B - Other than Food .....	1501 to 1846
Animals and Animal Products (except Chemicals and Fibres).....	2012 to 2348
Fibres, Textiles and Textile Products .....	3001 to 3576
Wood, Wood Products and Paper .....	4002 to 4311
Iron and Its Products .....	5001 to 5736
Non-Ferrous Metals and Their Products (except Gold) .....	6001 to 6259
Non-Metallic Minerals and Their Products (except Chemicals).....	7001 to 7304
Chemicals and Allied Products .....	8001 to 8950
Miscellaneous Commodities .....	9000 to 9274

VALUE AND VOLUME at end of report

## EXPLANATORY NOTES

1. **Source of Data.** Statistics of imports are based upon the declarations of importers (import entries) as subsequently checked by customs officials.
2. **Valuation.** The value of goods imported is the value as determined for customs duty purposes. In most cases this corresponds to the value shown on the invoice accompanying the goods, converted to Canadian dollars at authorized exchange rates (usually the commercial rate prevailing on the date at which the goods were actually despatched to Canada), and excluding such charges as freight, insurance, handling and taxes. In effect, therefore, import values are taken f.o.b. point of shipment in the country of export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment, except in certain special cases otherwise defined in the Customs Tariff. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are items such as "engines, gas, n.o.p., and parts" which show a quantity in "number" as well as value. In these items the "number" refers only to the number of substantially complete articles imported, while the value includes also the value of any parts of the article imported. For such items the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of imports include all goods which enter Canada and are cleared by customs officials for domestic sale or use. The series, therefore, includes goods which are cleared by customs immediately on entry into the country, and goods cleared out of customs warehouses; but excludes goods placed in customs warehouses on entering the country. The technical phrase "Imports entered for consumption" which is sometimes used to describe Canadian import statistics does not imply that all imports will actually be consumed in Canada, but only that they are free to be so consumed without further customs formalities.
5. **Exclusions.** Import statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the article. A small amount of gold scrap in the form of jewellers' sweepings is also included. Some goods for the use of United States forces stationed at treaty bases in Canada are excluded, as are ships of British construction and registry imported for use in Canada, ships purchased for use in foreign trade, bunker supplies and ships' stores purchased by Canadian vessels abroad, temporary imports for exhibition or competition, and Canadian-owned military equipment returned to Canada.
6. **Countries Credited.** Imports are usually credited to the country from which the goods were consigned to Canada. The country of consignment is the country from which goods have come to Canada without interruption of transit except in the course of transfer from one means of conveyance to another.  
  
An exception to this rule is made in the case of imports of goods originating in Central or South America (including the Antilles and Bermuda) which are consigned to Canada from the United States. This class of imports is credited to the country in which the goods originated.
7. **Time Periods.** Import statistics for any month include all goods declared on import entries received at the Bureau of Statistics during the calendar month in question.
8. **Abbreviations.** Many descriptions of countries and articles used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all articles appear in Volume III of the annual report "Trade of Canada". The letters "N.O.P." mean "not otherwise provided for".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.

## KEY TO ABBREVIATIONS OF COUNTRIES

Note:— The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in Volume I of the Annual Report of the Trade of Canada.

Aden .....	Aden	Ireland .....	Ireland

## Value, Price and Volume Indexes of Imports for Consumption

The following table gives index numbers of the declared (statistical) value of imports for consumption by months, and of the unit value (price) and volume of these imports. The value index expresses the value of imports in a given month as a percentage of the monthly average in the base year. The price index is of the fixed-weight aggregative (Laspeyre) type, and combines unit values calculated from the monthly import statistics with specified wholesale or other price quotations. These latter quotations are used where inadequate quantity reporting or insufficiently homogeneous items in the trade statistics prevent the obtaining of sufficiently representative unit value series. The volume index is derived by dividing the value index by the corresponding price index, and is, therefore, of the currently-weighted (Paasche) type. These indexes are computed with 1948 as an interim reference base pending conversion to the Bureau's official post-war reference base (1949).

