ANNUAL REPORT ON BENEFIT PERIODS
ESTABLISHED AND TERMINATED UNDER THE
UNEMPLOYMENT INSURANCE ACT

Calendar Year, 1958

(Compiled from material supplied by the Unemployment Insurance Commission)

Published by Authority of

The Honourable Gordon Churchill, Minister of Trade and Commerce

December, 1959
8004-522

Price \$1.00

NOTICE

Following are other publications based upon statistical data in the field of unemployment insurance:

- 73-001 Statistical Report on the Operation of the Unemployment Insurance Act** – Monthly – Price: \$2.00 a year.

(Estimates of the insured population; claims filed, claimants on the live unemployment register on last working day of month; disposition of claims; claimants not entitled to benefit; weeks and amount of benefit for the month; estimates of beneficiaries; similar data on seasonal benefit claims, period December to May)

- 73-501 Employment under the Unemployment Insurance Act, 1952** – Reference Paper 61 (Part 1) – Price: 25 cents.

(Distribution of contributors by contribution classes; duration of contributory employment; age group and sex; average weeks contributed separately for new entrants and renewals)

- 73-502 Employment Under the Unemployment Insurance Act, 1954** – Reference Paper 61 (Part 2) – Price: 50 cents.

(Historical data on contributors since inception of the Act; classified by earnings, age, sex, and duration of contributory employment; numerous cross-classification; textual resumé of Act and of sampling procedure)

- 73-503 Unemployment Insurance Claims 1946-55** – Reference Paper 78 – Price: 50 cents.

(Historical data on claims filed; claimants with unemployment register in the live file and of benefit payments with data on disposition of claims for 1955; historical data on monthly basis and annual basis for provinces. Appendices contain changes in Act during period)

- 73-504 Statistical Report on the Operation of the Unemployment Insurance Act 1954-58 (Supplement)** – Price: 75 cents.

(Monthly data for Canada and annual data for provinces on regular and seasonal benefit integrated; similar data for seasonal benefit only; appendices on terms, summary of Act, fishing benefit, supplemental unemployment benefit plans, schedules of contribution and benefit rates with amendments; administrative procedures and schedules)

- 11-003 Canadian Statistical Review** – Monthly – Price: \$5.00 a year.

(Includes statistics for claimants on live unemployment register, claims filed, estimate of beneficiaries, weeks of benefit, contributions to the Fund, total revenue of Fund, balance in Fund, registrations for employment and unfilled vacancies with National Employment Service)

- L12-1 The Labour Gazette** – Monthly – Price: \$2.00 a year.

(Includes decisions of the umpire; some data from first noted publication 73-001; unfilled vacancies with National Employment Service by industry and sex, occupation and sex; registrations for employment by occupation and sex; unfilled vacancies and registrations for employment by local office; placements by NES)

- LU1-58 Annual Report of the Unemployment Insurance Commission** – Price: 25 cents.

Inquiries regarding the first six reports should be directed to the Unemployment Insurance Section, Labour Division, Dominion Bureau of Statistics; and subscriptions to the Information Services Division of the Dominion Bureau of Statistics or to the Queen's Printer, Ottawa. Inquiries regarding the other two publications should be directed to the Editor, Labour Gazette and the Unemployment Insurance Commission; subscriptions should be directed to the Circulation Manager, Labour Gazette and the Queen's Printer.

SEVENTEENTH

ANNUAL REPORT ON BENEFIT PERIODS ESTABLISHED AND TERMINATED UNDER THE UNEMPLOYMENT INSURANCE ACT

Calendar Year, 1958

This report is designed to provide comprehensive information on the personal and economic characteristics of the insured unemployed on benefit. Data are shown for all persons protected by insurance on the insured's sex, province, age, marital status, occupation and industry. For the person establishing benefit periods additional information is shown on his dependency position, authorized weekly benefit, and authorized duration of benefit. In addition, for the person completing benefit periods data are given on whether his benefit rights have been exhausted, and on duration and amount of benefit actually paid. The basic information was supplied by the Unemployment Insurance Commission for persons covered by insurance on U.I.C. Form 699E (Sample-Book Renewal), for persons authorized to start benefit periods on U.I.C. 417 (Computation of Benefit), and for persons completing benefit periods on U.I.C. Form 485 (Unemployment Register).

The report answers such questions as the following: How many males are covered by in-

surance, how many females? What is the age distribution of all the workers covered? What is the distribution of the insured by province, by industry, by occupation? How many of those covered are married women? Who establishes regular or seasonal benefit periods? What is the distribution by sex, province, marital status, dependency position, age, industry and occupation? What proportion of claimants establish more than one regular benefit period in a year? How long is benefit authorized on the average? How many exhaust all their benefit rights in a benefit period? How do males and females compare in this respect? How do weeks of benefit paid differ on the average for males, for each province, age group, occupational group, industrial group? Do people prefer benefit to jobs? Do they collect the maximum number of benefit cheques possible? How do weeks authorized compare with weeks paid? Is it easy to collect benefits? Who get turned down? Why?

The Insured Population

Insurable employment

All persons employed in Canada in wage earning employment under a contract of service were insurable in 1958 unless specifically excepted. Exceptions broadly included those employed in agriculture; hunting and trapping; private domestic service; medical, nursing, technical and domestic staff in hospitals or charitable institutions not carried on for gain; private duty nursing; members of the armed forces; police forces, unless insured under arrangements with the municipalities and provinces; permanent employment with the federal government or a municipal authority except in municipal public utilities and designated federal crown corporations; employment in provincial public service, unless insured under arrangements with the individual provinces; employment paid by commission, such as insurance, real estate and securities salesmen; those paid on other than an hourly, daily or piece rate and earning more than \$4,800 a year, unless election was made to continue insurance.

Coverage was extended to any person engaged in commercial fishing effective April 1, 1957, notwithstanding that such a person was not an employee of any other person and the Commission designated as employers of the fisherman any person with whom the fisherman entered into contractual or other commercial relationship in respect to his occupation. For the fisherman who has no actual employer, or whose employer is a working member of the fishing

crew, the person who first buys the catch is, in general, the "employer" under the regulations and is thus responsible for making contributions on his behalf and for keeping the necessary records. However, a buyer insures only the fisherman who delivers his catch to him or his agent in Canada on a face-to-face basis. If the buyer is outside of Canada, or is at a distance which compels the fisherman to ship the catch to him instead of making personal delivery, the responsibility for acting as employer then usually devolves on the skipper or head fisherman. With respect to a catch made from the Great Lakes, the actual employer, if there was one, was the "employer" whether or not he was a member of the crew. Effective November 30, 1958 the special rule concerning the "actual employer" in the Great Lakes area was eliminated and the same rule for determining the responsible employer was applied as elsewhere in Canada.

As most fisherman have no earnings or wages in the ordinary sense, their contributions are based on the value of their catch when delivered to the buyer, after deduction of reasonable expenses for bait, ice and fuel. The scheme provides that fishermen, generally speaking, may qualify for benefit only in the off season, when most of them are partially or wholly unemployed. A fisherman was considered for seasonal benefit only, prior to March 30, 1958, unless the contribution requirements for ordinary regular benefit could be fulfilled without counting any fishing contribution weeks or,

if ordinarily employed on a year-round basis, he could fulfill the special contribution requirements applicable to fishermen. This latter requirement was not applicable before April 1, 1958.

