Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Highlights

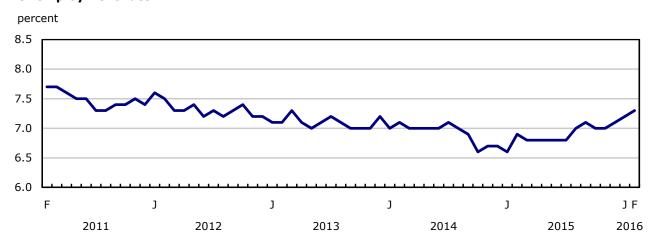

Employment was virtually unchanged in February (-2,300 or 0.0%) as gains in part-time work were offset by losses in full time. The unemployment rate rose by 0.1 percentage points for the third consecutive month, reaching 7.3% for the first time since March 2013.

Chart 1 Employment and unemployment rate, Canada, seasonally adjusted

Employment

Unemployment rate

Analysis — February 2016

Employment was virtually unchanged in February (-2,300 or 0.0%) as gains in part-time work were offset by losses in full time. The unemployment rate rose by 0.1 percentage points for the third consecutive month, reaching 7.3% for the first time since March 2013.

On a year-over-year basis, employment grew by 0.7% (+118,000), with the gains mostly coming from full-time work (+82,000 or +0.6%). At the same time, the number of hours worked increased by 1.0%.

Employment increased among men aged 55 and older in February, while the other demographic groups saw little change.

Saskatchewan, New Brunswick and Prince Edward Island registered employment declines, whereas British Columbia recorded an increase. There was little change in the remaining provinces.

Employment fell in health care and social assistance, educational services, 'other services', and natural resources. At the same time, there were more people working in construction, in business, building and other support services, as well as agriculture.

The number of public and private sector employees as well as the number of self-employed workers were little changed in February.

More men aged 55 and older employed

There were 18,000 more men aged 55 and older working in February. On a year-over-year basis, employment for this group was up 4.8% (+94,000). For their female counterparts, employment was little changed in February, but was up 5.1% (+81,000) on a year-over-year basis. Employment growth for men and women 55 and older has been driven by growth in their population.

Employment for men and women aged 25 to 54 was little changed on both a monthly and year-over-year basis. However, their unemployment rate was 6.3% in February, an increase of 0.6 percentage points compared with February 2015 as more of them searched for work.

For youths aged 15 to 24, employment edged down in February (-16,000), and the unemployment rate was 13.3%. On a year-over-year basis, youth employment fell by 2.2% (-56,000) while their population declined by 1.0% (-44,000).

Provincial summary

In February, employment fell by 7,800 in Saskatchewan, and the unemployment rate increased 0.3 percentage points to 5.9%. Compared with 12 months earlier, employment in the province was little changed. However, the unemployment rate was up 0.8 percentage points—the result of more people searching for work.

In New Brunswick, employment declined by 5,700 in February, and the unemployment rate increased 0.6 percentage points to 9.9%. Provincial employment has been on a downward trend since the autumn of 2015.

Employment in Prince Edward Island declined by 600, and the unemployment rate rose from 9.5% to 11.0%. In the 12 months to February, employment in the province was down 2,200 (-3.0%).

British Columbia was the lone province with more people working in February (+14,000). This brought total employment gains to 69,000 or 3.0% on a year-over-year basis, the highest rate of growth of all the provinces. In addition, British Columbia has outpaced the national year-over-year employment growth rate since June 2015. The unemployment rate in the province was 6.6% in February, unchanged from the previous month.

Following two monthly increases, employment in Ontario was little changed in February and the unemployment rate was 6.8%. On a year-over-year basis, employment in the province advanced by 74,000 or 1.1%, the second highest rate of growth among the provinces. The gains were mostly in full-time work.

Employment in Quebec was little changed both on a monthly and year-over-year basis, and the unemployment rate remained at 7.6% in February.

While employment in Alberta was also little changed in February, year-over-year declines totalled 21,000 (-0.9%), driven by losses in full-time work (-56,000 or -2.9%). With more Albertans in search of employment, the unemployment rate in the province reached 7.9% in February—an increase of 0.5 percentage points from January and up 2.5 percentage points from February 2015.

