Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Highlights

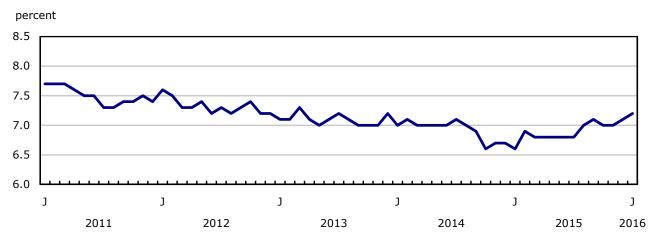

Employment was virtually unchanged in January (-5,700 or 0.0%) and the unemployment rate edged up to 7.2%. Chart 1

Employment and unemployment rate, Canada, seasonally adjusted

Employment

Unemployment rate

Analysis — January 2016

Employment was virtually unchanged in January (-5,700 or 0.0%) and the unemployment rate edged up to 7.2%.

In the 12 months to January, employment increased by 0.7% (+126,000). Over the same period, the unemployment rate increased from 6.6% to 7.2%, as the labour force grew at a faster pace than employment.

There was little change in both full-time and part-time employment in January. However, compared with 12 months earlier, full-time work increased by 172,000 (+1.2%) while part time was little changed. Over the same period, the number of hours worked increased by 1.2%.

In January, there were fewer employed people aged 55 and older. At the same time, employment increased among women aged 25 to 54.

There were fewer people working in Alberta, Manitoba as well as Newfoundland and Labrador in January. On the other hand, Ontario was the only province with an employment increase.

Employment declined in agriculture; manufacturing; transportation and warehousing; and in public administration. However, there were more people working in information, culture and recreation as well as in the 'other services' industry.

In January, there was little employment change among public and private sector employees and in the number of self-employed workers.

Fewer people aged 55 and older employed

There were 24,000 fewer people aged 55 and older working in January, the first decline since November 2008, and their unemployment rate rose 0.3 percentage points to 6.1%. Despite the monthly decline, employment for this age group grew by 4.8% (+170,000) in the 12 months to January. Over the same period, the population of people aged 55 and over increased by 3.1% (+310,000).

In January, employment rose by 23,000 among women aged 25 to 54. Their unemployment rate was little changed at 5.6% in January as there was an increase in their labour market participation.

For men aged 25 to 54, employment was little changed on both a month-to-month and a year-over-year basis. However, their unemployment rate increased 1.0 percentage point to 6.7% in the 12 months to January, as more of them searched for work.

For youths aged 15 to 24, employment was virtually unchanged and their unemployment rate remained at 13.0%. However, in the 12 months to January, youth employment fell 48,000, while their population declined by 44,000.

Employment down in Alberta, up in Ontario

Employment in Alberta decreased by 10,000 in January. This brought year-over-year declines to 35,000 (-1.5%), as losses in full-time work (-73,000) were partly offset by gains in part time (+38,000). The employment decrease in January raised the unemployment rate for the province to 7.4%, the highest since February 1996. The unemployment rate in Alberta was higher than the national rate for the first time since December 1988 (see Chart 8).

In Manitoba, employment decreased by 5,300 in January, the second decline in three months. With these recent losses, employment in the province was down 1.0% (-6,600) compared with January 2015. At 6.1% in January, the unemployment rate was little changed from the previous month, as fewer people participated in the labour market.

Employment in Newfoundland and Labrador fell by 2,400 in January, continuing a recent downward trend that began in autumn 2015. In the 12 months to January, employment losses in the province totalled 7,400 (-3.1%). The unemployment rate was unchanged in January at 14.4% as fewer people participated in the labour market.

For a second month, Ontario was the only province with employment growth, up 20,000 in January. However, the unemployment rate was unchanged at 6.7% as more people participated in the labour market. In the 12 months to January, employment in the province increased by 100,000 (+1.5%).

In Quebec, employment was little changed for the sixth consecutive month in January, and was up slightly on a year-over-year basis (+31,000). The number of people looking for work edged down in January, lowering the unemployment rate 0.3 percentage points to 7.6%.