Number of persons insured

The data on the insured population presented in Tables 1 to 5 are obtained from returns in connection with the renewal of insurance books and contribution cards at June 1st together with new entrants in June. Included in the figures are those who were in insurable employment at that time and whose books or cards were therefore renewed through employers, as well as those who were unemployed and on claim whose books were renewed at their first visit to a local office after June 1st. The tables are based upon a 10 p.c. sample of returns (consisting of those with insurance numbers ending in 4) and therefore the smaller numbers should be used with caution since they are likely to be affected by relatively large sampling variation.

The count of insured persons on a payroll at book renewal time in each of nine industry divisions is projected using the D.B.S. employment index for each group. The resulting figures are totalled to give an estimate of the number of insured persons "employed" each month. The number of active claimants with an unemployment register in the "live file" of the Commission on the last working day of the month shows the number of insured persons "unemployed". These totals are added and provision is made for any change in insurance coverage when it becomes effective. During 1958 the number of persons insured (currently in contact with the Commission either as contributors or as claimants) is estimated to have ranged from a high at January 1st of 4,236,000 to a low at November 1st of 3,987,000.

Data on the insured population provide a base to which the figures on benefit periods established and terminated can be related. Table 1 which distributes insured persons by sex, age, and industry is comparable with Table 22 for regular benefit periods terminated. Similarly, Table 2 may be compared with Tables 11 and 21; Table 3 with Tables 13 and 20; Table 4 with Tables 6, 16 and 32; while Table 5 is related to Tables 9, 17 and 33. However, the incidence of benefit periods established and terminated or benefit weeks paid derived from these tables should be used with care. The occupations and industries recorded in Tables 1 to 3 are those in which insured persons were engaged at June 1st, whereas those indicated in Tables 11, 13, 20, 21 relate to the last job held by each claimant at the time of claim. Thus, each must be taken as approximating the "usual" employment characteristic of the group covered. Nevertheless, comparison of provincial, occupational, industrial, marital status and age patterns of the insured together with those of persons establishing benefit and benefit weeks paid show significant concentrations connected with known shifts in employment.

Information on the number of persons insured at June 1, 1958 is shown under six heads (sex, province, age, marital status, occupation and industry), and in showing the relationship among these the number of possible three-way tables is 20. Of these, five three-way tables are given.

Table 1 distributes the insured by sex, age and industry. Women comprised 27.5 p.c. of the insured. Teenagers accounted for 11.3 p.c. of the insured; those from 20 to 24 years, 15.4 p.c.; those from 25 to 44 years, 47.7 p.c.; those from 45 to 64 years, 22.8 p.c.; and those over 65 years, some 2.7 p.c. Factory workers comprised 35.7 p.c. of all employed insured. While women made up 27.5 p.c. of all insured, they accounted for higher proportions of younger insured and lower proportions of older insured persons. The proportion of insured employed women varied greatly from one industry to another, from a high of 65.0 p.c. in finance, insurance and real estate to a low of 1.5 p.c. in fishing, hunting and trapping. Factory employment accounted for 30.4 p.c. of employed insured teenagers and 37.8 p.c. of those in the middle aged group from 45 to 64 years.

Table 2 groups the insured by sex, province and industry. The Atlantic region accounted for 8.0 p.c. of the insured; Quebec for 28.3 p.c.; Ontario for 40.7 p.c.; the Prairies for 13.6 p.c.; and British Columbia for 9.4 p.c. Women formed 27.5 p.c. of the insured nationally but varied in importance provincially from 29.7 p.c. in Ontario to 15.4 p.c. in Newfoundland. Factory workers accounted for 35.7 p.c. of the employed insured (37.4 p.c. of men and 31.4 p.c. of women) nationally but as much as 43.8 p.c. in Quebec and 40.2 p.c. in Ontario and as little as 14.1 p.c. in Saskatchewan.

Table 3 is concerned with the occupational attachment of the insured by sex and province. Managerial and professional workers comprised 4.0 p.c. of the insured; clerical and sales workers, i.e. clerical, commercial and financial occupations, 26.7 p.c.; unskilled and service workers, 25.2 p.c.; and others, skilled and semi-skilled workers, 44.1 p.c. The proportion of women insured varied from one occupation to another, from a high of 63.7 p.c. for clerical to a low of 0.2 p.c. for mining occupations. Manufacturing and mechanical occupations accounted for 21.3 p.c. of the insured (22.8 p.c. of men and 17.3 p.c. of women) nationally but as much as 24.8 p.c. in Quebec and 24.0 p.c. in Ontario and as little as 9.8 p.c. in Prince Edward Island.

Table 4 shows the marital status of the insured by sex and province. Married persons comprised 63.0 p.c. of the insured (68.4 p.c. for men and 49.2 p.c. for women) nationally but varied by province from a high of 66.6 p.c. in Newfoundland to a low of 57.1 p.c. in Quebec. Women accounted for 21.7 p.c. of the married, and 38.3 p.c. of other groups.

Table 5 provides an age distribution of the insured by sex and province. Among the provinces the proportion of teenagers in the insured population varied from 15.5 p.c. in Prince Edward Island to 8.7 p.c. in British Columbia; the proportion of those 20 to 24 years ranged from 18.5 p.c. in Saskatchewan to 13.6 p.c. in British Columbia; the proportion of those

25 to 44 years varied from 48.7 p.c. in Ontario to 43.6 p.c. in Saskatchewan; the proportion of those 45 to 64 years from 26.7 p.c. in New Brunswick to 20.2 p.c. in Quebec; and the proportion over 64 years from 4.0 p.c. in Prince Edward Island to 1.6 p.c. in Newfoundland.

Regular Benefit Periods Established and Terminated

Tables 6 to 13 are concerned with regular benefit periods established in 1958 and Tables 14 to 24 with regular benefit periods terminated in 1958 (whether established in 1957 or 1958). A benefit period is established when a claimant, having submitted his claim in the prescribed manner, proves he has fulfilled the minimum contribution requirements. The weeks authorized, weekly rate and amount of benefit authorized are then calculated and the benefit can be drawn upon during successive periods of unemployment. His benefit period terminates when either the amount of benefit authorized has been exhausted, or 12 months have elapsed since it was established, whichever comes first. Tables based on benefit periods established indicate the volume of claims from insured persons with some recent attachment to insured employment who are entitled to start a benefit period and provide information on the personal characteristics of such claimants. The tables based on benefit periods terminated provide figures on benefit paid as well as the number of cases so that the total number of weeks paid and weeks paid per entitled claimant can be secured for any significant group.

To establish a regular benefit period in 1958, a claimant had to satisfy these conditions:

1. Where he had no previous benefit period within the two years preceding his claim, he required
 - (a) 30 contribution weeks within the two years, and
 - (b) 8 contribution weeks within the year prior to claim.
2. Where he had a previous benefit period within the two years preceding his claim, he required in addition to 30 contribution weeks
 - (a) 8 contribution weeks in the last year or since the start of his last regular benefit period, whichever was the shorter period, and
 - (b) 24 contribution weeks in the last year, or since the start of the last benefit period, regular or seasonal, whichever was the longer period.