Industry perspective

In February, there were 20,000 fewer people working in health care and social assistance. Despite this decline, employment in the industry was up 61,000 (+2.7%) on a year-over-year basis.

The number of workers also fell in educational services (-17,000), bringing employment in the industry down to a level slightly lower than that of 12 months earlier.

In the 'other services' industry, such as repair and maintenance, employment declined by 15,000. In the 12 months to February, however, the number of people working in this industry was virtually unchanged.

There were 8,900 fewer people working in natural resources, which continued a downward trend that began late in 2014.

On the other hand, there were 34,000 more people working in construction in February. On a year-over-year basis, however, employment in the industry was virtually unchanged.

The number of people working in business, building and other support services also increased, up 13,000 in February. Despite this increase, employment in this industry was close to the level observed 12 months earlier.

Employment in agriculture rose by 7,200 in February. On a year-over-year basis, employment in the industry was little changed.

Despite little change in February, employment in manufacturing increased by 41,000 (+2.4%) from 12 months earlier. These gains were driven by growth in Ontario, Quebec and British Columbia.

The number of employees in the private and public sectors as well as self-employment were little changed in February, as well as on a year-over-year basis.

Canada-United States comparison

Adjusted to US concepts, the unemployment rate in Canada was 6.2% in February versus 4.9% in the United States. Compared with February 2015, the unemployment rate increased by 0.2 percentage points in Canada, while it declined by 0.6 percentage points in the United States.

The labour force participation rate in Canada (adjusted to US concepts) was 65.7% in February, compared with 62.9% in the United States.

In February, the US-adjusted employment rate in Canada stood at 61.7%, compared with 59.8% in the United States. Compared with 12 months earlier, the employment rate in Canada declined by 0.3 percentage points, while in the United States, it increased by 0.5 percentage points.

For further information on Canada-US comparisons, see *Measuring Employment and Unemployment in Canada and the United States – A comparison*.

Note to readers

The Labour Force Survey (LFS) estimates for February are for the week of February 14 to 20.

The LFS estimates are based on a sample and are therefore subject to sampling variability. As a result, monthly estimates will show more variability than trends observed over longer time periods. For more information, see *Interpreting Monthly Changes in Employment from the Labour Force Survey*. Estimates for smaller geographic areas or industries also have more variability. For an explanation of sampling variability of estimates and how to use standard errors to assess this variability, consult the "Data quality" section of the publication *Labour Force Information (71-001-X)*.

This analysis focuses on differences between estimates that are statistically significant at the 68% confidence level.

The **employment rate** is the number of employed persons as a percentage of the population 15 years of age and over. The rate for a particular group (for example, youths aged 15 to 24) is the number employed in that group as a percentage of the population for that group.

The unemployment rate is the number of unemployed as a percentage of the labour force (employed and unemployed).

The participation rate is the number of employed and unemployed as a percentage of the population.

For more detailed information, see the Guide to the Labour Force Survey (71-543-G).

Seasonal adjustment

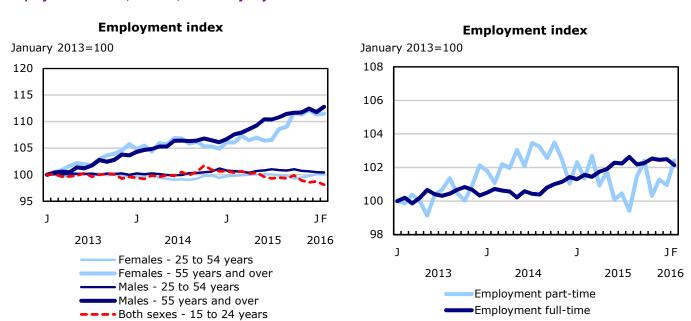

Unless otherwise stated, this release presents seasonally adjusted estimates, which facilitates comparisons by removing the effects of seasonal variations. For more information on seasonal adjustment, see Seasonally adjusted data – Frequently asked questions.

