PREFACE

This report covers a period of rising costs and gradual recovery from wartime shortages in book supply. Books in the possession of public libraries increased by nearly half a million volumes between 1945 and 1947, more than double the average biennial increase in the preceding fourteen years. Books and other printed matter were becoming available again from the United Kingdom in larger quantity, but the dollar value of imports was below the pre-war figure, while the value of imports from the United States had more than doubled.

In comparison with pre-war years less reliance is being placed upon the public library as a source of fiction reading for the adult population; circulation of this kind has dropped more than 25 p.c. in ten years. The public library, however, has maintained its place as a provider of adult non-fiction and of juvenile books, the latter frequently in collaboration with the schools. At the same time staffs have been strengthened and better service made possible by the libraries as reference centres.

University libraries, like other university facilities, were being strained to accommodate the veteran students. Book expenditure and library staffs in 1947 were about 60 p.c. greater than in pre-war years while enrolment had more than doubled.

The present report continues the biennial series begun in 1931. It has again been prepared by Miss S. A. Feeley of the Education Division, in consultation with Dr. John E. Robbins, Director.

H. MARSHALL,
Dominion Statistician.

CHAPTER I

PUBLIC LIBRARIES

The biennial survey of public libraries in Canada for 1947 covered 680 municipal and association libraries, the regional libraries of Prince Edward Island and British Columbia and the county library cooperatives of Ontario. The regional libraries of Nova Scotia and Saskatchewan in process of organization were not sufficiently advanced for inclusion in the 1947 survey.

Volumes.—The public libraries in 1947 exceeded all previous records of contents with 6,431,000 volumes. This is an increase of nearly 500,000 volumes since 1945 and in part is the result of deferred purchases during the years of the war when European books were not available and American and Canadian releases were fewer. The classification of reading material in 1947 shows a slight change in the proportions of classified volumes. In 1945 adult fiction represented 32 p.c. of the total classified volumes; non-fiction was 46 p.c. and juvenile material 22 p.c. The proportions for 1947 were: adult fiction, 29 p.c., non-fiction, 51 p.c. and juvenile books, 20 p.c. Some part of the increase in non-fiction reading material has been promoted by the regulations of Ontario that require the purchase of non-fiction books to meet the standards for provincial grants. An additional factor in the shift of weight is the difficulty in obtaining fiction reprints for replacements which results in patrons seeking other sources for fiction reading and a consequential drop in circulation for the libraries.

Circulation.—Despite the increase in volumes, loans have decreased almost to the 1937 level. During the years of the war there was considerable inflation of circulation and a measure of retrogression was expected in the post war years. Not all provinces indicate a decrease. In comparison with 1939 which might be considered a normal pre-war year, Quebec province, Alberta and British Columbia report substantial gains in circulation. The Maritime Provinces, Manitoba and Saskatchewan are affected by the reorganization of libraries under way in these areas. During the organizational period the work of some libraries has been suspended temporarily. Ontario province, responsible for two-thirds of the total volumes reported, shows a decrease of 980,000 loans from the 1939 figures; in the biennium 1945-47 the decrease was 300,000 loans.

TABLE 1.—SUMMARY OF VOLUMES REPORTED BY PUBLIC LIBRARIES IN 1947

Province	Adult fiction	Adult non-fiction	Juvenile	Unclassified	Total
Prince Edward Island	19,412	29,473	18,613	.....	67,498

1937	10,306,543	3,484,411	4,508,815	1,260,606	19,560,375	1,062,187

The major part of the loss in circulation is in adult fiction and in part is the result of popular Book Clubs and the availability of cheap editions.

Borrowers.—The loss in circulation is offset in some degree by an increase of 123,000 borrowers over the total reported for 1939. There is a drop from 1,254,000 in 1945 to 1,168,000 borrowers in 1947 which is due partly to a biennial revision of the list of borrowers and the suspended services during reorganization in certain areas of the Maritimes and the Prairie Provinces. The former factor does not wholly account for a drop of 17,000 borrowers reported by Ontario province between 1945 and 1947. In this case the lessened number of patrons is influenced by other sources of reading material and competitive interests for potential readers.

