## PREFACE

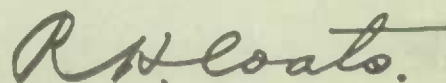

The operation of Canadian public libraries cost less than two million dollars in 1935; in return they loaned over 21 million volumes for home use and did probably between one-third and one-half as much more for reading-room and reference-room borrowers. The year's cost of public libraries per person in Canada was 18 cents, - less than 2 per cent of the cost of public schools, or about 10 per cent of the cost of universities and colleges. In the United States 38 cents per person is paid, and the libraries there are able to loan nearly four books for every man, woman and child in the population, while the Canadian libraries, with less than half as much support, loan two. Yet, library work per capita in the United States is not exceptional, for the circulation in Great Britain is higher on this basis, being four and a half volumes.

Ontario is the only province in which the use of public libraries is as great, per person, as it is on the average throughout the United States. The resident of California reads nine public library books in a year as compared with the Ontario resident's four. In some parts of Canada, however, the public library is becoming a more important institution by the development of modern, regional systems of library service, especially in Prince Edward Island, British Columbia and Ontario, - in the first two with the assistance of the Carnegie Corporation. Chapter I of this Survey reviews these and other trends at length.

Chapters II, III, IV and V review in order the records of 1935 from university and college libraries, government and other special libraries, school libraries, librarian's associations and centres of training. The longest of these chapters describes school library regulations and conditions in each province, and includes a section on forms of co-operation between public libraries and schools.

The latter part of the report is as usual a directory of individual libraries, in three sections: (1) Public Libraries; (2) University, College and Professional School Libraries; (3) Business, Technical Society and Government Libraries.

The Survey is the work of J. E. Mulroney and J. E. Robbins, Ph.D., of the Education Branch of the Bureau of Statistics.

Dominion Statistician.

### Part II. - Libraries Listed Individually

I. Public Libraries .....	A3
II. University, College and Professional School Libraries .....	A19
III. Business, Technical Society and Government Libraries .....	A28

Note on Contents of Part II. - The system of book classification used by each library is shown for the first time in this Survey. The following information appearing in previous Surveys is not repeated: Expenditure on books and periodicals (1931 & 1933); Number of registered borrowers, public libraries (1933); Periodicals received (1931).

## CHAPTER I. PUBLIC LIBRARIES

### Financial Support of Public Libraries.

For this edition of the Library Survey financial statements have been collected from public Libraries in Canada for the first time. They show that the 642 libraries operated on considerably less than two million dollars in 1935. Their work included the circulation of more than 21 million volumes in the year. If their entire support had been applied to this task, the cost of circulating each volume would have been about nine cents, but recorded circulation takes no account of the service given in reading-rooms and reference-rooms, where as much as one-third of the work of larger libraries is done.

The income of the public libraries is set out in detail in the table that follows. It will help further to place the total of \$1,902,691 in perspective, by saying that this is less than 2 per cent of the amount provided annually in support of public schools, or about 10 per cent of the annual sum required by universities and colleges.

### Receipts of Public Libraries, 1935.

Province	Local Taxes	Provincial Grants	Other Grants and Donations	All Other Receipts	Total
	\$	\$	\$	\$	\$
Prince Edward Island <sup>x</sup> .....	-	2,000	22,500	2,884	27,384
Nova Scotia .....	6,915	-	467	4,371	11,753

<sup>x</sup> Includes only Carnegie Demonstration.

<sup>+</sup> A grant to L'Institut Canadien de Quebec.

xx) A grant to the Fraser Valley Union Library.

A comparison with other public educational institutions may be used, too, in studying the sources of library revenue. All Provincial Governments make grants to public schools; not so with public libraries. In the Dominion as a whole, grants constitute nearly 20 per cent of the revenues of schools, but only a little more than 2 per cent of library revenue. Local taxes provide over 80 per cent for both, the difference between the 20 per cent and 2 per cent in provincial grants being made up, in the case of libraries, by private grants, donations, fines, fees, etc.

All Provincial Governments make grants to institutions of higher education, universities or colleges. In the Dominion aggregate they provide about 40 per cent of the cost of such institutions; local taxes contribute little or nothing.

As will be seen in later sections of this Chapter, there are other means than grants by which Provincial Governments may assist public libraries, - travelling libraries, open shelf libraries, departments or boards for their direction and encouragement, etc., - and these should also be taken into consideration in a thorough study of provincial support.

The next table reproduces the other side of the balance sheet, and shows how the libraries' income was spent.

Expenditure of Public Libraries, 1935.

Provinces	Books, Periodicals and Book Repairs	Salaries (Librarians and Librarians' Assistants)	All other Expenses	Total
	\$	\$	\$	\$
Prince Edward Island <sup>x</sup> .....	17,681	9,640	3,854	31,175
Nova Scotia .....	3,465	5,682	2,105	11,252
New Brunswick .....	4,107	8,971	7,550	20,628
Quebec .....	28,795	84,429	66,984	180,208
Ontario .....	284,884	618,670	309,508	1,213,062
Manitoba .....	20,824	35,844	16,823	73,491
Saskatchewan .....	21,572	44,752	33,869	100,193
Alberta .....	27,282	60,290	21,913	109,485
British Columbia .....	39,080	82,742	33,530	155,352
Yukon .....	561	875	351	1,787
CANADA .....	448,251	951,895	496,487	1,896,633

<sup>x</sup> Includes only Carnegie Demonstration.

Expenditure on books has been recorded in two preceding Surveys, and the sum of \$448,251 in 1935 is to be compared with \$426,142 in 1933 and \$517,997 in 1931.

To facilitate comparisons between the proportions of income from different sources, and the proportions of expenditure for different purposes in the several provinces, the following table of percentages is compiled.

Provinces	Per Cent of Receipts from -				Per Cent of Expenditure on -		
	Local Taxes	Government Grants	Other Grants and Donations	All Other Sources	Books, Periodicals, etc.	Salaries (Librarians and Assistants)	All Other Expenses
P. E. Island <sup>x</sup>	-	7.3	82.2	10.5	56.7	30.9	12.4
Nova Scotia .	58.8	-	4.0	37.2	30.8	50.5	18.7
New Brunswick	86.4	-	4.8	8.8	19.9	43.5	36.6
Quebec .....	43.9	.6	5.0	50.5	16.0	46.8	37.2
Ontario .....	87.6	2.9	1.0	8.5	23.5	51.0	25.5
Manitoba ....	96.9	-	.1	3.0	28.3	48.8	22.9
Saskatchewan.	92.4	2.5	.6	4.5	21.5	44.7	33.8
Alberta .....	85.1	3.2	.5	11.2	24.9	55.1	20.0
British Columbia ..	90.4	.1	.5	9.0	25.1	53.3	21.6
Yukon .....	5.4	86.8	-	7.8	31.4	49.0	19.6
CANADA ..	82.7	2.4	2.5	12.4	23.6	50.2	26.2

<sup>x</sup> Includes only Carnegie Demonstration.

Compared with the recommendations of the American Library Association for the apportionment of expenditure, the Canadian libraries do not spend enough on salaries; many of the persons looking after small libraries do it as a benevolent rather than a remunerative work.

#### The Volume of Public Library Work.

Previous editions of this Survey have set down certain qualifying considerations which should be kept in mind in interpreting public library statistics, - especially the fact that population in some provinces is more rural than in others, (remembering that rural-dwellers are more difficult to serve), and that church, commercial and home libraries provide more of the public's reading in some provinces than in others. A record of church or parish libraries in Quebec, the province where they are most numerous, is prepared quinquennially by the Quebec Bureau of Statistics. In 1933 there were 332 parishes reporting libraries. The population of these parishes was reported as 869,037. The libraries had 255,516 bound volumes, 36,257 pamphlets, etc., and 236 subscriptions to magazines and newspapers. The median size of a library was 470 volumes. The circulation of books was 336,757, and the expenditure for purchases of books, binding, etc., was \$8,659.

Keeping a consideration of other types of library in mind, the reader may be introduced to the customary table indicating the volume of public library work, by provinces, in 1935.

Volumes, Circulation and Borrowers, 1935.

Province	Number of Libraries	Volumes	Circulation	Borrowers registered at end of year
Prince Edward Island .....	1	37,960	261,029	21,918
Nova Scotia .....	15	100,041	199,084	22,000
New Brunswick .....	8	89,440	272,550	21,182
Quebec .....	26	598,203	784,449	29,183
Ontario .....	460	3,203,275	14,140,876	814,329
Manitoba .....	31	114,740	810,485	61,825

Alberta .....	24	230,775	1,554,455	63,960
British Columbia .....	30	266,974	1,797,153	103,034
Yukon .....	3	14,113	12,000	389
<hr/>				
CANADA, 1935 .....	642	4,848,793	21,137,902	1,199,815
1933 .....	638	4,770,981	22,376,340	1,114,201
1931 .....	623	4,516,206	21,135,354	-

The experience of a reduced circulation has been general since 1933 partly due to budgets being inadequate to provide a fresh and interesting supply of books, and partly perhaps to unemployed readers becoming less numerous. Some of the larger libraries report the decline entirely in fiction, and a continuous increase in non-fiction reading, - a situation which may not mean any decline in the amount of reading-time spent on public library books.

Some qualification should probably be attached to the apparent increase in registered borrowers since 1933. The increase in active borrowers is likely to be somewhat less, as a name once registered may remain on the library's record for several years, though the person has ceased to use the library.

Similarly, there may be certain "deadwood" in a cumulative record of volumes, but such a compilation should have some value, and is accordingly presented herewith for years at various intervals in the post-war period. The figures are only approximate, for in cases where a library failed to report in any year, an estimate of its size is included.

Public Library Work in Canada and the United States Compared

In the tables that have been presented thus far it is evident that the public library ranks as a much more important institution in some provinces of Canada than in others. In the two preceding editions of this Survey, comparisons have been made in further detail. By means of the lengthy table that follows, some comparisons are made between the individual Canadian provinces and states of the United States. The basic figures for the latter are taken from the American Library Association Bulletin of May, 1935.

The first column, circulation per capita, is the best available index of the public library's importance as an institution, and the states and provinces are accordingly ranked in the table according to this order, - those with the highest circulation per capita coming first. Twenty states rank above the highest province, (Ontario), and more than half of the states precede the second highest province. Taking the two countries as a whole, the United States public library circulation per capita is nearly double the Canadian.

The remaining columns of the table present various relevant data intended to help explain or clarify the situation represented in the first column. The two columns showing the percentages of population rural and the percentages without public library service are not entirely comparable, (even as between Canadian provinces due to different provincial practices regarding incorporation), but they nevertheless can be relied on to represent certain general relationships. In regard to illiteracy, the chief general tendency is for the southern states, where there is a large coloured population and a relatively high rate of illiteracy, to be at the bottom of the library list. The two columns offering most explanation are probably those showing library expenditure per capita, and per volume circulated. The message of these seems obvious. Canadians spend only about half as much per capita on public libraries as the people of the United States, and since they get rather more than half as many books from them, they receive all that they pay for. If the entire cost were set against outside circulation, it would cost nine cents to circulate a book in Canada, ten cents in the United States. Canadian libraries on the whole do not receive the financial support necessary to make them an institution as much-used as in the neighbouring country.

<sup>x</sup> State or Province in which at least one county or regional library system is operating.

(1) Not including parish libraries. If the 1933 circulation figures for parish libraries are included the circulation per capita would be increased to .4.

Adult and Juvenile, Fiction and Non-Fiction

This year, for the first time, the libraries were asked to report separately the number of their adult and juvenile readers. Not all of them were able to do this, about 20 per cent of the borrowers being unclassified in the Dominion as a whole. Yet the reports are sufficiently complete to demonstrate considerable provincial differences in the attention given to juvenile readers. In Manitoba, Ontario and British Columbia the boys and girls are one-third (or more) as numerous as adults, in Alberta and (probably) Saskatchewan about one-fourth as numerous, in Quebec and (probably) New Brunswick about one-fifth as numerous. The figures as reported are given in the following table.

Registered Borrowers Classified as Adult and Juvenile

Province	Adults	Boys and Girls	Not Classified	Total

The younger generation represents a special field of service to which some libraries are devoting a good deal of attention. In the later chapter of this Survey on School Libraries, a section is devoted to describing different types of co-operation between the public libraries and schools, and junior readers generally, that are being tried or practised in individual communities.

Libraries which cater to juvenile readers are liable to increase their circulation very rapidly, for juvenile books, where recorded separately, were reported to have circulated eleven times per volume in 1935 - a rate that is seldom equalled in the use of books in a library as a whole, (i.e. including adult volumes), as will be seen by reference to the following table.

Annual Circulation per Volume in Libraries of Different Sizes

Size of Library (Volumes)		Number of Libraries Circulating										
		Less than once	Once	Twice	Three Times	Four Times	Five Times	Six Times	Seven Times	Eight Times	Nine Times	Ten Times or More
Under 5,000 .....		129	145	74	51	29	9	9	-	1	1	5
5,000 - 11,000 .....		14	20	33	16	18	10	5	5	-	-	-
11,000 - 21,000 .....		-	3	6	5	3	-	8	2	1	2	-
Over 21,000 .....		4	2	3	2	3	3	8	5	4	-	4
All Libraries, 1935 ..		147	170	116	74	53	22	50	12	6	3	9
1933 ..		139	165	106	62	55	26	28	27	9	8	12
1931 ..		172	174	82	55	34	19	36	21	7	7	15

An interesting point in this classification is the tendency for circulation per volume to be highest in the largest libraries, even though some of these have a considerable proportion of their books in a reference section where they do not leave the library, and are accordingly not counted in the circulation at all.

Libraries were asked this year to classify their books and circulation as fiction and non-fiction. In those that were able to do so, non-fiction books, (including reference sections), were found to be in the majority. There were 1,608,865 books of fiction with a reported circulation of 11,992,514, and 1,958,017 volumes of non-fiction with a circulation of 4,346,028. Some of the libraries in making this classification of fiction and non-fiction included juvenile books, while others, (with 135,688 juvenile books accounting for a circulation of 1,487,545), recorded them separately. Still others, with 1,146,223 books and a circulation of 3,311,815, did not make a distinction between fiction and non-fiction at all.

