| Fibres, Textiles and Textile Products | 3001 to 3574 |
| Wood, Wood Products and Paper | 4002 to 4311 |
| Iron and Its products | 5001 to 5733 |
| Non-Ferrous Metals and Their Products (except Gold) | 6001 to 6256 |
| Non-Metallic Minerals and Their Products (except Chemicals) | 7001 to 7303 |
| Chemicals and Allied Products | 8001 to 8950 |
| Miscellaneous Commodities | 9000 to 9279 |

VALUE AND VOLUME at end of report

EXPLANATORY NOTES

1. In all the tables of imports in this Report, the quantities and values are based upon the declarations of importers (import entries), as subsequently checked by Customs officials.
2. Weight, where shown is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs Tariff.
3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.
4. In this Report are trade items such as "Engines, gas, n.o.p., and parts", which show both quantities and values. In the item "Engines, gas, n.o.p., and parts", the quantity represents the number of complete gas engines only, while the value represents not only the value of the specified number of complete gas engines but also the value of all kinds of "Parts" of gas engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.
5. "Imports" means "Imports entered for Consumption". "Entered for Consumption" does not imply that the goods have been actually consumed in Canada, but that they have passed into the custody of the importer and that duty has been paid on the dutiable portion.
6. For statistical purposes, the value of merchandise imported, as shown in this Report, is the value as determined for Customs duty purposes. In most cases, this would be the invoice value of the goods converted to Canadian dollars at authorized exchange ratios. The value does not include charges such as freight, insurance, handling, duties or taxes.
7. Imports into Canada are classified as received from the countries whence they were consigned to Canada. The countries of consignment are the countries from which the goods have come, without interruption of transit, except in the course of transshipment or transfer from one conveyance to another. The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to Canada. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England; Canadian statistics record such imports as coming from the United Kingdom.
8. The initials "N.O.P." mean "not otherwise provided for".
9. Some of the descriptions of articles used in this Report are abbreviated and incomplete due to lack of space and mechanical limitations. Full descriptions are shown in the annual printed report of the Trade of Canada.
10. Throughout this Report, figures are subject to revision.
11. The Foreign Trade of Newfoundland is included as from April 1, 1949.

KEY TO ABBREVIATIONS OF COUNTRIES

Note:— The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in Volume I of the Annual Report of the Trade of Canada.

Value, Price and Volume Indexes of Imports for Consumption

The following table gives index numbers of the declared (statistical) value of imports for consumption by months, and of the unit value (price) and volume of these imports. The value index expresses the value of imports in a given month as a percentage of the monthly average in the base year. The price index is of the fixed-weight aggregative (Laspeyre) type, and combines unit values calculated from the monthly import statistics with specified wholesale or other price quotations. These latter quotations are used where inadequate quantity reporting in the trade statistics prevents the obtaining of sufficiently representative unit value series. The volume index is derived by dividing the value index by the corresponding price index, and is, therefore, of the currently-weighted (Paasche) type. Until a suitable post-war reference base is determined for the Bureau of Statistics, these indexes will be computed with 1948 as an interim reference base.

In computing the price index certain minor adjustments were made to the regular grouping of commodities used in the trade statistics, and all three indexes are presented on the basis of these adjusted groups. The adjustments are as follows: the two groups "agricultural and vegetable products" and "animals and animal products" have been combined into one group now titled "agricultural and animal products"; the sub-group "rubber and its products" and the item "advertising matter" (4291) have been transferred to the "miscellaneous products" group; the items "articles Imperial army and navy" (9194) and "arms, etc., British or N.A.T.O. countries" (9196) have been deducted from the "miscellaneous products" total and the grand total; three "ships" items (9155-57) have been transferred to the "iron and steel and their products" group; and a few other adjustments designed to improve group classification by component material have been made.

These indexes are currently computed from the original data for months and calendar years only. Approximate indexes for intermediate periods may be obtained by averaging the monthly values. Although such indexes will be less accurate than would result from a separate computation based on the original data, the margin of error is insufficient to justify a lengthy separate computation.

A complete record of these series by months for the post-war period is published in Volume I of the annual report "Trade of Canada". Some additional commodity information appears in issues of the "Review of Foreign Trade". Details of the computation of the price indexes are given in D.B.S. Reference Paper, No. 8, 1950, titled "Export and Import Price Indexes by Months, July, 1945 - June, 1950 (1948 = 100)"

