ANNUAL REPORT ON BENEFIT PERIODS ESTABLISHED AND TERMINATED UNDER THE UNEMPLOYMENT INSURANCE ACT

Calendar Year 1957

This is the sixteenth annual report on unemployment insurance benefit for Canada. The report is designed to provide comprehensive information on the personal and economic characteristics of the insured unemployed on benefit. Data is shown for all persons covered by insurance on the insured's sex, province, age, occupation and industry. For the person establishing benefit periods additional data is shown on his marital status, whether he had a dependent, his authorized weekly benefit and authorized duration of benefit. In addition, for the

person completing benefit data is given on whether benefit rights have been exhausted, and on duration and amount of benefit actually paid. The basic information was supplied by the Unemployment Insurance Commission for persons covered by insurance on U.I.C. Form 699E (Sample—Book Renewal), for persons authorized to start benefit periods on U.I.C. Form 417 (Computation of Benefit), and for persons completing benefit periods on U.I.C. Form 485 (Unemployment Register).

The Insured Population

Insurable employment

All persons employed in Canada in wage earning employment under a contract of service were insurable in 1956 unless specifically excepted. Exceptions broadly included those employed in agriculture; hunting and trapping; private domestic service; medical, nursing, technical and domestic staff in hospitals or charitable institutions not carried on for gain; private duty nursing; teaching; professional sport; members of the armed forces; police forces, unless insured under arrangements with the municipalities and provinces; permanent employment with the federal government or a municipal authority, except in municipal public utilities and designated federal crown corporations; employment in provincial public service, unless insured under arrangements with the individual provinces; employment paid by commission, such as insurance, real estate and securities salesmen; those paid on other than an hourly, daily or piece rate and earning more than \$4,800 a year, unless election is made to continue insurance.

Coverage was extended to any person engaged in commercial fishing effective April 1, 1957, notwithstanding that such a person was not an employee of any other person, and designated as employers of the fisherman any person with whom the fisherman entered into contractual or other commercial relationship in respect to his occupation. Fishermen were not considered for benefit until the 1957-58 seasonal benefit period, which is not covered in this report.

Number of persons insured

The data on the insured population presented in Tables 1 to 4 are obtained from returns in connection with the renewal of insurance books and contribution cards at May 1 together with new entrants in May. Included in the figures are those who were in insurable employment at that time and whose books or cards were therefore renewed through employers, as well as those who were unemployed and

on claim whose books were renewed at their first visit to a local office after May 1. The tables are based upon a 10 p.c. sample of returns (consisting of those with insurance numbers ending in 4) and therefore the smaller numbers should be used with caution since they are likely to be affected by relatively large sampling variation.

The count of insured persons on a payroll at book renewal time in each of nine industry divisions is projected using the D.B.S. employment index for each group. The resulting figures are totalled to give an estimate of the number of insured persons "employed". The number of active claimants with an unemployment register in the "live file" of the Commission on the last working day of the month shows the number of insured persons "unemployed". These totals are added and provision is made for any change in insurance coverage when it becomes effective. During 1957 the number of persons insured (currently in contact with the Commission either as contributors or as claimants) is estimated to have ranged from a low at May 1st of 3,807,320 to a high at December 1st of 4,037,000.

Data on the insured population provide a base to which the figures on benefit periods established and terminated can be related. Table 1 which distributes insured persons by sex, age and industry is comparable with Table 21 for regular benefit periods terminated. Similarly, Table 2 lines up with Tables 10 and 20; Table 3 with Tables 12 and 19; while Table 4 is related to Tables 8, 16 and 32. At the same time the incidence of benefit periods established and terminated or benefit weeks paid derived from these tables should be used with caution. The occupations and industries recorded in Tables 1 to 3 are those in which insured persons were engaged at May 1, whereas those indicated in Tables 10, 12, 19, 20, 21, 29 and 34 relate to the last job held by each claimant at the time of claim. Thus each must be taken as an approximation to the "usual" employment characteristics of the group covered. Nevertheless, comparison of occupational,

industrial and age patterns of the insured population together with those of persons establishing benefit and benefit weeks paid show significant concentrations connected with known shifts in employment.

Information on the number of persons insured at May 1, 1957 is shown under five heads (sex, province, age, occupation and industry), and in showing the relationship between these the number of possible three-way tables is 10. Of these, four three-way tables are given.

Table 1 distributes the insured by sex, age and industry. Women comprised 26.7 p.c. of the insured. Teenagers accounted for 8.8 p.c. of the insured; those from 20 to 24 years, 15.6 p.c.; those from 25 to 44 years, 49.0 p.c.; those from 45 to 64 years, 23.5 p.c.; and those over 65 years, some 3.1 p.c. Factory workers comprised 36.8 p.c. of all employed insured. While women comprised 26.7 p.c. of all insured, they accounted for higher proportions of younger insured and lower proportions of older insured persons. The proportion of insured employed persons varied greatly from one industry to another, from a high of 65.0 p.c. in finance, insurance and real estate to a low of 0.01 per cent in quarrying, clay and sand pits. Factory employment accounted for 31.6 p.c. of employed insured teenagers and 38.5 p.c. of those in the middle aged group from 45 to 64 years.

Table 2 groups the insured by sex, province and industry. The Atlantic region accounted for 8.2 p.c. of the insured; Quebec for 26.9 p.c.; Ontario for 41.0 p.c.; the Prairies for 13.8 p.c.; and British Columbia for 10.2 p.c. Women comprised 26.7 p.c. of insured nationally but varied in importance pro-

vincially from 14.3 p.c. in Newfoundland to 28.9 p.c. in Ontario. Factory workers accounted for 36.8 p.c. of employed insured (38.4 p.c. of men and 32.2 p.c. of women) nationally but as little as 13.5 p.c. in Saskatchewan and as much as 45.0 p.c. in Quebec and 42.7 in Ontario.