Chart 1 shows trend-cycle data on employment. These data represent a smoothed version of the seasonally adjusted time series, which provide information on longer-term movements, including changes in direction underlying the series. These data are available in CANSIM table 282-0087 for the Canada-level employment series. For more information, see the StatCan Blog and Trend-cycle estimates – Frequently asked questions.

Next release

The next release of the LFS will be on April 8.

282-0143	Labour force survey estimates (LFS), by usual hours worked, National Occupational Classification (NOC) and sex, unadjusted for seasonality, monthly
282-0144	Labour force survey estimates (LFS), by usual hours worked, National Occupational Classification (NOC) and sex, annual
282-0145	Labour force survey estimates (LFS), by actual hours worked, National Occupational Classification (NOC) and sex, unadjusted for seasonality, monthly
282-0146	Labour force survey estimates (LFS), by actual hours worked, National Occupational Classification (NOC) and sex, annual
282-0147	Labour force survey estimates (LFS), multiple jobholders by National Occupational Classification (NOC), sex and age group, unadjusted for seasonality, monthly
282-0148	Labour force survey estimates (LFS), multiple jobholders by National Occupational Classification (NOC), sex and age group, annual
282-0149	Labour force survey estimates (LFS), job tenure by National Occupational Classification (NOC) and sex, unadjusted for seasonality, monthly
282-0150	Labour force survey estimates (LFS), job tenure by National Occupational Classification (NOC) and sex, annual
282-0151	Labour force survey estimates (LFS), wages of employees by type of work, National Occupational Classification (NOC), sex, and age group, unadjusted for seasonality, monthly
282-0152	Labour force survey estimates (LFS), wages of employees by type of work, National Occupational Classification (NOC), sex, and age group, annual
282-0153	Labour force survey estimates (LFS), employees working overtime (weekly) by National Occupational Classification (NOC), sex and age group, unadjusted for seasonality, monthly
282-0154	Labour force survey estimates (LFS), employees working overtime (weekly) by National Occupational Classification (NOC), sex and age group, annual

282-0155	Labour force survey estimates (LFS), employment by National Occupational Classification (NOC), seasonally adjusted, monthly
282-0156	Labour force survey estimates (LFS), employment by economic region based on 2011 Census boundaries and National Occupational Classification (NOC), three-month moving average, unadjusted for seasonality, monthly
282-0157	Labour force survey estimates (LFS), employment by economic region based on 2011 Census boundaries and National Occupational Classification (NOC), annual
282-0158	Labour force survey estimates (LFS), employment by census metropolitan area based on 2011 Census boundaries and National Occupational Classification (NOC), three-month moving average, unadjusted for seasonality, monthly
282-0159	Labour force survey estimates (LFS), employment by census metropolitan area based on 2011 Census boundaries and National Occupational Classification (NOC), annual
282-0160	Labour force survey estimates (LFS), weekly wage distributions of employees by type of work, National Occupational Classification (NOC) and sex, unadjusted for seasonality, monthly
282-0161	Labour force survey estimates (LFS), weekly wage distributions of employees by type of work, National Occupational Classification (NOC) and sex, annual
282-0162	Labour force survey estimates (LFS), hourly wage distribution of employees by type of work, National Occupational Classification (NOC) and sex, unadjusted for seasonality, monthly
282-0163	Labour force survey estimates (LFS), hourly wage distribution of employees by type of work, National Occupational Classification (NOC) and sex, annual
282-0164	Labour force survey estimates (LFS), employees by union status and National Occupational Classification (NOC), Canada, annual
282-0165	Labour force survey estimates (LFS), employment by Aboriginal group, National Occupational Classification (NOC), sex and age group, annual
282-0166	Labour force survey estimates (LFS), employment by Aboriginal group, National Occupational Classification (NOC) and age group, Canada, selected provinces and regions, annual
282-0167	Labour force survey estimates (LFS), average usual hours and wages of employees by age group, sex, union coverage, job permanency, and National Occupational Classification (NOC), unadjusted for seasonality, monthly
282-0200	Labour force survey estimates (LFS), weekly wage distributions of employees by type of work, North American Industry Classification System (NAICS), and sex, unadjusted for seasonality, monthly
282-0201	Labour force survey estimates (LFS), weekly wage distributions of employees by type of work, North American Industry Classification System (NAICS), and sex, annual
282-0204	Labour force survey estimates (LFS), hourly wage distributions of employees by type of work, North American Industry Classification System (NAICS), and sex, unadjusted for seasonality, monthly
282-0205	Labour force survey estimates (LFS), hourly wage distributions of employees by type of work, North American Industry Classification System (NAICS), and sex, annual

