## SALES AND PURCHASES OF SECURITIES

## BETWEEN CANADA AND OTHER COUNTRIES

The net sale by Canadians of outstanding securities in May reached nearly $\$ 40$ million, and was made up of net sales of $\$ 11$ million to the United States, $\$ 18$ million to the United Ringdom and $\$ 11$ million to other overseas countries. The net inflow which occurred in May has not been exceeded since September 1950 when the inflows were largely the effect of expectations of changes in the exchange rate.

Trade in outstanding Canadian securities accounted for $\$ 26$ million of the net sales balance in the month. Residents of the United Kingdom were the major buyers, and the sales balance of $\$ 18$ million was fully represented by Canadian common and preference stocks. This unprecedentedly large net trade in stocks with that country compared with $\$ 12$ million in April being larger even than that which resulted from trading in stocks in July 1956. Residents of other overseas countries also added to their holdings through trade in outstanding Canadian issues. The net sales balance of $\$ 11$ million was nearly double the April figure. It included about $\$ 7 \mathrm{million}$ of Canadian stocks but there were also net sales of Canadian bonds, principally corporate obligations. In contrast to the results of trading with overseas countries there were small repurchase balances with the United States in respect of both Canadian stocks and Canadian bonds, resulting in a capital export from Canada of some $\$ 3$ million.

During the first five months of 1957 net sales of outstanding Canadian securities to non-residents produced a net capital inflow of $\$ 80 \mathrm{million}$. This total was some $\$ 43$ million smaller than for the corresponding period of 1956. The difference was more than made up by a shift in the direction of trade in outstanding Canadian bonds, etc., which changed from net sales of $\$ 48$ million in the five months of 1956 to net repurchases of $\$ 3$ million in 1957. Net sales to non-residents of outstanding Canadian stocks rose in the corresponding period from $\$ 75$ million to $\$ 83$ million. There was also a considerable change in the geographical origin of the inflows in the two periods. In the first five months of 1956 net sales to the United States amounted to $\$ 76 \mathrm{million}$, to the United Kingdom $\$ 15$ million, and to other overseas countries $\$ 32 \mathrm{million}$. In 1957 there were net repurchases of $\$ 12$ million from the United States and the balance with overseas countries other than the United Kingdom remained relatively unchanged at $\$ 32 \mathrm{million}$, but the net inflow from the United Kingdom reached no less than $\$ 60$ million.

Transactions in outstanding foreign securities led to a net sales balance or capital import of $\$ 14$ million. On balance this reflected entirely the sale by Canadian investors of stocks of United States corporations.

Statistics in this bulletin cover transactions in outstanding securities reported by investment firms, stock exchanges, and other security dealers in Canada. Not included are sales of new issues and retirements of called or matured securities, security transactions of a short-term character analogous to changes in bank balances, and some transactions by other than reporting agencies. More complete statistics of capital movements will be found in the annual and quarterly reports on The Canadian Balance of International Payments.

Prepared in the Balance of Payments Section, International Trade Division.
