COMMENTARY

Employment edged down (-8,000) in August, the third consecutive month of small declines. This brings job losses since May to 35,000.

The small drop in employment combined with an increase in labour force participation pushed the unemployment rate up 0.2 percentage points in August to 7.2%.

Labour market continues to weaken for women and youths

Among adult women, full-time employment increased by 34,000 while part-time employment fell by 32,000, leaving overall employment almost unchanged. An increase in labour force participation pushed their unemployment rate up 0.2 percentage points to 6.2%. Employment among adult women is down 23,000 since May.

Employment among youths (15 to 24) was little changed in August but is down 27,000 since May. In August, their unemployment rate increased 0.3 percentage points to 12.7%.

While employment among adult men was also little changed in August, gains since May total 15,000. In August, their unemployment rate edged up 0.1 percentage points to 6.1%.

In August, full-time employment rose by 41,000 while part-time fell by 49,000. The increase in August brings full-time employment up 31,000 over the last three months. Over the same period, losses in part-time employment total 66,000.

Summer labour market for students similar to a year ago

From May to August, the Labour Force Survey collects data on young people aged 15 to 24 who were attending school full-time in March and intend to return to school full-time in the fall. The published estimates are not seasonally adjusted, therefore comparisons can only

COMMENTAIRE

L'emploi a diminué légèrement en août (- 8 000), un troisième mois consécutif de faible baisse. Cela porte les pertes depuis mai à 35 000 emplois.

La faible diminution de l'emploi ainsi qu'une augmentation de l'activité sur le marché du travail font en sorte que le taux de chômage a augmenté de 0,2 point pour s'établir à 7,2 %.

Le marché du travail continue de faiblir pour les femmes et les jeunes

Les femmes adultes comptaient 34 000 emplois à temps plein de plus qu'en juillet alors que le nombre d'emplois à temps partiel avaient chuté de 32 000, laissant ainsi l'emploi global pratiquement inchangé. Leur activité sur le marché du travail s'étant accrue, le taux de chômage a augmenté de 0,2 point pour se fixer à 6,2 %. Depuis mai, l'emploi chez les femmes adultes est en baisse de 23 000.

L'emploi chez les jeunes de 15 à 24 ans a peu bougé en août et est maintenant en baisse de 27 000 depuis mai. En août leur taux de chômage était de 12,7 % en hausse de 0,3 point.

Chez les hommes adultes, la situation de l'emploi a aussi peu changé en août. Ils affichaient cependant 15 000 emplois de plus qu'en mai. En août, leur taux de chômage a légèrement augmenté de 0,1 point à 6,1 %.

En août, l'emploi à temps plein a augmenté de 41 000 alors que l'emploi à temps partiel a diminué de 49 000. Grâce à cette accroissement, l'emploi à temps plein demeure en hausse de 31 000 au cours des trois derniers mois. L'emploi à temps partiel a fléchi de 66 000 au cours de la même période.

En été 2001, le marché du travail des étudiants s'apparente à ce qu'il était un an plus tôt

De mai à août, l'Enquête sur la population active identifie les jeunes âgés de 15 à 24 ans qui allaient à l'école à plein temps en mars et qui ont l'intention de retourner aux études à plein temps à l'automne. Les estimations publiées ne sont pas désaisonnalisées, et les comparaisons ne peuvent donc être

be made on a year-over-year basis. The labour market summary of students for the summer of 2001 is based on the average of three peak months for student employment, that is, June, July and August.

Overall, the summer labour market for students in 2001 was similar to the year before. This summer, the average employment rate, at 53.5%, was virtually unchanged (+ 0.1 percentage points) from the summer of 2000 and the unemployment rate remained at 13.6%. On average, the proportion of employed students with a full-time job was 47.1%, up slightly from a year ago (+0.3 percentage points).

Among students aged 20 to 24, the average employment rate increased slightly by 0.4 % to 70.0% while their unemployment rate fell 1.3 percentage points to 7.0%.

Among teenage students (15 to 19), the average employment rate edged up 0.2 percentage points to 47.5%. The average unemployment rate rose by 0.6 percentage points to 16.8% due to an increase in labour force participation.