In computing the price index certain adjustments were made to the regular grouping of commodities used in the trade statistics, and all three indexes are presented on the basis of these adjusted groups. The chief adjustments are as follows: the two groups "agricultural and vegetable products" and "animals and animal products" have been combined into one group now titled "agricultural and animal products"; the sub-group "rubber and its products" (1680-1730) and the item "advertising matter" (4291) have been transferred to the "miscellaneous products" group; the item "arms, etc., British or N.A.T.O. countries" (9196) has been deducted from the "miscellaneous products" total and the grand total; three "ships" items (9155-57) have been transferred to the "iron and steel and their products" group; and a few other adjustments designed to improve group classification by component material have been made.

These indexes are currently computed from the original data for months, quarters and calendar years. Approximate indexes for other periods may be obtained by averaging the monthly values. Although such indexes will be less accurate than would result from a separate computation based on the original data, the margin of error is insufficient to necessitate a lengthy separate computation.

A complete record of these series by months for the post-war period is published in issues of Volume 1 of the annual report "Trade of Canada". Some additional commodity information appears in issues of the "Review of Foreign Trade". Details of the computation of the price indexes are given in D.B.S. Reference Paper, No. 8, 1950, titled "Export and Import Price Indexes by Months, July, 1945 - June, 1950 (1948 = 100)".

 SUMMARY TABLES:	
Imports into Canada for Consumption, by Countries .....	4
Imports into Canada for Consumption, by Main Groups .....	6
 DETAILED TABLES:	
Imports for Consumption, by Articles and Countries:	
Agricultural and Vegetable Products (except Chemicals, Fibres and Wood):	Class Number
A – Mainly Food .....	1 to 390
B – Other than Food .....	1501 to 1846
Animals and Animal Products (except Chemicals and Fibres).....	2012 to 2348
Fibres, Textiles and Textile Products .....	3001 to 3576
Wood, Wood Products and Paper .....	4002 to 4311
Iron and Its Products .....	5001 to 5736
Non-Ferrous Metals and Their Products (except Gold) .....	6001 to 6259
Non-Metallic Minerals and Their Products (except Chemicals).....	7001 to 7304
Chemicals and Allied Products .....	8001 to 8950
Miscellaneous Commodities .....	9000 to 9274

VALUE AND VOLUME at end of report

## EXPLANATORY NOTES

1. **Source of Data.** Statistics of imports are based upon the declarations of importers (import entries) as subsequently checked by customs officials.
2. **Valuation.** The value of goods imported is the value as determined for customs duty purposes. In most cases this corresponds to the value shown on the invoice accompanying the goods, converted to Canadian dollars at authorized exchange rates (usually the commercial rate prevailing on the date at which the goods were actually despatched to Canada), and excluding such charges as freight, insurance, handling and taxes. In effect, therefore, import values are taken f.o.b. point of shipment in the country of export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment, except in certain special cases otherwise defined in the Customs Tariff. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are items such as "engines, gas, n.o.p., and parts" which show a quantity in "number" as well as value. In these items the "number" refers only to the number of substantially complete articles imported, while the value includes also the value of any parts of the article imported. For such items the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of imports include all goods which enter Canada and are cleared by customs officials for domestic sale or use. The series, therefore, includes goods which are cleared by customs immediately on entry into the country, and goods cleared out of customs warehouses; but excludes goods placed in customs warehouses on entering the country. The technical phrase "Imports entered for consumption" which is sometimes used to describe Canadian import statistics does not imply that all imports will actually be consumed in Canada, but only that they are free to be so consumed without further customs formalities.
5. **Exclusions.** Import statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the article. A small amount of gold scrap in the form of jewellers' sweepings is also included. Some goods for the use of United States forces stationed at treaty bases in Canada are excluded, as are ships of British construction and registry imported for use in Canada, ships purchased for use in foreign trade, bunker supplies and ships' stores purchased by Canadian vessels abroad, temporary imports for exhibition or competition, and Canadian-owned military equipment returned to Canada.
6. **Countries Credited.** Imports are usually credited to the country from which the goods were consigned to Canada. The country of consignment is the country from which goods have come to Canada without interruption of transit except in the course of transfer from one means of conveyance to another.

An exception to this rule is made in the case of imports of goods originating in Central or South America (including the Antilles and Bermuda) which are consigned to Canada from the United States. This class of imports is credited to the country in which the goods originated.