These qualifying periods could be prolonged up to four years by spells of sickness, non-insurable employment, self-employment, or stoppage of work owing to a labour dispute.

Consider a claimant for benefit on December 1, 1958. Assume that he had a previous regular benefit period established on August 1, 1957 which he exhausted February 1, 1958; and a seasonal B benefit period established February 1, 1958. He

would be tested with respect to regular benefit for (1) 30 contribution weeks since December 1, 1956; (2) 8 contribution weeks since December 1, 1957, since this is shorter than the period from August 1, 1957; and (3) 24 contribution weeks since December 1, 1957, since this is longer than the period from February 1, 1958.

Having established his right to insurance benefit, an insured person is usually entitled to receive payment for any week during which he proves he is unemployed, but he is disqualified from receiving benefit for every day for which he fails to prove he is (a) capable of work, subject to an exception for illness; (b) available for work, subject to an exception for illness; and (c) unable to obtain suitable employment. Benefit can be paid during periods of incapacity due to illness, injury or quarantine, if he was entitled to receive benefit at the time such illness, etc. occurred and if it was not because of the incapacity that he stopped working. It is considered that a woman during a period, generally six weeks, prior to and following childbirth is not available for work. As to "suitable employment" a claimant should be offered a job in his usual occupation if such a job is available. He should then be offered any other job which is available. If he refuses an offer of any employment, disqualification for benefit depends on whether there was a stoppage of work or labour dispute at his plant; if the employment offered was in his usual occupation, whether the rate of earnings was lower or conditions were less favourable than those prevailing; if before a reasonable interval has elapsed, or if after a reasonable interval has elapsed, and the employment was in other than his usual occupation, whether the rate of earnings was lower or conditions were less favourable than those prevailing; and whether acceptance would affect the claimant's rights to membership in, or to refrain from membership in, an association of workers.

The rate of benefit paid the claimant under the Act who had paid the required premiums; i.e. passed either the 30-weeks test and the 8 weeks test; or the 30-weeks test, 8 weeks test and 24 weeks test, was based on the average of his most recent 30 weekly contributions in the 104 weeks preceding the starting date of his benefit period. The contribution and benefit classes are shown below. It will be seen that if the claimant had 30 weekly contributions amounting to \$17.40 or more, his weekly benefit rate would be \$30.00 where he had a dependent, and \$23.00 if he did not, and in addition he could earn \$13.00 in casual, subsidiary or short-time earnings.

Contribution and Benefit Rates 1958

Weekly earnings	Employed weekly contributions	Benefit schedule				Allowable earnings	
		Range of average weekly contributions	Weekly benefit				
			With dependent	Without dependent			
dollars							
Under \$9.00 ¹	.08	under .20	8.00	6.00	2.00		
\$ 9.00 - 14.99	.16	.20 - .26	12.00	9.00	3.00		
\$15.00 - 20.99	.24	.27 - .32	15.00	11.00	4.00		
\$21.00 - 26.99	.30	.33 - .38	18.00	13.00	5.00		
\$27.00 - 32.99	.36	.39 - .44	21.00	15.00	6.00		
\$33.00 - 38.99	.42	.45 - .49	24.00	17.00	7.00		
\$39.00 - 44.99	.48	.50 - .53	26.00	19.00	9.00		
\$45.00 - 50.99	.52	.54 - .57	28.00	21.00	11.00		
\$51.00 - 56.99	.56	.58 - .60	30.00	23.00	13.00		
\$57.00 and over	.60						

¹ When earnings are less than \$9, the contribution is 8 cents and for benefit purposes is counted as one-half week.

The benefit rate to which the claimant is entitled; i.e. single or dependency, is established at the beginning of each benefit period, but is subject to change during the currency of the benefit period.

It should be noted that average weekly earnings, exclusive of agriculture, fishing, trapping, government and community service was estimated in 1958 to be about \$70.40. Thus, the maximum weekly benefit, including the allowance for dependents, was 42.6 per cent of average industrial earnings.

The Act specified in 1958 one week of full benefit for every two contribution weeks made in the last two years prior to the start of the benefit period, with a maximum of 36 weeks, except where extended on the basis of additional credits acquired under the 1940 Act by the transitional sections of the 1955 Act. The reference here is to the provision that a claimant's first benefit period, established within three years of the Act's coming into force (October 2, 1955), that becomes exhausted, may, on exhaustion, be extended on the basis of his contribution history under the old Act. Thus, only the claimant establishing a benefit period with an effective date prior to October 2, 1958 was entitled to consideration of any excess benefit which he would have received under the old Act had it been in force.

The minimum duration was 15 weeks. However, on a subsequent benefit period only those contributions made since the previous benefit period began or that were within a year of the new claim, whichever was the longer period, could be counted, giving a maximum of 36 weeks benefit and a minimum of 12 weeks. Additional special benefit could be provided in the form of seasonal benefit during the period from December 1, 1957 to June 28, 1958. It might be noted the provision of a nominal maximum credit of 36 weeks' benefit does not mean that 36 weeks is the maximum period for drawing regular benefit. Under the provisions regarding allowable

earnings from part-time employment while on claim, if a claimant earns more than the prescribed amount during a week while he is on claim, his benefit, though not necessarily cancelled altogether, will be reduced to some extent. His income will be maintained through the sum of partial earnings and partial benefit. The effect of this provision or of non availability for part or all of a week will be to extend the duration of his potential benefit. At the end of 36 weeks he may still have a credit and if his incidental earnings during some weeks are fairly substantial he may continue to receive benefit (with or without partial earnings) throughout 51 weeks instead of 36 weeks; i.e. until the end of his benefit period.

Benefit was not paid in 1958 to a claimant in the following cases:

1. At the start of the benefit period for a waiting period equivalent to a week of full benefit. This waiting period is somewhat like the deductible claim in an automobile or personal property insurance policy providing for the insured being himself responsible for losses up to \$50 or \$100, as the case may be. A waiting period in respect of a regular or seasonal benefit period could be waived. This was where a subsequent benefit period started immediately following the termination of the previous benefit period, or started in the last week thereof; and in the two complete weeks immediately preceding the completion of the previous benefit period, the total of the claimant's excess earnings (amounts earned during a claim week less his allowable earnings) was not greater than his benefit rate. The waiting period reduces the claimant's total benefit payment only if his benefit rights lapse, but not if he exhausts his entitlement. The waiting period provision saves expenses to the Unemployment Insurance Fund by eliminating claims for very short periods of unemployment and makes a lower rate of contributions possible. Eliminating such claims makes it unnecessary to investigate the genuineness of the unemployment, which is difficult to verify when it is only of one or two days' duration.