Continued job losses in professional, scientific and technical services

Employment declines over the last three months were concentrated in service-producing industries with losses totalling 37,000. Employment in goods-producing industries was virtually unchanged over the same period.

In August, employment in professional, scientific and technical services fell by 18,000, the third decline in the last four months and brings losses over this period to 66,000. The drop in August was concentrated in architecture and engineering services.

Employment in trade fell by 21,000 in August following four consecutive monthly gains totalling 53,000. The decline was mostly in Quebec and Ontario.

Employment in health care and social assistance increased by 19,000 in August, offsetting most of the losses over the previous four months (-23,000).

Employment in public administration edged up 13,000 in August following a decrease of 17,000 in July. So far this year, employment in public administration has remained virtually unchanged.

Number of private sector employees edging down

The number of private sector employees declined by 21,000 in August, bringing losses over the last three months to 36,000. These recent declines leave gains since the start of the year at 79,000.

faites que d'une année à l'autre. Le sommaire du marché du travail pour les jeunes au cours de l'été 2001 est fondé sur la moyenne des trois mois de pointe en ce qui a trait à l'emploi des jeunes, soit les mois de juin, juillet et août.

Globalement, le marché des emplois d'été pour les étudiants en 2001 était similaire à ce qu'il était un an plus tôt. Cet été, le taux d'emploi moyen est demeuré presque inchangé par rapport à il y a un an à 53.5 % (+ 0.1 point) et le taux de chômage est resté inchangé à 13.6 %. En moyenne, la proportion des étudiants ayant un emploi à temps plein était de 47.1 %, légèrement en hausse par rapport à il y a un an (+ 0.3 point).

Chez les étudiants de 20 à 24 ans, le taux d'emploi moyen a légèrement augmenté à 70.0% (+ 0.4 point) alors que le taux de chômage a diminué de 1.3 point pour s'établir à 7.0 %.

Chez les adolescents (15 à 19 ans), le taux d'emploi moyen a augmenté de 0.2 point à 47.5 %. Le taux de chômage moyen a augmenté de 0.6 point à 16.8 % étant donné que l'activité sur le marché du travail était en hausse.

Autre recul de l'emploi dans les services professionnels, scientifiques et techniques

Les pertes d'emplois au cours des trois derniers mois se concentraient dans le secteur des services qui affiche un déclin de 37 000 emplois. Le secteur des biens, pour sa part, est demeuré presque inchangé au cours de la même période.

Une troisième baisse de l'emploi au cours des quatre derniers mois est survenue dans les services professionnels, scientifiques et techniques en août. La diminution d'août s'élevait à 18 000 et porte les pertes au cours des quatre derniers mois à 66 000. La perte en août était concentrée surtout dans les services d'architecture et de génie.

Après avoir connu quatre mois consécutifs de gains totalisant 53 000, l'emploi dans le commerce a accusé un recul de 21 000 en août. Cette diminution est survenue principalement au Québec et en Ontario.

L'emploi a augmenté de 19 000 en août dans le secteur des soins de santé et de l'assistance sociale. Le gain en août compense presque entièrement pour les pertes survenues au cours des quatre mois précédents (- 23 000).

L'emploi dans les administrations publiques a enregistré un gain de 13 000 en août après avoir baissé de 17 000 en juillet. Jusqu'à maintenant cette année, l'emploi dans les administrations publiques demeure presque inchangé.

Le nombre d'employés du secteur privé en légère baisse

Une baisse de 21 000 employés du secteur privé en août porte les pertes au cours des trois derniers mois à 36 000 emplois et fait en sorte que les gains jusqu'à maintenant cette année sont de 79 000.

The number of self-employed was unchanged in August. So far this year, self-employment has fallen by 55,000.

Despite a slight increase in August, the number of public sector employees is down 17,000 since the start of the year.

British Columbia and Ontario account for most of the recent job losses

In August, employment fell by 20,000 in British Columbia, bringing losses over the last three months to 39,000. The unemployment rate increased 0.7 percentage points in August to 7.9%.

