CANADA'S FOREIGN TRADE, CALENDAR YEAR 1929.

Canada in the production and exportation of many staple products ranks high among the leading nations of the world. In the production of printing paper, nickel, asbestos, and cobalt, she leads the world; occupies second place in the production of wheat and automobiles; and in output of lead and gold she occupies third place. In export trade she leads the world in exports of wheat, printing paper, nickel, and asbestos; occupies second place in exports of wheat flour and automobiles, and third place in exports of wood pulp; as well as occupying a very high position in the exports of many other staple products such as lumber and timber, fish, copper, barley, cheese, raw furs, whiskey, meats, rubber tires, farm implements, pulpwood, cattle, raw gold, silver, lead, rye, oats, rubber footwear, leather and hides.

World-wide statistics are not yet available for the calendar year 1929, but for the calendar year 1928, Canada occupied fifth position in import and export trade, as well as in aggregate trade; second place in export and total trade per capita; third position in favourable trade balance, and second place in favourable trade balance per capita. Inasmuch as Canada's total trade for the calendar year 1929 compared with 1928 shows a decrease of \$89,213,000 (imports an increase of \$75,675,000 and exports a decrease of \$165,888,000) it is evident that the Dominion will continue to hold fifth position in import and total trade in 1929 among the principal commercial nations of the world, but that in export trade will probably move down to sixth position, yielding fifth place to British India. Also in respect to visible trade balance: this was unfavourable on December 31, 1929 to the extent of \$90,535,000 in comparison with a favourable trade balance of \$151,928,000 on December 31, 1928. This situation was largely brought about by an increase in imports and a decrease in exports. In the case of imports the increase was mainly due to the movement of capital equipment into the Dominion to meet expansion conditions, while in the case of exports the decrease was mainly accounted for by the falling off in the exports of grains, particularly wheat, to the United Kingdom and Continental Europe, due partly to lower yields, but also reflecting temporary marketing policies as well.

If the exports of barley, flaxseed, oats, rye, wheat and wheat flour are eliminated from the Dominion's domestic exports for 1928 and 1929, it will be noted that the exports of "all other commodities" show an increase for the year 1929 over 1928 of \$61,064,577 or 7.7 per cent. The particulars are set forth in the following table:-

Canada's Domestic Exports, less Exports of Barley, Flaxseed,  
Oats, Rye, Wheat and Wheat Flour.

Trade by Countries, 1929: The imports from foreign countries during the year 1929 were valued at \$1,041,678,000, and from the British Empire at \$257,315,000; the increase in 1929 over the same period in 1928, in the case of foreign countries being \$73,518,000, and of the British Empire \$3,157,000; while the exports of Canadian produce to foreign countries amounted to \$786,931,000, and to the British Empire to \$395,481,000, the exports to foreign countries showing a decrease of \$17,369,000, and to the British Empire a decrease of \$150,086,000. The decrease in exports to the British Empire was chiefly due to decreased exports of grains, particularly wheat, to the United Kingdom. From 1928 to 1929 the imports from foreign countries, except the United States, increased \$5,563,000, while imports from the British Empire, except the United Kingdom, decreased \$862,000; whereas exports to foreign countries, except the United States, from 1928 to 1929 decreased \$47,988,000, while the exports to the British Empire, except the United Kingdom, increased \$5,674,000. The exports to the United States from 1928 to 1929 increased \$30,619,000, while the exports to other foreign countries during the same interval decreased \$47,988,000. The trade of Canada with the United States in 1929 amounted to \$1,416,193,000 or 57 per cent of Canada's total trade with the world. In 1929 imports from the United States were valued at \$893,607,000, and domestic exports at \$522,586,000; the increase in imports over 1928 being \$67,955,000, and in exports \$30,619,000. The trade of Canada with the United Kingdom comes next in importance. Imports from the United Kingdom in 1929 amounted to \$194,776,000, and domestic exports to \$290,339,000, the increase in imports amounting to \$4,019,000, and the decrease in exports to \$155,760,000. Imports from Belgium, Germany, Italy, Japan and the Netherlands show increases, while the exports to these countries show decreases. Imports in order of importance were: Germany, \$22,072,000, increase \$2,186,000; Japan, \$13,324,000,