Table 3 is concerned with the occupational attachment of the insured by sex and province. Managerial and professional workers comprised 4.1 p.c. of the insured; clerical and sales workers, i.e. clerical, commercial and financial occupations, 26.2 p.c.; unskilled and service workers, 25.3 p.c.; and others, skilled and semi-skilled workers, 44.4 p.c. The proportion of women insured varied from one occupation to another, from a high of 53.0 p.c. for domestic service to a low of 0.2 p.c. for mining occupations. Manufacturing and mechanical occupations accounted for 21.8 p.c. of the insured (23.2 p.c. of men and 18.2 p.c. of women) nationally but as little as 10.4 p.c. in Saskatchewan and 10.5 p.c. in Newfoundland and as much as 25.6 p.c. in Quebec and 24.9 p.c. in Ontario.

Table 4 provides an age distribution of the insured by sex and province. Among the provinces the proportion of teenagers in the insured population varied from 6.5 p.c. in British Columbia to 10.9 p.c. in Quebec; the proportion of those 20 to 24 years ranged from 13.8 p.c. in British Columbia to 18.4 p.c. in Saskatchewan; the proportion of those 25 to 44 years varied from 44.7 p.c. in Nova Scotia to 50.0 p.c. in Ontario; the proportion of those 45 to 64 years from 20.8 p.c. in Quebec to 27.4 p.c. in Nova Scotia; and the proportion over 65 from 2.1 p.c. in Newfoundland to 4.6 p.c. in Prince Edward Island.

Regular Benefit Periods Established and Terminated

Tables 5 to 12 are concerned with regular benefit periods established and Tables 13 to 23 with regular benefit periods terminated. A benefit period is established when a claimant, having submitted his claim in the prescribed manner, proves he has fulfilled the minimum contribution requirements. The weeks authorized, weekly rate and amount of benefit authorized are then calculated and the benefit can be drawn upon during successive periods of unemployment. His benefit period terminates when either the amount of benefit authorized has been exhausted, or 12 months have elapsed since it was established, whichever comes first. Tables based on benefit periods established indicate the volume of claims from insured persons with some recent attachment to insured employment and provide information on the personal characteristics of such claimants. The tables based on benefit periods terminated provide figures on benefit paid as well as the number of cases so that the total number of weeks paid and weeks paid per claimant can be secured for any significant group.

To establish a regular benefit period in 1957, a claimant had to satisfy these conditions:

1. Where he had no previous benefit period within the two years preceding his claim, he required
 - a. 30 contribution weeks within the two years, and
 - b. 8 contribution weeks within the year prior to claim.
2. Where he had a previous benefit period within the two years preceding his claim, he required
 - a. 8 contribution weeks in the last year or since the start of his last **regular** benefit period, whichever was the **shorter** period, and
 - b. 24 contribution weeks in the last year, or since the start of the last benefit period, **regular or seasonal**, whichever was the **longer** period.

These periods could be increased by spells of sickness, non-insured employment or self-employment.

Having established his right to insurance benefit, an insured person is usually entitled to receive payment for any week during which he proved that he was unemployed, but he is disqualified from receiving benefit for every day for which he failed to prove he was (a) capable of, and available for, work;

and (b) unable to obtain suitable employment. Benefit could also be paid during periods of incapacity due to illness, injury or quarantine, if he was entitled to receive benefit at the time such illness, etc. occurred and if it was not because of the incapacity that he stopped working.

The rate of benefit paid the claimant under the Act who had paid the required premiums, i.e. passed either the 30-weeks test and 8-weeks test or the 30-weeks test, 8-weeks test and 24-weeks test, was

based on the average of his most recent 30 weekly contributions in the 104 weeks preceding the starting date of his benefit period. The contribution and benefit classes are shown below. It will be seen that if the claimant had 30 weekly contributions in the last two years amounting to \$17.40 or more, his weekly benefit rate would be \$30.00 where he had a dependent, and \$23.00 if he did not, and in addition he could earn \$13.00 in casual, subsidiary or short-time earnings.

Contribution and Benefit Rates 1957

Weekly Earnings	Employee Weekly Contributions	Benefit Schedule			Allowable Earnings
		Range of Average Weekly Contributions	Weekly Benefit With Dependent	Without Dependent	
\$	\$	\$	\$	\$	\$
Under 9.0008				
9.00 - 14.9916	Under .20	8.00	6.00	2.00
15.00 - 20.9924	.20 - .26	12.00	9.00	3.00
21.00 - 26.9930	.27 - .32	15.00	11.00	4.00
27.00 - 32.9936	.33 - .38	18.00	13.00	5.00
33.00 - 38.9942	.39 - .44	21.00	15.00	6.00
39.00 - 44.9948	.45 - .49	24.00	17.00	7.00
45.00 - 50.9952	.50 - .53	26.00	19.00	9.00
51.00 - 56.9956	.54 - .57	28.00	21.00	11.00
57.00 and over60	.58 - .60	30.00	23.00	13.00

The Act specified in 1957 one week of full benefit for every two contribution weeks made in the last two years prior to the start of the benefit period, with a maximum of 36 weeks, except where extended on the basis of additional credits acquired under the 1940 Act by the transitional sections of the 1955 Act.

The minimum duration was 15 weeks. However on a subsequent benefit period only those contribution weeks made since the previous benefit period began or that are within a year of the new claim, whichever is the longer period, could be counted, giving a maximum of 36 weeks benefit and a minimum of 12 weeks. Additional benefit could be provided in the form of seasonal benefit during the period from January 1 to April 15 of each year.