In Ontario, employment was little changed as an increase in full-time (+24,000) was offset by a decline in part-time jobs. Since May, employment is down 17,000. An increase in the number of job seekers pushed the unemployment rate up from 6.3% in July to 6.6% in August.

Employment edged up by an estimated 10,000 in Quebec as an increase in full-time (+18,000) was accompanied by a decline in part-time jobs. An increase in labour force participation pushed the unemployment rate up 0.2 percentage points to 8.4%. Over the last three months, employment gains in the province total 13,000.

In Saskatchewan, employment increased by 4,000 in August, bringing gains over the last three months to 7,000. Prior to these recent gains, employment in the province had shown a downward trend since March 2000. In August, the unemployment rate fell 0.6 percentage points to 5.2%.

In Newfoundland, employment grew by 3,000 in August, partly offsetting the 6,000 drop observed in July. Employment in that province is up 9,000 since the start of the year. The increase in employment in August was accompanied by a rise in the number of persons looking for work, and as a result, the unemployment rate rose 0.3 percentage points to 15.9%.

Employment was little changed in other provinces in August.

En août, le nombre de travailleurs indépendants est resté inchangé par rapport au mois précédent. Depuis le début de l'année, le travail indépendant a décliné de 55 000.

Malgré une légère hausse en août, le nombre d'employés du secteur public demeure en baisse de 17 000 depuis le début de l'année.

Les récentes pertes d'emplois sont survenues principalement en Colombie-Britannique et en Ontario

En août, l'emploi a chuté de 20 000 en Colombie-Britannique, portant les pertes depuis les trois derniers mois à 39 000. Le taux de chômage a augmenté de 0.7 point en août, pour atteindre 7.9%.

L'emploi a peu bougé en Ontario alors qu'une hausse du travail à temps plein (+ 24 000) était accompagnée d'un déclin dans le temps partiel. Depuis mai, l'Ontario a subi des pertes d'emplois s'élevant à 17 000. Une hausse du nombre de chercheurs d'emploi a fait passer le taux de chômage de 6.3 % à 6.6 % en août.

Au Québec, l'emploi a connu une légère hausse estimée à 10 000 alors qu'une augmentation de l'emploi à temps plein (+ 18 000) était accompagnée d'un déclin du travail à temps partiel. Une augmentation de l'activité sur le marché du travail a fait hausser le taux de chômage de 0.2 point pour le porter à 8.4 %. Au cours de trois derniers mois, l'emploi affiche une hausse de 13 000 au Québec.

La Saskatchewan a connu un accroissement de 4 000 emplois en août, portant les gains au cours des trois derniers mois à 7 000. Avant ces récents gains, l'emploi dans cette province affichait une tendance à la baisse depuis mars 2000. Le taux de chômage est passé à 5.2 % en août, en baisse de 0.6 point.

En août, l'emploi s'est accru de 3 000 à Terre-Neuve, annulant en partie le fléchissement de 6 000 observé en juillet. L'emploi dans la province est en hausse de 9 000 par rapport au niveau où il était au début de l'année. La hausse de l'emploi en août était accompagnée d'une augmentation du nombre de personnes qui se cherchaient un emploi, faisant en sorte que le taux de chômage a augmenté de 0.3 point pour se fixer à 15.9 %.

L'emploi a peu varié dans les autres provinces en août.

Notes to readers

1. The 2000 Labour force historical review on CD-ROM

This annual product is a comprehensive database of Labour Force Survey estimates, containing thousands of cross-classified data series and spanning more than two decades from 1976 to 2000. Monthly and annual average series are available on a wide range of subjects, including labour force status by demographic, education and family characteristics, trends in the labour markets of metropolitan areas, economic regions, industry and occupation estimates and much more.

The 2000 *Labour force historical review* (71F0004XCB, \$195) is available. LAN and bulk prices are available on request. For more information, contact Marc Lévesque (613-951-2793), or refer to Statistics Canada's Web site www.statcan.ca/english/ads/71F0004XCB/index.htm. To order this edition, contact your nearest Statistics Canada Regional Reference Centre or e-mail to order@statcan.ca.

