Security Transaction - Second Quarter, 1967

A net capital inflow of $\$ 98$ million during the second quarter of 1967 arose from transactions in portfollo securities between Cansda and other countries, a decline of about one third from the first quarter inflow of $\$ 152 \mathrm{million}$. Transactions in Canadlan lssucs gave rise to a $\$ 149$ million inflow compared with $\$ 206$ millon for the first quarter. Part of the decline reflected official repatriation of foreign pay issues of the Government of Canada. Net purchases of foreign securities remained approximately unchanged with a $\$ 51$ million outflow for the second quarter versus $\$ 54$ milion for the first quarter.

Sales of Canallan rew ismues at $\$ 322$ million changed little from the $\$ 331$ million of the firat quarter. Provinctal goverment direct and guaranteed bonds and debentures continued to make up the major portion (over three quarters) of the proceeds from new issues which climbed above the record level established in the first quarter 1967. New corporstion bond issues rose somewhat from the low flrst quarter figure to $\$ 56 \mathrm{million}$ in the second quarter. At $\$ 494 \mathrm{million}$, total offerings of new Canadian bonds and debentures to residents of the United States were the highest afnce the first quarter of 1963 . A placement by a Canadian pipeline company to finance the construction by an affiliate of facilities in the United Stacea accounted for a significent part of this cotal.

During the second quarter, transaction in outstanding Canadian securitles, produced a net outflow of $\$ 37$ million or about two thirds of the first quarter purchase balance. The net repatriation of canadian equities fell to $\$ 15$ million from $\$ 52$ million in the first quarter - the lowest level aince the first quarter of 1966.

Second quarter retirements of Canadian securities held by non-residents rose to $\$ 136$ million compared to $\$ 63$ million In: the first quarter. This rise was accounted for largely by an increase of $\$ 57$ milifon in retirements of Government of Canada direct issues which includes a apecial repurchase of more than $\$ 30$ million.

Although the total net outflow for the purchase of foreign securities was little changed in the first two quarters of 2046 there were changes in its composition. Net purchases of outstanding foreign eccuritiea, principally United States equities, increased by one half to $\$ 44$ million $1 \pi$ the second quarter of 1967 while Canadian purchase of foreign new issues contracted to $\$ 9$ million from $\$ 26$ milifon in the first quarter when an international institution had floated an isaue in Canada.

## Trade in Outstanding Securities - June 1967

During the month of June, trade in outstanding securities gave rise to a net purchase balance of $\$ 32.8$ million down from the $\$ 36.8$ million outflow for May. Geographically there were net outflows of $\$ 20.3$ million and $\$ 14.4$ million to the United States and the United Kingdom respectively while a net inflow of $\$ 1.9$ million was recorded from other foreign countries.

Net repatriation of outstanding Canadian securities continued during June but at a lower level of slightly more than $\$ 9.5$ million compared to $\$ 21.2$ million 1 n May. This was due largely to a sharp decline in net repurchases of Canadian bonds and debentures which moved down from $\$ 16.0$ million in May to $\$ 5.1$ million in Jure.

A net outflow from trading in outstanding foreign securities of $\$ 23.3 \mathrm{milli}$ on was recorded for the month of June, up about fifty per cent from that of May. This comprised a $\$ 19.2$ million outflow to the United States, a $\$ 6.2$ million outflow to the United Kingdom and a $\$ 2.1$ milion fnflow from other foreign countries. Transactions in United States equities produced a net purchase balance of $\$ 19.3$ million, nearly three quarters above that for May.

- Figures not available.

Incenthacional short term money market transactions
During the second quarter of 1967 there was a net outflow of $\$ 9$ million resulting from interamblocai transactions in Canadian money market instruments and other short-term borrowing by finance companies (data for which are included only in the accompanying two statements). Geographically, there was a $\$ 42$ milifon net outflow to the United States partially offset by $\$ 6$ million and $\$ 27$ million net inflows from the United Kingdom and other countries respectively.

International transactions in Canadian finance company paper (including that of the financing subsidiaries of manufacturing and retail enterprises) led in the second quarter to a $\$ 26$ million net outflow. This was partially offact by a $\$ 9$ million net inflow as a result of transactions in other finance company short-term obligations (which include borrowings from foreign banks and advances from parent companies). These second quarter flows compare with a $\$ 7$ million net inflow and a $\$ 19 \mathrm{mlli}$ on net outflow respectively during the first quarter. In addition there were, of course, other finance company transactions not identified separately which have been included with capital movements in longterm forms, notably in new issues and retirements of Canadian securities. Taken in total, non-residents decressed their holdings of these companies' securities in the second quarter by about \$15 milifon, or roughly the same as the corresponding first quarter figure.

Net sales of Canadian treasury bills declined from $\$ 15$ milifon the first quarter to $\$ 8$ million in the second quarter. During the second quarter the Canadian treasury bill holdings of residents of other foreign countries showed a $\$ 14$ million increase, while the holdings of United Kingdom residents decifned. There was no net change in United States holdings of these securities.

The net capital outflow due to international transactions in Canadian commercial paper (including bankers' acceptances) moved from $\$ 10$ million in the first quarter to $\$ 3$ million during the second quarter. At the same time there were $\$ 7$ million of net sales of other short-term paper (including notes of banks, mortgage loan companies and municipal and provincial governments). Buy-back transactions based on Government of Canada securities led to a net outflow of $\$ 4$ million.

(1) As published in the United States Federal Reserve Bulletin.
(2) Market offer rates at $11 \mathrm{a} . \mathrm{m}$. on the latest issue of three month bills.
(3) Rates per annum computed on basis of midpoint quotation (between bid and offer) at 11 a.m. In New York for both spot and forward Canadian dollars. When purchasing Canadian funds with United States Collars and simultaneously reselling them for Undted States dollars for delivery in 90 days, a positive figure represents a nominal return, at annual rates, to a United States resident, while a legative figure represents a nominal cost. The cases are reversed for a Canadian holder of Canadian funds doing a swap transaction in United States dollars.