Interim base, 1948 = 100

|--|--------------|
| EXPLANATORY NOTES | 2 |
| KEY TO ABBREVIATIONS OF COUNTRIES | 3 |
| SUMMARY TABLES: | |
| Imports into Canada for Consumption, by Countries ... | 4 |
| Imports into Canada for Consumption, by Main Groups | 6 |
| DETAILED TABLES: | |
| Imports for Consumption, by Articles and Countries: | |
| Agricultural and Vegetable Products (except Chemicals Fibres and Wood): | Class Number |
| A - Mainly Food | 1 to 390 |
| B - Other than Food | 1501 to 1846 |
| Animals and Animal Products (except Chemicals and Fibres) | 2012 to 2348 |
| Fibres, Textiles and Textile Products | 3001 to 3574 |
| Wood, Wood Products and Paper | 4002 to 4311 |
| Iron and Its products | 5001 to 5733 |
| Non-Ferrous Metals and Their Products (except Gold) | 6001 to 6256 |
| Non-Metallic Minerals and Their Products (except Chemicals) | 7001 to 7303 |
| Chemicals and Allied Products | 8001 to 8950 |
| Miscellaneous Commodities | 9000 to 9279 |

VALUE AND VOLUME at end of report

EXPLANATORY NOTES

1. In all the tables of imports in this Report, the quantities and values are based upon the declarations of importers (import entries), as subsequently checked by Customs officials.
2. Weight, where shown is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs Tariff.
3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.
4. In this Report are trade items such as "Engines, gas, n.o.p., and parts", which show both quantities and values. In the item "Engines, gas, n.o.p., and parts", the quantity represents the number of complete gas engines only, while the value represents not only the value of the specified number of complete gas engines but also the value of all kinds of "Parts" of gas engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.
5. "Imports" means "Imports entered for Consumption". "Entered for Consumption" does not imply that the goods have been actually consumed in Canada, but that they have passed into the custody of the importer and that duty has been paid on the dutiable portion.
6. For statistical purposes, the value of merchandise imported, as shown in this Report, is the value as determined for Customs duty purposes. In most cases, this would be the invoice value of the goods converted to Canadian dollars at authorized exchange ratios. The value does not include charges such as freight, insurance, handling, duties or taxes.
7. Imports into Canada are classified as received from the countries whence they were consigned to Canada. The countries of consignment are the countries from which the goods have come, without interruption of transit, except in the course of transshipment or transfer from one conveyance to another. The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to Canada. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England; Canadian statistics record such imports as coming from the United Kingdom.
8. The initials "N.O.P." mean "not otherwise provided for".
9. Some of the descriptions of articles used in this Report are abbreviated and incomplete due to lack of space and mechanical limitations. Full descriptions are shown in the annual printed report of the Trade of Canada.
10. Throughout this Report, figures are subject to revision.
11. The Foreign Trade of Newfoundland is included as from April 1, 1949.

KEY TO ABBREVIATIONS OF COUNTRIES

Note:— The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in Volume I of the Annual Report of the Trade of Canada.

Value, Price and Volume Indexes of Imports for Consumption

The following table gives index numbers of the declared (statistical) value of imports for consumption by months, and of the unit value (price) and volume of these imports. The value index expresses the value of imports in a given month as a percentage of the monthly average in the base year. The price index is of the fixed-weight aggregative (Laspeyre) type, and combines unit values calculated from the monthly import statistics with specified wholesale or other price quotations. These latter quotations are used where inadequate quantity reporting or insufficiently homogeneous items in the trade statistics prevent the obtaining of sufficiently representative unit value series. The volume index is derived by dividing the value index by the corresponding price index, and is, therefore, of the currently-weighted (Paasche) type. These indexes are computed with 1948 as an interim reference base pending conversion to the Bureau's official post-war reference base (1949).

In computing the price index certain adjustments were made to the regular grouping of commodities used in the trade statistics, and all three indexes are presented on the basis of these adjusted groups. The chief adjustments are as follows: the two groups "agricultural and vegetable products" and "animals and animal products" have been combined into one group now titled "agricultural and animal products"; the sub-group "rubber and its products" (1680-1730) and the item "advertising matter" (4291) have been transferred to the "miscellaneous products" group; the item "arms, etc., British or N.A.T.O. countries" (9196) has been deducted from the "miscellaneous products" total and the grand total; three "ships" items (9155-57) have been transferred to the "iron and steel and their products" group; and a few other adjustments designed to improve group classification by component material have been made.

These indexes are currently computed from the original data for months, quarters and calendar years. Approximate indexes for other periods may be obtained by averaging the monthly values. Although such indexes will be less accurate than would result from a separate computation based on the original data, the margin of error is insufficient to necessitate a lengthy separate computation.

A complete record of these series by months for the post-war period is published in issues of Volume I of the annual report "Trade of Canada". Some additional commodity information appears in issues of the "Review of Foreign Trade". Details of the computation of the price indexes are given in D.B.S. Reference Paper, No. 8, 1950, titled "Export and Import Price Indexes by Months, July, 1945 - June, 1950 (1948 = 100)".