2. For a period not over six weeks: (a) if he lost his employment by his own industrial misconduct, or if he voluntarily left it without just cause; (b) if he had, without good cause, refused or failed to apply for suitable employment or failed to accept it, or neglected to avail himself of an opportunity of such employment; (c) if he had, without good cause, failed to attend an instruction or training course under certain circumstances, or failed to carry out a written direction given him by the Commission to assist him in finding suitable employment.
3. For any week in which he worked the full working week in the place where he was employed.
4. For any week in which the only unemployed days were Sunday, a recognized holiday of one day, the day before or the day after such holiday.
5. If he lost his employment by reason of a stoppage of work resulting from a labour dispute at the plant where he was employed, unless he proved he was not participating in, financing or directly interested in such labour dispute and did not belong to a grade or class of workers who were. This disqualification lasted for the duration of the stoppage of work.
6. If he failed to prove he was unemployed, capable of and available for work, and unable to obtain suitable employment. The claimant had to sign a written statement affirming this each week at the counter of the local office on U.I.C. Form 489 (Claimant's Weekly Report) or if reporting by mail on U.I.C. Form 497 (Postal Claimant's Report).
7. If he ceased work because of illness, injury or quarantine, he was disqualified for the duration of his incapacity or until he proved he was capable of doing some other kind of work.
8. While he was an inmate of a prison or an institution supported wholly or partly out of public funds, and while he was a resident out of Canada.

Benefit paid in 1958 was reduced by earnings received when the claimant was not fully unemployed. Where these exceeded the amount allowed under the Act, the amount of benefit was reduced by the excess. Examples of these earnings were wages for part time work; amount received for annual plant vacations, including payments through vacation stamps; and money received at separation (a) in consideration of returning to work for the same employer after the seasonal lay-off, (b) as retirement leave credits, or (c) in place of notice.

The Commission is empowered to make additional conditions for benefit in relation to persons who usually work less than a full working week; work or have worked for only part of a year in a seasonal industry or occupation; who by custom of their occupation, trade or industry, or following an agreement with their employer, are paid wholly or partly by the piece or on a basis other than time; or who are married women. No benefit regulations under these powers were in effect in 1958.

Information on persons establishing regular benefit in 1958 is shown under 10 heads (sex, province, marital status, age, occupational attachment, industrial attachment, dependency status, weekly rate of benefit authorized, duration authorized and number of periods). The number of possible three-way tables for showing the relationship among these factors is 120. Some of these relations are trivial and only 10 are shown in this report in six three-way tables and one four-way table.

Table 6 distributes persons establishing regular benefit by sex, province and marital status. The table shows the Atlantic region accounted for 10.7 p.c. of entitled claimants; Quebec for 30.9 p.c.; Ontario for 35.8 p.c.; the Prairies for 11.4 p.c.; and British Columbia for 11.1 p.c. Women comprised 22.8 p.c. of claimants. Some 32.6 p.c. of claimants were single and 63.1 p.c. were married. The proportion of claimants who were women varied from 25.4 p.c. in Ontario and 27.7 p.c. in Manitoba to 9.2 p.c. in Newfoundland. A smaller proportion of women claimants than of men were single or married and a higher proportion were widowed or separated. Among the provinces, the proportion of single claimants varied from 39.4 p.c. in Quebec to 28.5 p.c. in Ontario; the proportion of married claimants ranged from 69.5 p.c. in Newfoundland to 57.2 p.c. in Quebec; and the proportion of other cases ranged from 5.6 p.c. in Manitoba to 1.8 p.c. in Newfoundland.

Table 7 shows persons authorized to start regular benefit by sex, province and number of periods established. The proportion of all claimants establishing more than one regular benefit period in 1958 was 1.7 p.c. (2.0 p.c. for men and 0.8 p.c. for women) nationally and varied by province from a high of 4.0 p.c. in New Brunswick to a low of 0.9 p.c. in Saskatchewan and 0.7 p.c. in Alberta.

Table 8 is concerned with the dependency position of persons establishing regular benefit by sex and province. Some 47.3 p.c. (59.4 p.c. for men but only 6.2 p.c. for women) of claimants had dependents and were authorized the higher rates of benefit. Among provinces the percentage with dependents varied from 72.3 p.c. in Newfoundland to 54.4 p.c. in Alberta for men and from 12.8 p.c. in Prince Edward Island to 5.3 p.c. in Quebec for women.

Table 9 provides an age distribution of persons establishing regular benefit by sex and province. Teenagers comprised 7.2 p.c. of claimants; those from 20 to 24 years, some 17.8 p.c.; those 25 to 44 years, some 48.8 p.c.; the middle aged group, 45 to 64 years, some 22.3 p.c.; and the older claimants, 3.9 p.c. Women accounted for higher proportions of the younger than of older claimants. Among the provinces, the proportion of teenagers varied from 9.8 p.c. in Quebec to 4.6 p.c. in British Columbia; the proportion of those 20 to 24 ranged from 22.2 p.c. in Saskatchewan to 15.7 p.c. in Nova Scotia; the proportion of those 25 to 44 varied from 50.3 p.c. in Ontario to 41.6 p.c. in Prince Edward Island; the proportion of those 45 to 64 ranged from 27.9 p.c. in Nova Scotia to 19.3 p.c. in Quebec; and the proportion of those over 64 from 5.7 p.c. in Manitoba to 2.6 p.c. in Quebec.

Table 10 shows the number of regular benefit weeks authorized entitled claimants by sex and province. The overall average was 26.2 weeks in 1958 (25.6 weeks for men and 28.2 weeks for women). Among provinces, average duration ranged from 26.9 weeks in Ontario to 21.5 weeks in Prince Edward Island for men, and from 29.0 weeks in Alberta to 24.8 weeks in Prince Edward Island.

Table 11 classifies persons starting regular benefit by sex, province and industry. Factory workers accounted for 34.0 p.c. (31.6 p.c. of men and 42.2 p.c. of women) of claimants nationally but as much as 41.4 p.c. in Ontario and as little as 11.5 p.c. in Saskatchewan.

Table 12 is a four-way classification of persons establishing regular benefit periods by sex, dependency position, weekly rate of benefit and duration authorized. Women comprised 40.6 p.c. of claimants for single benefit and only 3.0 p.c. of claimants for dependency benefit. The median rate authorized claimants starting regular benefit was over \$21 (over \$24 for men and over \$13 for women). The median rate was \$17 for claimants authorized single benefit and \$28 for claimants authorized dependency benefit. The percentage of claimants for single benefit authorized both maximum benefit and duration was 9.4 p.c. (12.8 p.c. of men and 4.2 p.c. of women). The percentage of claimants for dependency benefit authorized both maximum benefit and duration was 22.3 p.c. (22.8 p.c. of men and 4.8 p.c. of women).

Table 13 furnishes information on persons establishing regular benefit by sex, province and occupational attachment. Managerial and professional workers formed 1.9 p.c. of claimants; clerical and sales workers, i.e. clerical, commercial and financial occupations accounted for 15.3 p.c.; unskilled and service workers, 29.4 p.c.; and others, skilled and semi-skilled workers 53.4 p.c. The proportion of those who established regular benefit who were women varied from a high of 68.3 p.c. for clerical workers to a low of 0.1 p.c. for electric light and power workers. Manufacturing and mechanical workers accounted for 21.2 p.c. (19.5 p.c. of men and 26.9 p.c. of women) of claimants nationally but as much as 26.1 p.c. in Ontario and as little as 7.4 p.c. in Saskatchewan.

Information on terminations of regular benefit periods in 1958 (on benefit periods established in either 1957 or 1958) is shown under 13 heads (sex, province, marital status, age, occupational attachment, industrial attachment, dependency position, weekly rate of benefit authorized, duration authorized, cause of termination, duration paid, amount authorized and amount paid). The number of possible three-way tables for showing the relationship among these factors is 286. Only nine three-way tables and one four-way table are shown.