2. Occupational coding

Harmonization with Census occupation concepts has affected the comparability of current LFS occupation data through time. The change was phased in January 1999 to June 1999. The management group was most affected, with a portion of those formerly classified as managers now most likely coded to business, finance and administrative and sales and service occupations.

3. Labour Force Survey Products and Services, 2000-2001

Labour Force Survey Products and Services, 2000-2001 is a catalogue which describes all Labour Force Survey products and services offered on a monthly, annual and occasional basis. For a paper or electronic copy, please contact Jacques Ouellet at (613) 951-4168; e-mail jacques.ouellet@statcan.ca or by fax at (613) 951-2869.

4. Access information from the Internet

Commentary and key Labour Force Survey estimates are available at 7 a.m. on the Internet. Check us out at www.statcan.ca, select "The Daily".

This full publication is also available in electronic format on the Statistics Canada website. It is accessible by 7 a.m. the day of release. The catalogue number is

Notes aux lecteurs

1. Le CD-ROM 2000 de la Revue chronologique de la population active

Ce produit annuel constitue une base de données détaillée contenant les estimations de l'Enquête sur la population active, offrant des milliers de séries croisées portant sur plus de deux décennies (1976 à 2000). Les séries mensuelles et annuelles portent sur un éventail de sujets, incluant l'activité sur le marché du travail selon les caractéristiques démographiques, le niveau de scolarité et les caractéristiques familiales, les tendances sur le marché du travail des régions métropolitaines et des régions économiques, des estimations selon les industries et les professions et encore davantage.

Le CD-ROM de la *Revue chronologique de la population active, 2000* (71F0004XCB, 195 \$) est en vente. Des prix de réseau et de gros sont disponibles sur demande. Pour plus de renseignements, communiquez avec Marc Lévesque au (613) 951-2793 ou consultez le site Web de Statistique Canada : www.statcan.ca/francais/ads/71F0004XCB/index_f.htm. Pour commander cette nouvelle édition, communiquez avec votre centre de consultation régional de Statistique Canada ou commandez simplement par courrier électronique (order@statcan.ca).

2. Codification des professions

L'harmonisation aux concepts des professions du Recensement a affecté la comparabilité dans le temps des données courantes selon la profession de l'EPA. Ce changement a été implanté de janvier 1999 à juin 1999. Le groupe de la «gestion» a été le plus touché, alors qu'une portion des travailleurs auparavant classés dans la gestion sont maintenant codés le plus vraisemblablement dans les catégories «affaires, finance et administration» et «ventes et services».

3. Produits et services de l'Enquête sur la population active, 2000-2001

«Produits et services de l'Enquête sur la population active, 2000-2001» est un catalogue qui décrit brièvement les produits de l'Enquête sur la population active offerts une fois par mois, une fois par année ou à l'occasion. Pour une copie papier ou électronique, communiquer avec Jacques Ouellet au (613) 951-4168; courriel jacques.ouellet@statcan.ca ou par télécopieur au (613) 951-2869.

4. Ayez accès à l'information sur l'Internet

Le commentaire et les estimations clés de l'enquête sur la population active sont disponibles à 7 h sur Internet. Venez nous visiter à l'adresse www.statcan.ca sous la rubrique «Le Quotidien».

Cette publication est maintenant disponible en format électronique sur le site web de Statistique Canada. Elle est accessible à 7 h le jour même de la diffusion. Le numéro de catalogue est

71-001-PIB and can be retrieved from www.statcan.ca, select "Products and Services, Downloadable Publications (\$)", and then "Labour".

Note of Appreciation

The staff of the Labour Force Survey wish to acknowledge the valuable contributions made by Jean-Marc Lévesque and Roy Généreux during their long careers with the LFS in Ottawa. We wish them the best of luck during their retirements.

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Les employés de l'Enquête sur la population active expriment leur reconnaissance à Jean-Marc Lévesque et Roy Généreux durant leurs longues carrières avec l'EPA à Ottawa. Nous les souhaitons bonne chance dans leurs retraites.