Industry perspective

Employment in agriculture fell for a second month, down 14,000 in January, following a notable increase in November 2015. On a year-over-year basis, losses totalled 19,000 (-6.2%).

In January, there were 11,000 fewer people working in manufacturing, the result of a large decline in Alberta. At the national level, employment in manufacturing was little changed over the 12 months to January.

Employment in transportation and warehousing declined by 10,000 in January but was little changed from 12 months earlier.

In January, employment decreased by 7,200 in public administration, mostly in provincial public administration. On a year-over-year basis, there was little change in employment in public administration.

Employment in information, culture and recreation rose by 16,000 in January, but was little changed compared with January 2015.

In January, there were 9.600 more people employed in 'other services', such as personal and laundry services as well as repair and maintenance. On a year-over-year basis, employment in this industry was virtually unchanged.

Despite little employment change in natural resources for the month, declines in the industry totalled 13,000 (-3.6%) in the 12 months to January, driven by losses in Alberta.

Employment was little changed in January among public and private sector employees, as well as for self-employed workers.

Compared with January 2015, the number of public sector employees increased by 59,000 (+1.7%), driven by gains in health care and social assistance. Over the same period, there was little change in the number of private sector employees and self-employed workers.

Annual revision

A standard revision has been applied to Labour Force Survey (LFS) estimates, as announced in *The Daily* on January 26th and 27th.

Seasonally adjusted estimates from the LFS were revised back to January 2013 using the latest seasonal factors.

Occupation data estimates have been reclassified to the 2011 National Occupational Classification from the 2006 National Occupational Classification for Statistics.

New CANSIM tables have been created for all occupation-related series and are available from the start of each respective series. A list of the *occupation tables* is available.

At the same time, the North American Industry Classification System (NAICS) 2012 replaced the NAICS 2007. This change did not affect the LFS CANSIM tables as there were only minor changes at the four-digit level.

Note to readers

The LFS estimates for January are for the week of January 10 to 16.

The LFS estimates are based on a sample and are therefore subject to sampling variability. As a result, monthly estimates will show more variability than trends observed over longer time periods. For more information, see *Interpreting Monthly Changes in Employment from the Labour Force Survey*. Estimates for smaller geographic areas or industries also have more variability. For an explanation of sampling variability of estimates and how to use standard errors to assess this variability, consult the "Data quality" section of the publication *Labour Force Information* (71-001-X).

This analysis focuses on differences between estimates that are statistically significant at the 68% confidence level.

The **employment rate** is the number of employed persons as a percentage of the population 15 years of age and over. The rate for a particular group (for example, youths aged 15 to 24) is the number employed in that group as a percentage of the population for that group.

The unemployment rate is the number of unemployed as a percentage of the labour force (employed and unemployed).

The participation rate is the number of employed and unemployed as a percentage of the population.

For more detailed information, see the Guide to the Labour Force Survey (71-543-G).

Seasonal adjustment

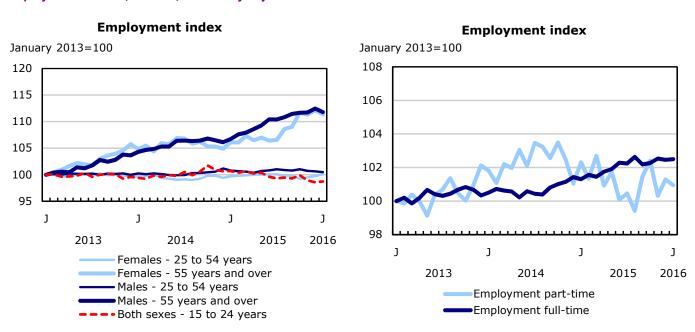

Unless otherwise stated, this release presents seasonally adjusted estimates, which facilitates comparisons by removing the effects of seasonal variations. For more information on seasonal adjustment, see *Seasonally adjusted data – Frequently asked questions*.