### Systems of Book Classification in Use

In addition to the usual information given in the directory of libraries in Part II of this Survey, there is a column in this edition to show the type of book classification used in each library. This information has not been published before. A summary of it is presented herewith showing how the usage varies in libraries of different size. Only 386 of the 642 libraries report that they have any system of classifying their books, and among these the Dewey Decimal system is used by 301, Cutter by 10, Library of Congress by one, while 74 claim to have devised special plans of their own. The Library of Congress system is used much more in university and college libraries.

### Systems of Book Classification in Public Libraries

### Public Library Staffs

In compiling information on librarians, the association and institute libraries were not included, as they depend largely on voluntary or part-time help. (Only six of them report librarians with library school training). This left 275 libraries in 1935. A summary of the data regarding their staffs is presented province by province in the table hereunder, for comparison with data from libraries of the same kind two years earlier. It shows an increase from 65 to 72 in the number of libraries employing library-school trained staff, and an increase of 46 in the number of such employees.

Province	1 9 3 5				1 9 3 3			
	Number of Libraries	Libraries with any trained staff	Librarians and Assistants	Number with Library school training	Number of Libraries	Libraries with any trained staff	Librarians and Assistants	Number with Library school training

Saskatchewan ....	24	3	59	9	24	3	58	4
Alberta .....	15	4	55	7	14	3	56	7
British Columbia.	7	6	78	41	6	6	49	26
Yukon .....	3	-	3	-	3	-	3	-
CANADA .....	275	72	967	374	272	65	891	328

The same data are presented in the next table arranged according to the size of libraries instead of their location. All but 18 of the 374 library-school graduates, it will be noted, are in the 74 libraries with more than 10,000 volumes. More than one-third of the total are in the Toronto Public Library.

Size of Library (Volumes)	1 9 3 5				1 9 3 3

### The Urban Coverage of Public Libraries

Before turning, in the next section, to review attempts that are being made to bring library service to rural residents, it will be of interest to have a record of the completeness with which library service covers urban communities, (incorporated cities, towns and villages). The following table is for this purpose. Each column, after the first, indicates the extent of library coverage in places of different size, province by province. The key to entries under each province is as follows: -

- (1) Urban population;
- (2) Urban population without public library service;
- (3) Per cent urban population without public library service.

Province	Urban Population	10,000 and over	5,000 - 10,000	1,000 - 5,000	500 - 1,000	Under 500
Nova Scotia -

# Regional Library Systems. Actual and Embryonic

The two-year interval since the last edition of this Survey has witnessed some substantial developments in the direction of regional library service in Canada, especially in Prince Edward Island, Ontario and British Columbia.

Prince Edward Island. - The Carnegie Demonstration has come to the end of its three year term in June, 1936, and the provincial Government has appropriated money for its continued support, though a much smaller sum than recommended by the Director of the Demonstration. A comprehensive and illuminating report on the three-year experiment has been issued, and may be obtained from the headquarters of the Prince Edward Island Libraries at Charlottetown. Some summary statistics are presented herewith. The first table shows where branches have been established and the work that has been done at each in 1935.

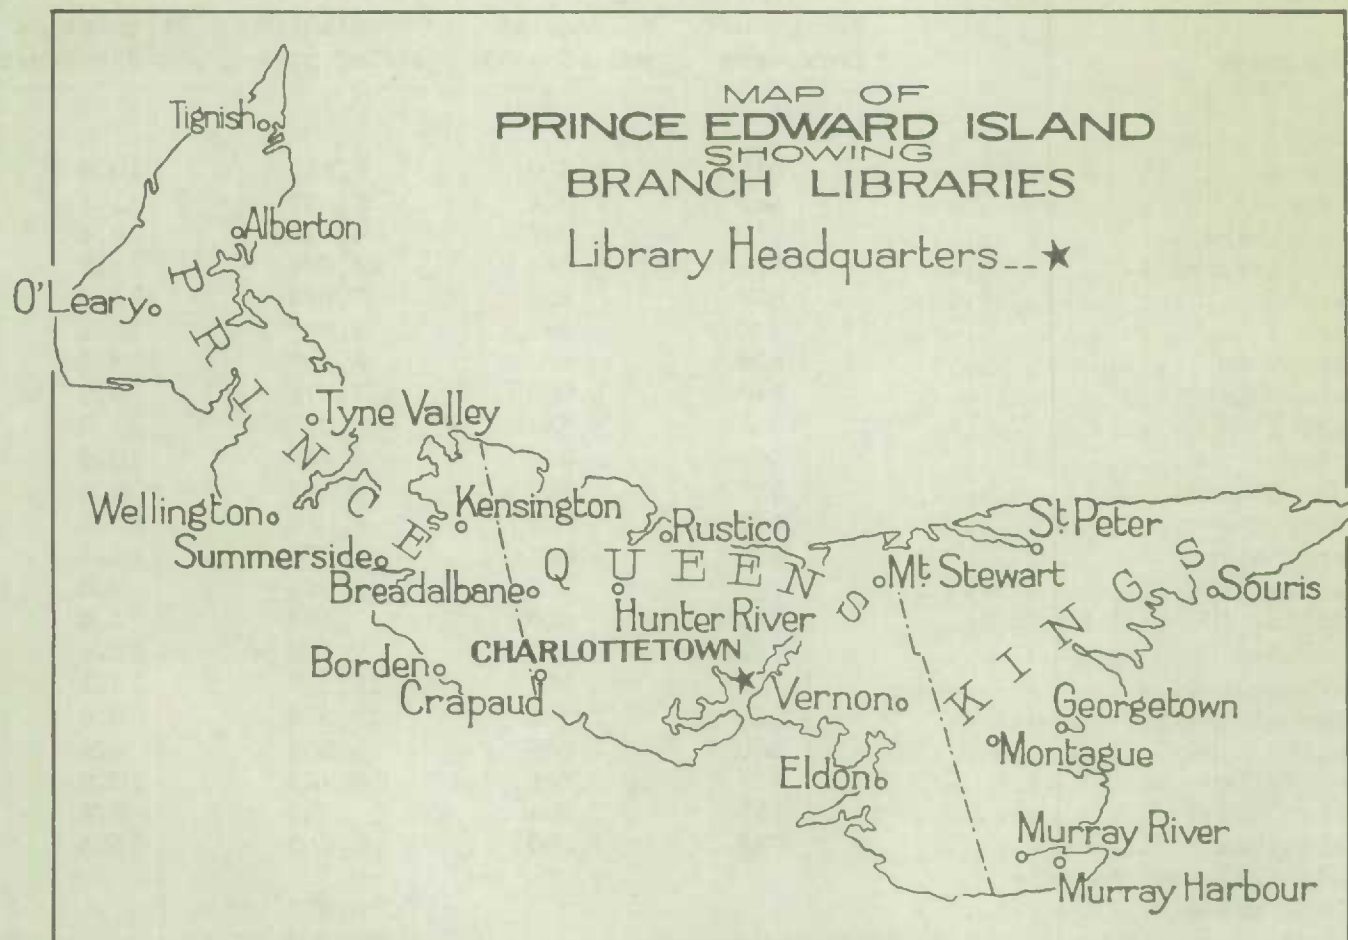

Branches	Registered Borrowers	Volumes at end of year	Circulation during year	Circulation per Borrowers
Alberton .....	812	1,320	8,820	10.9
Borden .....	562	1,021	6,437	11.5
Breadalbane .....	512	1,003	4,794	9.4
Charlottetown .....	5,715	5,823	83,703	14.6
Crapaud .....	682	980	7,684	11.3
Eldon .....	640	993	6,467	10.1
Georgetown .....	636	900	8,592	13.5
Hunter River .....	818	1,060	7,272	8.9
Kensington .....	951	1,336	11,274	11.9
Montague .....	906	1,075	9,458	10.4
Mount Stewart .....	626	917	8,433	13.5
Murray Harbour .....	604	805	8,059	13.3
Murray River .....	596	1,082	9,776	16.4
O'Leary .....	1,110	1,360	9,940	9.0
Rustico, (Deposit Station) ..	426	420	1,461	3.4
St. Peter .....	596	860	7,380	12.4
Souris .....	1,105	1,680	15,578	14.1
Summerside .....	2,053	2,200	17,976	8.8
Tignish .....	1,060	1,239	9,964	9.4
Tyne Valley .....	617	1,101	6,189	10.0
Vernon <sup>x</sup> .....	127	1,204	283	2.2
Wellington .....	764	1,140	8,650	11.3
Study Clubs and Women's Institutes .....			2,839	-
TOTAL .....	xx 21,918	29,519	261,029	11.8

<sup>x</sup> Opened in December, 1935.

xx In addition some 4,000 pupils use the library through the rural schools, and about 1,000 persons through the boxes of books sent to the Women's Institutes. Boxes of 50 selected books are available to Institutes more than five miles distant from a branch library.

	Fiction	Non-Fiction	Total
Number of volumes in library system .....	17,690	20,270	37,960
Number of volumes circulated during year ....	193,161	67,868	261,029
Circulation per volume .....	10.9	3.3	6.9

As already mentioned the table is for the calendar year 1935. By June, 1936, the number of registered borrowers had risen to 23,517. The population of the province is about 88,000. With reference to the figures for circulation, the Director says: "Almost every book which goes out in the winter months is read by several people before it is returned. It is the general opinion of our custodians that we should have a more correct estimate of the actual circulation if the figures were multiplied by three."

Prior to the Demonstration there were only two public libraries in the province. Their circulation was less than 50,000 volumes per year, as compared with the recorded provincial circulation of 261,029 in 1935. Over 25 per cent of the circulation is non-fiction. The book stock of each branch is changed annually, during the summer months,

and in addition any book in the system may be obtained by a borrower on special request, so that his choice is wide and varied. In the winter about 150 books weekly are sent out on special request, the total number thus supplied in three years being 13,500. Rural school teachers may take books to the number of one per pupil for two months at a time, from any branch. Annotated book lists on the following subjects have been supplied to the branches: Economics, Biography, Agriculture, Home Economics, Technical Books, Ships and Sea, War and Peace. Readers consult these and obtain any book by special request.

During the three-year period a total of 41,820 books were bought and put into circulation. A financial statement for the entire period follows: -

<u>Receipts</u>		<u>Expenditures</u>	
Carnegie grants .....	\$ 95,000	Salaries .....	\$ 28,561
Exchange on grants .....	9,749	Books .....	61,218
Provincial Government grant ..	2,000	Periodicals .....	948
Interest .....	2,976	Binding .....	352
Fines .....	787	Supplies .....	3,860
		Printing .....	455
		Travel and transportation ..	5,925
		Furniture and equipment ...	5,306
		Contingent .....	526
		McGill Summer School .....	900
		Maintenance and insurance ..	974
<hr/> Total Receipts .....		<hr/> Total Expenditures ..	
	\$110,512		\$109,025
	<hr/>		<hr/>

A sum of \$6,000 has been voted by the provincial Legislature as support for the last six months of 1936.

Nova Scotia. - The county library system continues to be operated by the Nova Scotia Department of Education through the medium of the rural and village schools. Further reference is made to it in the Chapter of this Survey on School Libraries. At this point it will be sufficient to quote from the Annual Report of the Superintendent of Education for 1935. "No additions were made to the travelling libraries in 1934-35 but the thirteen already organized continued to operate during the year. A study of the circulation figures for eight libraries made during the winter of 1935 showed that on the average each book was read five times in the period from 1932 to 1934. This compares favourably with a similar study made for the period two years earlier and shows that interest is being maintained. It is worth noting that the highest circulations are to be found in small rural sections - often sections receiving special financial assistance, while the lowest average circulations are found in village schools with relatively large enrolment."

Ontario. - The last two editions of this Survey have recorded the beginnings of a county library service in Lambton, sponsored by the Sarnia Public Library, which may be said to have pioneered in the field of regional library service in Ontario. The success of the experiment appears to have aroused considerable interest in other parts of the province, as the last two years have seen the beginnings of regional co-operation among established libraries in several other areas. Some of these can scarcely be called county systems as yet, but all evince the beginnings of collaboration which may result in such. Two of the associations are organized on the narrower basis of a township.

Lambton County Library Association - In operation for the past four years. Eighteen member libraries contribute \$25 annually for the purchase of books. Purchases are made with those of the Sarnia Library, and member libraries may also take advantage of co-operative buying for their own permanent titles. Books are exchanged every three months, twice a year by bookmobile and twice by direct exchange when the librarians from each library select their books from the entire county collection. Member libraries co-operate to the greatest extent possible with neighbouring rural schools. In some cases several schools have formed an association with a member library for the co-operative buying and exchange of books through the county association. During 1935 the 2,717 county books had a circulation of 22,498.

The member libraries are Alvinston, Arkona, Brigden, Copleston, Courtright, Forest, Inwood, Mandaumin, Oil Springs, Petrolia, Point Edward, Port Lambton, Plympton, Shetland, Somora, Thedford, Watford and Wyoming.

Middlesex County Library Association - Organized September, 1934. Twenty libraries in the county have joined the association. An annual membership fee of \$15 paid by each member library is used to purchase, catalogue and circulate the books of the association. Books are exchanged every three months at the London Public Library. Each library arranges for the transportation of its own books. The purchasing, cataloguing and preparing of books for circulation, compiling of circulation reports, arrangement of book packets and the system of exchange is all done by the staff of the London Public Library. The member libraries are Ailsa Craig, Byron, Belmont, Coldstream, Delaware, Dorchester, Glanworth, Glenco, Komoka, Lambeth, Lucan, Melbourne, Mount Brydges, Napier, Newbury, Parkhill, Strathroy, Thorndale, Wardsville and Wellburn.

Dufferin-Peel Library Association - Organized December, 1935. Members, Brampton and Orangeville Public Libraries. Each library will spend \$100 on non-fiction books during 1936. The libraries will exchange books every three months. Inter-library loans are for a period of three months after which the books are returned to the original purchasers.

Elgin County - The librarians of two of the public libraries in the county report that a county library association is being formed.