The number of weeks of benefit paid claimants which are shown in this report were calculated by

dividing the amount of benefit paid by the weekly rate authorized.

Table 14 classifies terminations and weeks paid by sex, age and cause of termination. The exhaustion rate was 32.4 p.c. in 1958 (25.8 p.c. in 1957). The rate was slightly higher for women at 32.9 p.c. than for men at 32.3 p.c., and varied from as much as 59.8 p.c. for claimants over 64 years to as little as 27.3 p.c. for claimants 25 to 34 years. The average duration for exhaustees was 21.86 weeks, ranging from 28.41 weeks for claimants over 64 years to 19.74 weeks for teenagers.

Table 15 distributes terminations, weeks paid and amount paid by sex and province. Benefit averaged \$313.87 per claimant (\$333.87 for men and \$239.56 for women), varying from \$375.77 in Newfoundland to \$287.44 in Alberta.

Table 16 arranges regular benefit periods terminated and weeks paid by sex, province and marital status. Benefit paid averaged 14.31 weeks (13.99 weeks for men and 15.52 weeks for women). Average duration ranged among provinces from 16.40 weeks in Newfoundland to 12.76 weeks in Alberta. Single claimants were paid on the average 13.88 weeks compared with 14.37 weeks for married claimants. Single women were on benefit for a shorter period, on the average, than single men; married women, however, averaged a longer period of benefit than married men. While married women claimants averaged 16.99 weeks of regular benefit nationally, duration ranged between 21.81 for Newfoundland married women and 14.17 weeks for Alberta married women.

Table 17 shows regular benefit periods terminated and weeks paid by sex, province and age. Average duration was 22.98 weeks for claimants over 64 years and 13.68 weeks for claimants 20 to 24 years. For older claimants, average duration ranged from 23.93 weeks in Ontario to 16.31 weeks in Prince Edward Island.

Table 18 distributes terminations and weeks paid by sex, province and cause of termination. The exhaustion rate varied among provinces from 52.9 p.c. in Newfoundland to 24.4 p.c. in Alberta. Duration averaged 10.70 weeks for terminations by expiry and 21.86 weeks for terminations by exhaustion of benefit rights. However, for this latter group, average duration varied from 24.25 weeks in Ontario to 18.13 weeks in Prince Edward Island.

Table 19 gives terminations and weeks paid classified by sex, province, dependency position and weekly rate of benefit authorized. Claimants for single benefit averaged 13.86 weeks, while claimants for dependency benefit averaged 14.73 weeks. Average duration of benefit varied by weekly rate from 16.88 weeks at \$12 weekly to 12.86 weeks at \$30 weekly. While claimants drawing \$30 weekly averaged 12.86 weeks nationally, average duration ranged from 16.38 weeks for this group in Newfoundland to 11.43 weeks in Alberta.

Table 20 groups terminations and weeks paid by sex, province and occupation. Average duration varied among occupations from 19.40 weeks for claimants attached to protective service work to 12.72 weeks for manufacturing and mechanical workers. Average weeks paid for this latter group ranged by province from 16.64 weeks in Newfoundland to 12.00 weeks in Alberta.

Table 21 presents terminations and weeks paid by sex, province and industry. Average duration varied among industries from 19.39 weeks for workers attached to communications to 10.23 weeks for workers attached to the fuels group of the mining industry. While former factory workers averaged 13.21 weeks of paid benefit, the duration on the average ranged from 16.19 weeks in Newfoundland to 12.07 weeks in British Columbia.

Table 22 shows terminations and weeks paid by sex, age and industry. Former factory workers averaged 13.21 weeks of paid benefit, varying from 24.02 weeks for older claimants over 64 years to 12.57 weeks for teenagers.

Table 23 is concerned with a distribution of terminations by sex, weeks authorized and weeks paid. The proportion of terminations authorized 35

or more benefit weeks was 36.5 p.c. (34.2 p.c. of men and 45.3 p.c. of women). However, the proportion paid this long was only 6.8 p.c. (5.3 p.c. of men and 12.3 p.c. of women). Some 6.9 p.c. of entitled claimants (5.9 p.c. of men and 10.6 p.c. of women) drew no benefit.

Table 24 gives terminations classified by sex, amount authorized and amount paid. Under the 1955 Act maximum entitlement to a claimant for dependency benefit was \$1,080. Under Section 121 of the 1955 Act, certain claimants, upon exhaustion of their first benefit period established prior to October 2, 1958 are entitled to have their benefit extended on the basis of contributions under the 1940 Act. In these cases the total entitlement cannot be less than it would have been under the 1940 Act. The table shows the extent to which the amounts authorized were used. The final diagonal line of figures contains, substantially, the terminations by exhaustion, i.e. those in which amounts paid equal amounts authorized. Figures to the left of this diagonal represent, progressively, terminations on which amounts paid were a smaller and smaller proportion of amounts authorized. The proportion of terminations authorized \$1,000 or more benefit was 14.1 p.c. (17.7 p.c. of men and 9.8 p.c. of women). Yet the proportion paid this much was only 2.1 p.c. (2.6 p.c. of men and 0.2 p.c. of women).

Seasonal Benefit Periods Established and Terminated

Tables 25 to 36 are concerned with seasonal benefit periods established and terminated in the period from December 1, 1957 to June 28, 1958. Seasonal benefit was made payable this year from December 1, 1957 to May 17, 1958, compared to December 31-April 20 last year. Because of the recession in 1958, a further temporary extension of the period for seasonal benefit was made from May 18 to June 28. The effect of the amendment to the Act, effective November 27, 1957, was to extend the period by approximately one month at either end so that benefit could be paid in December and from mid-April to mid-May. With the further extension seasonal benefit was payable for another month and a half.

The amended seasonal benefit provisions

A claimant who failed to qualify for regular benefit beginning with the week in which December 1, 1957 fell could qualify for seasonal benefit as follows:

1. Group A - If he had 15 contribution weeks or more since March 30, 1957 or
2. Group B - If his most recent regular benefit period terminated since May 18, 1957, whichever was the more favourable with respect to duration, or where duration was the same with respect to rate of benefit.

For the 1957-58 seasonal benefit period only, a claimant could qualify for seasonal benefit group B if his most recent regular benefit period terminated since April 15, 1957.

The duration of seasonal benefit was determined as follows:

1. Group A
 - (a) Five weeks' benefit for every six contribution weeks since March 30, 1957 (the previous formula was one benefit week for every two contribution weeks since the end of the previous March), or
 - (b) The number of possible benefit weeks (exclusive of the waiting week) in the period from the date of claim to May 17, 1958, whichever was lesser
 2. Group B
 - (a) The number of weeks in the immediately previous regular benefit period, or
 - (b) The number of possible benefit weeks (exclusive of the waiting week) in the period from the date of claim to May 17, 1958, whichever was lesser
 3. The minimum duration of seasonal benefit was theoretically 13 weeks for Group A, and 12 weeks for Group B. For both groups the maximum duration was 24 weeks.
- Claimants who failed to qualify for regular benefit could not be considered for seasonal benefit:
1. Group A - If the starting date of the claim was later than the week beginning with March 23, 1958.
 2. Group B - If the starting date of the claim was later than the week beginning May 4, 1958, except

- (a) If the starting date of the claim was in the week beginning May 11, 1958 and the waiting period was to be waived, it would be considered for seasonal B benefit.