Chart 1 shows trend-cycle data on employment. These data represent a smoothed version of the seasonally adjusted time series, which provide information on longer-term movements, including changes in direction underlying the series. These data are available in CANSIM table 282-0087 for the Canada-level employment series. For more information, see the StatCan Blog and Trend-cycle estimates – Frequently asked questions.

Next release

The next release of the LFS will be on March 11.

282-0145	Labour force survey estimates (LFS), by actual hours worked, National Occupational Classification (NOC) and sex, unadjusted for seasonality, monthly
282-0146	Labour force survey estimates (LFS), by actual hours worked, National Occupational Classification (NOC) and sex, annual
282-0147	Labour force survey estimates (LFS), multiple jobholders by National Occupational Classification (NOC), sex and age group, unadjusted for seasonality, monthly
282-0148	Labour force survey estimates (LFS), multiple jobholders by National Occupational Classification (NOC), sex and age group, annual
282-0149	Labour force survey estimates (LFS), job tenure by National Occupational Classification (NOC) and sex, unadjusted for seasonality, monthly
282-0150	Labour force survey estimates (LFS), job tenure by National Occupational Classification (NOC) and sex, annual
282-0151	Labour force survey estimates (LFS), wages of employees by type of work, National Occupational Classification (NOC), sex, and age group, unadjusted for seasonality, monthly
282-0152	Labour force survey estimates (LFS), wages of employees by type of work, National Occupational Classification (NOC), sex, and age group, annual
282-0153	Labour force survey estimates (LFS), employees working overtime (weekly) by National Occupational Classification (NOC), sex and age group, unadjusted for seasonality, monthly
282-0154	Labour force survey estimates (LFS), employees working overtime (weekly) by National Occupational Classification (NOC), sex and age group, annual

282-0155	Labour force survey estimates (LFS), employment by National Occupational Classification (NOC), seasonally adjusted, monthly
282-0156	Labour force survey estimates (LFS), employment by economic region based on 2011 Census boundaries and National Occupational Classification (NOC), three-month moving average, unadjusted for seasonality, monthly
282-0157	Labour force survey estimates (LFS), employment by economic region based on 2011 Census boundaries and National Occupational Classification (NOC), annual
282-0158	Labour force survey estimates (LFS), employment by census metropolitan area based on 2011 Census boundaries and National Occupational Classification (NOC), three-month moving average, unadjusted for seasonality, monthly
282-0159	Labour force survey estimates (LFS), employment by census metropolitan area based on 2011 Census boundaries and National Occupational Classification (NOC), annual
282-0160	Labour force survey estimates (LFS), weekly wage distributions of employees by type of work, National Occupational Classification (NOC) and sex, unadjusted for seasonality, monthly
282-0161	Labour force survey estimates (LFS), weekly wage distributions of employees by type of work, National Occupational Classification (NOC) and sex, annual
282-0162	Labour force survey estimates (LFS), hourly wage distribution of employees by type of work, National Occupational Classification (NOC) and sex, unadjusted for seasonality, monthly
282-0163	Labour force survey estimates (LFS), hourly wage distribution of employees by type of work, National Occupational Classification (NOC) and sex, annual
282-0164	Labour force survey estimates (LFS), employees by union status and National Occupational Classification (NOC), Canada, annual
282-0165	Labour force survey estimates (LFS), employment by Aboriginal group, National Occupational Classification (NOC), sex and age group, annual
282-0166	Labour force survey estimates (LFS), employment by Aboriginal group, National Occupational Classification (NOC) and age group, Canada, selected provinces and regions, annual
282-0167	Labour force survey estimates (LFS), average usual hours and wages of employees by age group, sex, union coverage, job permanency, and National Occupational Classification (NOC), unadjusted for seasonality, monthly
282-0200	Labour force survey estimates (LFS), weekly wage distributions of employees by type of work, North American Industry Classification System (NAICS), and sex, unadjusted for seasonality, monthly
282-0201	Labour force survey estimates (LFS), weekly wage distributions of employees by type of work, North American Industry Classification System (NAICS), and sex, annual
282-0204	Labour force survey estimates (LFS), hourly wage distributions of employees by type of work, North American Industry Classification System (NAICS), and sex, unadjusted for seasonality, monthly
282-0205	Labour force survey estimates (LFS), hourly wage distributions of employees by type of work, North American Industry Classification System (NAICS), and sex, annual