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

¹ These unemployment rates have been determined using a transition formula prescribed in the EI Regulations. For further information, see: <http://www.hrdc-dhrc.gc.ca/common/news/insur/00-61.shtml> for Bas-St-Laurent/Côte-Nord or <http://www.hrdc-dhrc.gc.ca/common/news/insur/00-62.shtml> for Madawaska-Charlotte.

² Ces taux de chômage sont déterminés en utilisant une formule de transition prescrite dans les Règlements sur l'Assurance-emploi. Pour plus d'information, voir : <http://www.hrdc-dhrc.gc.ca/common/news/insur/00-61.shtml> pour Bas-St-Laurent/Côte-Nord ou <http://www.hrdc-dhrc.gc.ca/common/news/insur/00-62.shtml> pour Madawaska-Charlotte.

* Since the Labour Force Survey is not conducted in the Yukon, Northwest Territories and Nunavut, the rate for regions 56, 57 and 58 is provided by Human Resources Development Canada and not by Statistics Canada.

¹ L'enquête n'étant pas menée au Yukon, dans les Territoires du Nord-Ouest et au Nunavut, le taux pour les régions 56, 57 et 58 est fourni par Développement des ressources humaines Canada et non par Statistique Canada.

Note : For geographic descriptions and maps of Employment Insurance Regions, see the Human Resources Development Canada website: http://www.hrdc-dhrc.gc.ca/ae-ei/reg-econ/5.1_e.shtml.

Note : Pour les cartes des Régions du régime d'assurance-emploi, voir le site web de Développement de ressources humaines Canada : http://www.hrdc-dhrc.gc.ca/ae-ei/reg-econ/5.1_f.shtml.

¹ Students are persons aged 15-24 who attended school full-time in March and who are planning to return to school in the fall.

Other persons are all other youths aged 15-24 who are not included in the student population.

Les étudiants sont les personnes âgées de 15 à 24 ans qui fréquentaient l'école à plein temps en mars et qui ont l'intention de retourner à l'école à l'automne.

Les autres personnes sont les jeunes de 15 à 24 ans qui ne sont pas inclus dans la population étudiante.

About the Labour Force Survey

The statistics contained in this report are based on information obtained through a sample survey of 52,000 representative households across the country. The Labour Force Survey, started in November 1945, was taken at quarterly intervals until November 1952. It has been carried out monthly since then. The information generated by the survey has expanded considerably over the years with a major redesign of the survey content in 1976 and again in 1997, and provides a rich and detailed picture of the Canadian labour market. Details of these changes are available on request from the Labour Force Survey Program, Statistics Canada, Ottawa, K1A 0T6.

The sample used in the Labour Force Survey has been designed to represent all persons in the population 15 years of age and over residing in the provinces of Canada, with the exception of the following: persons living on Indian reserves, full-time members of the armed forces and people living in institutions (for example, inmates of penal institutions and patients in hospitals or nursing homes who have resided in the institution for more than 6 months). Monthly estimates of employment, unemployment and persons not in the labour force refer to the specific week covered by the survey each month, normally the week containing the 15th day.

For detailed information on the LFS data collection, methodology and content see the document *Guide to the Labour Force Survey* (Catalogue no. 71-543-GIE) on the Statistics Canada web site at www.statcan.ca/english/concepts/labour/index.htm.

Definitions and Explanations

The **labour force** is composed of those members of the civilian non-institutional population 15 years of age and over who, during the reference week, were employed or unemployed.

Employed persons are those who, during the reference week:

- a) did any work at all
- b) had a job but were not at work

A person is considered to be **full-time** if his/her usual hours at the main job are greater than 29 hours per week. When the number of hours worked at the main job is usually less than 30 hours per week then he/she is considered to be **part-time**.

Unemployed persons are those who, during the reference week:

- a) were without work, had actively looked for work in the past four weeks (ending with reference week), and were available for work;
- b) had not actively looked for work in the past four weeks but were on temporary layoff and were available for work;
- c) had not actively looked for work in the past four weeks but had a new job to start in four weeks or less from the reference week, and were available for work.