282-0208	Labour force survey estimates (LFS), by educational degree, sex and age group, unadjusted for seasonality, monthly
282-0209	Labour force survey estimates (LFS), by educational degree, sex and age group, annual
282-0210	Labour force survey estimates (LFS), by family type and family age composition, unadjusted for seasonality, monthly
282-0211	Labour force survey estimates (LFS), by family type and family age composition, annual
282-0212	Labour force survey estimates (LFS), hours lost by employees by reason of absence, full and part week and sex, unadjusted for seasonality, monthly
282-0213	Labour force survey estimates (LFS), hours lost by employees by reason of absence, full and part week and sex, annual
282-0214	Labour force survey estimates (LFS), activity prior to unemployment by sex and age group, unadjusted for seasonality, monthly
282-0215	Labour force survey estimates (LFS), activity prior to unemployment, by sex and age group, annual
282-0216	Labour force survey estimates (LFS), reason for leaving job during previous year by sex and age group, unadjusted for seasonality, monthly
282-0217	Labour force survey estimates (LFS), reason for leaving job during previous year by sex and age group, annual
282-0218	Labour force survey estimates (LFS), reason for not looking for work, by sex and age group, unadjusted for seasonality, monthly
282-0219	Labour force survey estimates (LFS), reason for not looking for work, by sex and age group, annual
282-0220	Labour Force Survey estimates (LFS), employees by union status, sex and age group, Canada and provinces, annual
282-0221	Labour Force Survey estimates (LFS), employees by union status, sex, age group and education level, Canada, annual
282-0223	Labour Force Survey estimates (LFS), employees by union status, North American Industry Classification System (NAICS) and sex, Canada, annual
282-0224	Labour Force Survey estimates (LFS), employees by union status, establishment size, job tenure, type of work and job permanency, Canada, annual
282-0225	Labour Force Survey estimates (LFS), average weekly earnings, average hourly wage rate and average usual weekly hours by union status and type of work, Canada and provinces, annual
282-0226	Labour force survey estimates (LFS), by Aboriginal group, sex and age group, Canada, selected provinces and regions, annual
282-0227	Labour force survey estimates (LFS), by detailed Aboriginal group, sex and age group, Canada and selected regions, annual

282-0228	Labour force survey estimates (LFS), by Aboriginal group, educational attainment and age group, Canada and selected regions, annual
282-0229	Labour force survey estimates (LFS), employment by Aboriginal group, North American Industry Classification System (NAICS), sex and age group, annual
282-0230	Labour force survey estimates (LFS), employment by Aboriginal group, North American Industry Classification System (NAICS) and age group, Canada and selected regions, annual
282-0233	Labour force survey estimates (LFS), average hourly and weekly wages and average usual weekly hours by Aboriginal group and age group, Canada, selected provinces and regions, annual

Selected surveys from Statistics Canada

Labour Force Survey

Selected summary tables from Statistics Canada

- Average hourly wages of employees by selected characteristics and occupation, unadjusted data, by province (monthly)
- Days lost per worker by industry and sex
- · People employed, by educational attainment
- Reasons for part-time work by sex and age group
- Self-employment, historical summary
- Employment by age, sex, type of work, class of worker and province (monthly)
- Actual hours worked per week by industry, seasonally adjusted (monthly)
- Labour force characteristics, unadjusted, by territory (3 month moving average)
- Employment by industry and sex
- Full-time and part-time employment by sex and age group
- Labour force characteristics by age and sex
- Labour force characteristics by immigrant status of population aged 25 to 54, and by educational attainment
- · Labour force characteristics by immigrant status, by detailed age group
- Labour force characteristics by immigrant status of population aged 25 to 54, by country of birth
- Days lost per worker due to illness or disability, by sex, by province

