports entered for consumption" which is sometimes used to describe Canadian import statistics does not imply that all imports will actually be consumed in Canada, but only that they are free to be so consumed without further customs formalities.
5. **Exclusions.** Import statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods for the use of United States forces stationed at treaty bases in Canada, ships of British construction and registry imported for use in Canada, ships purchased for use in foreign trade, bunker supplies and ships' stores purchased by Canadian vessels abroad, temporary imports for exhibition or competition, Canadian-owned military equipment returned to Canada, and, from January 1, 1960, goods imported for foreign armed forces or diplomats stationed in Canada, settlers' effects, private donations and gifts, and tourist purchases exempt from duty (see blue pages of the January, 1960, issue of this report).
6. **Countries Credited.** Imports are usually credited to the country from which the goods were consigned to Canada. The country of consignment is the country from which goods have come to Canada without interruption of transit except in the course of transfer from one means of conveyance to another.

An exception to this rule is made in the case of imports of goods originating in Central or South America (including the Antilles and Bermuda) which are consigned to Canada from the United States. These imports are credited to the country in which the goods originated.

7. **Time Periods.** Import statistics for any month include all goods declared on import entries received at the Bureau of Statistics during the calendar month in question.
8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in Volume III of the annual report "Trade of Canada". The letters "N.O.P." mean "not otherwise provided for", "N.E.S.", "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.