The Temporary Act

Parliament passed "An Act for the Temporary Extension of Seasonal Benefit Periods under the Unemployment Insurance Act" on May 16, 1958. The extension affected:

- (a) claims active on May 17, 1958.
- (b) initial claims dealt with between the week beginning May 11th and June 28th that failed to qualify for regular benefit. These were considered for seasonal benefit Group A, on the basis of the number of contribution weeks since March 30, 1957 (not 1958); and, for Group B on the ground that the most recent regular benefit period ended after April 15, 1957; provided, in each case, that a seasonal benefit period had not already been established and exhausted since December 1, 1957,
- (c) seasonal benefit claims that were renewed after May 17, 1958.

On all seasonal benefit periods established effective on or after May 18, 1958 the waiting period was waived.

A seasonal benefit period established under the Temporary Act would not be considered a benefit period for the purpose of determining qualification for a subsequent initial claim.

Before ending this simplified account of administration of seasonal benefit claimants, attention will be drawn again to seasonal benefit claims established on or after December 1, 1957, which were exhausted. In these cases the claimant had no further entitlement and the extension did not apply to him.

Claimants for seasonal benefit had to comply with all the provisions of the Act, other than those referred to above. In the case of fishermen, however, the requirements covering the determination of the "full working week" and "availability" are waived during the seasonal benefit period. Fishing claimants benefited like others with the extension of the seasonal benefit period.

The rate of benefit paid the claimant under the Act, was based for Group A claimants on the average of all his weekly contributions subsequent to the Saturday before the 31 March concerned. The rate for Group B claimants was the same rate subject to redetermination of dependency or single position, as the claimant had in his regular benefit period. The schedule of benefit was the same as for regular benefit.

A claimant in early 1957 with 104 contribution weeks could draw 36 weeks of regular benefit in 1957 along with possible more weeks of additional credits under the Old Act and 30 weeks in the

1957-58 extended seasonal benefit period. If he had 30 contribution weeks in early 1957, he might draw 15 weeks of regular benefit, and if they terminated after April 15, 1957, he could draw a further 15 weeks of seasonal benefit in the 1957-58 seasonal benefit period. If this claimant had only 15 contribution weeks in early 1957, he could draw no regular benefit in 1957, but, if they were made since March 30, 1957, he would be entitled to draw a minimum of 13 weeks of seasonal benefit from December 1, 1957 to June 28, 1958.

Information on persons establishing seasonal benefit is shown under 12 heads (sex, group, province, marital status, age, dependency position, weekly rate of benefit authorized, occupational attachment, duration authorized, duration paid, cause of termination and industrial attachment). The number of possible three-way tables of 12 factors taken three at a time is 220. Some eight three-way tables and three four-way tables are shown in this report.

Table 26 distributes persons establishing seasonal benefit, weeks paid and amount paid by sex, group and province. The table shows the Atlantic area accounted for 19.9 p.c. of entitled claimants; Quebec for 32.5 p.c.; Ontario for 26.2 p.c.; the Prairies for 10.7 p.c.; and British Columbia for 10.7 p.c. Women comprised 20.0 p.c. of claimants. Some 46.9 p.c. of claimants established A benefit. The proportion of claimants who were women varied from 29.6 p.c. in Ontario to 3.8 p.c. in Newfoundland. Some 48.3 p.c. of men and 41.6 p.c. of women were A benefit claimants. The proportion of A claimants among provinces ranged from 73.7 p.c. in Prince Edward Island to 40.3 p.c. in Manitoba.

The overall average duration of paid benefit was 11.20 weeks (11.25 weeks for men and 11.01 weeks for women). Average duration of 11.27 weeks for A claimants was slightly higher than 11.14 weeks for B Claimants. Among provinces, average duration ranged from 13.59 weeks in Newfoundland to 9.99 weeks in Saskatchewan. The benefit paid averaged \$223.37 (\$251.83 for men and \$159.73 for women). Average benefit paid at \$230.60 for A claimants was less than \$235.83 for B claimants. Among provinces, benefit for entitled claimants ranged from \$287.19 in Newfoundland to \$215.41 in Alberta.

Table 27 classifies persons establishing seasonal benefit and weeks paid by sex, group and marital status. Single claimants formed 37.4 p.c. of all claimants; married claimants, 57.8 p.c.; and other claimants, 4.8 p.c. Group A claimants accounted for 51.1 p.c. of single persons, 44.8 p.c. of married persons, and 38.7 p.c. of other persons. Benefit weeks paid averaged 10.67 weeks for single persons, 11.45 weeks for married persons, and 12.33 weeks for other claimants.

Table 28 is concerned with the age distribution of persons establishing seasonal benefit and weeks paid them by sex and group. Teenagers comprised 11.3 p.c. of claimants; those 20 to 24 years, 16.0 p.c.; those 25 to 44, some 41.9 p.c.; the middle

aged group, 45 to 64, some 24.3 p.c.; and older persons over 64 years, 6.4 p.c. Women accounted for 16.1 p.c. of middle aged claimants and 5.4 p.c. of older claimants. Group A claimants comprised 63.8 p.c. of teenagers but only 29.6 p.c. of older claimants. Average duration was 14.97 for claimants 65 years or more but only 9.94 weeks for teenagers.

Table 29 presents persons establishing seasonal benefit and weeks paid by sex, group, dependency position and weekly rate of benefit authorized. Single benefit claimants comprised 55.3 p.c. and dependency benefit claimants 44.7 p.c. of all claimants. Those authorized the maximum benefit rate of \$30. weekly made up 11.4 p.c. of all claimants. The proportion of women with single benefit status was very high at 93.2 p.c. The proportion of A claimants with single benefit was approximately the same as for B claimants. The top benefit rate accounted for 14.2 p.c. of men but only 0.3 p.c. of women, for 9.7 p.c. of A claimants and 12.9 p.c. of B claimants. Duration at 10.97 weeks for single benefit claimants averaged less than 11.49 weeks for dependency benefit claimants. Average duration varied by rate of benefit authorized from 13.09 weeks for those paid \$8 weekly to 10.77 weeks for those paid \$9 and \$11 weekly.

Table 30 distributes persons establishing seasonal benefit and weeks paid by sex, group and occupational attachment. Managerial and professional workers comprised 1.0 p.c. of claimants; clerical and sales workers 11.2 p.c.; unskilled and service workers 36.4 p.c.; and others, skilled and semi-skilled workers, 51.4 p.c. The proportion of women varied from a high of 68.7 p.c. for commercial workers to a low of 0.3 p.c. for logging and mining workers. Manufacturing and mechanical workers accounted for 12.6 p.c. (9.4 p.c. of men and 25.4 p.c. of women) of all claimants, but varied in importance by benefit group for 10.7 p.c. of A claimants and 14.3 p.c. of B claimants. Average duration varied from 14.99 weeks for fishing workers to 8.94 weeks for financial workers.

Table 31 shows persons establishing seasonal benefit by sex, duration authorized and duration paid. The maximum duration for a person with a dependent was 30 weeks, made up of 24 weeks under the amended Act and an extension of 6 weeks under the Temporary Act. Those authorized maximum duration were 1,360 of some 470,490 claimants; 930 of 376,190 men; and 430 of 94,300 women. Only 680 claimants drew this much benefit. The proportion of all claimants who drew no benefit was 5.0 p.c.; of men, 4.3 p.c.; and of women, 7.8 p.c.

