EXPLANATORY NOTES.....	2
KEY TO ABBREVIATIONS OF COUNTRIES.....	3
SUMMARY TABLES:	
Imports into Canada for Consumption, by Countries.....	4
Imports into Canada for Consumption, by Main Groups.....	6
DETAILED TABLES:	
Imports for Consumption, by Articles and Countries:	
Agricultural and Vegetable Products (except Chemicals, Fibres and Wood):	Class Number
A – Mainly Food.....	1 to 390
B – Other than Food.....	1501 to 1846
Animals and Animal Products (except Chemicals and Fibres).	2012 to 2348
Fibres, Textiles and Textile Products .....	3001 to 3574
Wood, Wood Products and Paper.....	4002 to 4311
Iron and Its Products.....	5001 to 5732
Non-Ferrous Metals and Their Products (except Gold) .....	6001 to 6256
Non-Metallic Minerals and Their Products (except Chemicals)	7001 to 7303
Chemicals and Allied Products.....	8001 to 8437
Miscellaneous Commodities .....	9000 to 9274

VALUE AND VOLUME at end of report

## EXPLANATORY NOTES

1. In all the tables of imports in this Report, the quantities and values are based upon the declarations of importers (import entries), as subsequently checked by Customs officials.
2. Weight, where shown is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs Tariff.
3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.
4. In this Report are trade items such as "Engines, gas, n.o.p., and parts", which show both quantities and values. In the item "Engines, gas, n.o.p., and parts", the quantity represents the number of complete gas engines only, while the value represents not only the value of the specified number of complete gas engines but also the value of all kinds of "Parts" of gas engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.
5. "Imports" means "Imports entered for Consumption". "Entered for Consumption" does not imply that the goods have been actually consumed in Canada, but that they have passed into the custody of the importer and that duty has been paid on the dutiable portion.
6. For statistical purposes, the value of merchandise imported, as shown in this Report, is the value as determined for Customs duty purposes. In most cases, this would be the invoice value of the goods converted to Canadian dollars at authorized exchange ratios. The value does not include charges such as freight, insurance, handling, duties or taxes.
7. Imports into Canada are classified as received from the countries whence they were consigned to Canada. The countries of consignment are the countries from which the goods have come, without interruption of transit, except in the course of transshipment or transfer from one conveyance to another. The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to Canada. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England; Canadian statistics record such imports as coming from the United Kingdom.
8. The initials "N.O.P." mean "not otherwise provided for".
9. Some of the descriptions of articles used in this Report are abbreviated and incomplete due to lack of space and mechanical limitations. Full descriptions are shown in the annual printed report of the Trade of Canada.
10. Throughout this Report, figures are subject to revision.
11. The Foreign Trade of Newfoundland is included as from April 1, 1949.

## KEY TO ABBREVIATIONS OF COUNTRIES

Note:— The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in Volume 1 of the Annual Report of the Trade of Canada.

## CURRENT COMPARISONS OF THE VALUE AND PHYSICAL VOLUME OF IMPORTS

Three following tables set out current index number comparisons of the nominal (or declared) value of imports into Canada for consumption together with their price and volume components. The price indexes are of the base-weighted aggregative type and are interim measurements developed as deflators of the value series.(1) The physical volume indexes are quotients of a division of value indexes by corresponding price indexes. They are currently weighted.

The price indexes utilized as "deflators" of the value indexes differ slightly from the conventional trade statistics in their grouping, though arranged by nature of component material. Adjustments to groups are determined by pricing problems. Declared value indexes and physical volume indexes have been grouped, consequently, according to the price index samples.

The groups usually designated in the trade statistics as agricultural and vegetable products and animals and animal products have, in this format, been combined into Group I, agricultural and other primary products, with a subgroup of rubber and its products transferred to the miscellaneous group. Certain other adjustments to the groups of varying significance - such as the transfer of ships from the miscellaneous group to iron and steel and their products, phosphate rock from non-metallic minerals to fertilizer, advertising matter from wood products and paper to the miscellaneous group, etc. - represent a gain in precision of group comparisons over a time period. Totals exclude, in common with other statistics of imports into Canada for consumption, temporary imports for exhibition or competition, monetary and non-monetary gold; and include Newfoundland as a tenth Canadian province from April 1, 1949. Imports into Canada for the use of the United Kingdom government have been deducted from the total of the imports for consumption for the purpose of these index comparisons because of their special relationship to the Canadian trade content.(2)

A sub-division of the miscellaneous group, termed special and non-commercial transactions, is designed to distinguish unilateral transactions - such as donations and gifts - and transactions with mixed financial elements from the ordinary trade content. The double character of the miscellaneous group of trade transactions is thus emphasized by the distinction made between the ordinary commercial transactions and those which contain invisible elements. The special and non-commercial imports concerned are as follows: settlers' effects; effects left by bequest; charitable donations; casual donations; presentations for lifesaving; articles for the use of the Governor General; articles for the use of representatives of Commonwealth and foreign governments; incidental purchases by Canadians returning from other countries; cinematograph film positives; advertising and printed matter.