Essex County Library Association - Organized February, 1935. The six library members each purchase \$25 worth of new books annually. To avoid duplication, a list of the books suggested for purchase must be approved by the Executive Committee of the Association. Seventy-five per cent of the books purchased are fiction, the remainder non-fiction and juvenile. Each library retains its selection of books for two months and then provides for their transportation to the next library. When the circuit is complete the books become the property of the purchasing library. The member-libraries are Amherstburg, Cottam, Essex, Harrow, Kingsville and Woodslee. Other libraries express intention to join the Association.

Huron-Perth Library Association - Organized in January, 1936, for the purpose of selecting and co-operative buying of adult non-fiction to be circulated among the four libraries comprising the Association, - Exeter, Hensall, Mitchell and Seaforth.

Kent County - A county library association, to include the eight rural libraries of the county, is in the process of formation.

Lincoln County - St. Catharines reports that a county library project has been under active consideration for over a year, and that there is reason to hope something will be achieved at an early date.

Norfolk County Library Association. - Three member libraries, Port Dover, Jarvis and Waterford. Each library purchases \$25 worth of books annually. Books are retained by the purchasing library for three months and then loaned to each of the other libraries for a three-month period. The books then become the property of the purchasing library.

Simcoe County. - Public libraries in the towns of Orillia, Midland and Collingwood have made arrangements for the purchase of non-fiction books for their joint use. Each library is assigned a different four-month period in the year, during which time the board agrees to purchase at least \$100 worth of non-fiction books, retailing at \$2.50 or more each. The books are retained in the purchasing library for four months following the period of purchase and then loaned for four months in each case, to the other libraries. The books are then returned to the purchasing library. Any book is subject to recall by either of the other libraries for a three-week period on the payment of 25 cents to cover the cost of mailing. There is also an arrangement under which the three libraries can borrow from one another books which have been on the shelves of the owning library for a year or more.

Howick Township Library Association, (Huron County). - Five libraries in the township pool their money for the purchase of books. Books are purchased four or five times a year. The central book collection is at Gorrie from which place the books are distributed among the libraries. Each library receives a change of books every three months. The libraries are Belmore, Fordwich, Gorrie, Wroxeter and Lakelet.

Salifleet Township Library, (Wentworth County). - The library serves the whole township through eleven deposit stations situated in various sections of the township. The number of books placed in a deposit station depends upon the number of borrowers using the station. The books in each station are changed every three months. Books to the value of at least \$40 are placed in the Township High School Library each year. These are books that have been recommended by the teachers and are not available to the deposit stations. The library is maintained by a township tax levy of less than one-half mill.

Metropolitan Area of Toronto. - The regional problem in an area such as Toronto and environs is in some respects in a different category to any of the foregoing. It will be best understood by quoting from the last Annual Report of the Chief Librarian of the Toronto Public Library: "All along our eastern, northern and western borders there are settlements of people who have chosen to live there to avoid taxes levied on dwellers in the City ..... The Public Libraries Act provides that such persons living outside the municipality may have such (library) privileges by paying a fee set by the Library Board of the City. This would seem to dispose of the case - and so it does logically. But the matter is by no means settled, and by the devious methods known to man some of these people manage to get books; others can't. Such a law is not workable ..... I am suggesting that there be a thorough systematic study made of the matter as it affects Toronto, and that a metropolitan area be planned so that all who live within a certain distance of the City may have an opportunity of sharing in the educational benefits of the Libraries under a general taxing law covering all that territory." Such a survey is being made in 1936.

Other Beginnings in Ontario. - In some cases two libraries have arranged periodic or occasional exchange of a number of volumes, most often non-fiction apparently. Apple Hill, for instance, mentions an exchange with Martintown. In a few cases larger libraries have helped neighbouring smaller libraries by bulk loans. - Galt, for instance, has loaned to Preston and other points. With few exceptions, however, the only collaboration mentioned by the larger libraries, not counting those included

in the above-mentioned associations, is in the matter of inter library loans of one or a few volumes, by special request. Some, of course, discard a considerable number of books annually and donate them to small or weak libraries, as in other provinces.

There appears to be a good deal of variation in the relationships between the town or village libraries and their adjoining rural areas. Some make a definite effort to enlist rural interest, by making the fee little more than nominal, granting concessions in the way of allowing a larger number of books to be taken out by rural subscribers, a longer time to keep them without penalty, or opening the library at hours especially convenient for farmers. A few mention close co-operation with rural schools, Women's Institutes or clubs in the farming community, the latter sometimes putting on concerts for the benefit of the library and in return receiving library service. In some cases the library receives an annual grant from one or more adjoining townships, (rural municipality), for its service to rural patrons. A small number of the libraries are primarily rural community organizations, one for instance being conducted by a rural school section, (district).

Prairie Provinces. - With the exception of five larger centres, public library service in Manitoba is provided by women's organizations, mainly Women's Institutes. Many of the Institutes exchange a few dozen or a few hundred volumes with a neighbouring institute when an opportunity presents itself, but there seems to be no established system in the exchanges. This method of interchange extends even to the travelling libraries supplied by the Department of Education, it being less costly to move them from town to town than to return them to Winnipeg for reshipment. Several Saskatchewan and Alberta libraries also mention occasional exchanges, but none reports any regular system. One library says, "have tried but no success so far."

Two city libraries in the Prairie Provinces give special attention to their surrounding rural territory. These are Saskatoon and Lethbridge. The scope of the work at Saskatoon has made it seem more appropriate to include the description with the section of this Chapter on travelling libraries. Lethbridge reports that it has a membership of about 500 outside the city, made up of individual members and members in schools, accounting for a circulation of 14,000 in 1935. A small fee is charged for rural membership. Individual members receive their books in person or have them sent in and out by mail. Arrangements with the schools are described in the Chapter of this Survey on School Libraries.

British Columbia. - In this province there seem to be very few exchanges arranged between independent libraries, due probably to the fact that it is possible for smaller libraries to obtain substantial book-loans from the provincial Public Library Commission. There are, however, noteworthy developments to record in the direction of genuine regional library service. In 1934 the Carnegie Demonstration in the Fraser Valley became the publicly-supported Fraser Valley Union Library, a permanent regional institution. And as a result of the work of the Demonstration, the Okanagan and Kootenay districts voted in January last to organize regional libraries similar to the one in the Fraser Valley. There was also a plebiscite on the question on Vancouver Island but the vote was not heavy enough to warrant the adoption of the system. Vancouver Island has subsequently increased its favourable vote and a union library is at present in the process of organization. The Kootenay district, however, has decided not to go ahead with the scheme.

NOTE: Where it is impossible to separate the circulation figures for adjacent units, one set of figures is shown for them combined.

Each unit of local government constituting the union library district is assessed on a basis of 35 cents per capita population. The method of raising the required amount is left to the various units. The income side of the library's financial statement for 1935 shows \$14,230 collected in tax assessments, a provincial grant of \$200, fines, fees, etc., amounting to \$452, making total receipts of \$14,882. On the side of expenditure, \$8,024 went to salaries, \$2,744 was spent for books, not including \$198 for periodicals and \$700 for binding and repairing. Operation of the book van cost \$705, rent and maintenance of property \$1,302. Total expenditures were

approximately the same as income.

### Co-Operation of Public Libraries with Adult Study Groups

The preceding pages have recorded attempts that are being made to broaden the field of library service beyond the range of individual cities and towns, to make the urban libraries something more than isolated cases with wide intervening expanses of book-desert. There is, however, another kind of isolation which the public libraries must avoid if their fullest potentialities are to be realized. It is the isolation of a "water-tight" compartment in the community life, where the library lacks any vital relationship with the other educational organizations of its constituency, - the schools, adult study groups, clubs, associations, and the like. A later Chapter of this Survey will describe forms of collaboration between public libraries and schools that have been worked out in different communities; the present section will tell of steps that the libraries have taken to assist organized educational enterprises for the adult population, especially study groups of one kind and another. It is not exhaustive in detail, and probably does not even mention all communities where such collaboration is practised, for the thoroughness of the review is limited by the amount of information that was volunteered. But it should at least be illustrative of the ways in which the public libraries are giving assistance and direction to the adult education movement.

Prince Edward Island. - In Prince Edward Island the Carnegie Demonstration has not only followed a definite policy of co-operation with established local groups, especially the Women's Institutes, but from the outset has given active assistance and encouragement to the formation of community study clubs. The Director's Report for 1935 says: "We send packages of books to discussion and study groups. There are a number of these studying Crédit Unions, Social Credit, Unemployment, and a variety of other subjects." In considering the possibility of a well-defined island-wide development in adult education similar to the one in Cape Breton centering on St. Francis Xavier University, the Report says: "There are possibilities in Prince Edward Island of a similar awakening and the library would have a vital part to play in it."

Nova Scotia, New Brunswick and Quebec. - In the two larger Maritime Provinces the only public libraries reporting co-operation with study clubs are Halifax and Truro in Nova Scotia, Sussex and Woodstock in New Brunswick. At Woodstock a club for young men meets in the library. From Quebec, only Ayers Cliff and Montreal Children's Library, and the Fraser Institute say that they attempt to co-operate with study groups. Here as elsewhere of course there may be little in the way of systematic group study for the libraries to encourage.

Ontario. - About 50 of the Ontario libraries report arrangements with study clubs. Those giving any details are mentioned herewith in alphabetical order, although the reader should be warned that it is not possible to do justice to the scope of the arrangements in the larger centres in so brief a summary.

The Travel Club uses the library for material for papers on different countries at Almonte. This appears to be one of the most popular varieties of study club in the province. There are such clubs at Aurora and Ayr, the next two towns in alphabetical order, enjoying the co-operation of their library in obtaining books on the countries in which they are interested each year. The Corby Library at Belleville compiles book lists for groups on request, and these are frequently published in the local newspaper. Brampton suggests books for reading and review in the local Travel Club and Book Club. The Campbellford librarian reports that she is starting a Reading Club that will follow a

definite programme. Chatham prepares special suggested lists and purchases added titles along the line of study planned by groups. Two Reading Clubs at Collingwood draw on the library for their books. Cornwall aims to supply the books required by study clubs, Dundas and Dunnville each help one club. Gore's Landing sponsors a monthly literary meeting. Guelph gives special attention to the needs of groups. Hamilton prepares programmes and collects special information for the use of study clubs. Ingersoll mentions the securing of special books on art appreciation and on psychology for use in conjunction with two corresponding series of university extension lectures. Kingston reports the loan of books to Girl Guide summer camps; Kirkland Lake to the Young Women's Christian Association.

This review probably does not mention all of the libraries having a club room or lecture room in which study groups may meet, but the next three in alphabetical order are in this category. Kitchener says: "Our club room is open to clubs, which are largely university extension groups. We have two which meet every week during the season. Lists of books are made on any given subject for literary clubs, and addresses are given by the librarian and other members of the library staff." The London library "co-operates closely with Parent Education classes, Workers' Educational Association, University Extension, and Art classes, through book lists and by having such groups meet in the library." Niagara Falls reports: "Study groups have the use of a club room in the library. Also, the library sponsors an Art Club which meets once a week for practical work and instruction. In addition to this a series of five university extension lectures were held."

North Gower co-operates with the Boy Scout troop by allowing each scout to become a patron for 25 cents, the sum entitling him to a book every week. The same arrangement is open to young farm hands of the district. Oshawa gives advice to clubs on subjects as well as on books. Ottawa has a lecture room used by the Arts and Letters Club and other groups. Peterborough helps clubs in the purchase of books, and aims to be liberal in the time allowed on borrowings. Similarly with Pickering which says in addition: "Although there is no reference department in the library, anyone engaged in preparing material for a group is allowed the privileges of a reference library." St. Catharines writes: "Every possible assistance and interest is taken in Clubs that present their problems to the library." Besides the more common types of co-operation mentioned, St. Thomas arranges special displays of books in the library at the request of clubs. Sault Ste. Marie has a girls' reading club in connection with the juvenile department. Shelburne buys a magazine and books to meet the needs of a club. Simcoe helps an English Club and a Travel Club; Sombra an unspecified club. Walkerville helps to plan programmes and sees that necessary books are in the library. At Watford a Reading Club meets in the library basement. The Weston librarian says: "I am keenly interested in the Literary Club, Home and School Association, and mental health study group. I assist with their programmes by securing some of the speakers and material." At Whitby, presidents of clubs get the books required and are responsible for them, while the library tries to purchase what is required. Windsor makes bibliographies for all study groups.

Several libraries say that they give definite help to study groups without mentioning what form it takes. These include Bobcaygeon, Galt, Gananoque, Honeywood, Mount Forest, Newmarket, North Bay, Owen Sound, Pembroke, Port Arthur, Port Colborne, Ripley, Sarnia, Stouffville, Toronto and Walkerton.

Manitoba. The only libraries in Manitoba reporting co-operation with study groups are Winnipeg and Portage la Prairie. The former does not give details. The latter says: "We co-operate with the Arts Club in reading courses, and the Club last year bought the new Encyclopaedia Britannica for the library."

Saskatchewan. - Moose Jaw reports that it caters to the needs of study groups; Regina that it works constantly with study clubs, musical and other organizations of a similar nature. Saskatoon says: "In our book purchases study groups are given 'right of way', over all other requirements. Lists of required books are received from about twenty groups, usually in the summer and a month or so before the group starts work. If the study group is large additional copies of each title are secured. The groups are permitted to borrow the books for the whole winter and make the necessary exchanges within themselves. This means, of course, a good deal of duplication as there are many books required by groups which we have to have for the general public as well."

Other libraries claiming to co-operate with groups for study are Battleford, Gabri, Macklin and Rosetown.

Alberta. - Calgary "serves numberless study groups with books." At Cardston "the young people's organization of the Mormon Church, when they have finished with the books furnished for their winter study, place them in the library." Edmonton works with the Arts and Letters group of the Local Council of Women and the Dickens Fellowship Study Group. At Red Deer clubs donate part of the price of particular books needed. Libraries not specifying the nature of their collaboration are Beverly, Camrose, Lethbridge and Medicine Hat.

British Columbia. - The Fraser Valley Union Library besides having its own study clubs in connection with its branches, co-operates with groups otherwise sponsored. New Westminster says: "Study clubs send in lists of books desired and these are loaned on special reference slips, for the time required." North Burnaby reports: "A Book Club (fiction) is run by the library. This makes it possible to buy some newer fiction, which is later brought in for ordinary circulation in the library when the club members have read the books." Prince Rupert procures material for two reading clubs. Victoria says: "We co-operate with study clubs in making lists of books and in lending books." Vancouver and Nanaimo also report co-operation with study groups, but give no details.