- Employment by industry
- Labour force characteristics, seasonally adjusted, by province (monthly)
- Labour force characteristics, unadjusted, by province (monthly)
- · Labour force, employment and unemployment, levels and rates, by province
- Economic indicators, by province and territory (monthly and quarterly)
- Days lost per worker by reason, by provinces
- Labour force characteristics, seasonally adjusted, by census metropolitan area (3 month moving average)
- Labour force characteristics, unadjusted, by economic region (3 month moving average)
- Distribution of employed people, by industry, by province
- Employment by major industry group, seasonally adjusted, by province (monthly)
- Labour force characteristics
- Labour force characteristics, unadjusted, by census metropolitan area (3 month moving average)
- Labour force characteristics, population 15 years and older, by census metropolitan area
- Labour force characteristics, population 15 years and older, by economic region, by province
- Canada: Economic and financial data
- Labour force characteristics by sex and age group
- Labour force characteristics by immigrant status of population aged 25 to 54, by province
- Latest statistics (monthly)

- 1. Average standard error of change in two consecutive months (see "Sampling Errors" in Data Quality for further explanations).
- 2. Since 1992, the Labour force survey (LFS) has been conducted in the Yukon, using an alternative methodology that accommodates some of the operational difficulties inherent to remote locales. These estimates are not included in the national totals. In 1995, the LFS in the Yukon underwent a sample redesign. One result of the redesign was that the covered population increased from 85% to 92%, which is reflected by the sharp increase in the three month moving averages estimates of January, February and March of 1995 for all the level estimates. Users are therefore warned to be cautious when comparing estimates before January 1995 to estimates for January 1995 and forward.
- 3. Since 2001, the Labour force survey (LFS) has been administered in the Northwest Territories, using an alternative methodology that accommodates some of the operational difficulties inherent to remote locales. These estimates are not included in national totals.
- 4. Since 2004, the Labour force survey (LFS) has been administered in Nunavut, using an alternative methodology that accommodates some of the operational difficulties inherent to remote locales. These estimates are 3-month moving averages and are not included in national totals. From January 2004 to December 2007, estimates represent about 70% of all Nunavut residents aged 15 and over. Starting in January 2008, coverage was extended to 92%, so that by March 2008, the 3-month moving average is completely based on the extended coverage. Because of the large difference in coverage, users are recommended not to compare estimates prior to January 2008 with data afterwards. The January and February 2008 3-month moving average estimates are based on a mix of both coverages, since the extended coverage was introduced in January 2008. Estimates from January 2004 to December 2007 are based on the 10 largest communities in Nunavut: Iqaluit, Rankin Inlet, Cambridge Bay, Kugluktuk, Baker Lake, Arviat, Pond Inlet, Cape Dorset, Pangnirtung, Igloolik. Estimates from March 2008 to present cover the above communities as well as: Taloyoak, Gjoa Haven, Kugaaruk, Coral Harbour, Repulse Bay, Qikiqtarjuaq, Arctic Bay, Hall Beach, Clyde River.

^{1.} The boundaries of these regions are determined by Employment and Social Development Canada (ESDC). For geographic descriptions and maps of employment insurance regions, see the ESDC website: http://srv129.services.gc.ca/eiregions/en/geocont.aspx.

Note(s): All regions are based on the 1996 Census boundaries, with the exception of those in Prince Edward Island and in the territories, which respect the 2011 Census boundaries.

This region excludes St. John's.

^{3.} Prince Edward Island as well as the territories are each comprised of two regions effective October 12, 2014.

This region excludes Charlottetown.

^{5.} The monthly regional unemployment rates for EI purposes in the territories are subject to the greater of a seasonally adjusted 3 month moving average or 12 month moving average.

^{6.} This region excludes Whitehorse.

^{7.} This region excludes Yellowknife.

This region excludes Iqaluit.

