SALES AND PURCHASES OF SECURITIES
BETWEEN CANADA AND OTHER COUNTRIES
APRIL, 1953

Trade in Outstanding Securities

Trade in outstanding securities between Canada and other countries in April resulted in a small outflow of capital. Net purchases of \$5.5 million from the United States were offset by net sales to other countries aggregating \$5.0 million. While sales to the United Kingdom receded from the high levels of March, net sales to other overseas countries rose to heights not reached since the early months of 1951.

The broad pattern of international security trading characteristic of transactions in 1952 continued in April. There were outflows of capital for the repurchase from the United States of government bonds (mainly provincial issues in April) offset by net sales of securities of Canadian corporations to the United States and overseas.

During the month prices of United Kingdom bonds continued to firm but those on Canadian and particularly United States issues fell. A new long-term issue of the United States Government at the middle of the month, coupled with an increase near the end of the month in the interest rates charged by New York City banks, led to a general re-appraisal of yields on public securities but this took place too late to have a material effect on international security trading figures in April.

Statistics in this bulletin cover transactions in outstanding securities reported by investment firms, stock exchanges, and other security dealers in Canada. Not included are sales of new issues and redemptions of called or matured securities, security transactions of a short-term character analogous to changes in bank balances, and some transactions by other than reporting agencies. Complete statistics of capital movements are published in the annual reports on The Canadian Balance of International Payments, while preliminary comment on the first quarter of 1953 will be found in the March issue of this series.

Prepared in Balance of Payments Section.