#### Women's Organizations in Public Library Work

If the directory in the latter part of this Survey is consulted it will be seen that a considerable number of the libraries recorded in the public library section, especially in some provinces, are conducted by women's organizations, - The I. O. D. E., United Farm Women, Women's Institutes, etc. There are many other community libraries conducted by such groups which do not appear in the list, as it does not attempt to include those with fewer than 300 books. There are very likely some of the larger size omitted due to the difficulty of securing a complete list of them. Some seem to be working away and offering library service so unostentatiously that even the provincial headquarters of their organization have no record of it.

Mention has already been made of the way in which the Women's Institutes in Prince Edward Island have been co-operating with the new provincial library system. Occasional Institutes in the two larger Maritime Provinces and Quebec conduct Community libraries, or in various ways assist existing libraries. Similarly in Ontario where 85 branches give financial assistance to a library, several donate books, and 27 own and maintain one. Outside of five cities and towns, Manitoba communities are almost entirely dependent on women's organizations, especially Women's Institutes, for community libraries. In Saskatchewan many of the Homemaker's Clubs go in for library service. The summary that follows, from an unpublished study of their library work made in 1935 by the Director of Women's Work at the University of Saskatchewan, is reproduced here, in the belief that some of the comments and constructive suggestions may be applicable also in other provinces.

"A number of Homemakers' Clubs are responsible for library services in their communities and are thus meeting a real need of the people living there. The greatest weakness of our present method, or lack of method, seems to be the fragmentary way in which the work is being carried on, the excessive duplication of certain types of reading available, and the failure to meet the need for other types. Those who have considered the problem realize there should be some method of co-ordination, but are puzzled as to how to proceed. There is also the question of expense in inaugurating a centralized system and paying a full-time worker for services which are not given voluntarily or which are rewarded by a very small remuneration.

"Units for consolidation might be the municipality, a city of larger town with its subsidiary communities, or in some cases, the territory included in a district Homemakers' organization.

"Since my work is largely with Homemakers' Clubs, I shall speak first of some possibilities here. The Davidson district includes the towns on the Canadian National Railway line between Regina and Saskatoon, from Hanley to Chamberlain, with adjoining communities. At all of the towns, as well as at Dundurn, the Homemakers' clubs maintain lending libraries. The annual amounts available for upkeep are small, and every year there is a desire expressed to exchange books. Since each group has acted independently in making selections and all have been influenced to buy the most talked of books, there is little opportunity to make exchanges. At the last convention of the Davidson district in October, 1934, I suggested the appointment of a district library committee, who would receive requests and recommendations for books and who would place orders for all the libraries in the district, endeavouring to select in such a way that parcels of books could be exchanged by the different towns at intervals during the year. While all the districts in the province are not so compact or the clubs within such easy access of one another, there are others where a similar policy might be adopted. A few efforts are being attempted in different parts of the province and a brief outline of these follows.

"When I was in Indian Head a few weeks ago, a rural club whose members live some miles from the town raised the question of establishing a library in their community. I advised them against this until they had tried out a system of co-operation with the town library, contributing what money they had to spend for books to the Indian Head library and making an agreement whereby they could get parcels of books from town at stated intervals.

"An experiment of this nature is in operation at Kerrobert now. When the Halcyonia Homemakers' Club asked me how they might get some of the books being distributed by Mr. Angus Mowat, Saskatoon City Librarian, I hinted that they had better leave these for some of the outlying districts of the province and try to make an arrangement with the I. O. D. E. library at Kerrobert. They have done this, club officers get the books from Kerrobert and take them back and the club pays a stipulated sum to the library.

"The Garnock Homemakers' Club, (10 miles from the town of Kelliher), conducts a Mechanics and Literary Institute Library so as to give a maximum of service. The collection of more than 600 volumes is divided into three parts, two of these being placed at country points and the third in the town of Kelliher. These are exchanged from time to time. This library also receives from the parliamentary library at Ottawa copies of a number of outstanding monthly journals and reviews.

"Another Homemakers' group that is rendering excellent service to its community is the White Heather Club of Govan. Not only do they have good modern fiction,

but their books include poetry, classics, travel, history, economics and biography. This club has a well-qualified library committee that handles the yearly appropriation of about \$50 most economically and thoughtfully.

"At Nokomis, the Wreford and Mount Hope clubs have combined forces on the library in the town. Although they have over 1,000 volumes, these are not so well selected as those of White Heather. Smaller libraries are operated at Tate, Venn, Simpson and Semans.

"A consideration of the above statements combined with a study of the map of Saskatchewan would indicate that Nokomis would be an appropriate centre for a regional library experiment. Weather conditions in Saskatchewan do not permit automobile travel in the winter months and Nokomis' position on two lines of railway seems ideal.

"If the American Library Association should decide to recommend that the Carnegie Corporation conduct a Library experiment in Saskatchewan similar to those now in progress in the Fraser River Valley of British Columbia and in Prince Edward Island, I should be most happy to encourage our Homemakers' Clubs to give the project their utmost support."

In Alberta and British Columbia, women's organizations participate to some degree in library work. Two I. O. D. E. libraries in Alberta are recorded in the directory of this Survey. The president of the Alberta Women's Institutes says: "I believe there are 22 branches of the Alberta Women's Institutes which own libraries. In each of these there are from 200 to 500 books on the shelves, and in addition travelling libraries are obtained from the University Extension Department. The libraries have as subscribers, not only institute members, but they are available to all persons in their local communities."

### Travelling Libraries

Statistics relating to public library service would not be complete without reference to the travelling libraries which circulate in every province of Canada. The object of travelling libraries is to supplement the book stock of small public and school libraries and to provide some public library service in communities otherwise without any. Three universities, Acadia, Dalhousie and St. Francis Xavier conduct such a service in Nova Scotia, and McGill University circulates libraries in Quebec and the Maritime Provinces. Each of the five most westerly provinces operates a provincial system of travelling libraries with headquarters at the provincial capital. In Saskatchewan the provincial service is augmented by libraries sent out by the Saskatoon Public Library, while in Alberta the Lethbridge Public Library circulates boxes of books among the rural schools in the vicinity of the City. (See Chapter on School Libraries). The National Chapter of the I. O. D. E. operates a system of travelling libraries and reports 18 libraries in circulation during 1934-35. Seven were circulating in British Columbia, six in Nova Scotia, and two each in New Brunswick and Prince Edward Island.

The following table is a summary of the activities of the various universities and provincial government departments offering this form of public library service during 1935. The circulation of the books is not shown as in most of the provinces no record of such figures is available.

Travelling Library Sources in Canada	Books available	Number of libraries sent out	Average number of books to a library
Acadia University .....	175	9	25
Dalhousie University .....	1,094	22	30

University of Alberta .....	12,075	345	35
British Columbia Library Commission .....	50,000	570	80
Imperial Order Daughters of the Empire ...	x	18	x

Compared with the years immediately preceding, there was, generally speaking, an increase in the work done by the travelling library systems of the universities in the four most easterly provinces, and by the Ontario system; but financial support was insufficient to permit the western provincial systems to continue their growth. The Manitoba libraries suffered most in this respect, their appropriation having been suspended since 1933. Significant trends in the Ontario system, including the increased use in schools and enhanced proportion of adult non-fiction, are in evidence in the four-year summary that follows:

	1932	1933	1934	1935
<b>Libraries loaned to -</b>				
Public libraries .....	151	143	198	247
Schools .....	12	53	59	192
Women's Institutes .....	67	98	85	77
Miscellaneous .....	138	145	103	82
<b>Total - Ontario .....</b>	<b>368</b>	<b>439</b>	<b>445</b>	<b>598</b>
<b>Circulation -</b>				
Juvenile .....	7,433	9,393	15,105	17,131

Adult Fiction .....	13,709	15,648	12,926	15,040
<b>Total - Ontario .....</b>	<b>25,112</b>	<b>32,057</b>	<b>37,073</b>	<b>42,021</b>

The provincial system in Saskatchewan maintains its pre-eminence in point of volume of work done. Its coverage of the province is so general that a map is included in this Survey, (page 30), to demonstrate it. For three years the province has also had

SASKATCHEWAN TRAVELLING LIBRARIES, 1936.

Regina, Provincial Bureau of Publications, Library Headquarters ■  
Each dot represents a community receiving a library.

the advantage of a somewhat similar service from the Saskatoon Public Library an enterprise that calls for description at some length.

Starting in 1933 the librarian of the Saskatoon Public Library solicited and received used books from large public libraries in eastern Canada, especially from Toronto Public Library, and the I. O. D. E. They were carried free by the railways to Saskatoon where they were sorted into boxes and shipped to rural communities, mainly to the drought area in the south-west part of Saskatchewan and the newly-settled districts in the extreme north. A few were sent to Manitoba and Alberta. The Saskatoon Library supplies the packing cases, sorts, lists and ships the books, and keeps a history of each box as it travels around. In two years 716 boxes containing 39,380 books were sent out, and exchanges between localities without returning the books to the city bring the total to 50,000. Individual readings or circulation of the books would be several times this figure. It is expected that about 400 boxes will go out in 1935-36, and it is proposed to carry on the work as long as books are available. Freight is paid from Saskatoon, out and return, by the borrower. The communities are informed of the availability of the case-libraries through the co-operation of the press.

Next to Saskatchewan the British Columbia Public Library Commission sends out the largest volume of books as travelling libraries. The libraries here are considerably larger than from other sources. Most of them are sent out from Victoria, but since 1933 the Commission has had a branch operating at Prince George to serve areas remote from the capital. The following table shows trends in the last six years.

	1930	1931	1932	1933	1934	1935
<b>Libraries sent out -</b>						
General .....	356	403	396	421	387	408

#### Open Shelf Libraries

Open shelf library service, the loaning of specified books by mail to individual borrowers distributed over a wide area, is offered in most of the provinces. The books are mainly non-fiction and may be borrowed one, or a few at a time. In some cases the borrowing is restricted to teachers, clergymen, or other occupational groups.

The Nova Scotia Department of Education and the Protestant section of the Quebec Department of Education maintain such libraries for the use of school teachers and inspectors. McGill University conducts a service of this type for clergymen and 90 books were loaned during the year. The Legislative library of Ontario offers such a service to school teachers, provincial civil servants and members of the legislature. The Public Libraries Branch of the Ontario Department of Education offers a limited open shelf service for persons unable to obtain specific volumes from their local library, or without library service. Wesley and Manitoba Colleges have a collection of some 250 books, available to country ministers. During 1935, 117 ministers registered as borrowers and a circulation of 942 was recorded.

St. Francis Xavier University maintains an open shelf library for the use of the members of the study clubs organized by its Extension Department. The library contains 1,500 volumes, practically all of which are non-fiction. During the year some 3,000 volumes were loaned. Expenditure on books and book repairs amounted to \$600.

The Manitoba Department of Education maintains an open shelf library containing 1,175 books. During the year 740 books were mailed to 515 registered borrowers on a postage fee basis.

The Saskatchewan Bureau of Publications operates an open shelf library containing some 11,000 volumes. The books are practically all non-fiction.

University of Alberta. - The circulation of 19,726 recorded by the open shelf library of the Department of Extension was the highest in the history of the library. Of the total circulation, 13,707 were non-fiction and 6,019 were fiction. In addition 2,536 pamphlets and clippings were loaned. Another service offered by the library is the distribution of plays to amateur dramatic groups. During the year 597 communities were supplied with a total of 5,575 plays.

British Columbia Public Library Commission. - The open shelf library of the Commission, a collection of non-fiction books, loaned 10,882 volumes as compared with 8,527 in 1934. The persons taking advantage of this service numbered 4,084, an increase of 1,153 over the previous year. In addition the Prince George Branch made 6,951 loans to individual borrowers.

#### Provincial Departments or Boards

In the statistical summary of financial support, appearing on a previous page, it was apparent that there are considerable differences in the extent to which public libraries are subsidized by provincial Governments. There are, of course, other ways in which the Province may assist, besides by grants in cash. Among these are the provision of travelling libraries and open shelf services, which have now been reviewed. Still another, however, is the maintenance of a branch of the provincial Government to give assistance, direction and co-ordination to public library work in the way that the Departments of Education do for the schools. Only two provinces have well-defined organizations for this purpose, - Ontario and British Columbia, the two in which public library service is most complete, (except for the new scheme in Prince Edward Island). The Public Libraries' Act is administered by the Department of Education in Saskatchewan and Alberta, but the interest of the Departments seems to be confined mainly to the routine payment of grants, as there is no employee of either entirely devoted to library work, and the supplementary library services of the Governments, including travelling and open shelf libraries, are conducted by other Departments, (in Alberta, by the provincial university).

In Ontario there is a distinct branch of the Department of Education, the Public Libraries Branch, concerned with library work. It is headed by an Inspector of Public Libraries and is responsible for the quarterly Ontario Library Review, the only library periodical published in Canada. The Annual Report of the Branch, to which the reader is referred for a review of the current scope of its work, constitutes a section in the Annual Report of the Minister of Education.

The provincial body in British Columbia is the Public Library Commission, consisting of three members without remuneration, but maintaining a permanent staff in Victoria whose duty is to assist and encourage the development of public library service. As does the Public Libraries Branch in Ontario, it conducts the provincial travelling and open shelf libraries. An Annual Report of its activities is published as a self-contained bulletin.

#### Public Library Legislation, 1934-35

Public library legislation enacted since the publication of the last survey was almost totally confined to the provinces of Prince Edward Island and British Columbia. In both of these provinces the permanent adoption of the Carnegie Demonstrations necessitated the new legislation.

Prince Edward Island. - Chapter 14 of 1935 is a Public Library Act empowering the Lieutenant-Governor in Council to appoint a Public Library Commission consisting of seven members. The Act outlines the duties and powers of the Commission and provides for the appointment of a duly trained and qualified librarian as **superintendent**. The superintendent, in addition to supervising the administration of the Act, is to act as Secretary of the Commission. This Act was repealed in 1936.

