Vol. 2 No. 7

### Sales and Purchases of Securities Between Canada and Other Countries

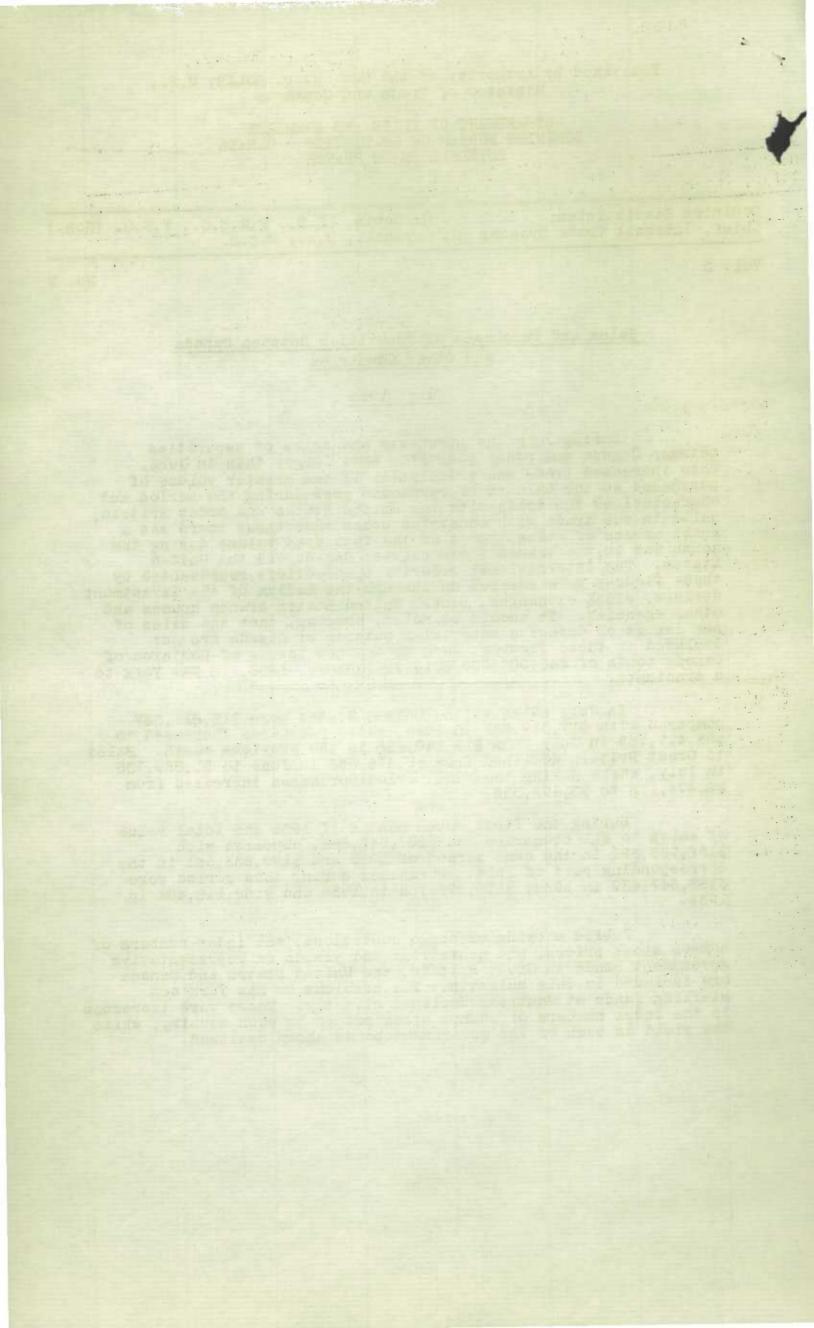

#### July, 1936

During July the purchases and sales of securities between Canada and other countries were larger than in June. This increased trade was principally in the greater volume of purchases so the balance of purchases grew during the period and characterized the trade with the United States and Great Britain, while in the trade with countries other than these there was a small excess of sales. Most of the increased volume during the month was in the transactions between Canada and the United States. The international security transactions represented by these figures were carried on through the medium of the investment dealers, stock exchanges, banks, United States branch houses and other agencies. It should be noted, however, that the sales of new issues of Canadian securities outside of Canada are not included in these figures, such as the new issues of Dominion of Canada bonds of \$48,000,000 sold in January, 1936, in New York to a syndicate.

In July sales to the United States were \$18,811,327 compared with \$17,317,821 in June, while purchases increased to \$25,417,735 in July from \$19,240,228 in the previous month. Sales to Great Britain declined from \$2,474,323 in June to \$1,869,735 in July, while during the same period purchases increased from \$2,474,113 to \$3,492,336.

During the first seven months of 1936 the total value of sales to all countries was \$207,542,888, compared with \$152,986,392 in the same period of 1935 and \$199,633,561 in the corresponding part of 1934. Purchases during this period were \$182,647,439 in 1936, \$118,376,705 in 1935 and \$168,118,487 in 1934.

Tables showing exchange quotations, the index numbers of common stock prices, and quotations and yields on representative government bonds in Great Britain, the United States and Canada are included in this bulletin. The premiums on New York and sterling funds at Montreal declined slightly. There were increases in the index numbers of common stock prices in each country, while the yield on each of the government bonds shown declined.