Analysis of Commodity Trade, 1929: The increase in the imports, 1929 compared with 1928, amounting to

\$76,675,000, occurred in six of the main groups, three showing decreases; while the decrease in the domestic exports, amounting to \$167,455,000, occurred in three of the main groups, six showing increases. The decreases in the imports and exports occurred in the identical main groups, viz.: the Agricultural and Vegetable Products group, the Animal Products group and the Fibre and Textile Products group. The decreases in these groups were, in the case of imports, \$6,372,000, and in the case of exports, \$244,160,000; while the increases in the Wood and Paper group, the Iron and Its Products group, the Non-Ferrous Metals group, the Non-Metallic Minerals group, the Chemical Products group and the Miscellaneous Commodities group, in the case of the imports amounted to \$83,047,000, and in the case of exports to \$76,705,000. The import groups arranged in order of importance, with increase or decrease, 1929 compared with 1928 were: (1) Iron and Its Products, \$342,481,000, increase \$19,517,000; (2) Agricultural and Vegetable Products \$232,826,000, decrease \$3,435,000; (3) Fibres and Textiles \$198,929,000, decrease \$2,814,000; (4) Non-Metallic Minerals, \$185,922,000, increase \$23,749,000; (5) Non-Ferrous Metals \$90,686,000, increase \$21,747,000; (6) Miscellaneous Commodities \$75,108,000, increase \$9,366,000; Animal Products \$70,090,000, decrease \$123,000; (8) Wood and Paper, \$62,820,000, increase \$5,501,000; and (9) Chemical Products, \$40,131,000, increase \$3,167,000; the export groups arranged in order of importance, with increase or decrease, 1929 compared with 1928 were: (1) Agricultural and Vegetable Products, \$429,801,000, decrease \$221,271,000; (2) Wood and Paper, \$292,601,000, increase \$3,475,000; (3) Non-Ferrous Metals, \$148,164,000, increase \$44,753,000; (4) Animal Products \$140,829,000, decrease \$22,629,000; (5) Iron and Its Products \$90,101,000, increase \$19,435,000; (6) Non-Metallic Minerals \$29,720,000, increase \$3,137,000; (7) Chemical Products \$21,828,000, increase \$3,471,000; (8) Miscellaneous Commodities \$19,896,000, increase \$2,433,000; and (9) Fibres and Textiles \$9,472,000, decrease \$260,000. Imports for Canadian Industries, 1929: It will be noted by reference to the statistics in the following table showing "Imports of Sixty-Three Leading Commodities for Canadian Industries" (Calendar Year 1929) that the total increase in Canada's imports, amounting to \$76,675,000, was not due to increase in the value of these imported materials, as from 1928 to 1929 there was actually a decrease of \$3,289,000. While the value of the imports of raw, semi-manufactured and fully manufactured products for Canadian industries in 1929 amounted to \$383,943,000 compared with a similar import in 1928 of \$387,232,000, decrease \$3,289,000; the proportion of these imports with increase or decrease, 1929 compared with 1928, according to degree of manufacture, was: raw materials \$188,865,000, increase \$1,737,000; semi-manufactured products \$84,453,000, decrease \$989,000; and manufactured products \$110,625,000, decrease \$4,037,000.

A further analysis of the statistics in the following table will show that thirty-one of the sixty-three commodities listed show increases in value, and thirty-two show decreases; while twenty-seven of the forty-eight commodities for which there are quantity statistics, show increases, and twenty-one show decreases. Of the forty-eight commodities for which there are quantity statistics, seven show increases in the quantity imported, and decreases in the value, viz.: raw cotton, raw rubber, raw coffee, tin in blocks, ingots, etc., raw cocoa, artificial silk yarn and tops, and hard rubber, recovered rubber, etc., four show decreases in the quantity imported and increases in the value, viz.: lumber, rough sawn, cotton yarn, wire rods, for making wire, and bristles; while twenty show increases in both quantity and value, and seventeen show decreases. Of the fifteen commodities entered at value only, eight show decreases and seven increases. The statistics in