Benefit was not paid in 1957 to a claimant in the following cases:

- At the start of the benefit period for a waiting period equivalent to a week of full benefit. This waiting period is somewhat like the deductible clause in an automobile insurance policy providing for the insured being himself responsible for losses up to \$50 or \$100, as the case may be. When one benefit period terminates and the claimant immediately re-qualifies for benefit, the waiting period could be waived. This was where in the two complete weeks immediately prior to the completion of the former benefit

period, the total of his excess earnings (amounts earned during a claim week less allowable earnings) was not greater than his benefit rate. The waiting period reduces the claimants' total benefit payment only if his benefit rights lapse, but not if he exhausts his entitlement.

- For a period not over six weeks: (a) if he lost his employment by his own industrial misconduct, or if he voluntarily left it without just cause; (b) if he had, without good cause, refused or failed to apply for suitable employment or failed to accept it, or neglected to avail himself of an opportunity of such employment; (c) if he had, without good cause, failed to attend an instruction or training course under certain circumstances or failed to carry out a written direction given him by the Commission to assist him in finding suitable employment.
- For any week in which he worked the full working week in the place where he was employed.
- For any week in which the only unemployed days were Sunday, a recognized holiday of one day, the day before or the day after such holiday.
- If he lost his employment by reason of a stoppage of work resulting from a labour dispute at the plant where he was employed, unless he proved he was not participating in, financing or directly interested in such labour dispute and did not

belong to a grade or class of workers who were. This disqualification lasted for the duration of the stoppage of work.

6. If he failed to prove he was unemployed, capable of and available for work, and unable to obtain suitable employment. The claimant had to sign a written statement attesting to this each week at the counter of the local office on U.I.C. Form 489 (Claimant's Weekly Report) or if reporting by mail on U.I.C. Form 497 (Postal Claimant's Report).
7. If he ceased work because of illness, injury or quarantine, he was disqualified for the duration of his incapacity or until he proved he was capable of doing some other kind of work.
8. While he was an inmate of a prison or an institution supported in part or wholly by public funds, and while he was a resident out of Canada.

Benefit paid in 1957 was reduced by earnings received when the claimant was not fully employed. Where these exceeded the amount allowed under the Act, the amount of benefit was reduced by the excess. Examples of these earnings were wages for part time work; amount received for annual plant vacations, including payments through vacation stamp; and money received at separation in consideration of returning to work for the same employer after the seasonal lay-off, as retirement leave credits, or in place of notice.

Effective November 17, 1957 special regulations applying to married women, imposing additional conditions on recently married women before they could qualify for benefit, were revoked. Before this change, a married woman who wanted to receive benefit for any week within two years following her marriage had to prove she had acquired at least 10 contribution weeks during the period starting with the week following her marriage, if she was unemployed at the time of marriage. If she had been employed at the time of her marriage, the 10 contribution weeks must have been acquired from the week following the week in which she first separated from her employment.

Information on persons establishing regular benefit in 1957 is shown under 10 heads (sex, province, marital status, age, occupational attachment, industrial attachment, dependency status, weekly rate of benefit authorized, duration authorized and number of periods). The number of possible three-way tables for showing the relationship between these factors is 120. Some of these relations are trivial and only 10 are shown in this report in six three-way tables and one four-way table.

Table 5 distributes persons establishing regular benefit by sex, province and marital status. The table shows the Atlantic region accounted for 10.9 p.c. of claimants; Quebec for 31.4 p.c.; Ontario for 34.4 p.c.; the Prairies for 11.3 p.c.; and British Columbia for 12.1 p.c. Women comprised 21.1 p.c. of claimants. Some 35 p.c. of claimants were single

and 61 p.c. were married. The proportion of women who were claimants varied from 7.0 p.c. in Newfoundland to 25.0 p.c. in Ontario and 26.1 p.c. in Manitoba. A smaller proportion of women claimants than of men were single or married and a higher proportion were widowed or separated. Among the provinces, the proportion of single claimants varied from 30.2 p.c. in Ontario to 41.4 p.c. in Quebec; the proportion of married claimants ranged from 55.3 p.c. in Quebec to 67.7 p.c. in Newfoundland; and the proportion of other cases ranged from 2.0 p.c. in Newfoundland to 5.4 p.c. in Manitoba.

Table 6 shows persons starting regular benefit by sex, province, and number of periods established. The proportion of all claimants establishing a second regular benefit period in 1957 was 1.6 p.c. (1.8 p.c. for men and 0.8 p.c. for women). The proportion of claimants with a second regular benefit period varied among provinces from a low of 0.93 in British Columbia and 0.95 p.c. in Ontario to a high of 4.4 p.c. in New Brunswick.

Table 7 is concerned with the dependency status of persons establishing regular benefit by sex and province. Some 47.3 p.c. of claimants had dependents and were authorized the higher rates of benefit (58.2 p.c. for men but only 6.8 p.c. for women). Among provinces the percentage with dependents varied from 43.9 p.c. in Manitoba to 66.8 p.c. in Newfoundland.

Table 8 provides an age distribution of persons establishing regular benefit by sex and province. Teenagers comprised 7.7 p.c. of claimants; those from 20 to 24 years, some 17.6 p.c.; those from 25 to 44, some 48.0 p.c.; the middle aged group 45 to 64 years, some 22.7 p.c.; and the older claimants 4.0 p.c. Women accounted for higher proportions of younger than of older claimants. Among the provinces, the proportion of teenagers varied from 5.2 p.c. in Alberta and British Columbia to 10.1 p.c. in Quebec; the proportion of those 20 to 24 ranged from 15.4 p.c. in British Columbia to 21.9 in Saskatchewan; the proportion of those 25 to 44 varied from 44.0 p.c. in Prince Edward Island to 49.4 p.c. in British Columbia; the proportion of those 45 to 64 ranged from 19.6 p.c. in Quebec to 26.5 p.c. in Nova Scotia; and the proportion of those over 64 from 2.6 p.c. in Newfoundland to 4.7 p.c. in Ontario.

