(I) Since subprovincial estimates are subject to wide margin of errors, the monthly estimates are averaged over a period of three months. The resulting series show less irregular movements, while preserving the underlying trend of the monthly series. A feature article on moving averages was published in the January 1991 issue of "The Labour Force", (catalogue 71-001). Puisque les estimations subprovinciales sont sujettes à de fortes marges d'erreurs, les estimations infra provinciales sont présentées sous forme de moyennes trimestrielles. La série obtenue contient moins d'observations irrégulières, tout en préservant la tendance sous-jacente de la série mensuelle. Un article portant sur les moyennes mobiles est paru dans le numéro de janvier 1991 de "La Population Active", (71-001 au catalogue).

(I) Since subprovincial estimates are subject to wide margin of errors, the monthly estimates are averaged over a period of three months. The resulting series show less irregular movements, while preserving the underlying trend of the monthly series. A feature article on moving averages was published in the January 1991 issue of 'The Labour Force', (catalogue 71-001). Puisque elles sont sujettes à de fortes marges d'erreurs, les estimations infraprovinciales sont présentées sous forme de moyennes trimestrielles. La série obtenue contient moins d'observations irrégulières, tout en préservant la tendance sous-jacente de la série mensuelle. Un article portant sur les moyennes mobiles est paru dans le numéro de janvier 1991 de 'La Population Active', (71-001 au catalogue).