Data quality

Definitions and explanations

The **labour force** is composed of those members of the civilian non-institutional population 15 years of age and over who, during the reference week, were employed or unemployed.

Employed persons are those who, during the reference week:

- did any work at all at a job or business;
- had a job but were not at work.

A person is considered to be **full-time** if his/her usual hours at the main job are 30 or more hours per week. When the number of hours worked at the main job is usually less than 30 hours per week then he/she is considered to be part-time.

Unemployed persons are those who, during the reference week:

- were without work, had actively looked for work in the past four weeks (ending with reference week) and were available for work:
- (b) had not actively looked for work in the past four weeks but were on temporary layoff and were available for work;
- had not actively looked for work but had a new job to start within four weeks from the reference week and were available for work.

Persons in the civilian non-institutional population 15 years of age and over who, during the reference week, were neither employed nor unemployed are classified as not in the labour force.

The unemployment rate represents the number of unemployed persons expressed as a percentage of the labour force (employed and unemployed). The unemployment rate for a particular group (for example, age, sex, or marital status) is the number unemployed in that group expressed as a percentage of the labour force for that group.

The participation rate represents the total labour force expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (for example, women aged 25 years and over) is the labour force in that group expressed as a percentage of the population for that group.

The employment rate represents the number of employed persons expressed as a percentage of the population aged 15 years and over. The employment rate for a particular group (for example, age, sex, marital status, or province) is the number employed in that group expressed as a percentage of the population for that group.

The part-time rate represents the number of persons employed part-time expressed as a percentage of the employed. The part-time rate for a particular group (for example, age or sex) is the number of persons employed part-time in that group expressed as a percentage of the employed for that group.

All geographic regions are based on the 2011 Census boundaries.

Seasonal adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. The seasonally adjusted series contains irregular as well as longer-term cyclical fluctuations.

The seasonally adjusted series are revised each year to take into account current data and to generate new forecast factors for the next twelve months. The data are therefore subject to slight revisions in future issues of this publication.

For more information on seasonal adjustment, see Seasonally adjusted data – Frequently asked questions.

Sampling variability of estimates

Estimates in this publication are based on the Labour Force Survey, a monthly survey of approximately 56,000 households across Canada. Because the entire population is not surveyed, the estimates are subject to sampling error. While the published estimate is the best available indicator of the real value, changes in the level of any estimates between two months can be the result of a true change, or sampling variability. The sampling error can be estimated by calculating the standard error for the published estimate or statistic. These standard errors have been included in the publication tables in order to assist users in interpreting the data. They are based on 12-month averages and are updated twice a year, in February and August.

Interpretation based on standard error

Approximately two-thirds (68%) of the time, a change greater than the sampling error indicates a real change. The larger the change compared to the standard error, the better the chance that we are observing a real change, as opposed to a change due to sampling variability. At the 95% confidence level, the change in the estimate must be greater than twice the standard error in order to ensure that change is real.

Movements in estimates that are smaller than the standard error are less likely to reflect a real change and more likely to be due to sampling variability. While the above is true for monthly movements, one can have more confidence in a series of consecutive movements in the same direction, even though some of the monthly movements may be smaller than the standard error.

Interpretation based on confidence intervals

Confidence intervals provide another way of looking at the variability inherent in estimates of sample surveys. To illustrate how to calculate the confidence interval, let us say that one month the published estimate for total employment rose by 16,000 to reach 18,000,000. The associated standard error for the movement estimate is 29,500. The standard error used to interpret the movement estimate indicates that:

- There are approximately two chances in three (68%) that the real value of the movement between the two months falls within the range -13,500 to +45,500 (16,000 + or - one standard error).
- There are approximately nine chances in ten (90%) that the real value of the movement between the two months falls within the range -31,200 to +63,200 (16,000 + or - 1.6 times the standard error).
- There are approximately nineteen chances in twenty (95%) that the real value of the movement between the two months falls within the range -43,000 to +75,000 (16,000 + or – two standard errors).

For more detailed explanations on the sampling variability of estimates, and in particular for information on how to assess the variability of level estimates, consult the Data quality section of the Guide to the Labour Force Survey (71-543-G).
