SALES AND PURCHASES OF SECURITIES BETWEEN CANADA AND OTHER COUNTRIES

APRIL 1950

Security transactions between Canada and other countries during April declined from the high level prevailing in the previous month, but exceeded the total volume in the corresponding month in 1949. Both sales and purchases decreased from March totals, sales amounting to \$21.0 million and purchases to \$21.9 million. Largely as the result of offsetting transactions in Canadian and United States securities, sales and purchases were almost brought into balance. A purchase balance of \$0.9 million replaced the sales balance of \$4.2 million incurred in the previous month.

Cumulative transactions at the close of the first four months in 1950 were \$45.7 million higher than the total volume for the corresponding period in 1949. A cumulative sales balance of \$4.5 million existed at the end of April which compares with net sales of approximately equal amount that arose out of a smaller volume of trade for the January-April period in the previous year.

The decline in security transactions in April resulted chiefly from decreased sales and purchases with the United States, sales amounting to \$20.1 million and purchases to \$19.4 million. These transactions produced a sales balance of \$0.7 million which compares with net sales of \$5.6 million occurring in the preceding month. Repurchases of Canadian stocks were offset by sales in Canadian bonds and debentures and also in United States common and preference stocks.

The volume of trade with the United Kingdom declined from the previous month, sales decreasing to \$0.1 million while purchases were increased to \$2.2 million. The monthly purchase balance existing since September 1949 amounted to \$2.1 million as the result of April transactions.

Sales to other countries increased to \$0.8 million while purchases decreased from the previous month to \$0.3 million, thus giving rise to a sales balance of \$0.5 million.

In Table 4, which lists prices and yields of representative government bonds, prices of Canadian and United States issues receded from levels prevailing in the previous month, while an increase occurred in the price of the United Kingdom issue.

Index numbers of all common stock prices appearing in Table 5 advanced over the previous month. The largest gains were made in the index of Dominion common stocks other than mining which reached the highest level recorded in any month during the past 13 years.

Statistics in this bulletin cover transactions reported by investment firms, stock exchanges and other security dealers in Canada. Not included are: new issues of Canadian securities floated abroad, redemptions of called or matured Canadian bonds owned abroad, and some transactions by other than the reporting agencies. Complete statistics regarding Capital movements are included in the annual reports on the Canadian Balance of International Payments.
