TEACHERS' SALARIES AND QUALIFICATIONS

IN NINE PROVINCES

1952 - 1953

The tables on salaries, qualifications and experience in this bulletin have been published annually in similar form since 1939, including data for all provinces except Quebec.

As one result of the Federal-Provincial Conference on Education statistics held in May 1952 a new report form designed for punch card use was adopted and put into effect in the fall of 1952. Provision was made for considerably more information than had been available heretofore.

Beginning with this bulletin there are tables for eight provinces showing turnover and losses from the profession, teaching load, those teaching in provinces other than the one where trained, marital

status of women teachers, grade level, and teachers and supervisors of special classes and subjects.

The data for all provinces except British Columbia and Ontario are based on returns made by the teachers in October or November 1952. Unfortunately not all teachers reported. The shortage particularly affects the detail tables where unclassified could not be shown.

Data for British Columbia are based on similar reports returned by the teachers in June 1953. The data for Ontario comes from "Schools and Teachers in the Province of Ontario", Parts I and II published by the Ontario Department of Education, as of November 1952 and are limited to what is found in these publications.

NOTES ON CLASSIFICATION

The tabulations include the full-time teachers of the publicly-controlled schools — regular classroom teachers, teachers and supervisors of special subjects and classes and principals and supervising principals. Excluded are superintendents or inspectors and their equivalents. Most of these are employees of the provinces or of the larger centres. Substitute teachers are included when it appears they are full-time employees on an annual salary but not if on a day basis.

In classifying by certificate the former "Class I or Higher" has been divided into four — Advanced, Graduate, University, First. *Advanced* indicates training of at least one year beyond the university degree and professional training required of teachers in academic secondary schools. *Graduate* indicates a university degree with the professional training required of these teachers. Commercial specialists are also included here. *Class I — First* indicates an academic background of the level of senior matriculation and one year professional training. *University* indicates training between this level and the Graduate in so far as indicated by the professional certificate. *Class II* indicates academic training of the level of junior matriculation (high school graduation) and one year professional training. Those in *Class III* have less academic and professional training and all are teachers with certificates no longer issued. *Special* includes those with vocational certificates and certificates for special subjects. A teacher is credited with a special certificate only when teaching under it. If teaching regular classes the credit is to the ordinary certificate. In the few cases where a

teacher with a valid certificate of one province teaches under a permit in another, the teacher is counted as having a certificate rather than a permit.

In the classification by location, the general tables on all cities include the suburban areas of the larger centres corresponding to the metropolitan areas of the Census. These areas are situated about the cities of St. John's, Halifax, Saint John, Ottawa, Toronto, Hamilton, London, Windsor, Winnipeg, Vancouver and Victoria. They are not included in the tables giving data on the thirteen individual cities.

Rural schools of six rooms and over are included with towns and villages. This has the effect of including with towns and villages centres which, though unincorporated, are typically urban.

As the statutory requirements regarding size for urban municipalities in British Columbia differ considerably from those of other provinces a reclassification is made. Cities include all centres of 10,000 population or over. Smaller centres are classified according to the number of classrooms.

Except where indicated the median rather than the arithmetic mean (popular average) is used to represent the average in order to avoid the effect of extremes. The median is the value of the middle point in a distribution. Where the teachers are classified from low to high according to salary, the median is the salary of the middle teacher. Half the teachers got salaries lower, half got salaries higher than this figure. Commonly the average (arithmetic mean) salary of teachers is higher than the median.

REVIEW

Based on figures given in provincial reports, the total number of teachers in the nine provinces was 68,963 an increase of 9,121 or 15 per cent over 1950. If to these be added an estimated 27,550 for Quebec the total for the ten provinces was 96,513. They were distributed 23 per cent in one-room rural schools, 12 per cent in rural schools of two to five rooms, 29 per cent in town and village and larger rural schools and 36 per cent in city schools.

The proportion of men teachers was 30 per cent of the total as compared with 29 per cent in 1950 and returns from eight provinces give 32 per cent of the women as married.

In the 9 provinces 60,964 teachers or 89 per cent had training equivalent to at least junior matriculation plus one year professional training. In 1939 this group accounted for 98 per cent of the teachers. In 1952-53, 29 per cent of teachers in one-room rural schools had less training than this. Over 22 per cent of all the teachers reported having university degrees. This is 11 per cent more than reported in 1950 but the increase may be due largely to better reporting of this item.

Median salaries ranged from \$1,199 in Newfoundland to \$3,510 in British Columbia. That for the nine provinces was \$2,510, an increase of \$545 or 28 per cent over the median for 1950. Median salaries of one-room rural schools ranged from \$1,042 in Newfoundland to \$2,816 in British Columbia with a median of \$1,923 for the nine provinces an increase of 23 per cent over the 1950 median. In contrast with an increase of \$354 in the median salary of teachers in one-room rural schools was the increase of \$716 in the median salary of teachers in city schools.

Data on experience, tenure, turnover, losses from the profession etc. are tabulated for eight provinces only, Ontario and Quebec being omitted. In the eight provinces the average (median) experience varies from 3.8 years in Newfoundland to 10.1 years in Alberta. It should be noted the experience and tenure is as of the beginning of the school year in all provinces except British Columbia where it is as of the end of the school year.

Tenure in one-room rural schools is very short suggesting that most teachers do not stay in a school longer than the one year. In fact for all rural schools in the eight provinces the turnover at midsummer 1952 was close to 43 per cent and 21 per cent in urban schools. In total at least 29 per cent of all the teachers in the eight provinces changed employers.

