## BETWEEN CANADA AND OTHER COUNTRLES

Security Transactions - Second Quarter, 1956
Transactions in Canadian eecurities resulted in a net capital inflow of $\$ 195$ million during the second quarter of 1956. This movement was larger than any tince the massive inflow which occurred during the third quarter of 1950 , and compared with $\$ 110$ million for the first quarter of 1956 . The movement included $\$ 48$ million from the net sale of outstanding Canadian stock and bonds, and $\$ 172$ million from the sale to non-residente of new iswues lems $\$ 25$ million of Canadian securities owned by non-renidents which were retired.

Net sale of outstanding Canadian stocks rose to new heights, contributing $\$ 62$ million to the total for the quar ter. The balances with the United States, the Undted Kingdom, and with other over eas countries each rone. Net sales to United States resident: amounted to $\$ 35 \mathrm{million}$, an increase of about one-half over the firet quarter balance. There was a very sharp rise in net sales to resident of the United Kingdom which exceeded $\$ 16$ million during the quarter, compared with less chan $\$ 2$ million in the preceding quarter. Resident of other overseas countries added $\$ 11$ million to their holdings, compared with $\$ 6$ million in the first quarter. In contrast to the trandactions in outstanding Canadian stocks there were, however, net repurchases during the second quarter of the year of outstanding Canadian bond:, debentures and other securities amounting to some $\$ 14$ million. This movernent was in contrast to net sales which oc curred on balance in each of the preceding two quarters. Canadians repurchamed nearly $\$ 25$ million of outstanding Canadian bond and debentures held in the United States, but old on balance $\$ 3$ million and $\$ 8$ million to residenta of the Unjted Kingdom and other overseas countries respectively. The securitien repurchased from the United States. included on balance, $\$ 16$ million of Government of Canada direct issues, $\$ 6$ million of provincial, and $\$ 7$ million of corporation issues, while there were modest sales of Government guaranteed and municipal iseves and other securities. Net sales of residents of over seas countries other than the United Kingdom were mainly Government of Canada direct issues.

Detail. of new issues and retirements of Canadian securities appear on pege 8.
Transactions in foreign securities led to a net capital inflow of $\$ 6$ million compared with an outflow of $\$ 17$ million in the first quarter. There was a net inflow of $\$ 11$ million from the ale by Canadian of holdings of oustanding foreign securities. This sales balance contrasted with a purchase balance of $\$ 16$ million recorded in the firet quarter of the year when, however, trading was dominated by a ubstantial participation by Canadian investor, in a public redistribution of etock of an Eutomobile company previously owned by a United State foundation. Mont of the inflow reprenented the proceeds of Undted States stocka. Whiledisposing of outstanding foreignisaues, Canadians purchased $\$ 5$ million of new foreign issues, mainly United States corporate and foreign goverament bonds.

## Trade-in Outstanding Securities - June, 1956

While there was an inflow of copital from trade in all outstanding aecurities during June, it amounted to only $\$ 5$ million compared with $\$ 34$ million in May. Transactions with the United States led to an outhow of $\$ 7$ million, but there were inflows of $\$ 7$ million and $\$ 5$ million from the United Kingdom and other overieas countries respectively. Net sales of outetanding Ganadian tocks fell from $\$ 27$ million in May to $\$ 15 \mathrm{milhon}$, and in contrast to males of $\$ 7$ million of all other outstanding securities, there were repurchases of $\$ 10$ million. Most of this change occurred in Canadian bond and debentures.

Statistic on pages 2 to 7 of thi bulletin cover transactions in outstanding ecurities reported by inveatment firms, tocks exchanges, and other security dealer in Canada. Not included are sale of new issues and retirements of called or matured mecurities, security transactions of a short-term character analogous to changea in bank balances, and some transactions by other than reporting agencies. More complete statistics of capital movements will be found in the annual and quarterly reports on The Canadian Balance of International Payments.

Prepared in the Balance of Payments Section, International Trade Division.

The proceeds of new issues sold to non-residents during the second quarter were the highest since the first quarter of 1954. Residents of the United States bought more than 90 per cent of the total. Approximately 85 per cent of the new bonds and debentures sold to nonresidents during the quarter were payable solely or optionally in foreign currencies.
