

# TRUSTEED PENSION PLANS FINANCIAL STATISTICS, 1959 

Published by Authority of
The Honourable George Hees, Minister of Trade and Commerce

## PREFACE

This report provides data on the financial aspects of trusteed pension plans for 1959. A previous report issued a few years ago presented statistics on the receipts, disbursements and assets of Canadian trusteed pension funds for 1952 and 1953. The interest in the earlier publication and requests for more up-to-date information have led to the current series which began in 1957. The catalogue number of the 1957 report is $74-504$. Commencing with the 1958 report, the catalogue number is 74-201.

The response from corporations, trust companies, investment companies and frustees contacted in the survey was excellent, and this cooperation is gratefully acknowledged.

This report was prepared by the Pension Plans Section of the Business Finance Division of the Dominion Bureau of Statistics.

# TRUSTEED PENSION PLANS FINANCIAL STATISTICS, 1959 

Trusteed pension plans are pension plans where contributions are deposited with a selected trustee other than an insurance company or the Government Annuities Branch. The trustee may be a corporate trustee, an investinent company, or an individual or group of individuals. Contributions are invested and administered by the trustee in accordance with a contractual agreement. The majority of these are called "Funded Trusts" and the others are known as "Pension Fund Societies".

The Pension Fund Society is a body which has been incorporated under Federal or Provincial Pension Fund Societies Acts, Companies Acts, etc. Its operations are similar to those described above. Since the 1953 survey the marked increase in the number of smaller firms showing a preference for trusteed plans prompted corporate trustees to introduce "pooled, or classified, funds". They enable small plans to have their assets combined so that each fund participates in the diversity, security and yield previously available only to the much larger single funds.

## Survey Coverage

This is the fourth survey of Trusteed Pension Plans in Canada conducted by the Dominion Bureau of Statistics. It is similar to the 1957 and 1958 surveys, and includes specifically:

1. Municipalities and municipal enterprises.
2. Crown corporations, federal and provincial.
3. Federal and provincial boards and commissions.
4. Religious and charitable organizations.
5. Provincial civil service plans for three of the provinces.
6. Teachers federation plans for seven of the provinces.
7. Educational institutions, and health organizations such as hospitals.
8. Trade and employees associations.
9. Incorporated companies, partnerships and sole ownerships.

The report is based on 986 completed returns received in the survey. There were others which were received but were not used in the tabulations for the following reasons:

1. The funds were consolidated with others.
2. The funds were administered, and their assets held, outside Canada.
3. The fund was reported as having been inaugurated subsequent to January 1, 1959. A fund is not included in the survey until it has been in existence for at least one year.

Less than half of one per cent of the firms surveyed failed to reply to the questionnaire.

Authorization notices were included in the schedules for use when the company or organization was unable to complete the financial data and it was thus necessary to contact the trustee.

Improved methods of identifying existing trusteed pension funds were instrumental in bringing into the current survey 39 additional funds which should have been included in the 1958 survey. The number of new funds inaugurated during 1958 was 106.

## General Review of Survey Results

The current survey, covering the financial aspects of trusteed pension plans for the year 1959. included a total of 986 funds, of which 742 were administered by corporate trustees, 205 by individual trustees, and 39 by pension fund societies. There were 993,677 employees covered by these funds, or an average of 1,008 employees per plan. The \&mployees of about $26 \%$ of the plans made no contri-
butions toward the funds. Contributions amounted to $\$ 379$ million, of which employers contributed $63 \%$. Investment income amounted to $\$ 131$ million, and other income, including net profit on sale of securities, accounted for an additional $\$ 6$ million. Total income was $\$ 516$ million, from which expenditures of $\$ 144$ million were made. Approximately $68 \%$ of these expenditures was due to pension payments.

TABLE 1. Trusteed Pension Plans, 1959

| Investment in pooled funds, | 57 | 36 |
| Other assets ..................... | 21 | 20 |
| Total assets | 3,084 2,791 |  |

The total assets of the funds at the end of 1959 were $\$ 3,084$ million, an increase of $10.5 \%$ over the corresponding figure at the end of 1958. The market value of assets declined considerably due to lower prices of marketable securities at the end of the year. Bonds of all types accounted for $74.2 \%$ of the assets in 1959 compared with $76.8 \%$ in 1958. As percentages of the whole, there was a decrease of slightly more than $3 \%$ in bond holdings, the same rate of decrease which prevailed a year ago. The heaviest concentration of assets was in bonds issued, or guaranteed by, provincial governments, amounting to $30 \%$ of the total, down slightly from the $31 \%$ in 1958. Next in magnitude were federal bonds, making up $18 \%$ of the 1959 total, unchanged from the previous year. Other Canadian bonds, municipal debentures and mortgages accounted for $16 \%, 10 \%$ and $9 \%$ respectively. All stocks with the exception of non-Canadian stocks, preferred, comprised $9.7 \%$ of the assets in 1959 as compared with $8.5 \%$ in 1958, indicating a $14 \%$ increase. The distribution of assets in 1958, which totalled $\$ 2,791$ million, followed substantially the same pattern. Actual amounts invested were greater in nearly all cases in 1959, the greatest change being the $58 \%$ increase in pooled funds.