Persons in the civilian non-institutional population 15 years of age and over who, during the reference week, were neither employed nor unemployed are classified as **not in the labour force**.

À propos de l'Enquête sur la population active

Les statistiques publiées ici sont fondées sur une enquête mensuelle menée auprès d'environ 52 000 ménages représentatifs d'un bout à l'autre du Canada. L'enquête sur la population active, lancée en novembre 1945, a eu lieu tous les trois mois jusqu'à novembre 1952. Depuis lors, elle a lieu tous les mois. L'information générée par l'enquête s'est considérablement accrue au cours des années grâce à un remaniement majeur de l'enquête en 1976, suivi d'un autre en 1997, et fournit une image riche et détaillée du marché du travail canadien. On peut obtenir des détails sur ces changements en s'adressant au Programme de l'enquête sur la population active, Statistique Canada, Ottawa, K1A 0T6.

L'échantillon retenu aux fins de l'enquête sur la population active représente toutes les personnes de 15 ans et plus résidant dans les provinces du Canada, à l'exception des personnes vivant dans des réserves indiennes, des membres à plein temps des Forces armées et des pensionnaires d'institutions (par exemple les détenus de prison et les malades séjournant à l'hôpital ou dans une maison de repos pour plus de 6 mois). Les estimations mensuelles de l'emploi, du chômage et des inactifs se rapportent à une semaine bien précise chaque mois, soit normalement celle où tombe le quinzième jour du mois.

Des renseignements détaillés sur la collecte de données, la méthodologie et le contenu de l'EPA sont contenus dans le document *Guide de l'Enquête sur la population active* (n° 71-534-GIF au catalogue) dans le site web de Statistique Canada www.statcan.ca/freIGHTS/concepts/labour/index.htm.

Définitions et explications

La **population active** comprend les membres de la population civile hors institution âgés de 15 ans et plus qui avaient un emploi (personnes occupées) ou étaient en chômage pendant la semaine de référence.

Les **personnes occupées** sont celles qui, au cours de la semaine de référence:

- a) ont fait un travail quelconque
- b) avaient un emploi mais n'étaient pas au travail

Une personne est considérée à **temps plein** si elle travaille habituellement plus de 29 heures par semaine à son emploi principal. Une personne est considérée à **temps partiel** si elle travaille habituellement moins de 30 heures par semaine à son emploi principal.

Les **chômeurs** sont les personnes qui, au cours de la semaine de référence:

- a) étaient sans emploi, avaient activement cherché du travail au cours des quatre dernières semaines (y compris la semaine de référence) et étaient prêts à travailler;
- b) n'avaient pas activement cherché de travail au cours des quatre dernières semaines, mais étaient temporairement mises à pied et étaient prêtes à travailler;
- c) n'avaient pas activement cherché de travail au cours des quatre dernières semaines, mais devaient commencer un nouvel emploi dans quatre semaines ou moins à compter de la semaine de référence, et étaient prêtes à travailler.

La partie de la population civile hors institution âgée de 15 ans et plus qui était ni occupée ni en chômage pendant la semaine de référence est classée comme **inactive**.

The **unemployment rate** represents the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.

The **participation rate** represents the labour force expressed as a percentage of the population 15 years of age and over. The participation rate for a particular group (age, sex, etc.) is the labour force in that group expressed as a percentage of the population for that group.

The **employment rate (formerly the employment/population ratio)** represents the number of persons employed expressed as a percentage of the population 15 years of age and over. The employment rate for a particular group (age, sex, etc.) is the number employed in that group expressed as a percentage of the population for that group.

The **part-time rate** represents the number of persons employed part-time expressed as a percentage of the employed. The part-time rate for a particular group (age, sex, etc.) is the number employed part-time in that group expressed as a percentage of the employed for that group.

Seasonal Adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. The seasonally adjusted series contains irregular as well as longer-term cyclical fluctuations.