(1) See "Export and Import Price Indexes by Months, July, 1945 - June, 1950 (1948=100) D.B.S., October, 1950 (Reference Paper No. 8).

(2) These imports on United Kingdom Government account may be described also as non-commercial import transactions.

Index Numbers of the Declared Valuesfor Consumption, by Groups.

SUMMARY TABLES:	
Imports into Canada for Consumption, by Countries.....	4
Imports into Canada for Consumption, by Main Groups .....	6
DETAILED TABLES:	
Imports for Consumption, by Articles and Countries:	
Agricultural and Vegetable Products (except Chemicals, Fibres and Wood):	Class Number
A – Mainly Food.....	1 to 390
B – Other than Food.....	1501 to 1846
Animals and Animal Products (except Chemicals and Fibres).	2012 to 2348
Fibres, Textiles and Textile Products .....	3001 to 3574
Wood, Wood Products and Paper.....	4002 to 4311
Iron and Its Products.....	5001 to 5732
Non-Ferrous Metals and Their Products (except Gold) .....	6001 to 6256
Non-Metallic Minerals and Their Products (except Chemicals)	7001 to 7303
Chemicals and Allied Products.....	8001 to 8437
Miscellaneous Commodities .....	9000 to 9274

VALUE AND VOLUME at end of report

## EXPLANATORY NOTES

1. In all the tables of imports in this Report, the quantities and values are based upon the declarations of importers (import entries), as subsequently checked by Customs officials.
2. Weight, where shown is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs Tariff.
3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.
4. In this Report are trade items such as "Engines, gas, n.o.p., and parts", which show both quantities and values. In the item "Engines, gas, n.o.p., and parts", the quantity represents the number of complete gas engines only, while the value represents not only the value of the specified number of complete gas engines but also the value of all kinds of "Parts" of gas engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.
5. "Imports" means "Imports entered for Consumption". "Entered for Consumption" does not imply that the goods have been actually consumed in Canada, but that they have passed into the custody of the importer and that duty has been paid on the dutiable portion.
6. For statistical purposes, the value of merchandise imported, as shown in this Report, is the value as determined for Customs duty purposes. In most cases, this would be the invoice value of the goods converted to Canadian dollars at authorized exchange ratios. The value does not include charges such as freight, insurance, handling, duties or taxes.
7. Imports into Canada are classified as received from the countries whence they were consigned to Canada. The countries of consignment are the countries from which the goods have come, without interruption of transit, except in the course of transshipment or transfer from one conveyance to another. The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to Canada. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England; Canadian statistics record such imports as coming from the United Kingdom.
8. The initials "N.O.P." mean "not otherwise provided for".
9. Some of the descriptions of articles used in this Report are abbreviated and incomplete due to lack of space and mechanical limitations. Full descriptions are shown in the annual printed report of the Trade of Canada.
10. Throughout this Report, figures are subject to revision.
11. The Foreign Trade of Newfoundland is included as from April 1, 1949.

## KEY TO ABBREVIATIONS OF COUNTRIES

Note:— The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in Volume I of the Annual Report of the Trade of Canada.

The following table sets out index number comparisons of the nominal (or declared) values of imports into Canada for consumption together with their respective price and volume components for a current month.(1) The price indexes are of the base-weighted aggregative type and are interim measurements developed as deflators of the value series.(2) The physical volume indexes are quotients of a division of value indexes by corresponding price indexes. They are currently weighted.

The price indexes utilized as "deflators" of the value indexes differ slightly from the conventional trade statistics in their grouping, though arranged by nature of component material. Adjustments to groups are determined by pricing problems. Declared value indexes and physical volume indexes have been grouped, consequently, according to the price index sample.

The groups usually designated in the trade statistics as agricultural and vegetable products and animals and animal products have, in this format, been combined into Group I, agricultural and other primary products, with a sub-group of rubber and its products transferred to the miscellaneous group. Imports of foreign built ships have been transferred from the miscellaneous group to iron and steel and their products; phosphate rock has been transferred from non-metallic minerals to fertilizer; advertising matter has been subtracted from wood products and paper and added to the miscellaneous special and non-commercial transactions; and certain other minor group adjustments have been made. Totals exclude-in common with other statistics of imports into Canada for consumption-temporary imports for exhibition or competition, monetary and non-monetary gold; and include Newfoundland as a tenth Canadian province from April 1, 1949. Imports into Canada for the use of the United Kingdom government have been deducted from the total imports for consumption for the purpose of these index number comparisons because of their special relationship to the Canadian trade content.(3)

A sub-division of the miscellaneous group, termed special and non-commercial transactions, is designed to distinguish unilateral transactions-such as charitable donations, bequests, etc. - and transactions with mixed financial elements from the ordinary trade content. The double character of the miscellaneous group of trade transactions is thus emphasized. Special and non-commercial imports concerned are as follows: settlers' effects; effects left by bequest; charitable donations; casual donations; presentations for lifesaving; articles for the use of the Governor General; articles for the use of representatives of commonwealth and foreign governments; incidental purchases by Canadians returning from other countries; cinematograph film positives; advertising and printed matter.