Table 32 classifies persons establishing seasonal benefit and weeks paid by sex, province and marital status. Average duration was 11.55 weeks for married women nationally, but ranged from 14.50 weeks in Prince Edward Island to 9.70 weeks in Alberta.

Table 33 gives persons establishing seasonal benefit and weeks paid by sex, province and age. Among the provinces the percentage of teenagers ranged from 14.0 p.c. in Quebec to 7.4 p.c. in New-

foundland; those 20 to 24 years from 18.4 p.c. in Quebec to 10.4 p.c. in Prince Edward Island; those 25 to 44 years from 46.0 p.c. in Newfoundland to 37.1 p.c. in Saskatchewan; those 45 to 64 years from 30.2 p.c. in Prince Edward Island to 20.4 p.c. in Quebec; and those over 64 years from 10.7 p.c. in Manitoba to 3.5 p.c. in Newfoundland. Average duration paid for those claimants 65 years and over was 14.97 weeks nationally but this varied among provinces from 16.05 weeks in Manitoba to 14.32 weeks in British Columbia.

Table 34 allot persons establishing seasonal benefit and weeks paid by sex, province and cause of termination. The figures show 44.2 p.c. of claimants exhausted their benefit rights. Newfoundland with 63.3 p.c. had the highest exhaustion rate while Alberta with 30.9 p.c. had the lowest. A slightly higher percentage of women (45.8 p.c.) than of men (43.8 p.c.) exhausted their benefit. Average duration was 8.33 weeks for terminations through lapsing and 14.83 weeks for terminations through exhaustion. Average duration for the latter group varied from 16.03 weeks in Newfoundland to 14.32 weeks in Quebec.

Table 35 distributes persons establishing seasonal benefit by sex, dependency position, duration authorized and weekly rate authorized. About 50 p.c., i.e. the median, of the claimants were authorized 13 weeks (13 weeks for men and 14 weeks for women). The median rate authorized was \$21 (\$23 for men; \$13 for women; \$17 for single benefit claimants; \$26 for dependency benefit claimants). The percentage of single benefit claimants authorized both maximum benefit and duration was 0.06 p.c. (0.06 p.c. of men and 0.05 p.c. of women). The percentage at dependency benefit rates authorized both was 0.13 p.c. (0.13 p.c. of men and 0.16 p.c. of women).

Table 36 classifies persons establishing seasonal benefit and weeks paid by sex, group and industrial attachment. Factory workers accounted for 25.0 p.c. (20.6 p.c. of men and 42.3 p.c. of women) of all claimants. Women made up as much as 78.4 p.c. of claimants attached to the clothing industry but as little as 0.6 p.c. of those attached to the fishing industry. Factory workers accounted for 23.5 p.c. of A claimants and 26.3 p.c. of B claimants. While former factory workers overall averaged 11.18 weeks of paid benefit, A claimants averaged 10.18 weeks and B claimants averaged 11.97 weeks.

Table 37 shows persons, weeks paid and amounts paid by sex, group and province prior to the extension of the seasonal benefit period from May 18 to June 28, 1958. Comparison of the table with Table 26 indicates the extension made establishment possible for a further 48,760 persons and paid to those persons and to those whose benefit was extended a further 886,610 weeks and some \$18.6 million. The effect on different provinces for establishments was as shown on the next page.

The three provinces increasing their share of the Canadian total were Quebec, Ontario and British Columbia.

Percentage Distribution of Claimants Establishing Seasonal Benefit

Province	December 1, 1957 to May 17, 1958	December 1, 1957 to June 28, 1958
Newfoundland	6.34	6.01
Prince Edward Island	1.23	1.15
Nova Scotia	5.92	5.75
New Brunswick	7.21	7.01
Quebec	32.28	32.49
Ontario	25.65	26.24
Manitoba	3.93	3.93
Saskatchewan	3.09	2.96
Alberta	3.88	3.79
British Columbia	10.47	10.67
Canada	100.00	100.00

Review of Unemployment Insurance Benefit in 1958

The foregoing comments on the detailed tables have been concerned with what the data for 1958 show, with particular reference to the characteristics known to distinguish the different groupings of claimants in this report, such as differences in sex, province, age, etc. Apart from this, something has been written about the requirements for establishing ordinary or special benefit and about instances when benefit is not payable. Some comparisons with earlier years are noted here.

The gross national product, which is a measure of the market value of all goods and services produced in Canada, showed an advance of only 2.3 p.c. over the year 1957, of which the larger part represented higher prices prevailing in the period. The relative stability in the physical volume of total output in 1958 compares with a gain of 9 p.c.

in 1955, 9 p.c. in 1956, no change in 1957, and a postwar average 1947 to 1958 of 4 p.c. per year. Average civilian employment dropped by 24,000, and the number of persons without jobs seeking work rose to 6.3 p.c. of the civilian labour force compared with 4.3 p.c. in 1957, and 3.1 p.c. in 1956.

The highest unemployment among the insured labour force was recorded in March 1958 when there were 869,300 persons on benefit or seeking benefit or 296,900 more than a year earlier in 1957. The point of lowest unemployment for 1958 was recorded in October with 282,600 active claimants or 56,100 more than in October 1957. For the five years 1954-58, the highest unemployment in each month was recorded in 1958. The data on active claimants is shown below.

Active Claimants on First of Month 1954-58

	1954	1955	1956	1957	1958
	Number ¹ (thousands)				
January	451.5	479.3	388.1	398.2	744.2

Average	10.3	9.3	7.6	8.7	13.2

¹ For monthly information on claimants for regular and seasonal benefit, see: Dominion Bureau of Statistics, Unemployment Insurance Section, *Monthly Statistical Report on the Operation of the Unemployment Insurance Act*.

The insured labour force increased by some 3.3 p.c. from 1957 to a total of 4,106,400 in 1958. The number establishing regular benefit increased by 5,312 from 1957 to 1,091,484. But the number who either were not entitled to ordinary benefit or whose ordinary benefit had been exhausted and who established seasonal benefit increased by 261,706 from the 1956-57 seasonal benefit period. This report does not consider claimants for seasonal benefit in December of 1958, but is concerned only with the seasonal benefit period 1957-58; i.e. December 1957 to June 1958.