Expenditures and Receipts.—The costs of library service have increased in common with other community services. Expenditures for 1947 were approximately $3,739,000 as compared with $2,764,000 in 1945 and $2,056,000 in 1939. The proportion of the expenditures spent on books, binding and repair was about 26 p.c. in 1947 and 24 p.c. in 1945 and 1939. Salaries and wages represent about 54·6 p.c. of total expenditures in recent years. This is an increase of five per cent over 1939. The amount spent on salaries in 1947, $1,830,000, is almost double that of 1939, which was $947,000. Not all of this increase is represented by improved individual salaries. Some part of it is the result of larger staffs. In 1939 the libraries reported 1,262 employees including part time assistants. The staffs for 1947 totalled 1,990 employees. The average salary for the 1939 employees was $751: for the 1947 employees it was $920. During the past eight years the average salary of library employees has increased 23 per cent; the total amount spent on salaries increased 93 p.c. and the number of employees increased 58 p.c. over 1939.

Local taxes in 1947 accounted for 81·6 p.c. of the current receipts. Provincial grants were responsible for 9·5 p.c. of the receipts. The present survey is the first since the extensive revision of provincial grants undertaken by Ontario which, with some changes in the other provinces, have increased the total grants from provincial governments to $371,000 for 1947, as compared with $134,000 in 1945, and $72,000 in 1939.

[1] Includes bank over-drafts of $12,933.
T Territorial grant.

CITY LIBRARIES

City libraries in 1947 are responsible for 77 p.c. of the total expenditures or 3,064 thousand dollars out of a total of 3,961 thousand dollars. They hold 50 p.c. of the book stock and report 72 p.c. of the total circulation. The borrowers reported represent about 22 p.c. of the total population of the cities in which the libraries are located. This item varies by areas and ranges from 7 p.c. in the Maritimes to 32 p.c. in Ontario. Quebec borrowers in city libraries represent 20 p.c. of the population and those in the west are 23 and 22 p.c. for the Prairie Provinces and British Columbia respectively.

Reference Libraries.—Aside from the circulation of reading material, one of the most significant services to adults promoted by the public libraries is that of the reference departments and reference libraries. It is almost impossible statistically to assess the work of this branch of community service. Casual inquiries and telephone requests may appear too insignificant for the busy librarian to record, yet the time and effort required to satisfy the enquiring patron may be out of all proportion to the significance of the request. The more serious requests by research students, scholars, writers, business organizations and industry, require of the reference librarian a knowledge of the current and historical data published on the subject of enquiry whether it be professional or popular in character. Statistical data on such requests are incomplete but examples show that these enquiries compensate in some degree for the loss in circulation. The public libraries of Toronto and Hamilton with large reference departments replied to 43,000 requests in 1947. In the Prairie provinces, Regina, Saskatoon, Edmonton and Calgary answered another 40,000 enquiries. The Fraser Institute Library of Montreal, a reference library which reports no circulation of reading material, reports that 13,474 readers and research students consulted 20,916 books in 1947. In addition some two thousand requests were answered by telephone or letter. These data, compiled from the annual reports of the libraries mentioned, comprise a limited and inadequate sample of reference work conducted by all city libraries which serve the housewife, scholar, business man or teen-ager equally well.

Children's Libraries.—City libraries provide considerable data on their work with juveniles. There are eight libraries, one in Halifax and seven in Montreal, organized for children only. These eight special libraries report a book stock of 28,800 volumes. Some 10,000 children borrowed more than 12 volumes each, to total 128,664 loans during the library year.

The largest proportion of work with young readers is carried out by the Children's departments of municipal libraries where separate attractive quarters with facilities for various types of activities as well as reading are provided. The main activities recorded by the children's departments of public libraries were as follows:

Registered borrowers	249,383
Circulation of books	4,695,215
Number of school libraries or deposits	434
Libraries in receipt of class visits	45
Libraries that visit the schools	28
Libraries providing story hours	49
Libraries providing film shows	37
Libraries providing art classes	21
Libraries providing puppet shows	5

These activities were selected from a great variety of programs reported. In addition individual libraries report original feature programs of educational and recreational value such as dramatics, pageants, hobbies and handicrafts, poster contests, radio broadcasts, games and exhibitions.