Nova Scotia. - The Plympton Public Library Society is incorporated by Chapter 101, 1934.

New Brunswick. - Chapter 77, 1934, confers certain borrowing powers on the Commissioners of the Free Public Library of Saint John but limits the total of the loans at any one time to \$10,000.

British Columbia. - Chapter 42, 1935, amends several of the sections of the Public Libraries' Act dealing with the formation of union library districts. The ballot used in the vote required for the formation of a union library district was formerly worded "Are you in favour of establishing a union library district in the area set out in the Order-in-Council providing for this plebiscite?" In future the ballot will read "Are you in favour of your, (municipality or rural school district, as the case may be), becoming part of a union library district to be formed under the provisions of the Public Libraries' Act?" Only those municipalities or rural school districts having an affirmative majority are included in the proposed district. Provision is also made for the inclusion of any municipality or rural school district which may later enter into a written agreement with the board of management of the union district.

The board of management is to consist of one representative from each municipality and from each rural school district with a population of 1,000 or more. Rural school districts with a population of less than 1,000 appoint a joint representative for every 1,000 of their combined population. The representative of a municipality must be an elector in that municipality while the representative of a rural school district must be a qualified voter of the district. The tenure of office of each representative is not to exceed two years. The representative of a municipality is to

have a vote for each complete 3,000 of population in his municipality. Representatives of rural school districts each have one vote. Extraordinary expenditure must be approved by a vote of not less than three-fifths of the total vote of the representatives of the board of management.

oOo

## CHAPTER II. - UNIVERSITY, COLLEGE, AND PROFESSIONAL SCHOOL LIBRARIES.

The libraries for which data are summarized here are listed individually in the second table, (or directory) of Part II. They include normal schools. Their readers are mainly students and teaching staff of the institutions possessing the libraries, - about 65,000 full-time students and 7,000 teachers or professors.

In 1935 these libraries found more money for books than in either 1933 or 1931. The net increase in the number of volumes they reported was greater in the biennium 1933-35 than in the preceding. A contributing factor was the special annual grants of the Carnegie Corporation of New York to 30 of the libraries during the three-year period 1932-35. These grants exceeded \$200,000.

There are 232 libraries in this group. Compared with the 275 larger public libraries, (for which the classification in Chapter I showed a staff of 967, of whom 374 had library-school training), the university and college libraries reported a staff of 608, of whom 151 had attended a school of librarianship. Some of the 608 were student volunteers not receiving pay.

Statistics of the libraries by provinces are summarized below. The large number in Quebec results from the different organization of this province's secondary and higher educational system, - the large number of classical colleges, preparatory schools and theological seminaries of religious orders.

### Summary Statistics, University, College, and Professional School Libraries, 1935.

Province	Number of li- braries	Volumes	Pamphlets (where recorded)	Period- icals Received	Expen- diture, books and period- icals \$	Staff	Number of staff with library school training
Prince Edward Island	2	9,201	x	57	2,727	2	2
Nova Scotia .....	18	392,249	29,650	745	23,181	39	11
New Brunswick .....	6	88,845	6,340	266	8,161	13	4
Quebec .....	107	1,905,331	151,279	6,261	100,766	264	41
Ontario .....	51	1,195,316	201,288	6,047	99,362	184	60
Manitoba .....	12	146,085	1,270	676	22,277	31	10
Saskatchewan .....	15	131,756	27,413	518	8,070	28	7

British Columbia ...	8	126,294	11,631	526	17,677	24	6
CANADA, 1935 ..	232	4,116,144	433,171	15,787	289,221	608	151
1933 ..	232	3,856,713	398,025	-	235,029	-	-
1931 ..	230	3,615,402	-	16,191	246,617	-	-

The next table classifies the libraries according to size instead of location. The number of libraries in any single size group changes, of course, from year to year. The only size-group showing a fall in the number of volumes since 1933, with the number of libraries remaining the same, is the last on the table. This fall is due to the Gest Chinese Library being no longer reported by McGill. It has not been open for some time, and in 1936 arrangements have been made for transferring it to Princeton University.

University, College and Professional School Libraries, Classified According to Size, 1931, 1933, 1935.

Size of Library (Volumes)	1 9 3 5		1 9 3 3		1 9 3 1	
	Number	Volumes	Number	Volumes	Number	Volumes
Under 1,000 ....	14	7,145	24	13,315	26	12,234
1,000 - 5,000 ....	77	218,700	77	208,494	80	209,492
5,000 - 10,000 ....	51	351,547	54	382,913	53	360,345
10,000 - 20,000 ....	40	498,110	30	385,272	24	305,132
20,000 - 30,000 ....	17	418,200	17	406,587	18	405,206

100,000 - 200,000 ....	2	284,574	2	261,638	3	387,636
Over 200,000 ....	3	883,593	3	950,341	2	725,827
TOTAL .....	232	4,116,144	232	3,856,731	230	3,615,402

The directory in Part II shows for each library the system of book classification in use. This information is summarized in the table below. Many of the libraries, especially those in Quebec, do not report the use of any standard system. The chief contrast with the usage of public libraries is the greater use of the Library of Congress and Cutter systems in the colleges and universities.

Systems of Book Classifications in University, College and Professional School Libraries.

Size of Library (Volumes)	Number of Libraries	Number reporting a classification system	System Reported			
			Dewey Decimal	Library of Congress	Cutter	Special and Other

### CHAPTER III. - BUSINESS, TECHNICAL SOCIETY AND GOVERNMENT LIBRARIES

The libraries included under this head are listed individually in Table III of Part II. They do not represent a single clearly-defined class as do the public and college libraries discussed in the two preceding chapters. This is rather a list of important book collections that come to the attention of the compilers and that are not included in the public and college groups. It is believed that the list of government libraries is reasonably complete, but there is no assurance regarding some of the other types, especially the business of company libraries, as it is manifestly not feasible to circularize all companies where libraries might exist. The names and locations of further libraries that merit a place in the list will be gratefully received by the Education Branch of the Dominion Bureau of Statistics.

The first table hereunder classifies the libraries according to general types of ownership, and offers certain statistical information for each group.

Classification	No.	Volumes	Pamphlets (where recorded)	Periodicals and news- papers received	Libraries having full-time librarians		
					No.	Total Staff	<sup>x</sup> Number who have attended a school of librarianship
<hr/>							
Government Libraries --							
(a) Dominion	37	990,932	282,969	4,602	20	64	16
(b) Provincial	19	790,034	177,378	1,808	10	37	13
<hr/>							
Technical Society Libraries --							
(a) Law Societies	13	229,202	540	513	10	16	2
(b) Other Societies	19	118,429	16,234	839	7	8	6
<hr/>							
Business or Company Libraries	38	105,135	52,800	3,109	25	54	17
<hr/>							
Y.M.C.A., Y.W.C.A. and Y.M.H.A.	8	27,391	1,185	126	3	5	3
<hr/>							
Other Libraries	16	50,957	3,961	516	4	10	3
<hr/>							
TOTAL	150	2,312,080	535,067	11,513	79	194	60

<sup>x</sup> Only four members of the staffs of the 71 libraries not employing a full-time librarian have attended a school of librarianship.

From the standpoint of size, the government libraries are dominant. Only a few of the smaller Dominion Government libraries are outside of Ottawa, and something like 40 per cent of the volumes in Ottawa are in the Library of Parliament. There are half a dozen specialized Departmental libraries of more than 60,000 volumes.

Provincial Government Libraries are about half as numerous as Dominion, but the Legislative libraries are large enough to bring the total number of volumes up to a figure approaching that of the Ottawa libraries.

Government libraries have a staff of 101 persons. One-fifth of the Dominion librarians have had library school training, one-quarter of the provincial. The Dominion proportion is about the same as in university and college libraries, but a considerable proportion of the college library help is voluntary or only partially paid whereas the government librarians are full-time employees.

Among the libraries owned by technical societies, the law collections average much the largest, though there are several other relatively large libraries including those of the Royal Society of Canada, Academy of Medicine and Royal Canadian Institute.

Most of the business or company libraries are intended purely for reference use by technical and executive employees, although a few are educational libraries for the use of the staffs in general.

The group "Other libraries" includes libraries for the blind at Toronto, Montreal and Winnipeg, the libraries of local historical associations, etc.

The statistical data of the foregoing table arranged according to size of the libraries appears as follows: -

Size of Library (Volumes)	Number of each size	Volumes	Pamphlets (where recorded)	Periodicals and news- papers received	Libraries having full-time librarians			
					Number	Total Staff	Number who have attended a school of librarianship	
Under 1,000	32	17,093	27,343	694	9	14	3	
1,000- 5,000	60	153,022	94,306	2,696	22	31	13	
5,000- 10,000	20	134,306	19,730	2,433	15	33	16	
10,000- 20,000	16	218,016	41,540	1,186	13	24	10	
20,000- 30,000	5	118,872	3,900	343	4	12	3	
30,000- 40,000	1	35,000	10,200	-	1	1	-

50,000-100,000	7	489,172	217,000	1,636	7	24	5	
100,000-200,000	2	315,057	41,548	546	2	8	1	
200,000 and over	2	613,000	75,000	996	2	37	6	
TOTAL ....	150	2,312,080	535,067	11,513	79	194	60	

## CHAPTER IV. - SCHOOL LIBRARIES

The present Survey has not collected statistics of libraries from individual schools, (for the 1931 edition, high school libraries were circularized), but there is considerable basic information on school libraries which it has been possible to bring together without the use of a questionnaire. The compilers of this Survey have thought that persons interested in the general field of library work may find it useful to have an outline of **existing** practice in regard to school libraries in the different provinces, for it becomes evident in any plan of modern library service that the provision of reading in supplement of school text books should not be treated as an isolated problem, but as part of the general problem of library service. That it is being so treated in some Canadian communities is evident from the activities described in the section below on "Co-operation of Public Libraries and Schools."

Insofar as the reading of school children is to be regarded as part of the public librarians' concern, the latter will be interested in a comparative description of the means used by Departments of Education and other bodies to encourage school libraries, and such a description is accordingly given hereunder. This is followed by a summary of opinions from school inspectors regarding the effectiveness of school library policies and the influence on libraries of the difficult economic conditions of recent years.

The Chapter closes with a word concerning the provision of the special reading sources required by teachers.

### Provincial Money Grants for School Libraries

Prince Edward Island and New Brunswick. - Each of these provinces offers a grant equal to one-half the amount spent by a local board in aid of a library annually, up to a maximum grant of \$10. The provincial grant, as well as the amount spent by the district, must be expended on books, so that out of the total book expenditure of a year the province pays one-third, the district two-thirds. The following summary shows the number of districts benefiting by such grants in New Brunswick in recent years, and their expenditure for books.

Year ending October 31,	Number of districts receiving grants	Amount of grants \$	Total book expenditure \$
1935 .....	14	100	301
1934 .....	11	105	359
1932 .....	12	93	279
1930 .....	19	166	506
1928 .....	14	126	384
1926 .....	12	115	347

As there are about 1,500 active school boards in New Brunswick, it will be noted that only about one in a hundred each year takes advantage of the library grant. The proportion in Prince Edward Island is apparently no greater, for the Department reports that from the time of its enactment the provision in the School Act offering library grants has **rarely been** called upon for fulfilment.

Nova Scotia. - Library grants are made only to school sections, (districts), which do not receive high school or manual training grants, - in other words, mainly to rural schools. If the books in a rural school are worth at least \$50 and there has been a circulation of at least 150 volumes in a year, the school is eligible for a library grant of \$10. If the value of the books is \$100, and the circulation 300 volumes, a grant of \$15 is earned. The grants are paid to the teacher, who acts as librarian. There has been a steady and substantial increase in the payments of recent years, as the following summary shows:

1935 .....	\$3,390	1931 .....	\$1,940
1934 .....	3,225	1930 .....	1,705
1933 .....	3,135	1929 .....	1,265
1932 .....	2,880		

As will be shown in the next section of this review, there has been a remarkable increase in the size and value of the rural school libraries of the province during these same years. Although as will also be shown, there have been other important reasons for the increase, it may be worth noting that the Nova Scotia plan of grants differs from the practice in the other Maritime Provinces, in that it deals directly with the teacher, not the school board, and makes the grants dependent on use of the books, (a teacher's problem), rather than on the amount of local expenditure, (a trustees' problem). After the minimum value of books is once reached, it is possible that the annual grant would be practically enough to keep the library up to the established standard; and this prospect, moreover, would act as a definite incentive, to the teachers in schools with sub-standard libraries, to improve them enough to reach the self-sustaining basis.

Quebec. - The Education Act says that the Government may appropriate as much as \$2,000 in a year, out of the Superior Education Fund to aid the establishment of school libraries where suitable contributions have been made by the local school boards for the purpose. Such aid may be given either in money or in books. No record of expenditures under this section of the Act has been located by the compiler, and there is no record in the Education Act or Regulations of any provision for annual grants ear-marked for the maintenance of libraries.

Ontario. - One of the bases for payment of grants to secondary schools in Ontario is expenditure on teaching equipment including libraries. Ten per cent of a board's library expenditure for collegiate institutes, high schools or continuation schools, (not to exceed a certain maximum, varying with the size of the school), is paid by provincial grant. In the case of vocational schools the grant for equipment may be 50 per cent of its value, and in a composite school, (partly vocational and partly academic), it may be as high as 25 per cent.

Until 1932, the Department of Education had for many years encouraged the improvement of rural school libraries by meeting part of the school board's annual expenditure on them when it amounted to as much as \$10. The following summary shows the amount of the rural library grants in the last years they were available, the number of schools participating each year, and their total expenditure on books.

Year	Rural school library grants	Number of schools participating	Total expenditure of these schools on libraries	Total number of rural schools in province
	\$		\$	
1932 .....	9,776	3,359	62,100	6,130
1931 .....	24,930	3,109	59,061	5,986
1930 .....	24,882	2,887	54,639	6,105

As may be seen from the table, about half of all rural schools participated in these grants each year, and their own locally-raised expenditures for books did considerably better than match the provincial grants. (Grants were available for only part of the year 1932).