Table 9 shows the number of regular benefit weeks authorized claimants by sex and province. The overall average was 26.6 weeks in 1957 (26.2 weeks for men and 28.4 weeks for women). Among provinces average duration ranged from 22.7 weeks in Prince Edward Island to 28.0 weeks in Ontario.

Table 10 classifies persons starting benefit by sex, province and industry. Factory workers accounted for 36.1 p.c. of claimants nationally (33.1 p.c. of men and 47.4 p.c. of women) but as little as 12.1 p.c. in Saskatchewan and as much as 47.2 p.c. in Ontario.

Table 11 is a four-way classification of persons establishing regular benefit periods by sex, dependency status, weekly rate of benefit and duration authorized. Some 47.3 p.c. of claimants had dependents (58.1 p.c. of men and 6.8 p.c. of women). Women comprised 37.3 p.c. of claimants with single benefit status and only 3.0 p.c. of claimants authorized dependency benefit. About 50 p.c., i.e. the median, of claimants were authorized 25.67 weeks (24.63 weeks for men and 30.94 weeks for women). The median rate authorized claimants starting regular benefit was over \$21 (over \$23 for men and over \$13 for women). The median rate almost \$19 for claimants authorized at single benefit rates and almost \$28 for claimants authorized dependency benefit rates. The percentage of claimants at single benefit rates authorized both maximum benefit and maximum duration was 8.2 p.c. (11.4 p.c. of men and 3.0 p.c. of women). The percentage of claimants at dependency benefit rates authorized both maximum benefit and maximum duration was 20.3 p.c. (20.8 p.c. of men and 4.3 p.c. of women).

Table 12 furnishes information on persons establishing regular benefit by sex, province and occupational attachment. Managerial and professional workers comprised 1.7 p.c. of claimants; clerical and sales workers, i.e. clerical, commercial and financial workers accounted for 13.2 p.c.; unskilled and service workers, 29.0 p.c.; and others, skilled and semi-skilled workers, 56.1 p.c. The proportion of women who established benefit periods varied from a high of 56.3 p.c. for personal service to a low of 0.2 p.c. for mining and for electric light and power workers. Manufacturing and mechanical workers accounted for 22.4 p.c. of claimants establishing benefit nationally (19.9 p.c. of men and 31.8 p.c. of women) but as little as 12.1 p.c. in Saskatchewan and as much as 47.2 p.c. in Ontario.

Table 13 classifies terminations and weeks paid by sex, age and cause of termination. The average duration for claimants who exhausted their benefit rights was 21.19 weeks. This varied by age groups from 18.68 weeks for teenagers to 28.61 for older claimants 65 years and over.

Table 14 distributes terminations, weeks paid and amount paid by sex and province. The average benefit paid per claimant was \$256.26 (\$271.59 for men and \$199.68 for women) ranging from \$221.00 in Alberta to \$356.97 in Newfoundland.

Table 15 classifies regular benefit periods terminated and weeks paid by sex, province and marital status. Benefit paid averaged 12.02 weeks (11.62 weeks for men and 13.46 weeks for women). Average duration ranged among provinces from 9.89 weeks in Alberta to 16.12 weeks in Prince Edward Island. Single claimants were paid on the average 14.53 weeks compared with 13.81 weeks for married claimants. Single women were on benefit for a shorter period, on the average, than single men; married women, however, averaged a longer period of benefit than married men. While married women claimants averaged 14.54 weeks of regular benefit nationally,

duration ranged between 11.21 weeks for Alberta married women and 18.00 weeks for Prince Edward Island married women.

Table 16 shows regular benefit periods terminated and weeks paid by sex, province and age. Average duration was 10.77 weeks for claimants 20 to 24 years and 22.44 weeks for claimants over 64 years of age. For these older claimants average duration ranged from 20.19 weeks in Newfoundland to 24.26 weeks in Manitoba.

Table 17 distributes terminations and weeks paid by sex, province and cause of termination. Average duration of regular benefit paid was 8.82 weeks for benefit periods terminated through expiry and 21.19 weeks for those terminated by exhaustion of benefit rights. However, for this latter group, average duration varied from 18.55 weeks in New Brunswick to 23.62 weeks in Ontario.

Table 18 gives terminations and weeks paid classified by sex, province, dependency status, and weekly rate of benefit authorized. Claimants with dependents averaged 11.74 weeks of paid benefit, while claimants without dependents averaged 12.29 weeks. Average duration of benefit varied by weekly rate from 9.83 weeks for \$30 benefit weekly to 16.41 weeks for \$12 weekly. While claimants drawing \$30 weekly averaged 9.83 weeks nationally, average duration ranged from 7.70 weeks in Alberta to 14.52 weeks in Newfoundland.

Table 19 groups terminations and weeks paid by sex, province and occupation. Average duration varied among occupations from 9.63 weeks for financial workers to 14.78 weeks for claimants attached to managerial occupations. Average duration for manufacturing and mechanical workers was 10.44 weeks for Canada, and varied from 8.35 weeks in Alberta to 16.36 weeks in Prince Edward Island.

Table 20 presents terminations and weeks paid by sex, province and industry. Average duration varied among industries from 7.96 weeks for workers attached to the fuels division of mining, quarrying and oil wells to 16.03 weeks for workers attached to the tobacco products industry group. While former factory workers averaged 11.18 weeks of paid benefit, the variation for factory workers by provinces was from 10.30 weeks in Alberta to 15.56 weeks in Prince Edward Island.