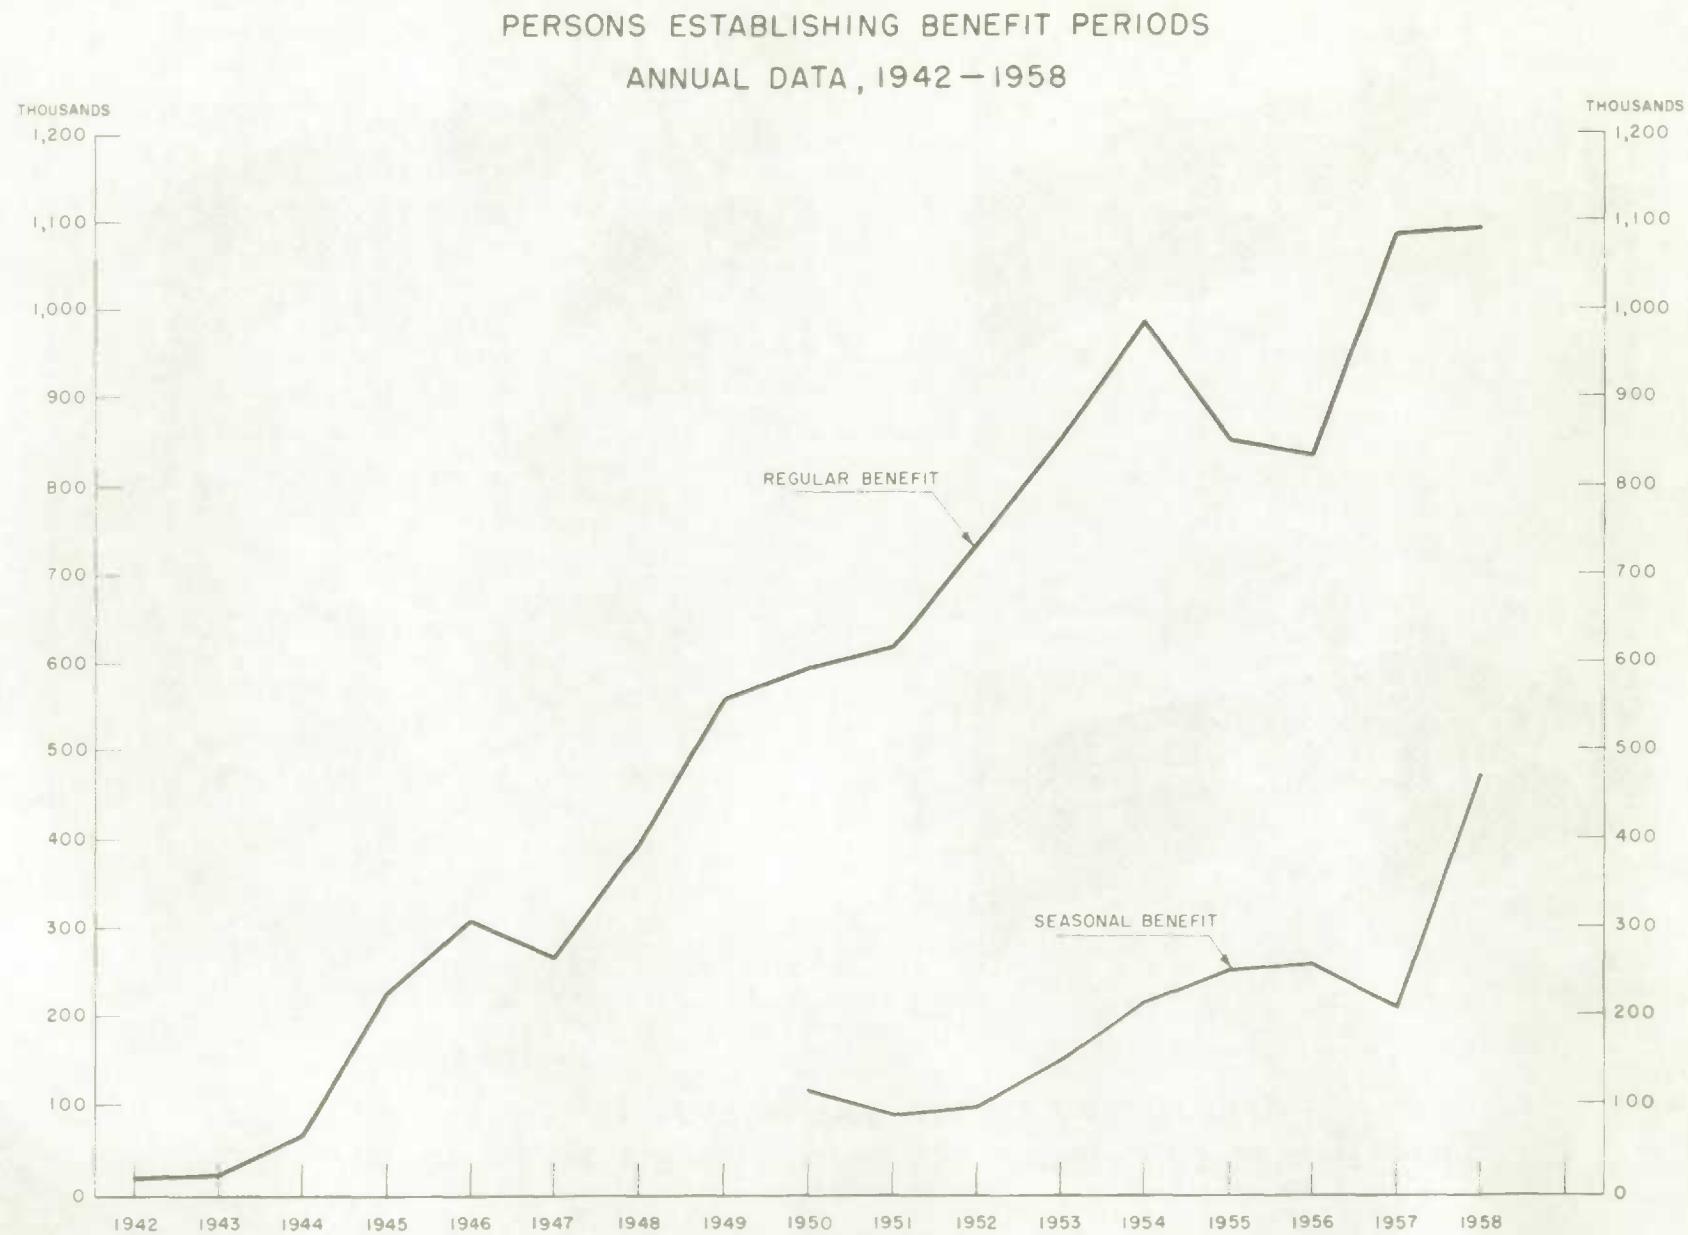

Beneficiaries who terminated regular benefit in 1958 drew benefit on the average for 14.3 weeks, or about 2.3 weeks longer than in 1957. The average

payment for ordinary benefit increased to \$313.87 in 1957 from \$256.26 in the previous year; an increase of 22.5 p.c. The increase in the actual duration of benefit was accompanied by a sharp rise in the number of claimants who exhausted their ordinary benefit from 229,952 in 1957 to 363,348 in 1958. The exhaustion percentage rate advanced from 25.8 to 32.4 p.c.

Seasonal benefit claimants drew benefit on the average for about 11.2 weeks, or about 4.1 weeks longer than in the mid-winter months of 1956-57. The average payment for seasonal benefit rose from \$141.86 in 1957 to \$233.37, an increase of 64.5 p.c. The exhaustion percentage rate for seasonal benefit was 44.2 p.c.

APPENDIX

SPECIMEN FORMS

The following forms illustrate the clearance of a worker's annual renewal of his insurance book, establishment of benefit entitlement and history of his benefit period, and the tabulation of statistical data presented in this report. They are as follows:

1. Punch card for insured population.
2. Punch card for benefit data.
3. U.I.C. 417 (Computation of Benefit).
4. U.I.C. 485 (Unemployment Register).