7. **Time Periods.** Import statistics for any month include all goods declared on import entries received at the Bureau of Statistics during the calendar month in question.
8. **Abbreviations.** Many descriptions of countries and articles used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all articles appear in Volume III of the annual report "Trade of Canada". The letters "N.O.P." mean "not otherwise provided for".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.

## KEY TO ABBREVIATIONS OF COUNTRIES

Note:— The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in Volume I of the Annual Report of the Trade of Canada.

## Value, Price and Volume Indexes of Imports for Consumption

The following table gives index numbers of the declared (statistical) value of imports for consumption by months, and of the unit value (price) and volume of these imports. The value index expresses the value of imports in a given month as a percentage of the monthly average in the base year. The price index is of the fixed-weight aggregative (Laspeyre) type, and combines unit values calculated from the monthly import statistics with specified wholesale or other price quotations. These latter quotations are used where inadequate quantity reporting or insufficiently homogeneous items in the trade statistics prevent the obtaining of sufficiently representative unit value series. The volume index is derived by dividing the value index by the corresponding price index, and is, therefore, of the currently-weighted (Paasche) type. These indexes are computed with 1948 as an interim reference base pending conversion to the Bureau's official post-war reference base (1949).

In computing the price index certain adjustments were made to the regular grouping of commodities used in the trade statistics, and all three indexes are presented on the basis of these adjusted groups. The chief adjustments are as follows: the two groups "agricultural and vegetable products" and "animals and animal products" have been combined into one group now titled "agricultural and animal products"; the sub-group "rubber and its products" (1680-1730) and the item "advertising matter" (4291) have been transferred to the "miscellaneous products" group; the item "arms, etc., British or N.A.T.O. countries" (9196) has been deducted from the "miscellaneous products" total and the grand total; three "ships" items (9155-57) have been transferred to the "iron and steel and their products" group; and a few other adjustments designed to improve group classification by component material have been made.

These indexes are currently computed from the original data for months, quarters and calendar years. Approximate indexes for other periods may be obtained by averaging the monthly values. Although such indexes will be less accurate than would result from a separate computation based on the original data, the margin of error is insufficient to necessitate a lengthy separate computation.

A complete record of these series by months for the post-war period is published in issues of Volume I of the annual report "Trade of Canada". Some additional commodity information appears in issues of the "Review of Foreign Trade". Details of the computation of the price indexes are given in D.B.S. Reference Paper, No. 8, 1950, titled "Export and Import Price Indexes by Months, July, 1945 - June, 1950 (1948 = 100)".

TRADE OF CANADA

**IMPORTS**

JUNE, 1956

AND

SIX MONTHS ENDED JUNE, 1956

*Published by Authority of*  
The Right Honourable C. D. Howe, Minister of Trade and Commerce

## TABLE OF CONTENTS

	Page
EXPLANATORY NOTES .....	2
KEY TO ABBREVIATIONS OF COUNTRIES .....	3
 SUMMARY TABLES:	
Imports into Canada for Consumption, by Countries .....	4
Imports into Canada for Consumption, by Main Groups .....	6
 DETAILED TABLES:	
Imports for Consumption, by Articles and Countries:	
Agricultural and Vegetable Products (except Chemicals, Fibres and Wood):	Class Number
A – Mainly Food .....	1 to 390
B – Other than Food .....	1501 to 1846
Animals and Animal Products (except Chemicals and Fibres).....	2012 to 2348
Fibres, Textiles and Textile Products .....	3001 to 3576
Wood, Wood Products and Paper .....	4002 to 4311
Iron and Its Products .....	5001 to 5736
Non-Ferrous Metals and Their Products (except Gold) .....	6001 to 6259
Non-Metallic Minerals and Their Products (except Chemicals).....	7001 to 7304
Chemicals and Allied Products .....	8001 to 8950
Miscellaneous Commodities .....	9000 to 9274