Manitoba. - The system of the Manitoba Department of Education in supporting school libraries is, technically, perhaps a means of insuring that local boards support them, rather than of provincial support. Payment of a part of the annual school grant, except in cities, is conditional upon the money being spent on a library. Out of the grant earned, between \$10 and \$15 per teacher employed must be used for library support. In practice each school annually selects books to the appropriate value, and they are provided by the Department. Due to the unusual need of boards for the full provincial grant in cash, the practice was discontinued between 1931 and 1935. Most of the inspectors reported in the later year that libraries had in the four years become very seriously depleted, as little or no expenditure had been made on them. Compulsory library spending of at least \$10 per teacher is, however, again in force.

Saskatchewan. - See the next section. Library grants are made only to secondary schools; they receive an annual grant for equipment until a specified maximum value is attained.

Alberta. - Rural schools upon establishment become eligible for a grant of \$15, and during the first six years of their operation a grant as high as 15 cents per school day, (the actual amount depending on the inspector's rating), both of which grants may, at the discretion of the Department, be payable in books for the school library, or other equipment.

Some years ago there were grants for high school libraries. The latest report on inspection of high schools says as follows: "Very few accessions are made to school libraries. For the purpose of encouraging boards to build up their school libraries, the restoration of the Library Grant is advisable."

British Columbia. - Normally the Department of Education matches, dollar for dollar, the library expenditure of school boards, (up to \$50 per year in districts with one school, and up to \$150 in the largest districts), on condition that the grant also is spent for library books. Over \$3,000 per year was spent in these library grants until 1932, when they were discontinued. The books were usually purchased through the Department's Text-Book Branch, half of the cost of each order being paid by the board. Since then the boards have been obliged to pay in full for their orders, except for a 10 per cent discount. (Provision has been made for increasing grants in 1936).

Libraries of about 40 titles are given to new schools on opening. The last annual report records that 24 such libraries were donated; the preceding report, 16.

### Other Statutory Assistance in Providing Books

Besides the offer of money grants, the Departments of Education use various other means of building up or maintaining the book stock in the schools under their jurisdiction. The enumeration of these methods below, while it may not be exhaustive, is complete enough to convey some idea of the variety of ways in which the problem of better school libraries can be attacked. Where definite standards have been found stated in Departmental Regulations, either as to size of libraries or expenditure on them, these are mentioned, whether the money is required to be provided from provincial or local sources. Where provincial money is spent in providing free texts this is mentioned, for it seems likely that large sums spent in this way are in some measure considered an alternative to spending on a larger variety of books for a library.

Prince Edward Island. - The Carnegie Library Demonstration, elsewhere described in this Survey, has given continuously increased attention to co-operation with the schools, ever since its inauguration in 1933. Insofar as the experiment is aided by provincial funds, (which has been only slightly to date), it may be regarded as a means used by the Province to encourage the development of school libraries. The need for such development was indicated in the Report of the Department of Education for 1933 when it said that in spite of numerous gifts of school libraries from private or philanthropic sources, "there are still many schools with no library equipment whatever".

But the Department reports for 1934 as follows: "Teachers now have the privilege of obtaining a number of books for their pupils which may be retained for two months, when they can be exchanged for others, (in the Carnegie Demonstration), and thus each school has access through its nearest branch to the whole supply of books in the provincial library". Hence, it appears that the school library problem would be largely solved if the experiment would develop into a permanent provincial institution, although the Department's 1935 Report states that the teachers in some schools feel that they cannot undertake the responsibility of taking charge of a borrowed collection of books, by reason of having no bookcase in the school in which they can be safely kept.

Nova Scotia. - In the last eight years the Department of Education has made the improvement of school libraries an important matter of policy. Two earlier editions of this Survey have described the establishment of county libraries in the schools, to provide reading for parents as well as children. Boxes of 25 books are moved about from school to school in rural and village communities three times yearly, in the 13, (of the 18), counties which have been provided with a library system. There are from 1,200 to 3,000 books in each system, the number depending on the size of the county.

Since 1927 the Department of Education has been presenting small permanent libraries and supplementary reading to the schools in greatest need of them. The gifts include reference material for high schools. In the first three years of the plan 100,000 volumes were placed in this way. The expenditure has been as follows:

1935 .....	\$ 2,235	1931 .....	\$13,312
1934 .....	1,249	1930 .....	6,212
1933 .....	3,791	1929 .....	10,151
1932 .....	14,316	1928 .....	5,573

It is of interest to compare with this expenditure and the library grants to rural teachers, the growth in school libraries during the same period.

<u>Rural and Village Schools</u>			<u>Urban Schools</u>	
	<u>Number of</u> <u>Books</u>	<u>Value</u> \$	<u>Number of</u> <u>Books</u>	<u>Value</u> \$
1935 .....	207,263	104,272	74,358	57,405
1934 .....	190,388	95,062	71,882	60,725
1933 .....	181,192	89,293	67,830	56,999
1932 .....	170,212	84,748	68,506	56,070
1931 .....	150,239	74,807	65,882	56,405
1930 .....	125,904	61,923	63,967	53,699
1929 .....	89,484	47,938	73,864	65,170
1928 .....	55,058	33,064	45,604	33,410
1927 .....	43,812	29,287	49,991	36,484

As measured either in terms of volumes or value the increase has been remarkable, especially in the smaller schools where it has been about four-fold.

The Department's School Book Bureau has for some years distributed a considerable proportion of free text books. The Government contribution required to make up the Bureau's deficit averaged \$25,802 in the years 1928-33, and was \$87,547 in 1934 due to the adoption of a new course of study. Beginning in the school year 1934-35, a general policy of free elementary school texts was adopted and the cost to the Government was \$218,173. At the same time the distribution of high school text books to indigent pupils was discontinued.

New Brunswick. - The Annual School Report for 1930 mentioned the presentation of history reference books, to the value of \$1,200, to high schools. This appears to have been the only recent year in which the Province made a gift of books to school libraries.

Prior to 1934 the Government spent substantial sums in distributing free text books through the School Book Department conducted by the Provincial Secretary's Department. In four years the average annual excess of expenditures over revenue from sale of books was \$61,000.

Quebec. - Provincial effort is directed toward the presentation of books to individual school children rather than to school libraries. The Departmental Regulations say it is desirable that one volume at least should be given in each class. Most of them are awarded on the teachers' recommendation at the end of each year for success in studies, but some are also given for good conduct or for regularity of attendance. The school inspectors supervise the awards. The cost of the prize books annually awarded in recent years has been as follows:

1934 .....	\$ 30,000	1929 .....	\$50,000
1933 .....	85,247	1928 .....	39,500
1932 .....	35,000	1927 .....	35,000
1931 .....	102,800	1926 .....	29,000
1930 .....	50,000		

Commenting on the need for school libraries, in his report for 1935, one of the eight Catholic regional inspectors says as follows in regard to the practice of distributing prize books: "The setting up of a school library would be of great help. This should be easy, as the prize books sent to inspectors by the Department could be given to the school rather than the children, with a form stating that, thanks to the application, success or assiduity of this or that pupil, the library is enriched by another book".

The Department of Education assists Protestant rural schools in obtaining travelling libraries from the McGill University system.

Ontario. - To varying extents in recent years the Provincial Government has purchased books and placed them in school libraries. The most frequent arrangement has been the purchase of a single book, or set of books for the library of every school. The following statement shows the recent expenditure made in this way. (Sometimes the public libraries also receive the book, but since they are much less numerous than schools most of the expenditure represents assistance to school libraries).

1935 .....	Nil	1931 .....	\$13,779
1934 .....	\$ 6,750	1930 .....	48,913
1933 .....	8,750	1929 .....	37,027
1932 .....	11,930	1928 .....	33,900

The provincial travelling library system, conducted by the Public Libraries Branch of the Department of Education, is used by some schools. Between 50 and 60 cases were loaned to schools in each of 1933 and 1934, and the report of the Inspector of Public Libraries in the latter year said that further increases in the school service were expected with the active co-operation of the Chief Inspector of Public and Separate Schools. In 1935 there were 192 cases sent to schools.

The Department of Education spends considerable sums in the preparation of text books and subventions to text-book publishers, (mainly the latter), in order that the books may sell at low prices. The expenditure ranged down from \$82,000 in 1930 to \$55,000 in 1934.

Departmental regulations concerning the size of libraries seem to be more specific than in other provinces. They require that in each collegiate institute or high school there must be a separate room, easily accessible to all pupils, furnished as a library and reading room. Regulations for continuation schools say that a room for a library should be provided, but where the teachers' room is large enough it may be used as a library also. In continuation schools with one teacher only, there must be a library of a minimum value of \$150; in larger continuation schools and high schools of two or three teachers there must be a library worth at least \$300; in larger high schools it must be valued at not less than \$450, and in collegiate institutes at \$600.

Regulations for the public and separate (elementary) schools demand that each board shall supply a library containing one copy of each of the revised editions of the Ontario School Manuals, a gazetteer and an English reference dictionary for each classroom; and when required under the Regulations regarding authorized text books, there must be a supply of history, geography and hygiene readers, as well as the books in English literature to be read by the candidates for a Departmental examination.

Manitoba. - See the preceding section. It might also be noted that Regulations for secondary schools demand a certain minimum expenditure each year on library and laboratory apparatus. In one-room high schools it must be at least \$20, and higher for larger schools, up to collegiate institutes where it must be \$50.

The Department of Education conducts a travelling library system, but it is not intended primarily for use in the schools. A Text Book Bureau has been operated since 1931 at a small profit.

Saskatchewan. - The School Act states that each school board shall spend annually on books for the library \$10 per classroom. But the Departmental Regulations qualify this by making it permissible to spend the money on other equipment, upon the recommendation of the inspector.

Regulations for the larger secondary schools, (those organized under "The Secondary Education Act"), prescribe definite standards for libraries, and the Act offers an annual grant for reference books. A high school, (a school with two or three secondary teachers), when first organized must have a reference library valued at \$100, and a collegiate institute, (four or more secondary teachers), must have a library worth \$300. In order to obtain the legislative grant there shall be expended annually by a high school board \$50 for the library; and by a collegiate institute board, \$75. Grants of \$150 annually are paid to high schools for equipment until their laboratory apparatus is worth \$400, reference library \$300, maps, globes, and art equipment, \$100; grants of \$200 a year are paid to collegiate institutes until their laboratory apparatus is worth \$750, reference library \$500, geography and art teaching equipment \$150.

The largest travelling library system in Canada is conducted by the Government of Saskatchewan but the extent to which it is used by the schools is not evident from the records available.

The Department of Education has provided free school readers for many years, at an annual cost of about \$50,000 until three years ago, since when it has averaged less.

Alberta. - The Province's travelling library system is conducted by the Extension Department of the Provincial University, and over 100 libraries per year go to schools.

The Department of Education is offering, as an experiment, a circulating library service to the rural schools in a southern section of the province. Under the system each school will receive a collection of forty books three times during the school year. Each collection contains, for the most part, titles not in the school library. Schools taking advantage of the service release fifty books from their present libraries to create a central book collection from which selections for the circulating libraries are made. In addition the school pays the Department an annual fee of ten dollars. The Department guarantees to spend five dollars of this on new books. Thus eventually fifteen dollars worth of new books will be available for the pupils of each school during a school year.

School boards may purchase books from the Department's School Book Branch at the same discount given to retailers. This Branch aims to operate with neither profit nor loss.

British Columbia. - Nearly one-third of the travelling libraries sent out by the Public Library Commission go to schools, - 172 out of 580 in the last year recorded.

The Text Book Branch of the Department of Education in each year since 1931 has distributed free text books (and supplies) to the value of about \$50,000; in earlier years, considerably more.

School Library Assistance from the I. O. D. E., Etc.

In addition to the assistance of the Province, some trustee boards and teachers receive help in providing school libraries from private sources. First in importance among these is the I. O. D. E., but other donors appear in the records from time to time. The first two county travelling libraries in Nova Scotia, for instance, were provided by individual citizens. There was also a noteworthy instance in Prince Edward Island when in 1927 a native of the province, resident in California, remembering the need of his boyhood schools, inaugurated the School Days Library Commission to solicit funds from former Prince Edward Island students at home and abroad to establish libraries in their former home schools. The Commission succeeded in placing libraries of about one hundred books in more than one hundred schools, nearly one-fourth of the schools in the province, but the Department of Education reports that "the financial depression dried up its resources".

The giving of school libraries is a well established activity of I. O. D. E. Chapters in all provinces. The Order maintains a National Educational Department at Head Office in Toronto, through which the local Chapters usually do their buying, choosing the books themselves, or leaving the selection to the National Office, as they prefer. The local Chapter may choose the school to which the library is to be sent or may designate one from a list which the provincial Educational Secretaries of the Order compile in co-operation with school inspectors. The number and cost of libraries ordered through Head Office in recent years has been as follows: -

	<u>Number of Libraries</u>	<u>Cost of Libraries</u> \$	<u>Number of local Chapters participating</u>
1935 .....	132	1,364	-
1934 .....	93	801	74
1933 .....	116	1,276	89
1932 .....	181	1,816	111
1931 .....	186	2,223	113
1930 .....	183	2,197	104
1929 .....	202	2,580	114
1928 .....	136	1,562	84

In addition to this distribution from the National Office many Chapters buy or collect books locally to make up libraries for the schools, but there is no complete record of the work thus done. Others supply reference material in one or two subjects of study, especially History and Geography Readers, instead of the larger assortment of books described as libraries. Numerous Chapters give prize books to individual children. Pictures, calendars, charts, gramophone records, magazines, and other school equipment, as well as books, are placed in the schools through the National Office and individual Chapters.

### Co-Operation of Public Libraries and Schools

The preceding sections have described ways in which the Provincial Governments and I. O. D. E. assist in the development of school libraries, and it remains now to review ways in which schools co-operate with one another and with their local public libraries to the same end. The questionnaire sent to public libraries by the Dominion Bureau of Statistics at the close of 1935 invited a description of practices of this kind, and the paragraphs hereunder are mainly a summary of the replies received.

Maritime Provinces. - From the Maritime Provinces no co-operation between public libraries and schools is reported (other than in the Prince Edward Island Demonstration which has been mentioned above) except at Baddeck and Truro in Nova Scotia and at Sussex and Woodstock, New Brunswick. The last-mentioned has a story-hour for children on Saturday mornings during the winter.