Audio-visual education.—Acting in cooperation with the National Film Board, the National Film Society, the Provincial Departments of Education and other sources, the libraries of 37 cities and nine towns reported films in stock for loans or showings by the library. The returns received for 1947 were as follows:

Area	Public libraries	Films in stock		Showings	Audience
		Owned	On deposit		
Maritimes	2	.....	20	16	*
Quebec	3	4	530	6,844	678,854
Ontario[1]	31	713	1,904	17,096	1,045,675
Western provinces[2]	10	253	458	4,063	466,174
Total	46	970	2,912	28,019	2,190,703

[1] Includes 7 libraries in towns.
[2] Includes 2 libraries in towns.
* Information not available.

The above statistics are incomplete as some libraries rented or loaned their films to outside organizations and have no data on the number of showings or the audience.

Music Appreciation.—Records for loan or rental are reported by 21 city libraries. In all, some 13,000 records were reported. Loans outside the libraries numbered 54,363. Returns on concerts held by the libraries are incomplete but eight of the libraries reported the use of 2,437 records for this purpose.

Personnel.—The staffs of the city libraries under review include 986 full-time employees and 403 part-time employees. The full-time personnel includes 73 chief librarians, 538 other librarians, 233 clerical workers and 142 other employees engaged in various activities about the libraries. The full-time staff includes 456 employees with training in library science and the part-time assistants include 2 former librarians. This means that at least 75 per cent of the librarians now have professional training which in most cases is the Bachelor of Library Science degree or its equivalent. The full-time staffs were distributed as follows:

TABLE 7.—FULL-TIME STAFFS OF PUBLIC LIBRARIES IN CITIES, 1947

—	Chief librarians	Heads of divisions	Other librarians	Clerical staffs	Other assistants	Training in library science
Maritime Provinces	10	.....	8	3	.....	10

Ontario	31	86	219	110	125	283
Prairie Provinces	10	28	60	47	4	33
British Columbia	3	18	21	65	5	43
Total	73	147	391	233	142	456

Salaries.—The data supplied by the city public libraries on the subject of salary classification are incomplete. As a measure of reassurance to the employees, the questionnaire asks for a distribution of salaries by $500 intervals for the higher grades and $100 intervals for the lower grades. In several cases the maximum and minimum of the class involved was reported with no attempt to

fit the individual current salary into the intervals listed on the schedule. In such cases, where possible, the salaries were fitted into the intervals. In other cases the returns had to be entered under the unclassified group. The tables hereunder report the distribution of salaries by population unit for the professional librarians as separate from the non-professional and clerical employees.

The educational background of some 75 p.c. of the professional librarians is comparable with that of secondary teachers. The median salaries of the secondary and elementary teachers of ten individual cities were compared with those of the librarians of the same cities. The median salaries of the librarians are lower than the similar figures for secondary teachers in the same city by from $900 to $1,500, and in only four cities do they exceed those of the elementary teachers by from one hundred to two hundred dollars.

LIBRARIES IN TOWNS AND VILLAGES

Library authorities in Canada consider that a population unit of 4,000 is required to provide adequate library service for a community. There were 382 individual community libraries in the towns and villages of Canada by the 1941 census classification. Of this group, 96 libraries were located in centres with more than 3,000 population, 61 of them rated as free libraries. The Free libraries reported 646 thousand volumes and 1,719 thousand loans. Each volume was loaned 2·6 times. The Association libraries in the group, 35 in number, reported 115 thousand volumes and 238 thousand loans. On the basis of borrowers, each patron of the Free libraries read 13 books during the year. Patrons of the Association libraries read 29 books each in the same period. The average expenditures of the Free libraries was $4,000 each; that of the Association libraries was $936 each. The average amount paid by the Free libraries for salaries and wages was $1,600; that for Association libraries was $435. The median salary for the librarians employed by the 96 libraries of the group was $940.

A larger group of 286 libraries were located in incorporated towns and villages with less than 3,000 population, one-half of them in centres with less than 1,000 population. Although most of these libraries function on a part-time basis their service justifies the expenditure of public monies received from provincial and municipal sources. Statistical data on these small libraries for Ontario, the prairie provinces and British Columbia have been compiled for comparison of the free libraries and association libraries included. See tables 12 and 13.