Table 21 shows terminations and weeks paid by sex, age and industry. Former factory workers averaged 11.18 weeks of paid benefit, varying from 9.29 weeks for teenagers to 23.22 weeks for older claimants 65 years and over.

Table 22 is concerned with a distribution of terminations by sex, weeks authorized and weeks paid. The proportion of terminations authorized 36 or more benefit weeks was 29.6 p.c. (26.2 p.c. of men, and 42.2 p.c. of women). The proportion of terminations paid 36 or more benefit weeks was 4.3 p.c. (3.2 p.c. of men and 8.3 p.c. of women). Some 11.1 p.c. of claimants drew no benefit (9.9 p.c. of men, and 15.6 p.c. of women).

Table 23 gives the number of terminations classified by sex, amount of benefit authorized and amount of benefit paid. Under the 1955 Act minimum entitlement for a person with a dependent is \$1,080. Under Section 121 of the 1955 Act certain claimants, upon exhaustion of benefit rights, are entitled to have their benefit extended on the basis of contributions under the 1940 Act. In these cases the total entitlement cannot be less than it would have been under the 1940 Act. The table shows the extent to which the amounts authorized were used. The final diagonal line of figures contains, substantially, the benefit periods terminated by exhaustion, i.e. those

in which amounts paid are equal to amounts authorized. Figures to the left of this diagonal represent, progressively, benefit periods on which the amounts paid were a smaller and smaller proportion of amounts authorized. The proportion of benefit periods terminated authorized \$1,000 or more benefit was 10.2 p.c. (12.8 p.c. of men and 0.6 p.c. of women). The proportion of terminators paid \$1,000 or more was 1.4 p.c. (1.8 p.c. of men and 0.2 p.c. of women). Some 11.1 p.c. of claimants drew no benefit. The percentages for men and women were 9.9 p.c. and 15.6 p.c.

Seasonal Benefit Periods Established and Terminated

Tables 24 to 34 are concerned with seasonal benefit periods established which terminated in the first and second quarter of 1957. A claimant who failed to qualify for regular benefit between December 1st, 1956 and April 20th, 1957 could qualify for seasonal benefit as follows:

Group A—If he had 15 contribution weeks or more since the Saturday prior to the previous March 31st, or

Group B—If his most recent regular benefit period terminated subsequent to the previous April 15th. A claimant who failed to qualify for regular benefit was first tested for 15-weeks and only if he failed that test was he considered for Group B.

The rate of benefit paid the claimant under the Act, was based for Group A claimants on the average of all his weekly contributions subsequent to the Saturday before the 31 March concerned. The rate for Group B claimants was the same rate, subject to redetermination of dependency or single status, as the claimant had in his regular benefit period. The schedule of benefit was the same as for regular benefit.

The Act specified in the 1956-57 seasonal benefit period for Group A claimants either one benefit week for two contribution weeks, with a minimum of 10 weeks, subsequent to the Saturday before the March 31st concerned or the number of possible benefit weeks (i.e. exclusive of the waiting week) in the period from the most recent Sunday prior to the date of his claim until April 20, whichever was lesser. Thus a claimant could draw benefit from 1 to 16 weeks.

A Group B claimant was entitled to the number of possible benefit weeks (i.e. exclusive of the waiting week) in the period from the most recent Sunday prior to the date of his claim until April 20 or the number of weeks in the immediately previous benefit period (12 to 16 weeks), whichever was lesser. Thus he could draw benefit from 1 to 16 weeks.

A claimant was able to establish benefit beginning with the week of November 25, 1956 (the week in which December 1st fell) until April 20th,

1957, the end of the week in which April 15th next fell. Benefit could only be paid, however, from December 30, 1956 (the beginning of the week in which January 1st, 1957 fell). In the interval of December 1956 the claimant could prove unemployment sufficient to fulfil the waiting period required, equivalent to one week of benefit.

A claimant under this benefit formula in the last week of 1956 with 104 contribution weeks could draw 36 weeks of regular benefit in 1957 and 16 weeks of seasonal benefit in 1958. If he had 30 contribution weeks, he could draw 15 weeks of regular benefit, and if they terminated after April 15, 1957 he could draw a further 15 weeks of seasonal benefit in 1958. If this claimant had only 15 contribution weeks he could draw no regular benefit in 1957 but would be entitled to draw a minimum of 10 weeks of seasonal benefit in the first and second quarter of 1957.

Information on persons establishing seasonal benefit is shown under 12 heads (sex, province, marital status, age, occupational attachment, industrial attachment, dependency status, weekly rate of benefit authorized, class of benefit, duration authorized, amount authorized and amount paid). The number of possible three-way tables of 12 factors taken three at a time is 220. Some seven three-way tables and three four-way tables (permitting another new 11 three-way tables) are shown in this report.

Table 25 distributes persons establishing seasonal benefit, weeks paid and amount paid by sex, group and province. The table shows the Atlantic area accounted for 19.1 p.c. of claimants; Quebec for 33.4 p.c.; Ontario for 25.7 p.c.; the Prairies for 12.4 p.c.; and British Columbia for 9.4 p.c. Women comprised 21.6 p.c. of claimants. Some 69.0 p.c. of claimants established Class A seasonal benefit. The proportion of claimants who were women varied from 4.6 p.c. in Newfoundland to 31.0 p.c. in Ontario. Some 72.2 p.c. of men and 57.3 p.c. of women were Class A claimants. The proportion of Class A claimants among provinces varied from 62.5 p.c. in Ontario to 81.2 p.c. in Saskatchewan.