The seasonally adjusted series are revised each year to take into account current data and to generate new forecast factors for the next twelve months. The data are therefore subject to slight revisions in future issues of this publication.

Sampling Error

Estimates in this publication are based on the Labour Force Survey, a monthly survey of 52,000 households across Canada. Because they are based on a sample survey, the estimates are subject to sampling error. Changes in the level of any estimates between two months can be the result of a true change or sampling variability. In most tables in this publication an indicator of the sampling error is provided. Two thirds of the time, a change greater than the sampling error indicates a real change. Movements in estimates that are smaller than the sampling error are less likely to reflect a real change and more likely to be due to sampling variability. While the above is true for monthly movements, one can have more confidence in a series of consecutive movements in the same direction, even though some of the monthly movements may be smaller than the sampling error.

For comprehensive information on Labour Force Survey methodology, see the publication *Methodology of the Canadian Labour Force Survey*, catalogue no. 71-526-XPB.

Le **taux de chômage** représente le nombre de chômeurs exprimé en pourcentage de la population active. Le taux de chômage d'un groupe particulier (âge, sexe, etc.) est le nombre de chômeurs dans ce groupe, exprimé en pourcentage de la population active dans le même groupe.

Le **taux d'activité** représente la population active exprimée en pourcentage de la population de 15 ans et plus. Le taux d'activité d'un groupe particulier (âge, sexe, etc.) est la population active dans ce groupe exprimée en pourcentage de la population dans le même groupe.

Le **taux d'emploi (antérieurement nommé rapport emploi-population)** représente le nombre de personnes occupées exprimé en pourcentage de la population de 15 ans et plus. Le taux d'emploi d'un groupe particulier (âge, sexe, etc.) est le nombre de personnes occupées dans ce groupe, exprimé en pourcentage de la population dans le même groupe.

Le **taux de temps partiel** représente le nombre de personnes occupées à temps partiel exprimé en pourcentage du nombre de personnes occupées. Le taux de temps partiel d'un groupe particulier (âge, sexe, etc.) est le nombre de personnes occupées à temps partiel dans ce groupe, exprimé en pourcentage du nombre de personnes occupées dans le même groupe.

Désaisonnalisation

Les fluctuations des séries chronologiques économiques sont causées par des mouvements saisonniers, cycliques et irréguliers. Une série désaisonnalisée est une série dont on a éliminé les effets des mouvements saisonniers. Ces derniers sont causés par des événements annuels réguliers comme les changements de température, les vacances, les cycles agricoles, de productions et de ventes au détail durant la période de Noël et de Pâques. La série désaisonnalisée contient à la fois des fluctuations irrégulières et des fluctuations cycliques à long terme.

Les données désaisonnalisées sont révisées chaque année afin de tenir compte des données courantes et produire des coefficients d'extrapolation prospective pour les 12 prochains mois. Les données d'extrapolation prospective seront l'objet de légères révisions dans les éditions ultérieures de la présente publication.

Erreur d'échantillonnage

Les estimations contenues dans cette publication sont basées sur l'Enquête sur la population active, une enquête mensuelle de 52 000 ménages à travers le Canada. Étant donné qu'elles reposent sur une enquête par échantillon, ces estimations sont sujettes à des erreurs d'échantillonnage. Le changement dans le niveau d'une estimation entre deux mois peut donc être le résultat d'un changement réel ou d'une variation d'échantillonnage. Un indicateur de l'erreur d'échantillonnage est inclus dans la plupart des tableaux de cette publication. Deux fois sur trois, un changement plus grand que l'erreur d'échantillonnage indique un changement réel. Des variations moins élevées que l'erreur d'échantillonnage sont moins susceptibles de montrer des changements réels que des variations dues à l'échantillonnage. On peut avoir davantage confiance dans un ensemble de mouvements consécutifs dans la même direction, même si certains de ces mouvements sont plus petits que l'erreur d'échantillonnage.

Pour des renseignements plus complets sur la méthodologie de l'Enquête sur la Population Active, voir la publication *Méthodologie de l'enquête sur la population active*, n° 71-526-XPB au catalogue.