In the eight provinces 6,115 teachers were reported as leaving the profession. If to this be added a possible 2,000 for Ontario and 1,500 for Quebec at least 9,600 left the profession from all ten provinces. This makes a 10 per cent loss for all Canada but this is held down by a 7 per cent loss

in Ontario and perhaps a lower loss in Quebec due to the large proportion of members of religious orders among the teachers of that province. The data of Table 22 suggest the loss in the other provinces was greater than 10 per cent, perhaps averaging 15 per cent though it is difficult to determine because of the large proportion of unknown. In Prince Edward Island, where the number with destination unknown was very small, the loss was 22 per cent.

Of those whose destination was known 25 per cent left to be married (some of these may later return to teaching), 15½ per cent turned to home duties, 21 per cent went to other occupations and 16 per cent dropped out to take further training. A good number of these latter will return to teaching but in the meantime they have to be replaced.

The total reported joining the teaching staffs in the eight provinces (Ontario and Quebec excluded) was 7,233. Of those reporting source, 43 per cent came from the training schools, 21 per cent were housewives (mostly former teachers) 12 per cent came from other occupations and 24 per cent came directly from secondary schools without benefit of professional training. It is of interest to note that, though 778 were reported as leaving the profession to enter non-teaching occupations, 685 were recruited from this source. Also 552 of the teachers new to provinces were teaching in other provinces the previous year.

Data on teaching load (enrolment in class) are given for the eight provinces only. They indicate a large proportion of heavy classes particularly in cities and towns, and a large proportion of small classes in one-room rural schools.

The median class for cities was 35.7 pupils and for towns 32.9. In cities, over half the classes had more than 34 pupils and 22 per cent had 40 or more. The greatest crowding appears in Newfoundland where the median class in St. John's is 42 pupils. Even in towns 19 per cent of classes have 40 or over enrolled. There are a number of small classes in urban centres but these are largely special classes. 2.8 per cent of classes in one-room rural schools had 40 or more pupils.

Fourteen per cent of one-room rural schools had less than 10 pupils enrolled. The greatest incidence is in Saskatchewan where 20.7 of these schools have less than 10 pupils, Nova Scotia and British Columbia come next with 14 per cent each.

Going one group farther, 37 per cent of one-room schools had less than 15 pupils and in Saskatchewan it amounts to 50 per cent. The median enrolment in one-room schools in the eight provinces was 20.8.

The teaching-load in one-room schools is aggravated by the number of grades taught. In almost 10 per cent of these schools the teacher was giving

instruction beyond Grade 8 level. This was particularly true in Newfoundland, Prince Edward Island and Nova Scotia where 40 per cent, 54 per cent and 22 per cent respectively of these teachers had pupils beyond Grade 8.

In the eight provinces 8 per cent of the teachers have teacher certificates of provinces other than the ones in which they are teaching. Most of these (87 per cent) are in the four western provinces, 36 per cent in British Columbia and 27 per cent in Alberta. In fact 17 per cent of the British Columbia teachers came from outside the province while 12 per cent of the Alberta teachers were trained elsewhere.

Forty-one per cent or 1,335 of these 3,253 teachers hold a Saskatchewan certificate, more than is normally trained in that province in two years. Approximately half the gains of Manitoba, Alberta and British Columbia come from Saskatchewan. Considering numbers trained each year a significant number of teachers have been lost by Nova Scotia, Manitoba and Alberta also.

Unfortunately there are no data on such teachers in Ontario and Quebec but there has been a considerable influx into Ontario during and since the war and the Protestant schools of Quebec have gained a good many from outside the province.

1949	976	1,048	1,520	1,258	1,974	1,593	1,514	2,163	2,502	1,855
1950	966	1,083	1,569	1,341	2,109	1,689	1,580	2,279	2,668	1,965
1951	917	1,135
1952	915	1,198	..	1,631	3,124	..
1953	1,199	1,365	1,793	1,740	2,771	2,136	2,132	2,781	3,510	2,510
To give some idea of salaries and changes between 1950 and 1953 the following average (arithmetic mean) salaries are given:										
1950	1,205	1,177	1,674	1,362	2,377	2,108	1,818	2,362	2,773	-
1951	1,186	1,224	1,717	1,549	2,505	2,224	1,914	2,534	3,060	-
1952	1,210	1,317	1,782	1,703	2,846	2,346	2,076	2,709	3,204	-

1. New Brunswick figures do not include teachers in vocational schools and departments prior to 1950.

2. The Total excludes Newfoundland previous to 1949, the year of confederation.

1. Most of those in the lower salary groups are permit teachers except in Ontario where they are members of religious orders teaching in the Roman Catholic Separate schools.

2. Those in Newfoundland with no salary are members of religious orders working as additional members of staff in the Roman Catholic schools and as such earn no provincial salary unit. Such teachers in schools of the other denominations receive a salary from their school board.

1. Number in Ontario teaching both elementary and secondary grades cannot be determined from available information. Teachers of grades 9 and 10 in elementary schools are counted perforce as elementary. Others teaching at both levels are classified at one level or the other usually according to the proportion of the salary.

1. Number in Ontario teaching both elementary and secondary grades cannot be determined from available information. Teachers of grades 9 and 10 in elementary schools are counted perforce as elementary. Others teaching at both levels are classified at one level or the other usually according to the proportion of the salary.

TABLE 30. Number of Teachers and Supervisors of Special Classes and Subjects Classified According to Specialty, 1952-53, Eight Provinces Only

Note: This table includes all who reported teaching or supervising special work. Most have special training, but for some of these specialties there are no professional certificates issued by the provinces.