- 
- (1) For a condensed post-war record by months see "Trade of Canada, Imports; January, 1951"; D.B.S. 10-4030, Vol. 8, No. 1.
- (2) See "Export and Import Price Indexes by Months, July, 1945 - June, 1950 (1948=100)"; D.B.S., Ottawa, October, 1950 (Reference Paper No. 8)
- (3) These imports on United Kingdom Government account may be described as non-commercial import transactions also.

Chemicals and Allied Products.....	8001 to 8437
Miscellaneous Commodities .....	9000 to 9274

VALUE AND VOLUME at end of report

## EXPLANATORY NOTES

1. In all the tables of imports in this Report, the quantities and values are based upon the declarations of importers (import entries), as subsequently checked by Customs officials.
2. Weight, where shown is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs Tariff.
3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.
4. In this Report are trade items such as "Engines, gas, n.o.p., and parts", which show both quantities and values. In the item "Engines, gas, n.o.p., and parts", the quantity represents the number of complete gas engines only, while the value represents not only the value of the specified number of complete gas engines but also the value of all kinds of "Parts" of gas engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.
5. "Imports" means "Imports entered for Consumption". "Entered for Consumption" does not imply that the goods have been actually consumed in Canada, but that they have passed into the custody of the importer and that duty has been paid on the dutiable portion.
6. For statistical purposes, the value of merchandise imported, as shown in this Report, is the value as determined for Customs duty purposes. In most cases, this would be the invoice value of the goods converted to Canadian dollars at authorized exchange ratios. The value does not include charges such as freight, insurance, handling, duties or taxes.
7. Imports into Canada are classified as received from the countries whence they were consigned to Canada. The countries of consignment are the countries from which the goods have come, without interruption of transit, except in the course of transshipment or transfer from one conveyance to another. The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to Canada. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England; Canadian statistics record such imports as coming from the United Kingdom.
8. The initials "N.O.P." mean "not otherwise provided for".
9. Some of the descriptions of articles used in this Report are abbreviated and incomplete due to lack of space and mechanical limitations. Full descriptions are shown in the annual printed report of the Trade of Canada.
10. Throughout this Report, figures are subject to revision.
11. The Foreign Trade of Newfoundland is included as from April 1, 1949.

The following table sets out index number comparisons of the nominal (or declared) values of imports into Canada for consumption together with their respective price and volume components for a current month.(1) The price indexes are of the base-weighted aggregative type and are interim measurements developed as deflators of the value series.(2) The physical volume indexes are quotients of a division of value indexes by corresponding price indexes. They are currently weighted.

The price indexes utilized as "deflators" of the value indexes differ slightly from the conventional trade statistics in their grouping, though arranged by nature of component material. Adjustments to groups are determined by pricing problems. Declared value indexes and physical volume indexes have been grouped, consequently, according to the price index sample.

The groups usually designated in the trade statistics as agricultural and vegetable products and animals and animal products have, in this format, been combined into Group I, agricultural and other primary products, with a sub-group of rubber and its products transferred to the miscellaneous group. Imports of foreign built ships have been transferred from the miscellaneous group to iron and steel and their products; phosphate rock has been transferred from non-metallic minerals to fertilizer; advertising matter has been subtracted from wood products and paper and added to the miscellaneous special and non-commercial transactions; and certain other minor group adjustments have been made. Totals exclude in common with other statistics of imports into Canada for consumption-temporary imports for exhibition or competition, monetary and non-monetary gold; and include Newfoundland as a tenth Canadian province from April 1, 1949. Imports into Canada for the use of the United Kingdom government have been deducted from the total imports for consumption for the purpose of these index number comparisons because of their special relationship to the Canadian trade content.(3)

A sub-division of the miscellaneous group, termed special and non-commercial transactions, is designed to distinguish unilateral transactions-such as charitable donations, bequests, etc. - and transactions with mixed financial elements from the ordinary trade content. The double character of the miscellaneous group of trade transactions is thus emphasized. Special and non-commercial imports concerned are as follows: settlers' effects; effects left by bequest; charitable donations; casual donations; presentations for lifesaving; articles for the use of the Governor General; articles for the use of representatives of commonwealth and foreign governments; incidental purchases by Canadians returning from other countries; cinematograph film positives; advertising and printed matter.

- 
- (1) For a condensed post-war record by months see "Trade of Canada, Imports; January, 1951"; D.B.S. 10-4030, Vol. 8, No. 1.
  - (2) See "Export and Import Price Indexes by Months, July, 1945 - June, 1950 (1948=100)"; D.B.S., Ottawa, October, 1950 (Reference Paper No. 8)
  - (3) These imports on United Kingdom Government account may be described as non-commercial import transactions also.