The overall average duration of paid benefit was 7.08 weeks (7.01 weeks for men and 7.35 weeks for women). Average duration of 6.84 weeks for

Class A claimants was shorter than 7.63 weeks for Class B claimants. Among provinces average duration ranged from 6.31 weeks in Alberta to 7.88 weeks in Prince Edward Island. The average benefit paid per claimant was \$141.86 (\$153.02 for men and \$101.42 for women). Average benefit paid at \$137.63 for Class A claimants was less than \$151.25 for Class B claimants. Among provinces, benefit per capita ranged from \$135.07 in Alberta to \$175.35 in Newfoundland.

Table 26 classifies persons establishing seasonal benefit and weeks paid by sex, group and marital status. Single claimants comprised 37.0 p.c. of all claimants; married claimants, 57.7 p.c.; and other claimants, 5.3 p.c. Class A claimants accounted for 78.8 p.c. of single persons, 63.9 p.c. of married persons, and 55.7 p.c. of other persons. Benefit weeks paid averaged 6.59 weeks for single persons, 7.31 weeks for married persons, and 8.17 weeks for other claimants.

Table 27 is concerned with the age distribution of persons establishing seasonal benefit and weeks paid them by sex and group. Teenagers comprised 12.8 p.c. of claimants; persons 20 to 24 years, 14.5 p.c.; those aged 25 to 44, some 39.0 p.c.; the middle aged group 45 to 64, some 24.8 p.c.; and older persons 65 or more, 9.0 p.c. Women accounted for only 18.7 p.c. of middle aged claimants and 5.7 p.c. for older claimants. Class A claimants comprised 89.0 p.c. of teenagers but only 39.3 p.c. of the older claimants. Average duration was 6.15 weeks for teenagers but 9.90 weeks for those claimants 65 years or more.

Table 28 presents persons establishing seasonal benefit and weeks paid by sex, group, dependency status and weekly rate of benefit authorized. Single status claimants comprised 55.9 p.c. and dependency status claimants comprised 44.1 p.c. of all persons establishing seasonal benefit. Those authorized the maximum benefit rate of \$30 weekly comprised 7.0 p.c. of all claimants. The proportion of women with single status was very high at 93.2 p.c. The proportion of Class A claimants with single status was slightly higher than for Class B. The top benefit rate accounted for 8.9 p.c. of men but only 0.2 p.c. of women, for 6.5 p.c. of Class A claimants and 8.4 p.c. of Class B claimants. Average duration of 6.95 weeks for single status claimants was less than 7.26 weeks for dependency status claimants. Average duration varied by rate of benefit authorized from 6.57 weeks for those paid \$21 weekly to 9.07 weeks for those paid \$8 weekly.

Table 29 distributes persons establishing seasonal benefit and weeks paid by sex, group and occupational attachment. Managerial and professional workers comprised 1.0 p.c. of claimants; clerical and sales workers accounted for 11.3 p.c.; unskilled and service workers, 38.7 p.c.; and others, skilled and semi-skilled workers for 49.0 p.c. The proportion of women varied from a low of 0.1 p.c. for logging workers to a high of 73.6 p.c. for com-

mercial workers. Manufacturing and mechanical workers accounted for 11.9 p.c. of all claimants (8.2 p.c. of men and 25.1 p.c. of women), but varied in importance by class of benefit for 10.0 p.c. for Class A and 16.0 p.c. for Class B claimants. Average duration varied from 6.82 weeks for logging workers to 9.21 weeks for protective service workers.

Table 30 shows persons establishing seasonal benefit by sex, amount of benefit authorized, and amount of benefit paid. Under the Act the maximum entitlement for a person with a dependent is \$480. The final diagonal line of figures contains, substantially, the benefit periods terminated by exhaustion in which amounts paid are equal to amounts authorized. Figures to the left of this diagonal represent, progressively, benefit periods on which the amounts paid were a smaller and smaller proportion of amounts authorized. Those authorized maximum benefit were 1,324 of some 209,000 claimants; 1,312 of some 164,000 men; only 12 of some 45,000 women; just 4 of some 144,000 Class A claimants; and 1,320 of some 65,000 Class B claimants. Only 908 claimants drew this much benefit. The proportion of all claimants who drew no benefit was 8.7 p.c.; of men, 8.0 p.c.; of women, 11.4 p.c.; of Class A claimants, 8.6 p.c.; and of Class B claimants, 9.0 p.c.

Table 31 classifies persons establishing seasonal benefit and weeks paid by sex, province and marital status. Average duration was 7.62 weeks for married women, but ranged from 6.34 weeks in Alberta to 8.52 weeks in Prince Edward Island.

Table 32 gives persons establishing seasonal benefit and weeks paid by sex, province and age. Among the provinces the percentage of teenagers ranged from 7.9 p.c. in Newfoundland to 15.4 p.c. in New Brunswick; those 20 to 24 years from 10.9 p.c. in British Columbia to 17.1 p.c. in Quebec; those 25 to 44 years from 34.9 p.c. in Alberta to 48.2 p.c. in Newfoundland; those 45 to 64 years from 21.7 p.c. in Quebec to 31.1 p.c. in Alberta; and those over 64 years from 3.4 p.c. in Newfoundland to 14.6 p.c. in Manitoba. Average duration paid for those claimants 65 years and over was 9.90 weeks but this varied among provinces from 8.92 weeks in Saskatchewan to 10.24 weeks in Manitoba.

Table 33 distributes persons establishing seasonal benefit by sex, dependency status, duration authorized and weekly rate authorized. About 50 p.c., i.e. the median, of the claimants were authorized 9.34 weeks (9.27 weeks for men and 9.60 weeks for women). The median rate authorized claimants establishing seasonal benefit was over \$19 (about \$21 for men and almost \$13 for women). The median rate was \$15 for claimants authorized single benefit rates and \$24 for those authorized dependency benefit rates. The percentage of persons at single benefit rates authorized both maximum benefit and maximum duration was 0.6 p.c. (0.8 p.c. of

men and 0.3 p.c. of women). The percentage at dependency benefit rates authorized both was 1.4 p.c. (1.5 p.c. of men and 0.4 p.c. of women).