Quebec. - Only two Quebec public libraries report co-operation with schools. These are the Fraser Institute and Montreal Children's Library. The latter mentions the following ways: By lending books, making reading lists, suggesting suitable books for school libraries, addressing groups of parents, teachers, pupils and group leaders, help in establishment of small school libraries, loan of posters, maps and charts to schools.

Ontario. - In Ontario a few dozen public libraries report that they are taking cognizance of the needs of the schools, although the attitude of a majority of the smaller libraries here, as in the other provinces, seems to be typified by the reply. "The school has a library of its own". The varieties of co-operation most frequently mentioned are stocking the supplementary reading books, often on separate shelves, and consulting with teachers on the purchase of books in order to secure titles of value for children's reading without duplicating those in the schools. Sometimes lists of the public library books suitable for children or high school students are supplied to the teachers who in turn post them up or otherwise bring them to the attention of their pupils. In several centres, especially the cities, cases of books are loaned to the schools, and in effect become temporarily a part of the school libraries.

Besides a children's room in each of its fifteen branch libraries, the Toronto Public Library has established eleven school library branches. The circulation from these 26, combined with that of Boys and Girls House at the Main Library, was more than a million volumes in 1935; and this includes only the books taken home. The Public Libraries in Hamilton and Ottawa both place packages of books in the schools, the circulation attained in the latter having been 47,344 in 1935. London reports loans in about 40 classrooms, made on application of teachers, for the period of one year, - 40 to 60 books in each loan.

Among the smaller cities, Niagara Falls circulates more than 4,000 through the schools, and Oshawa reports loans to schools at some distance from the Public Library. St. Catharines has 3,000 books from the Juvenile department in the public and separate schools. "Each teacher puts in a request to the librarian and a suitable selection is made for her to distribute among the pupils. These are exchanged when desired". Schools outside the city also are served. St. Thomas loans collections of books to public school classes for one month. Kingston places books in two outlying schools during term time, enough to supply each classroom with at least 35 volumes. Kitchener reports that books are sent to the schools at the request of the teacher and used by brighter students when their work is completed. Walkerville makes loans to classrooms, usually in batches of 40, but sometimes in smaller numbers on special

subjects. Public libraries in smaller centres that report similar arrangements with the schools of their town are Bobcaygeon, Campbellford, Hagersville, Napanee, Norwich, Preston, Seaforth and Ridgeway. The simplicity of the arrangement is described as follows by the Hagersville Librarian. "In September the principal of the public school and his teachers meet the librarian and choose 75-100 books suitable for their classes. They make duplicate lists of them, one for the library, one for themselves, and take the books off to the school in the principal's car. A few books are placed in each room of the school, and the teacher tries to get the non-readers interested in reading. The English teachers of the high school staff also take about the same number of books, almost exclusively non-fiction".

In Lambton County, where the first county library association in the province was organized four or five years ago, provision is made for inclusion of rural schools in the scheme, as will doubtless also be done in the counties where associations have more recently been formed. The Sarnia librarian says: "There is immense increase in use of books, spreading to the rural schools where co-operative buying and exchange of books is being carried on among schools with their own small libraries". For instance, the Theford Public Library, a member of the Lambton County Association, has organized the village school and five neighbouring rural schools of the same township into a Township Schools Library Association, the schools acting as branches of the village public library. The Sombra library, also in Lambton County, reports that six schools of the township each paid \$5 last year, and this money was used to buy juvenile books for a travelling library among the schools. So also the Forest Public Library. It receives \$10 per year from each of ten rural schools, and in return provides them with libraries. So also the Mandaumin library, near Sarnia. It co-operates with the six nearest public schools; each school board pays \$5 to the library treasurer, which entitles the teacher to choose 50 books from the juvenile section, and these are exchanged three times a year, (the standard frequency of exchange among members of the County Library Association). Plympton supplies five near-by schools. Every school in Sarnia Township belongs to the Township Circulating Library. Nine schools are served by the Wyoming library, seven of them rural schools.

Not many public libraries outside of Lambton County report co-operation with surrounding rural schools. Millbank gives such service to two country schools, exchanging the books whenever the teachers desire, the cost being 25 cents per pupil per annum. Newcastle and Callander each mention assistance to one rural school. Norwich supplies books to two neighbouring rural schools. Marmora gives free membership to all rural school children.

In some of the smaller places where the public library is organized on the association plan and there is normally a fee for joining it, the fee is sometimes reduced or abandoned altogether in the case of school pupils. Among those reporting this kind of help to schools are Agincourt, Huntsville, Schomberg, Strathcona, Unionville. In some cases the school board pays all or part of the membership fee for pupils, and in other cases it pays an annual sum to the association library in order that the teachers may make certain special calls on the service of the library, as at Wardsville and Morrisburg.

Some public libraries make special provision for school children coming to work in the library in groups. Grimsby writes: "We have shelves which hold the best reading material for the children of the different grades. Help is given to pupils in special school assignments. If special projects are given by the teachers, books on the subjects are gathered together and put in view in the juvenile section of the library". Honeywood reports: "High school students taking part in debates, oratorical contests or essays are assisted in their work by the library. The topics are submitted

to the librarian who selects a number of relevant books and places them on a shelf by themselves, and the young people make their own selection from these". The Mount Forest librarian marks school cards to show what books the pupils have read. At North Bay the auxiliary or opportunity classes spend regular periods in the library under the supervision of their teacher and the librarian. At Pickering the teachers have gone over the shelves of the public library and made note of the books useful as supplementary reading. The list is kept in the library and the librarian refers to it when her assistance is required by the pupils. The Sandwich librarian says: "We have a number of desks, and after school the children come to look up information for speeches and essays. We help in every way to find the information that is wanted. The pamphlets we get from the government are of great service in this work". Tavistock has a children's hour, also Brampton. The latter writes: "With the help of the Local Council of Women we are holding a story hour for school children. Through this we are trying to interest children in reading the better class of books. The schools urge pupils to join the library and allow them bonus marks for library books they read aside from prescribed supplementary reading". Belleville reports: "Work with schools takes the form of book talks to the various classes, either at the library or in the schools". Huntsville says: "The library is open to pupils on Wednesday afternoons for two hours. They are supervised by one of their teachers, who records what books they take out and change". At Oshawa a member of the public library staff visits the schools to explain the use of the library. At St. Thomas school children and teachers from all public and separate schools in the city visit the library each year for book talks by the library staff. "High school students do a great deal of their work in the reference room". In Kitchener "some of the teachers bring entire classes to the library during school hours. We advertise our story hour in the schools". Walkerville gives a series of four lessons in the schools on the use of the public library, also holds story-telling periods in the schools. Further "when teachers have special projects on hand, the library is notified, and the necessary books are collected and made available on a special table, clearly marked, for the pupils involved. We do a tremendous amount of reference work with the secondary schools". At Napanee "teachers frequently send seven and eight pupils down to the library at a time". At Weston there is a Children's Book Week, when the library provides posters and conducts essay contests.

These paragraphs can not claim to have mentioned by any means all of the attempts being made in Ontario to co-ordinate the work of school and public library. They are intended to indicate the variety of methods that are in use, the methods showing considerable variation with the size of the library and community. In particular the review has not given an adequate impression of the boys' and girls' work in the larger libraries. For the Toronto Public Library a description of this work may be found in the Library's own printed annual report. The last two numbers have described assistance given to Orillia in developing its boys' and girls' work. Early in 1934 the Chairman of the Orillia Public Library wrote to the Toronto Public Library asking for help in the selection of children's books. The Toronto report describes the situation thus: "There was no children's librarian, and the one adult librarian had neither the time nor the training to develop the children's side. The Board as a whole were worried by the large circulation of light fiction and felt that if the children were not trained to enjoy a more substantial and worth-while type of book the reading done by the next generation in Orillia would be worthless. On examining the book stock we recommended as a first step the withdrawal of over seven hundred books. Then we began to build up the collection, and in the spring conducted an "opening" of the new Boys' and Girls' Library, with book-talks in the schools and story-hours at the Library. As a result the very progressive Library Board and Board of Education joined forces in asking us to release a trained children's librarian from our staff for four months, from January to the end of April, 1935." The four-month trial resulted in the permanent appointment of a trained children's librarian in Orillia in the summer of 1935, part of her salary to be paid by the school

board, and part by the public library board. The librarian visits each school once a week in the morning and remains at the library in the afternoons. Comment on the arrangement in the Toronto report for 1935 is as follows: "This successful consolidation of both school and library reading resources has impressed other municipalities, and there are indications that the example of Orillia will be followed by others in the near future".

Manitoba. - Only four libraries in Manitoba report any attempt to work with the schools, - the public libraries in Winnipeg, Selkirk and Portage La Prairie, and the United Farm Women's Library at Oakville. Selkirk reports that teachers are consulted on book purchases, and Portage La Prairie buys the books on school reading courses. Winnipeg does not give details.

Saskatchewan. - The Regina Public Library maintains a regular system of classroom and other libraries in public and separate schools, and provides special collections in collegiates as requested by teachers. Battleford says: "being same building, exchange is easily arranged". Sintaluta, Macklin and Rosetown say that they co-operate with schools, as also the Mechanics and Literary Institute Libraries at Cabri. Garnock (near Kelliher), Luseland, Milden and Warman. The last mentioned describes their interesting arrangement as follows: "The Institute was established in 1933-34 after the Rural Municipality of Warman had received a C. N. R. Community Progress prize. The sum of \$275 was set aside for the establishment of a municipal library. \$50 annually to be used, which together with provincial grants must be spent on books and magazines with the primary purpose of supplementing schools' work. Three school principals, strategically located, act as central librarians, through whom other teachers secure books for their districts. School districts pay a minimum fee of \$3 each for library privileges".

Alberta. - Of the larger cities, Edmonton says: "Loan collections are sent to a few schoolrooms", Calgary reports "175 small school libraries in the city schools", and Lethbridge "regular circulation to classrooms". Lethbridge caters a great deal to its adjacent rural communities through the schools. The librarian says: "We have a membership of about 500 outside the city, individuals and schools. A small fee is charged them. Our rural circulation was nearly 14,000 in 1935. The schools arrange to collect their boxes of books either by making use of the district truck service or by some member of the community who is willing to do this for them. Most of the rural schools would be entirely without books if it were not for this service. We are trying to make arrangements with rural school boards to extend it considerably next fall". Medicine Hat says "we co-operate with schools but do not exchange books".

The Cardston Public Library has an unusual experience to relate, one that has come from no other library in Canada: "We asked the local school board to co-operate with us and they refused, as they wish to keep their school library distinct and separate". Wetaskiwin has "a very successful children's story hour." Drumheller, Blairmore Institute and Stettler I. O. D. E. libraries report co-operation with schools.

British Columbia. - The Public Library of Vancouver reports co-operation with schools, but does not say whether finances have permitted it to continue the package loans of earlier years. Victoria says "we lend 1,500 books each year to grade schools and occasionally to the high school". In 1933 the library's report said that the children's librarian had visited every classroom in the city and Oak Bay municipality. New Westminster "loans to local schools whenever asked and sets aside books that they may need from time to time". The Fraser Valley Union Library reports: "We serve 25 schools directly with school deposit collections". Other libraries claiming to work with schools are Armstrong and Spallumcheen, Hollyburn, Kamloops,

Nanaimo and Prince Rupert.

Yukon. - The Whitehorse Public Library turns over to the Public School several of the illustrated magazines that it receives.

INSPECTORS' REPORTS ON THE CONDITION, USE AND IMPROVEMENT OF SCHOOL LIBRARIES

The foregoing pages have undertaken to describe means used to promote the usefulness of school libraries. It remains now to obtain some information on their effectiveness. For this we are largely dependant on the reports of school inspectors because few statistical data on library size or expenditure are available. Hence the paragraphs that follow will be mainly extracts from reports of inspectors in the last two years. Where it is possible to quote from several individual inspectors in a province, it will be noted that their opinions of library conditions are sometimes quite divergent, and there doubtless are wide differences in sections of a single province. This may be partly due to local circumstances, but it seems to be illustrated by the New Brunswick quotation that the condition of libraries is also determined in large measure by the interest and enthusiasm of inspector and teachers.

Prince Edward Island. - One inspector in 1935 writes as follows: "36 schools in the inspectorate possess a library and 41 are without one. The present system of library service in our province somewhat modifies the disadvantages of the latter ..... enabling teachers to procure supplementary reading material for pupils. I have observed that about 25 per cent of the teachers avail themselves of the opportunity. The reason frequently given by others for not doing so is the lack of proper accommodation for books in their classrooms".

The following is from another inspectorate in 1934: "During the year I made a complete survey of school libraries. The total number of volumes is 2,280, an average of 42 per school. Libraries on the whole are well cared for and quite extensively used. Almost every school has a library record book, and a pupil librarian".

Nova Scotia. - The Chief Inspector writes in 1934: "Tardily but noticeably the interests of school principals are turning towards library facilities. Here and there book cases and filing cabinets are being installed, and in a few schools library periods are a feature of the weekly time-table ..... The smaller encyclopaedias are beginning to be consulted as a regular part of class-work and the pupils stimulated to self-help in the pursuit of knowledge".

The two following quotations from different county inspectorates indicate a contrast: "All schools have a library case well supplied with reading material of value. Forty-eight schools in Annapolis County and fifteen in Digby District will be eligible for library grants this year". "One great lack in most of the rural and village schools (Kings and Hants West) is that of adequate library facilities".

Most of the inspectors comment on the school county travelling libraries in much the same tenor: "The library boxes in Richmond County are for the most part well appreciated. Some trustees excuse their lack of co-operation in circulating the boxes by contending that the books are a source of danger in spreading disease, but I have yet to find the same persons refusing to accept paper currency owing to its having passed through too many hands". The travelling library (Pictou County) was appreciated about as usual, most sections looking forward to the arrival of a new box. Some are indifferent and a couple have refused the boxes". "It would appear as though

(in Cumberland County) the library books are read and enjoyed by a large number of pupils and adults. I find it hard to get the trustees to move the boxes on the appointed date, and in some cases, I have had to straighten them out myself. The books were moved three times during the year".

