## SALES AND PURCHASES OF SECURITIES BETWEEN CANADA AND OTHER COUNTRIES

SEPTEMBER 1968

## Security transactions - Third Quarter, 1968

The net capital inflow of $\$ 317$ million recorded during the third quarter from transactions in portfolio securities between Canada and other countries, although relatively large, represented a drop of over one third from the record high $\$ 494$ million net inflow of the previous quarter. Every category except retirements of Canadian securities contributed to this decline with the major factor being the decrease of $\$ 217$ million in the net inflow from the sale to non-residents of new issues of Canadian securities. All in all net sales of Canadian securities fell some $\$ 162$ million to $\$ 448$ million. The net outflow due to transactions in foreign securities rose $\$ 15 \mathrm{million}$ to $\$ 131$ million.

Sales of Canadian new issues fell back from the $\$ 705$ million peak in the second quarter to $\$ 489$ million in the quarter under review. While the Government of Canada had replenished official exchange reserves through the sale abroad in the second quarter, largely in European capital markets, of about $\$ 250$ milion of new issues denominated in foreign currencies, there were no such sales in the third quarter. On the other hand, sales to non-residents of provincial government direct or guaranteed new issues rose sharply from the relatively high second quarter figure of $\$ 174$ million to a record $\$ 280$ million. Over half of this total was derived from the European markets. New bond issues of Canadian corporations fell from the rather large $\$ 232$ million second quarter figure to $\$ 149$ million. However new stock issues taken up by non-residents rose to $\$ 27 \mathrm{mfllion}$ the highest in two and a half years. Total offerings of new Canadian bonds and debentures to United States residents fell to $\$ 282$ million during the quarter, the lowest since the fourth quarter of 1966. The net purchase balance from transactions in outstanding Canadian securities during the quarter amounted to $\$ 3$ million or a swing of $\$ 26$ milion from the net inflow of $\$ 23$ million in the second quarter. Trading in outstanding Canadian common and preference shares produced a fifth consecutive net quarterly inflow at $\$ 10 \mathrm{million}$, following an unbroken succession of net outflows from the second quarter of 1961 , to the second quarter of 1967.

Retirements of Canadian securities in the third quarter at $\$ 38$ million moved to less than one-third of the previous Goviter. Retirements of all categories of Canadian bonds were lower than in the previous quarter, with corporate and Government of Canada issues showing the largest declines.

Net purchases by Canadian residents of foreign securities as mentioned above moved up to $\$ 131$ million. Increases by Canadian residents in their holdings of outstanding United States common and preference shares accounted for a net outflow of nearly $\$ 119$ million or over 90 per cent of the total.

## Trade in Outstanding Securities - September 1968

During the month of September, trade in outstanding securities gave rise to a purchase balance of $\$ 42.9$ million, over 80 per cent higher than the $\$ 23.5$ million outflow recorded for August. Geographically, the largest part of the outflow moved to the United States at $\$ 39.2$ million with about a further $\$ 4.0$ million to the United Kingdom. A small net sales balance of $\$ 0.3$ million was recorded in trans actions with residents of other foreign countries. Transactions in outstanding Canadian securities in September led to a net inflow of $\$ 6.8 \mathrm{million}$, the fifth sales balance in the last six months.

A net purchase balance of $\$ 49.8$ milion was recorded from trading in outstanding foreign securities or more than double the $\$ 24.1$ million outflow for August. Transactions in United States comon and preference shares produced a net purchase balance of nearly $\$ 51.0$ million while transactions in other foreign equities gave rise to a net inflow of $\$ 1.9 \mathrm{millon}$.

## International short-term money market transactions(1)

International transactions in Canadian money market instruments and other short-term borrowings by finance companies (data for which are included only in the accompanying two statements), amounted to a $\$ 25$ million net outflow. Geographically there were outflows of $\$ 36 \mathrm{milli}$ on and $\$ 1$ million to the United States and other countries, respectively, while United Kingdom holdings of these instruments rose by $\$ 12$ million in the quarter.

During the first two months of the third quarter, long-term interest rates (as measured by the average yield of Government of Canada issues due or callable in 10 years or over) continued to pull back from the historically high peak of 7 per cent established in May of 1968 . However, they edged up slightly to 6.60 percent by the end of September to produce a small decline of 2 basis points for the quarter as a whole. Yields on comparable United States Government bonds remained lower by some 125 to 145 basis points throughout the period. Short-term interest rates in Canada as measured by yields on three month treasury bills tracing a similar pattern recorded a steep decline of 107 basis points over the first two months of the quarter to 5.47 per cent (Canadian quotation basis) the lowest rate since November 1967, and then rose to 5.70 per cent at the quarter end. The hedged yield differential between Canadian and United States treasury bills reversed from a small net advantage of 14 basis points In favour of Canadian bills to a relatively large advantage in favour of the United States instruments by the end of July which was reduced substantially to 38 basis points by the end of September.

International transactions in Canadian finance company paper (including that of financing subsidiaries of manufacturing and retail enterprises) led in the third quarter to a $\$ 37$ million net outflow. This was augmented by a $\$ 1$ million net outflow as a result of transactions in other finance company short-term obligations (which include borrowings from foreign banks and advances from parent companies). The corresponding second quarter figures were net outflows of $\$ 35$ million and $\$ 6$ million for finance company paper and other finance company short-term obligations respectively. In addition, there were other finance company transactions not identified separately which have been included with capital movements in long-term forms, notably new issues and retirements of Canadian securities. Taken in total, non-residents decreased their claims on these companies in the third quarter by about $\$ 50$ million.

International transactions in treasury bills led to an $\$ 11$ million inflow in the third quarter, the highest quarterly inflow since the first quarter of 1967. Net capital flows due to transactions in Canadian commercial paper (including bankers acceptances) produced a $\$ 3$ million inflow while nonresidents decreased their holdings of other short-term paper (including notes of banks, mortgage loan companies and provincial and municipal governments) by \$l million. Buy-back transactions based on Government of Canada securities again gave rise to no net capital movement in the quarter.
(1) Short-term securities are, for balance of payments purposes, those with an original term to maturity of one year or less.
