### SUMMARY TABLES:

Imports by Countries .....	6
Imports by Sections from Principal Countries .....	7

### DETAILED TABLE:

#### Imports by Commodities and Countries:

Section	Classes	
Live animals .....	1 - 19 to 9 - 99 .....	8
Food, feed, beverages and tobacco .....	11 - 09 to 183 - 99 .....	8
Crude materials, inedible .....	201 - 10 to 291 - 99 .....	24
Fabricated materials, inedible .....	301 - 10 to 496 - 99 .....	31
End products, inedible .....	501 - 19 to 961 - 99 .....	74
Special transactions - Trade .....	970 - 10 to 970 - 99 .....	137

## INTRODUCTORY NOTES

This preliminary report is published with the aim of providing users of Canadian trade statistics with annual totals of 1964 imports, by commodity and by country, approximately one month earlier than it is normally possible to produce the December issue of the monthly report Imports by Commodities (Cat. No. 65-007). As this preliminary report will be superseded, in its entirety, by the more accurate information contained in the monthly Imports by Commodities report for December 1964, subscribers are advised to discard or destroy this preliminary publication when the December 1964 monthly import report is received.

These preliminary annual totals are produced by merging the cumulative import figures covering the first ten months of 1964 (as published in the monthly import report for October, 1964) with first-run tabulations for November and December, 1964, which in the interest of timeliness have not undergone the normal degree of screening. Accordingly, the advance annual import figures contained in this publication are subject to revision by the January to December cumulative totals which will appear in the regular monthly import report for December, 1964. Nevertheless, this preliminary information should prove sufficiently valid to be useful for most practical purposes during the interval until the December report becomes available.

Import statistics for only the calendar year 1964 as a whole are contained in this publication; figures for individual months or comparative annual totals for previous years are not included. This report is comprised of three tables: the first summarizes the value of imports by country and broad geographic groupings of countries; the second summarizes the value of imports, by sections of the commodity classification, from principal countries and trading areas; the third shows import values, and quantities whenever possible, by individual commodities and countries. These tables are adaptations of Tables 1, 3 and 4, respectively, appearing in the monthly Imports by Commodities report.

The value figures shown in this report are expressed in thousands of dollars rather than in the usual manner. The symbol -- designates values under \$500. Commodity class totals designated by an asterisk (\*) may not add due to rounding. Users of these figures are requested to notify the External Trade Division, Dominion Bureau of Statistics, Ottawa, Ontario, if the rounding of value totals reduces the usefulness of these data to them. We are considering whether the values presented in regular Trade of Canada reports should also be limited to thousands of dollars.

Pertinent information as to source of data, time periods, coverage, countries credited, quantities, values and abbreviations is to be found in the Explanatory Notes and the Key to Abbreviations of Countries appearing in any issue of the monthly report "Imports by Commodities" for 1964.