282-0208	Labour force survey estimates (LFS), by educational degree, sex and age group, unadjusted for seasonality, monthly
282-0209	Labour force survey estimates (LFS), by educational degree, sex and age group, annual
282-0210	Labour force survey estimates (LFS), by family type and family age composition, unadjusted for seasonality, monthly
282-0211	Labour force survey estimates (LFS), by family type and family age composition, annual
282-0212	Labour force survey estimates (LFS), hours lost by employees by reason of absence, full and part week and sex, unadjusted for seasonality, monthly
282-0213	Labour force survey estimates (LFS), hours lost by employees by reason of absence, full and part week and sex, annual
282-0214	Labour force survey estimates (LFS), activity prior to unemployment by sex and age group, unadjusted for seasonality, monthly
282-0215	Labour force survey estimates (LFS), activity prior to unemployment, by sex and age group, annual
282-0216	Labour force survey estimates (LFS), reason for leaving job during previous year by sex and age group, unadjusted for seasonality, monthly
282-0217	Labour force survey estimates (LFS), reason for leaving job during previous year by sex and age group, annual
282-0218	Labour force survey estimates (LFS), reason for not looking for work, by sex and age group, unadjusted for seasonality, monthly
282-0219	Labour force survey estimates (LFS), reason for not looking for work, by sex and age group, annual
282-0220	Labour Force Survey estimates (LFS), employees by union status, sex and age group, Canada and provinces, annual
282-0221	Labour Force Survey estimates (LFS), employees by union status, sex, age group and education level, Canada, annual
282-0223	Labour Force Survey estimates (LFS), employees by union status, North American Industry Classification System (NAICS) and sex, Canada, annual
282-0224	Labour Force Survey estimates (LFS), employees by union status, establishment size, job tenure, type of work and job permanency, Canada, annual
282-0225	Labour Force Survey estimates (LFS), average weekly earnings, average hourly wage rate and average usual weekly hours by union status and type of work, Canada and provinces, annual
282-0226	Labour force survey estimates (LFS), by Aboriginal group, sex and age group, Canada, selected provinces and regions, annual
282-0227	Labour force survey estimates (LFS), by detailed Aboriginal group, sex and age group, Canada and selected regions, annual

282-0228	Labour force survey estimates (LFS), by Aboriginal group, educational attainment and age group, Canada and selected regions, annual
282-0229	Labour force survey estimates (LFS), employment by Aboriginal group, North American Industry Classification System (NAICS), sex and age group, annual
282-0230	Labour force survey estimates (LFS), employment by Aboriginal group, North American Industry Classification System (NAICS) and age group, Canada and selected regions, annual
282-0233	Labour force survey estimates (LFS), average hourly and weekly wages and average usual weekly hours by Aboriginal group and age group, Canada, selected provinces and regions, annual

Selected surveys from Statistics Canada

Labour Force Survey

Selected summary tables from Statistics Canada

- Average hourly wages of employees by selected characteristics and occupation, unadjusted data, by province (monthly)
- Days lost per worker by industry and sex
- · People employed, by educational attainment
- Reasons for part-time work by sex and age group
- Self-employment, historical summary
- Employment by age, sex, type of work, class of worker and province (monthly)
- Actual hours worked per week by industry, seasonally adjusted (monthly)
- Labour force characteristics, unadjusted, by territory (3 month moving average)
- Employment by industry and sex
- Full-time and part-time employment by sex and age group
- Labour force characteristics by age and sex
- Labour force characteristics by immigrant status of population aged 25 to 54, and by educational attainment
- Labour force characteristics by immigrant status, by detailed age group
- Labour force characteristics by immigrant status of population aged 25 to 54, by country of birth
- Days lost per worker due to illness or disability, by sex, by province