TRADE OF CANADA

IMPORTS

DECEMBER, 1953

AND

TWELVE MONTHS ENDED DECEMBER, 1953

Published by Authority of

The Right Honourable C. D. Howe, Minister of Trade and Commerce

TABLE OF CONTENTS

| | Page |
|--|--------------|
| EXPLANATORY NOTES | 2 |
| KEY TO ABBREVIATIONS OF COUNTRIES | 3 |
| SUMMARY TABLES: | |
| Imports into Canada for Consumption, by Countries ... | 4 |
| Imports into Canada for Consumption, by Main Groups | 6 |
| DETAILED TABLES: | |
| Imports for Consumption, by Articles and Countries: | |
| Agricultural and Vegetable Products (except Chemicals Fibres and Wood): | Class Number |
| A - Mainly Food | 1 to 390 |
| B - Other than Food | 1501 to 1846 |
| Animals and Animal Products (except Chemicals and Fibres) | 2012 to 2348 |
| Fibres, Textiles and Textile Products | 3001 to 3574 |
| Wood, Wood Products and Paper | 4002 to 4311 |
| Iron and Its products | 5001 to 5733 |
| Non-Ferrous Metals and Their Products (except Gold) | 6001 to 6256 |
| Non-Metallic Minerals and Their Products (except Chemicals) | 7001 to 7303 |
| Chemicals and Allied Products | 8001 to 8950 |
| Miscellaneous Commodities | 9000 to 9279 |

VALUE AND VOLUME at end of report

EXPLANATORY NOTES

1. In all the tables of imports in this Report, the quantities and values are based upon the declarations of importers (import entries), as subsequently checked by Customs officials.
2. Weight, where shown is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs Tariff.
3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.
4. In this Report are trade items such as "Engines, gas, n.o.p., and parts", which show both quantities and values. In the item "Engines, gas, n.o.p., and parts", the quantity represents the number of complete gas engines only, while the value represents not only the value of the specified number of complete gas engines but also the value of all kinds of "Parts" of gas engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.
5. "Imports" means "Imports entered for Consumption". "Entered for Consumption" does not imply that the goods have been actually consumed in Canada, but that they have passed into the custody of the importer and that duty has been paid on the dutiable portion.
6. For statistical purposes, the value of merchandise imported, as shown in this Report, is the value as determined for Customs duty purposes. In most cases, this would be the invoice value of the goods converted to Canadian dollars at authorized exchange ratios. The value does not include charges such as freight, insurance, handling, duties or taxes.
7. Imports into Canada are classified as received from the countries whence they were consigned to Canada. The countries of consignment are the countries from which the goods have come, without interruption of transit, except in the course of transshipment or transfer from one conveyance to another. The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to Canada. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England: Canadian statistics record such imports as coming from the United Kingdom.
8. The initials "N.O.P." mean "not otherwise provided for".
9. Some of the descriptions of articles used in this Report are abbreviated and incomplete due to lack of space and mechanical limitations. Full descriptions are shown in the annual printed report of the Trade of Canada.
10. Throughout this Report, figures are subject to revision.
11. The Foreign Trade of Newfoundland is included as from April 1, 1949.

KEY TO ABBREVIATIONS OF COUNTRIES

Note:— The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in Volume I of the Annual Report of the Trade of Canada.

Value, Price and Volume Indexes of Imports for Consumption

The following table gives index numbers of the declared (statistical) value of imports for consumption by months, and of the unit value (price) and volume of these imports. The value index expresses the value of imports in a given month as a percentage of the monthly average in the base year. The price index is of the fixed-weight aggregative (Laspeyre) type, and combines unit values calculated from the monthly import statistics with specified wholesale or other price quotations. These latter quotations are used where inadequate quantity reporting or insufficiently homogeneous items in the trade statistics prevent the obtaining of sufficiently representative unit value series. The volume index is derived by dividing the value index by the corresponding price index, and is, therefore, of the currently-weighted (Paasche) type. These indexes are computed with 1948 as an interim reference base pending conversion to the Bureau's official post-war reference base (1949).

In computing the price index certain adjustments were made to the regular grouping of commodities used in the trade statistics, and all three indexes are presented on the basis of these adjusted groups. The chief adjustments are as follows: the two groups "agricultural and vegetable products" and "animals and animal products" have been combined into one group now titled "agricultural and animal products"; the sub-group "rubber and its products" (1680-1730) and the item "advertising matter" (4291) have been transferred to the "miscellaneous products" group; the item "arms, etc., British or N.A.T.O. countries" (9196) has been deducted from the "miscellaneous products" total and the grand total; three "ships" items (9155-57) have been transferred to the "iron and steel and their products" group; and a few other adjustments designed to improve group classification by component material have been made.

These indexes are currently computed from the original data for months, quarters and calendar years. Approximate indexes for other periods may be obtained by averaging the monthly values. Although such indexes will be less accurate than would result from a separate computation based on the original data, the margin of error is insufficient to necessitate a lengthy separate computation.

A complete record of these series by months for the post-war period is published in issues of Volume I of the annual report "Trade of Canada". Some additional commodity information appears in issues of the "Review of Foreign Trade". Details of the computation of the price indexes are given in D.B.S. Reference Paper, No. 8, 1950, titled "Export and Import Price Indexes by Months, July, 1945 - June, 1950 (1948 = 100)".

172 Monthly Index Numbers of Declared Values, Prices and Physical Volume of Imports for Consumption, by Groups