Table 34 classifies persons establishing seasonal benefit and weeks paid by sex, group and industrial attachment. Factory workers accounted for 24.0 p.c. of all claimants (18.8 p.c. of men and 42.6 p.c. of women). Women made up just 1.0 p.c. of

claimants attached to general contractors in the construction industry, but as much as 65.6 p.c. of claimants attached to the communications industry. Factory workers accounted for 42.6 p.c. of Class A claimants and 38.6 p.c. of Class B claimants. While former factory workers averaged 7.17 weeks of paid benefit, those in Class A averaged 6.40 weeks and those in Class B averaged 8.44 weeks.

Review of Unemployment Insurance Benefit in 1957

The foregoing comments on the detailed tables have been concerned with what the data for 1957 show, with particular reference to the characteristics known to distinguish the different groupings of claimants in this report, such as differences in sex, province, age, etc. Apart from this, something has been written about the requirements for establishing ordinary or seasonal benefit and about instances when benefit is not payable. Some comparison with earlier years is noted here.

The expansion in Canada's economic activity continued in 1957, but at a slower pace than in the two preceding years. The gross national product, which is a measure of the market value of all goods and services produced in Canada, rose to \$31.1 billion, an increase of \$1.1 billion from 1956 com-

pared with an increase of \$3.0 billion in the previous year. Average civilian employment increased to 135,000, but the number of persons without jobs seeking work rose to 4.3 p.c. of the civilian labour force, compared with 3.1 p.c. in 1956.

The highest unemployment among the insured labour force was reached in 1957 in March, when there were 572,400 persons on benefit or seeking benefit or 61,400 more than a year earlier in 1956. The point of lowest unemployment for 1957 was reached in July with 204,500 active claimants or 68,500 more than in July 1956. For the five years 1953-57, the highest unemployment in the first four months was recorded in 1955, for the months May to September in 1954, and for the last three months in 1957. The data on active claimants is shown below.

Active Claimants on First of Month, 1953-1957

	1953	1954	1955	1956	1957
Number (thousands)					
January	303.8	451.5	479.3	388.1	398.2
February	376.3	556.0	586.8	476.9	546.0
March	288.5	558.7	619.7	511.0	572.4
April	262.6	379.9	605.2	511.1	558.8
May	239.9	378.9	353.9	292.1	292.3
June	164.5	293.2	144.3	268.1	250.3
July	142.3	244.9	186.3	136.0	204.5
August	134.1	228.4	167.7	138.5	205.8
September	134.3	222.8	152.8	132.3	208.7
October	142.6	214.4	145.4	128.4	226.5
November	184.7	236.4	163.1	139.4	268.0
December	283.3	306.6	219.8	215.4	403.3
Percentage of insured labour force					
January	9.4	13.6	13.9	10.8	10.1
February	11.8	16.7	17.0	13.2	13.7
March	12.2	16.9	17.8	13.9	14.4
April	8.3	11.8	17.4	13.9	14.1
May	7.6	11.7	10.8	8.1	7.7
June	5.3	9.1	4.4	7.2	6.4
July	4.5	7.5	5.5	3.6	5.2
August	4.2	7.0	4.9	3.7	5.1
September	4.2	6.8	4.4	3.5	5.2
October	4.4	6.5	4.2	3.4	5.7
November	5.7	7.2	4.7	3.7	6.7
December	8.7	9.2	6.2	5.6	10.0
Average	7.2	10.3	9.3	7.5	8.7

The insured labour force increased by some 6.4 p.c. from 1956 to a total of 3,974,100 in 1957. The number establishing regular benefit increased by 30.2 p.c. from 1956 (almost by a third). But the number who either were not entitled to ordinary benefit or whose ordinary benefit had been exhausted and who established seasonal benefit dropped 18.3 p.c. from the 1955-56 seasonal benefit period. This report does not consider claimants for seasonal benefit in December of 1957, but is concerned only with the seasonal benefit period 1956-57, i.e., December 1956 to April 1957.

Beneficiaries who terminated regular benefit in 1957 drew benefit on the average for 12.0 weeks, or about a week longer than in 1956. The average pay-