- Employment by industry
- Labour force characteristics, seasonally adjusted, by province (monthly)
- Labour force characteristics, unadjusted, by province (monthly)
- · Labour force, employment and unemployment, levels and rates, by province
- Economic indicators, by province and territory (monthly and quarterly)
- Days lost per worker by reason, by provinces
- Labour force characteristics, seasonally adjusted, by census metropolitan area (3 month moving average)
- Labour force characteristics, unadjusted, by economic region (3 month moving average)
- Distribution of employed people, by industry, by province
- Employment by major industry group, seasonally adjusted, by province (monthly)
- Labour force characteristics
- Labour force characteristics, unadjusted, by census metropolitan area (3 month moving average)
- Labour force characteristics, population 15 years and older, by census metropolitan area
- Labour force characteristics, population 15 years and older, by economic region, by province
- Canada: Economic and financial data
- Labour force characteristics by sex and age group
- Labour force characteristics by immigrant status of population aged 25 to 54, by province
- Latest statistics (monthly)

- 1. Average standard error of change in two consecutive months (see "Sampling Errors" in Data Quality for further explanations).
- 2. Since 1992, the Labour force survey (LFS) has been conducted in the Yukon, using an alternative methodology that accommodates some of the operational difficulties inherent to remote locales. These estimates are not included in the national totals. In 1995, the LFS in the Yukon underwent a sample redesign. One result of the redesign was that the covered population increased from 85% to 92%, which is reflected by the sharp increase in the three month moving averages estimates of January, February and March of 1995 for all the level estimates. Users are therefore warned to be cautious when comparing estimates before January 1995 to estimates for January 1995 and forward.
- 3. Since 2001, the Labour force survey (LFS) has been administered in the Northwest Territories, using an alternative methodology that accommodates some of the operational difficulties inherent to remote locales. These estimates are not included in national totals.
- 4. Since 2004, the Labour force survey (LFS) has been administered in Nunavut, using an alternative methodology that accommodates some of the operational difficulties inherent to remote locales. These estimates are 3-month moving averages and are not included in national totals. From January 2004 to December 2007, estimates represent about 70% of all Nunavut residents aged 15 and over. Starting in January 2008, coverage was extended to 92%, so that by March 2008, the 3-month moving average is completely based on the extended coverage. Because of the large difference in coverage, users are recommended not to compare estimates prior to January 2008 with data afterwards. The January and February 2008 3-month moving average estimates are based on a mix of both coverages, since the extended coverage was introduced in January 2008. Estimates from January 2004 to December 2007 are based on the 10 largest communities in Nunavut: Iqaluit, Rankin Inlet, Cambridge Bay, Kugluktuk, Baker Lake, Arviat, Pond Inlet, Cape Dorset, Pangnirtung, Igloolik. Estimates from March 2008 to present cover the above communities as well as: Taloyoak, Gjoa Haven, Kugaaruk, Coral Harbour, Repulse Bay, Qikiqtarjuaq, Arctic Bay, Hall Beach, Clyde River.

^{1.} The boundaries of these regions are determined by Employment and Social Development Canada (ESDC). For geographic descriptions and maps of employment insurance regions, see the ESDC website: http://srv129.services.gc.ca/eiregions/en/geocont.aspx.

Note(s): All regions are based on the 1996 Census boundaries, with the exception of those in Prince Edward Island and in the territories, which respect the 2011 Census boundaries.

This region excludes St. John's.

^{3.} Prince Edward Island as well as the territories are each comprised of two regions effective October 12, 2014.

This region excludes Charlottetown.

^{5.} The monthly regional unemployment rates for EI purposes in the territories are subject to the greater of a seasonally adjusted 3 month moving average or 12 month moving average.

^{6.} This region excludes Whitehorse.

^{7.} This region excludes Yellowknife.

This region excludes Iqaluit.

Data quality

Definitions and explanations

The **labour force** is composed of those members of the civilian non-institutional population 15 years of age and over who, during the reference week, were employed or unemployed.