VALUE AND VOLUME at end of report

## EXPLANATORY NOTES

1. **Source of Data.** Statistics of imports are based upon the declarations of importers (import entries) as subsequently checked by customs officials.
2. **Valuation.** The value of goods imported is the value as determined for customs duty purposes. In most cases this corresponds to the value shown on the invoice accompanying the goods, converted to Canadian dollars at authorized exchange rates (usually the commercial rate prevailing on the date at which the goods were actually despatched to Canada), and excluding such charges as freight, insurance, handling and taxes. In effect, therefore, import values are taken f.o.b. point of shipment in the country of export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment, except in certain special cases otherwise defined in the Customs Tariff. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are items such as "engines, gas, n.o.p., and parts" which show a quantity in "number" as well as value. In these items the "number" refers only to the number of substantially complete articles imported, while the value includes also the value of any parts of the article imported. For such items the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of imports include all goods which enter Canada and are cleared by customs officials for domestic sale or use. The series, therefore, includes goods which are cleared by customs immediately on entry into the country, and goods cleared out of customs warehouses; but excludes goods placed in customs warehouses on entering the country. The technical phrase "Imports entered for consumption" which is sometimes used to describe Canadian import statistics does not imply that all imports will actually be consumed in Canada, but only that they are free to be so consumed without further customs formalities.
5. **Exclusions.** Import statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the article. A small amount of gold scrap in the form of jewellers' sweepings is also included. Some goods for the use of United States forces stationed at treaty bases in Canada are excluded, as are ships of British construction and registry imported for use in Canada, ships purchased for use in foreign trade, bunker supplies and ships' stores purchased by Canadian vessels abroad, temporary imports for exhibition or competition, and Canadian-owned military equipment returned to Canada.
6. **Countries Credited.** Imports are usually credited to the country from which the goods were consigned to Canada. The country of consignment is the country from which goods have come to Canada without interruption of transit except in the course of transfer from one means of conveyance to another.

An exception to this rule is made in the case of imports of goods originating in Central or South America (including the Antilles and Bermuda) which are consigned to Canada from the United States. This class of imports is credited to the country in which the goods originated.

7. **Time Periods.** Import statistics for any month include all goods declared on import entries received at the Bureau of Statistics during the calendar month in question.
8. **Abbreviations.** Many descriptions of countries and articles used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all articles appear in Volume III of the annual report "Trade of Canada". The letters "N.O.P." mean "not otherwise provided for".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.

## KEY TO ABBREVIATIONS OF COUNTRIES

Note:— The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in Volume I of the Annual Report of the Trade of Canada.

## Value, Price and Volume Indexes of Imports for Consumption

The following table gives index numbers of the declared (statistical) value of imports for consumption by months, and of the unit value (price) and volume of these imports. The value index expresses the value of imports in a given month as a percentage of the monthly average in the base year. The price index is of the fixed-weight aggregative (Laspeyre) type, and combines unit values calculated from the monthly import statistics with specified wholesale or other price quotations. These latter quotations are used where inadequate quantity reporting or insufficiently homogeneous items in the trade statistics prevent the obtaining of sufficiently representative unit value series. The volume index is derived by dividing the value index by the corresponding price index, and is, therefore, of the currently-weighted (Paasche) type. These indexes are computed with 1948 as an interim reference base pending conversion to the Bureau's official post-war reference base (1949).

In computing the price index certain adjustments were made to the regular grouping of commodities used in the trade statistics, and all three indexes are presented on the basis of these adjusted groups. The chief adjustments are as follows: the two groups "agricultural and vegetable products" and "animals and animal products" have been combined into one group now titled "agricultural and animal products"; the sub-group "rubber and its products" (1680-1730) and the item "advertising matter" (4291) have been transferred to the "miscellaneous products" group; the item "arms, etc., British or N.A.T.O. countries" (9196) has been deducted from the "miscellaneous products" total and the grand total; three "ships" items (9155-57) have been transferred to the "iron and steel and their products" group; and a few other adjustments designed to improve group classification by component material have been made.

These indexes are currently computed from the original data for months, quarters and calendar years. Approximate indexes for other periods may be obtained by averaging the monthly values. Although such indexes will be less accurate than would result from a separate computation based on the original data, the margin of error is insufficient to necessitate a lengthy separate computation.

A complete record of these series by months for the post-war period is published in issues of Volume 1 of the annual report "Trade of Canada". Some additional commodity information appears in issues of the "Review of Foreign Trade". Details of the computation of the price indexes are given in D.B.S. Reference Paper, No. 8, 1950, titled "Export and Import Price Indexes by Months, July, 1945 - June, 1950 (1948 = 100)".