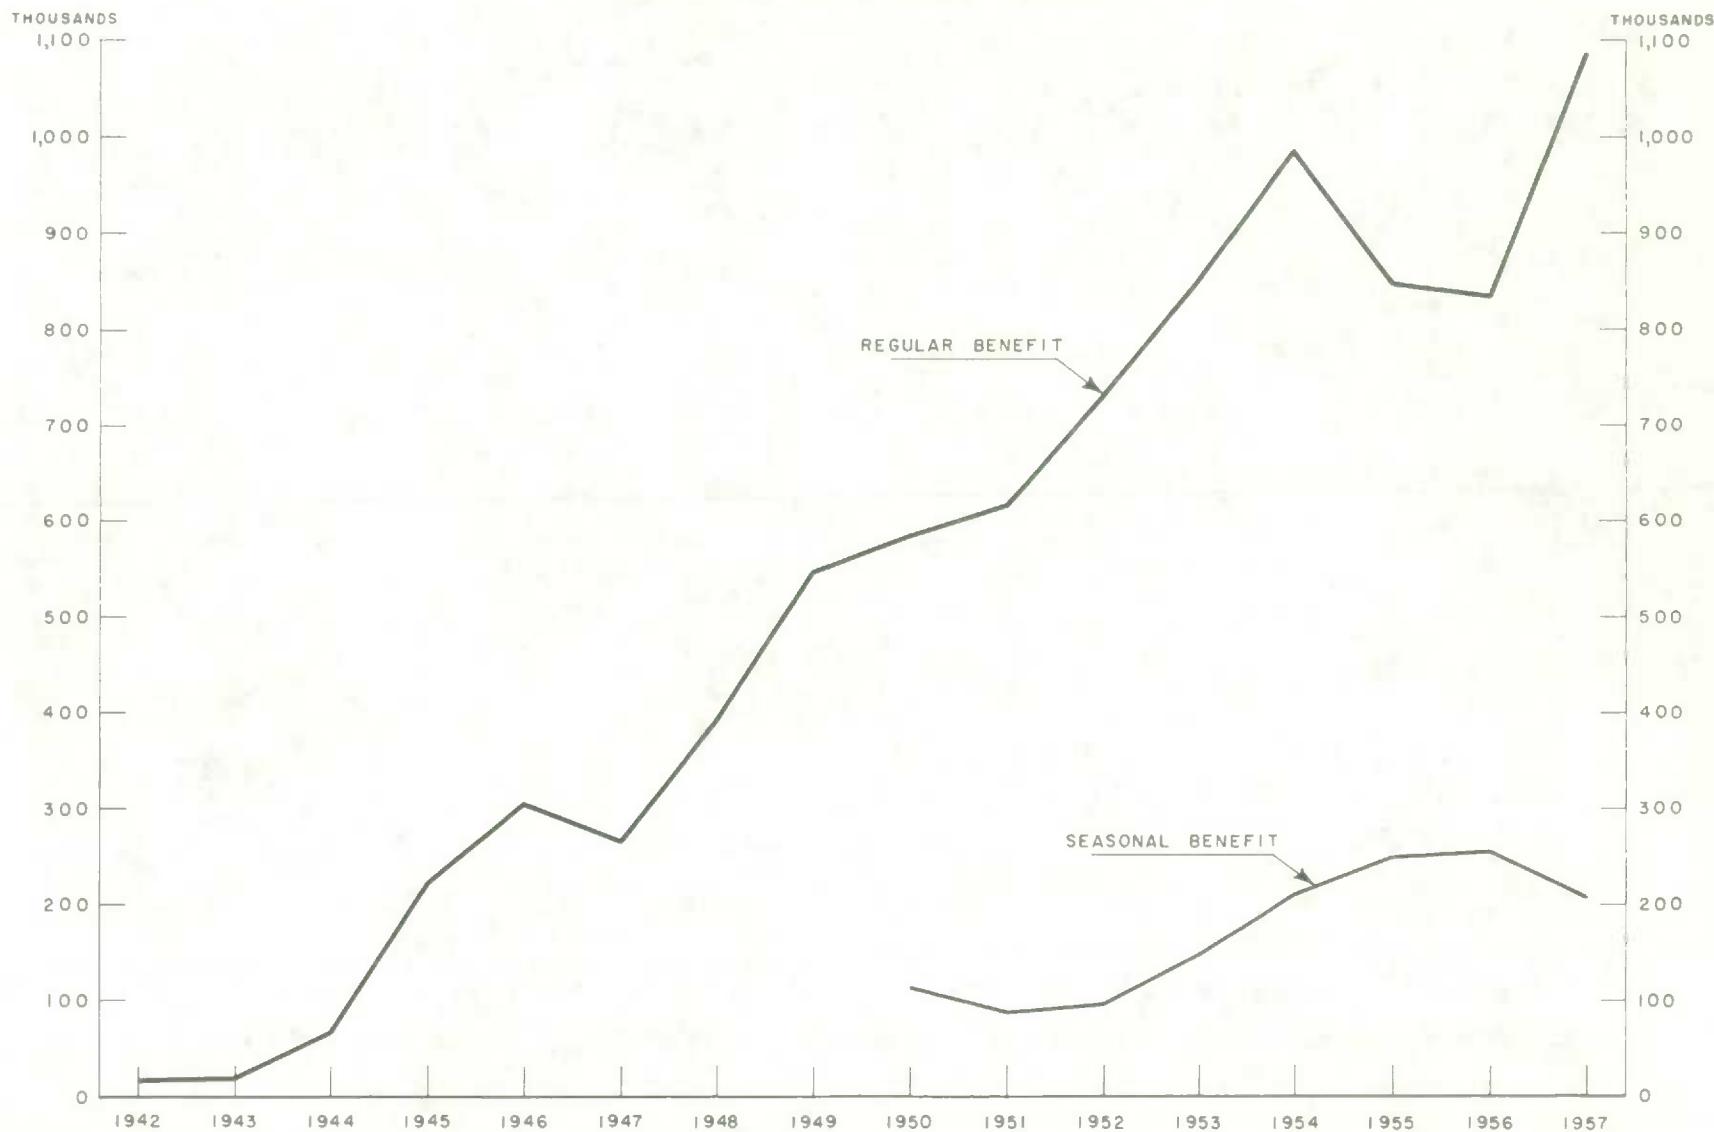

ment for ordinary benefit increased to \$256.26 in 1957 from \$213.61 in the previous year, an increase of 20.0 p.c. The increase in the actual duration of benefit was accompanied by a sharp rise in the number of claimants who exhausted their ordinary benefit rights - from 137,896 in 1956 to 229,952 in 1957. The exhaustion percentage rate advanced from 17.2 to 25.8 p.c.

Seasonal benefit claimants drew benefit on the average for about 7.1 weeks, or about four-fifths of a week less than in the mid-winter months of 1955-56. The average payment for seasonal benefit fell from \$148.93 in 1956 to \$141.86, a drop of 4.7 p.c. The diminution in actual duration of benefit more than offset an increase in average weekly payment from \$18.74 to \$20.02.