TABLE 2. Selected Data for Life Insurance Companies Group Annuities, Federal Government Group Annuities, and Trusteed Pension Funds, 1959

|  | Contributions | Number of plans | Number of employees | Assets |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | 1959 | 1958 |
|  | millions of \$ |  |  | millio |  |

| Life Insurance Group Annuities in Canada | 152 | 5,850 | 423,484 | 1,046 ${ }^{\text {² }}$ | $894{ }^{1}$ |
| Federal Government Group Annuities | 36 | 1,568 | 216,000 | 695 | 655 |

[^0]To provide a background for assessing the importance of trusteed pension plans some limited data in the operations of Insurance Companies and Government Annuity Plans have been assembled. For comparative purposes it is assumed that all life insurance companies group annuities arise from pension plans and that each contract originates from a separate pension plan. One pension plan, in reality, may require several contracts. In aidition, these figures do not include any individual annuities Which may result from pension plans. There is, as W11, the fact that certain employees may be covered by two, or even all three, types of plans.

Despite these limitations certain comparisons Gall be made. Trusteed pension plans in 1959
accounted for $61 \%$ of the total employees and $67 \%$ of the employer-employee contributions, although only $12 \%$ of all pension plans. The assets of the trusteed plans represented $64 \%$ of the total assets.

The following table indicates the relative importance of the various size groups. The largest size group, comprising $15 \%$ of the funds, accounted for $85 \%$ of the income and approximately $89 \%$ of the expenditures, the 1958 assets, and the 1959 assets. The three smallest size groups, into which $60 \%$ of the plans fell, accounted for less than $43 \%$ of the income, expenditures and assets.

## Contributory and Non-Contributory Plans (Tables 4-7)

The majority of trusteed plans were those to which the employees are required to contribute. In 1959 these plans formed $74 \%$ of all the funds, and covered $71 \%$ of the employees, $82 \%$ of the income, $83 \%$ of the expenditures and $80 \%$ of the assets.

The bulk of the contributory and non-contributory plans were operated by corporate trustees. About one-third of the contributory and two-fifths of the non-contributory plans participated in pooled funds.

Contributory funds received their income as follows: $41 \%$ from employers, $33 \%$ from employees, $25 \%$ from investments and $1 \%$ from all other sources. Employer contributions provided $69 \%$ of the income of non-contributory funds; investment provided about $29 \%$; less than $2 \%$ came from other sources.

The primary expenditures of contributory funds were pension payments and cash withdrawals, amounting to $89 \%$ of expenditures. The comparable
percentage for non-contributory funds cannot be derived from the schedule as it appears in Table 5, because there is included as an expenditure under "Cost of pensions purchased" a transfer of $\$ 6,098$ thousand from one of the trusteed funds to a Group Annuity Contract with an insurance company. If an adjustment is made for this transfer, the total of pension payments and cash withdrawals from non.. contributory funds is found to be $88 \%$ of expenditures.

The assets of the contributory funds were held mainly in Government and corporation bonds. Bond holdings fell off about $31 / 2 \%$ during 1959, while common stocks showed a $26 \%$ jump as a percentage of the whole and a $40 \%$ increase in actual amount. Mortgages showed a $10 \%$ increase, as a percentage of the whole. Pooled funds showed a $381 / 2 \%$ increase, from $1.3 \%$ of the total in 1958 to $1.8 \%$ in 1959. Little change in the bond investments of the noncontributory funds can be noted, all of them having decreased slightly. The only sharp rise in assets was, as in the contributory funds, in pooled funds, where a $46 \%$ increase can be seen.

## Financial Data by Type of Trusteed Fund (Tables 8-10)

Although the funds which were administered by corporate trustees formed numerically the largest group under this breakdown, it was the funds which have individual trustees that accounted for more than $56 \%$ of the total income, and expenditures in 1959, and assets in both 1958 and 1959. Pooled funds provided less than $5 \%$ of the income, expendi-
tures and assets. Some of the participants in the pooled funds continued to keep certain of their investments separate from the pooled funds.

Pension fund societies accounted for $9 \%$ of the total income and $15 \%$ of the expenditures in 1959 , and $12 \%$ of the assets in both years.