New Brunswick. - Some of the inspectors enumerate in their annual report what they consider to be noteworthy improvements in school property or equipment. Of 178 districts in which improvements were noted in 1935 only five bought new libraries or made noteworthy additions to old. These records, however, do not include one inspectorate where most of the school library improvement in the province seems to have occurred in the last few years. The inspector records: "The success of this movement (to add to the worth of school libraries) is shown by the annual statements in the School Report which show that in the last three years in Inspectorial District Number 5, 62 schools purchased for school libraries 1,681 volumes at a cost of \$1,212.54, while in all the rest of New Brunswick 37 schools purchased 1,031 volumes at a cost of \$925.64. In this respect it should be noted that this inspectorate is almost exclusively a rural district having 14 graded schools, with Sussex the only town".

Quebec. - The Catholic Regional Inspector of the Ottawa area says in 1935: "What have inspectors to say about some of our school boards? ..... the school furniture is incomplete, no libraries, no books of information or of literary interest ..... I gladly admit that there are some excellent school boards and school commissioners, but they do not make up for the others".

Regional Inspector of the Lower St. Lawrence: "To make even the smallest school an intellectual centre, school libraries have been organized. Their success has been limited by our resources, which are very small. But the idea is making its way; of 194 libraries, the shelves of some reveal only a few books whereas others have hundreds. This is a good start. Children who never see a book at home will acquire a taste for reading and will be saved from total ignorance".

The Inspector-General of Catholic Primary Schools in 1935: "Convinced that every school should be an intellectual centre, the regional inspectors, with the help of the district inspectors, organized school libraries. Children will thus be able to develop a taste for reading and the library will also benefit the teacher who takes the trouble to establish one".

The Inspector-General of Protestant Schools has not commented on libraries in recent reports.

The quinquennial comparison of libraries published by the Quebec Bureau of Statistics shows that in 1932-33 there were 2,368 "primary schools" in the province with libraries, the number of books being 893,794. In 1927-28 there were 2,209 "primary school" libraries with 589,921 volumes. The term "primary school" as thus used includes all schools except those in the university and college section of this Survey. There were 8,222 "primary schools" in the province in 1932-33.

Ontario. - The Chief Inspector of Public and Separate Schools writes in 1935: "The rural schools continued to suffer for lack of money with which to purchase necessary library books and other school equipment". The high school inspectors say: "There has been a very noticeable falling off in the amounts of money spent by boards in keeping up or improving the equipment for teaching purposes". As was shown in this Survey for 1931, some secondary schools have a full-time librarian under whose direction all classes spend supervised study periods in the

school library. School librarians are now sufficiently numerous to represent a special group within the Ontario Library Association. Synopses of the papers read at the 1935 annual meeting of the group appear in the August number of the Ontario Library Review.

Manitoba. - Basing the statement on inspectors' observations, the Education Department's report for 1934 states: "The depression continues to affect seriously the condition of libraries in our schools. The majority of the districts still can afford to spend the few dollars annually as (normally) required by the Act, but not many School Boards have done so. The average school trustee feels his duty done when the teacher is engaged, and either does not see, or will not admit, the necessity of tools with which to do her work. Books do wear out, and the time has arrived for Departmental action in the interest of the children, many of whom have no opportunity to practise reading apart from the material in the school library".

For 1935 the following appears: "The provisions of the Public Schools' Act respecting additions to the school libraries were again put into effect, and the requisitions from the schools for 1935 will be dealt with in the usual manner. Tabulating the orders is a task requiring time, and the books will be supplied to the schools early in 1936, their cost being deducted from the grants payable at that time".

Saskatchewan. - Comments from a dozen individual inspectors in the Education Department's latest Report are almost all in the same tone, "Not many additions are made to libraries". "During the past few years these (libraries) have been neglected to a large extent". "School libraries are falling into a very unsatisfactory condition". "Libraries are very meagre". "Our school libraries are in very poor condition and are becoming poorer every year". "The school libraries are dwindling away". "Boards are of the opinion that the expenditure of ten dollars required by the Act for library represents the maximum". One inspector reports in a different tone: "Practically all schools are improving their libraries this year".

Alberta. - Some opinions from individual inspectors in the last two Annual Reports of the Department: "The average rural school library will probably fall short of the desirable minimum until such time as the district is required by legislation to devote each year some specified sum for this purpose, or until special library grants are again available". "The greatest single lack in this respect (equipment) is that of adequate library facilities. The Departmental library grant given during the first few years of a school's existence, is helpful in newly organized districts, but this is only a drop in the bucket by comparison with the very great need that exists". "All schools lack adequate libraries". "It would be advisable to direct that a certain amount of the grants paid by the Department should be expended on the purchase of library books or other needed equipment".

British Columbia. - The Annual Report on the Schools does not include reviews by the inspectors, and their comments on libraries are accordingly not available.

#### Special Provision for Teachers' Reading

School libraries are primarily for the use of pupils rather than teachers, but the reading requirements of the latter represent a special problem that has been receiving increased attention within the last few years. The Nova Scotia Department of Education and the Protestant section of the Quebec Department have established professional libraries from which the teachers may borrow by mail, the only cost to them being return postage. Ontario and the Western Provinces conduct libraries in the same way (called "Open Shelf" libraries) for the general public, but in stocking these the reading require-

ments of teachers receive consideration, and teachers and clergymen are among their best customers.

Besides this special attention to the teachers' reading needs on the part of the Province, public libraries in some cases treat the teachers of their community as a special clientele, and make special provisions for them. Local teachers' associations in some cities present to the public libraries books intended primarily for the reading of their membership, and the library keeps them in a special section, so that in effect it conducts the library that the teachers provide for themselves. In other cities the teachers, instead of placing their books in the public library, keep them in a centrally-located school where there is space for a teachers' reading room. The library and reading-room is kept open after school hours and on Saturdays, and pedagogic periodicals as well as books are available. In some cases the school board helps the teachers to establish and maintain their library.

A complete list of these teachers' libraries has not been obtained, but a description of one of the larger and more recent is given herewith. It is the Teachers' Library of the Montreal Catholic School Commission, and the information is extracted from a paper prepared by Miss Grenier, one of the two librarians in charge, October, 1934:

"When the building of the new Plateau School was finally set, it was decided to build a room with a special entrance on the street, and to establish it as a Library. In 1931, on the first of October, Miss Toupin and myself started the organization and preparatory work which consisted in buying books, cataloguing and classifying them, and many other technical details. On October 3rd, 1932, with a collection of 3,000 books, the library formally opened its doors to the teachers ..... The collection, constantly growing, contains now 6,000 books of which 40 per cent are English ..... Our Library is a subscriber to 30 of these (pedagogic and other) magazines in English (others in French) ..... and all these magazines can be taken home to read at leisure hours, just like the books ..... Every month, in the last page of "L'Ecole Canadienne" (monthly journal published by the Catholic School Commission) a bibliography is published. We thereby draw the attention of the readers to new books, and recent articles that we have found worth while ..... We try our best to supplement what is lacking in our Library by personally helping our readers to find what they are looking for ..... To have a right to use the Library all you have to do is to bring a note from the principal of your school certifying that you are a teacher of that school".

At the Vancouver School Board offices there is a Teachers' Library of more than 3,000 volumes. Sixteen periodicals are received, and the librarian reports that about 700 people used the library habitually in 1935.

oOo

## CHAPTER V. -- LIBRARY ASSOCIATIONS AND LIBRARY SCHOOLS

Each of the four preceding Chapters has dealt with libraries of a particular class. The training of librarians and their association in a professional capacity is of common interest to all groups, although a few of the associations listed here represent specialized rather than general interests in the library field.

### Library Associations

Since last publication of a list of librarians' associations, two new organizations have been formed: (1) A librarians' group within the Professional Institute of the Civil Service of Canada in 1934, the membership of which is composed of librarians of Dominion Government Departments; (2) A provincial library association in Manitoba in May, 1936, for which preliminary arrangements had been made by the library committee of the Winnipeg University Women's Club during the preceding year.

A list of the existing associations, their presidents and secretaries follows. Though not exactly a librarians' organization, The Association of Canadian Bookmen is included, being of special interest to librarians, and having a considerable membership among them.

The Association of Canadian Bookmen. - Organized in 1935 for the purpose of keeping "the book readers of Canada informed about the best current literature available and to save them time and disappointment" by providing news sheets, reading courses, topical book lists and literary bulletins. Executive Secretary, A. B. Cutts, 20 Dundas Square, Toronto.

Canadian Library Council. - Formed in June, 1934, during the week of the American Library Association Conference in Montreal. President, John Ridington, University of British Columbia, Vancouver; Secretary, E. S. Robinson, Public Library, Vancouver.

Maritime Library Institute. - At Annual Conference of 1935, name was changed from Maritime Library Association to Maritime Library Institute, membership about 50. President, Miss E. M. A. Vaughan, Saint John Free Public Library, Saint John, New Brunswick; Secretary, Mrs. M. K. Ingraham, Acadia University Library, Wolfville, Nova Scotia. Conference of 1936 was held May 29, at Mount Allison University where it was resolved to publish an occasional Bulletin. The first issue of the Bulletin (June) says it "will reflect the interests and aims of the librarians of the Maritime Provinces, but will assume that these interests and aims are not regional only, that librarianship is a learned profession".

Quebec Library Association. - Organized in 1932. Membership 113. Annual meeting in Montreal in May. Also holds monthly meetings. Secretary, Miss E. R. Gordon, Medical Library, McGill University, 3640 University Street, Montreal.

Montreal Special Libraries Association. - Organized 1932. Secretary, Mrs. M. E. Bevington, Librarian, Department of Immigration and Colonization, Canadian Pacific Railway, Montreal. Annual meetings held in May.

Ontario Library Association. - Organized in 1900. President, Miss Dorothy Carlisle, Public Library, Sarnia; Secretary-Treasurer, Miss Elizabeth H. Morton, Public Library, Toronto. Annual meetings usually held Easter Monday and Tuesday at Toronto Public Library, but the annual meeting in 1937 is to be held at Ottawa. Some account of the proceedings is included in the Ontario Library Review, published by the Public Libraries Branch, Department of Education. There are sections of the Association for high school and intermediate libraries, boys' and girls' and circulating libraries.

Ontario Regional Group of Cataloguers. - Organized in 1927. Chairman, Miss Dorothy Dingle, Toronto Public Library; Secretary, Miss Marjorie Richmond, Trinity College Library, Toronto. Annual meetings at same time as Ontario Library Association.

Professional Institute of the Civil Service of Canada Library Group. - Organized in 1934. Willing to co-operate with librarians in connection with problems concerning government documents. President, Miss Grace Hart, Librarian, Department of External Affairs, Ottawa; Secretary, Miss M. S. Gill, Librarian, National Research Council, Ottawa.

Manitoba Library Association. - Organized May, 1936, with the objective of promoting library service and librarianship, and stimulating public interest in libraries in the province. President, W. J. Healy, Librarian, Provincial Library of Manitoba, Winnipeg; Secretary, Miss Inga Thomson, Manitoba Free Press Library, Winnipeg.

Alberta Library Association. - Organized in 1930. Not meeting regularly. Secretary, Mrs. Cecil E. Race, Assistant to Librarian, University of Alberta, Edmonton.

British Columbia Public Library Association. - Organized in 1911. Annual meeting of 1934 held at New Westminster. Secretary, Miss Lorna Barton, Public Library, Vancouver.

#### Some Organizations in Other Countries with Canadian Affiliations.

American Library Association. - Numerous members in Canada. Headquarters - 520 North Michigan Avenue, Chicago, Illinois.

Carnegie Corporation of New York. - From the British Dominions and Colonies fund that it administers, grants and other assistance are given to libraries in Canada. Headquarters, - 522 Fifth Avenue, New York.

Special Libraries Association. - The Montreal Special Libraries Association is a Chapter of the organization. Annual convention of 1936 was held in Montreal. Headquarters - 345 Hudson Street, New York.

The Library Association. - Some members in Canada. Headquarters, - Chaucer House, Malet Place, London W. C. 1.

#### Library Schools

Canadian libraries are gradually being staffed by persons who have been specifically prepared for their work by training in a university school of librarianship. The schools at the University of Toronto and McGill University now graduate about 60 persons annually from their one-year course, and in addition McGill conducts a short summer course.

The public libraries in 1935 employed 380 persons who had taken a course of this kind, the university and college libraries 151, government, technical society and business libraries 64. There were also some in school libraries, and probably some in the libraries of such institutions as reformatories, hospitals, sanatoria, etc., but a record of their numbers was not obtained.

Men in the librarians' course are very much in the minority, even more so than in teacher-training schools. The discrepancy, in fact, appears to be out of all proportion to the relative possibilities for the two sexes in the profession of librarianship. At a time when obtaining satisfactory employment has been as difficult for university graduates as in the last few years it seems surprising that more young men have not been prompted to canvass the possibilities of librarianship as a career.

McGill University Library School. -- A one-year course for university graduates, leading to the degree of Bachelor of Library Science. Degrees were granted to the fourteen full-time students in attendance during 1934-35 and seventeen students were enrolled for the 1935-36 session. The evening course in Library Organization and Routine was attended by eight students during 1934-35 and fourteen attended the Summer Library School. Director, G. R. Lomer.

Library School, Ontario College of Education. -- A one-year course demanding senior matriculation or equivalent for admission. Students in attendance in the year 1935-36, numbered forty-seven, of whom thirty-seven were university graduates. Director, Miss Winnifred Barnstead. The calendar for 1936-37 announces two distinct courses, one for university graduates leading to the degree of Bachelor of Library Science, the other as before requiring honour matriculation for admission, and leading to a diploma.

Acadia University, Wolfville, Nova Scotia. -- Two optional subjects, Library Methods and History of Libraries and Library Administration, are open to students in the Faculty of Arts. Lecturer, Mrs. M. K. Ingraham.

University of Western Ontario. -- Library Science is a compulsory subject for first year students. One hour weekly.

Library Training for Teachers. -- Normal schools in some of the provinces include in their course some instruction in the use and operation of a library. The Ontario Department of Education has offered among its summer courses, one for school librarians.

PART II - DIRECTORIES