Employed persons are those who, during the reference week:

- did any work at all at a job or business;
- had a job but were not at work.

A person is considered to be **full-time** if his/her usual hours at the main job are 30 or more hours per week. When the number of hours worked at the main job is usually less than 30 hours per week then he/she is considered to be part-time.

Unemployed persons are those who, during the reference week:

- were without work, had actively looked for work in the past four weeks (ending with reference week) and were available for work:
- (b) had not actively looked for work in the past four weeks but were on temporary layoff and were available for work;
- had not actively looked for work but had a new job to start within four weeks from the reference week and were available for work.

Persons in the civilian non-institutional population 15 years of age and over who, during the reference week, were neither employed nor unemployed are classified as not in the labour force.

The unemployment rate represents the number of unemployed persons expressed as a percentage of the labour force (employed and unemployed). The unemployment rate for a particular group (for example, age, sex, or marital status) is the number unemployed in that group expressed as a percentage of the labour force for that group.

The participation rate represents the total labour force expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (for example, women aged 25 years and over) is the labour force in that group expressed as a percentage of the population for that group.

The employment rate represents the number of employed persons expressed as a percentage of the population aged 15 years and over. The employment rate for a particular group (for example, age, sex, marital status, or province) is the number employed in that group expressed as a percentage of the population for that group.

The part-time rate represents the number of persons employed part-time expressed as a percentage of the employed. The part-time rate for a particular group (for example, age or sex) is the number of persons employed part-time in that group expressed as a percentage of the employed for that group.

All geographic regions are based on the 2011 Census boundaries.

Seasonal adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. The seasonally adjusted series contains irregular as well as longer-term cyclical fluctuations.

The seasonally adjusted series are revised each year to take into account current data and to generate new forecast factors for the next twelve months. The data are therefore subject to slight revisions in future issues of this publication.

For more information on seasonal adjustment, see Seasonally adjusted data – Frequently asked questions.

Sampling variability of estimates

Estimates in this publication are based on the Labour Force Survey, a monthly survey of approximately 56,000 households across Canada. Because the entire population is not surveyed, the estimates are subject to sampling error. While the published estimate is the best available indicator of the real value, changes in the level of any estimates between two months can be the result of a true change, or sampling variability. The sampling error can be estimated by calculating the standard error for the published estimate or statistic. These standard errors have been included in the publication tables in order to assist users in interpreting the data. They are based on 12-month averages and are updated twice a year, in February and August.

Interpretation based on standard error

Approximately two-thirds (68%) of the time, a change greater than the sampling error indicates a real change. The larger the change compared to the standard error, the better the chance that we are observing a real change, as opposed to a change due to sampling variability. At the 95% confidence level, the change in the estimate must be greater than twice the standard error in order to ensure that change is real.

Movements in estimates that are smaller than the standard error are less likely to reflect a real change and more likely to be due to sampling variability. While the above is true for monthly movements, one can have more confidence in a series of consecutive movements in the same direction, even though some of the monthly movements may be smaller than the standard error.

Interpretation based on confidence intervals

Confidence intervals provide another way of looking at the variability inherent in estimates of sample surveys. To illustrate how to calculate the confidence interval, let us say that one month the published estimate for total employment rose by 16.000 to reach 18.000.000. The associated standard error for the movement estimate is 29,500. The standard error used to interpret the movement estimate indicates that:

- There are approximately two chances in three (68%) that the real value of the movement between the two months falls within the range -13,500 to +45,500 (16,000 + or - one standard error).
- There are approximately nine chances in ten (90%) that the real value of the movement between the two months falls within the range -31,200 to +63,200 (16,000 + or - 1.6 times the standard error).
- There are approximately nineteen chances in twenty (95%) that the real value of the movement between the two months falls within the range -43,000 to +75,000 (16,000 + or – two standard errors).

For more detailed explanations on the sampling variability of estimates, and in particular for information on how to assess the variability of level estimates, consult the Data quality section of the Guide to the Labour Force Survey (71-543-G).