## Breakdown by Type of Organization (Tables 11-14)

The breakdown by type of organization in this report is the same as in 1958. Crown corporations and governmental bodies and agencies have been broken down into provincial and federal groups; the
educational group, which includes schools, teachers federations, etc., was segregated; trade and employee associations include some professional associations which could not be included under the health,
governmental or educational divisions. Recreational funds and other unrelated funds comprised the Other Organizations.

Industry includes incorporated companies, sole proprietorships and partnerships. Together these formed $82 \%$ of the funds. Thsy covered $59 \%$ of the employees, and accounted for $56 \%$ of the income, $49 \%$ of the expenditures, and $60 \%$ of the assets of 1958 and 1959. Federal Crown corporations ranked second in importance, with less than $1 \%$ of the plans, but $12 \%$ of the employees, $15 \%$ of the income, $17 \%$ of the expenditures, and $12 \%$ of the 1958 and 1959 assets. The provincial group and the edu-
cational followed closely together, while the remaining groups had much less influence on the overall pattern.

Industry showed a $10 \%$ increase in assets from 1958 to 1959. As percentages of the whole, bond holdings decreased, except for Government of Canada bonds, which moved ahead about $2 \%$ from 1958 to 1959. Canadian preferred stocks fell both in percentage and amount for the second successive year, while there has been a substantial increase in common stock holdings over the same two year period. Pooled funds increased by $39 \%$. There were significant increases in insured residential (NHA) mortgages and in real estate and lease-hacks. There was little change in the remaining forms of investment.

## Classification by Size of Assets of Funds (Tables 15-18)

Under this classification it can be seen that the largest size group accounted for $47 \%$ of the employees, $54 \%$ of the income, $60 \%$ of the expenditures and about $60 \%$ of the 1958 and 1959 assets. For the most part plans in this group were selfadministered, in contrast to the first three groups where the majority were operated by corporate trustees. The pooled funds may be found in the first three groups only.

All the size groups received better than $70 \%$ of their income from contributions. Investment income, expressed as a percentage of the total in each size group, increased from $9 \%$ in the smallest size group to $28 \%$ in the largest. All other forms of income combined accounted for less than $3 \%$ of the receipts in any size group.

Pension payments increased, in proportion to total expenditures, from $36 \%$ of the total in the smallest size group to $75 \%$ in the largest. Cash
wlthdrawals revealed the opposite trend, ranging from $44 \%$ in the smallest group to $15 \%$ in the largest size group. The cost of pensions purchased ranked third in importance in the three middle groups. The other disbursements constituted less than $16 \%$ of total expenditures in all the size groups.

Investment in Federal government bonds was $8 \%$ of total investment in the smallest size group, rising to $23 \%$ in the largest size group. Provincial government bonds ranged from $7 \%$ of the total assets in the first size group to $36 \%$ in the largest. Municipal bonds and other Canadian bonds followed a pattern, increasing throughout the first four groups and dropping off sharply in the largest size group. With the exception of the first group, where $50 \%$ of the assets were held as pooled funds, at least $53 \%$ of the assets in all other groups were held in bonds of some form. The distribution of the assets in both 1958 and 1959 followed essentially the same trend.

## IPPENDIS 1

## Pooled Pension Trust Funds

Pooled Pension Trust Funds provide an opportunity for the smaller pension funds to maintain a more varied portfolio of investment. These funds have grown at the rate of $\$ 1.8$ million a month during 1959 which was also the rate of growth experienced in 1958. The table below shows a total of $\$ 58.6$ million compared with $\$ 56.7$ fillion in the main report. The discrepancy can be explained by the fact that the main survey does not include profitsharing plans, registered retirement savings plans, or pooled funds which began operation during the year.

Following the trend which was noted last year, investment in Canadian bonds continues to drop,
from $63.4 \%$ to $58.3 \%$, a decrease of $8 \%$. Common stocks rose from $22.2 \%$ to $26.6 \%$, an increase of $19.8 \%$. "while mortgages remained fairly static at $11.5 \%$.

There is a slight decrease in the figures for 1958 as compared with those reported for that year in last year's publication. Last year one trust company with 116 pension trusts participating in its pooled fund gave figures for June 30, 1958, the end of its financial year nearest to December 31, 1958. This year it changed its financial year end to December 31, 1958, and thus there is a difference of six months between the respective figures

## Employe

The term "employee" may nor be exactly applicable bu is intended to cover participants of a trusteed pension fund, whether or not they are employees of a commercial organization.

[^0]:    ${ }^{1}$ The assets held in 1958 against life insurance group annuities have been estimated to be equal to the total of group annuity reserves and liabilities for outstanding claims for group annuities in Canada plus a proportion of the excess of assets over liabilities, special reserves and shateholders surplus which are attributable to group annuities. These estimates were based on compilations from individual company reports in the 1958 report cited below. As this report is not yet available for 1959 , the assets for 1959 were estimated by adding total 1959 contributions to the assets for 1958 .
