SALES AND PURCHASES OF SECURITIES
BETTEEN CANADA AND OTHER COUNTRIES

## Security Transactions - Second Quarter, 1957

Capital inflows into Canada from portfolio security transactions rose by aldost one-third ca a new peak of $\$ 314$ willion in the second quarter of 1957 from $\$ 239$ million in the first quarter. The net infiow of $\$ 553 \mathrm{milliot}$ in the first six months compares with $\$ 306$ willion in the first half of 1956 and $\$ 454$ million ln the seconcthalf, and is much higher than the total in any earlier complete year. About one-quarter of the tocal inflows from portfolio sedurtit transactions in the first half-year were from overseas countries chiefly because of unprecedented overseas demands for Canadian stocks.

The leading source of these inflows in the second quarter from porffolio security transactions was again the borrowing by provinctal governments and corporations through the sale of new issues of canadian securities sold abrod. At $\$ 280$ million the new issues abraad reached a new high level. Capital outflows connected with retirement of securlties abros of $\$ 28$ million were less than in the previous quarter. Details of the new issues and retirements appear on the final page of this report. The other source of inflow was the sale of outstanding Canadian securities which at \$47 milllion amounted to slightly more than in the first quarter. And in addition there were inflows from the liquidation of holdings of foreign securities amounting to $\$ 15$ million.

The leading feature of the trade in ourstanding securities in both quarters of 1957 has been the extent of capital inflows from the United Kingdom and other overseas countries for the acquisition of cansdian stocks. In the six months net sales of Cansdian outstanding securities to the United Ringdom were $\$ 72$ million and $\$ 69$ million of these were net sales of stocks with $\$ 42$ million occurring in the second quarter. Net sales of stocks to other foreign countries were $\$ 23$ million in the half year, having also risen in the second quarter, in addicion to net sales of outstarding bonds of $\$ 13$ million. In contrast, transactions in outstanding canadian securities with the United states led to capital outflows of $\$ 27$ million in the same period mainly from repurchsses of outstanding canadian bonds.

## Trade in Outstanding Securities - June, 1957

Although substantial in volume, trade in outstanding securities in June was close to equilibrium with net sales of only $\$ 1.3$ million. The small balance with all countries was the result of enlarged net repurchases of both outatanding bonds and atocks from the United States which amounted to $\$ 15.7$ million. Net sales to the United Kingdom and other overseas countries of $\$ 11.8$ million and $\$ 5.3$ million respectively were less than in the two previous months but continued to be largely made up of sales of stocks.

Statistics on pages 2 to 7 of this bulletin cover transactions in outstanding securicles reported by investment firms, stock exchanges, and other security dealers in Canada. Not included are sales of new issues and retirements of called or matured securities, securdty transactions of a short-term character analogous to changes in bank balances, and some transactions by other than reporting agencies. More complete statistics of capital movements will be found in the annual and quarterly reports on The Canadian Balance of International payments.
prepared in the Balance of Payments Section, International Trade Division.

The proceeds of new issues of Canadian securities sold to non-residents during the second quarter estab11 shed a new high in the quarterly series which conmenced in 1950 and have only been exceeded by annual totals in a few years. Residents of the United States were again purchasers of over 90 per cent of the total. Approximately 90 per cent of the new bonds and debentures sold to non-residents during the quarter were payable solely or optionally in foreign currencies.