RURAL LIBRARIES

In addition to the small libraries reported by the incorporated villages there is a further group of 225 individual libraries located in non-incorporated communities, mostly in Ontario. The average expenditure of these libraries in 1947 was under $360 or $30 per month. Included in the group are several large suburban libraries with budgets equivalent to those of the larger towns. If these were excluded the average expenditures would be $173 per library or less than $15 per month.

REGIONAL LIBRARIES

Since the publication of the 1944-46 survey, the work of organizing regional library service has progressed although there are no statistical data to indicate the progress made by the new libraries. In the province of Nova Scotia the projected Annapolis Valley Regional library is now fully organized. A similar project is under way for Truro. Manitoba has obtained the necessary legislative authority for the establishment of Regional libraries.

Prince Edward Island reports a return to pre-war standards in reading and book stock and considerable improvement in the buildings and equipment of the branch libraries. More than 350 schools in the province, mostly rural schools, were served in 1947. Total circulation of books in the schools was 47,000. In 1945 the libraries served 272 schools. Total circulation for that year was 31,264.

The county councils of Ontario have passed by-laws to permit the establishment of county library cooperatives which are recognized as the only solution that has yet been found to the problem of book service for rural areas in Ontario. The Ontario Provincial Government has increased the grants-in-aid to the co-operatives. Exclusive of the new cooperatives the Legislative grants increased from $9,300 to $22,560 between 1945 and 1947.

Saskatchewan province passed enabling legislation in 1946 and is establishing the first experimental regional district in the vicinity of Prince Albert where some 90,000 people live in a relatively compact area. The Minister of Education proposes a per capita grant of one dollar for the purchase of an initial book stock and thereafter will contribute 25 p.c. of the annual maintenance budget. Alberta is proceeding with a similar project for the Peace River District. The great difficulty encountered in the Prairie provinces in the establishment of Regional library service is that of the widely scattered population which increases the costs of transportation.

The Union libraries of British Columbia extended their services into new areas. The total population served by the libraries increased from 126,000 in 1946 to 184,000 in 1947, or approximately 50 per cent. Staffs, book budgets and equipment were increased proportionately.

* Information not available.

[1] The number of county libraries in Ontario refers to the central library. There is no record available of the individual participating libraries.

CHAPTER II

UNIVERSITY AND COLLEGE LIBRARIES

Statistical data on the academic libraries indicate that the libraries have kept pace with the inflated enrolment in the colleges and universities during the post-war years. Full-time enrolment in the institutions of higher education had increased 66 p.c. in 1947 over that of 1945. Expenditures on book stock by the libraries of these institutions had increased 65 p.c. in the same period. A similar increase occurred in the personnel of the libraries. Full-time employees were 47 p.c. higher in 1947 than in 1945 and part-time assistants, almost entirely students, 75 p.c. higher, making an increase of 60 p.c. of the entire staff over that of 1945. In actual numbers, the data were as follows:

—	Full-time enrolment	Expenditure on book stock	Full-time staff	Part-time staff
		$		
1947	108,000	417,000	420	602
1945	65,000	252,000	287	350

The volumes reported in 1947, 6,373 thousand including pamphlets and periodicals, were almost equally divided between the French language institutions and the English language institutions. Out of 169 libraries, 82 French language libraries reported 2,559 thousand volumes and 87 English language institutions reported 3,814 thousand volumes. On the basis of the number of volumes in each library the group may be classified as follows:

—	French language libraries	English language libraries
Volumes reported—		
100,000 and over	5	9
50,000—99,999	7	7
25,000—49,999	21	9
10,000—24,999	22	26
Under 10,000	27	36
Total	82	87

In examining the above table it is well to remember that nine universities in Canada record a full-time enrolment of 3,000 and over and 124 of the colleges and seminaries included in the group report less than 500 enrolment. A large proportion of the group are residential institutions in many of which no records of the loans and the individual borrowers are kept. In later years the increased library personnel with training in library science have kept such records and some interesting data are available as shown hereunder.

Full-time enrolment	Number of institutions	Book stock	Recorded loans	Recorded borrowers	Inter-library loans	
					In	Out
		000's	000's	000's		
5,000 and over	6	2,190	1,266	400	2,716	3,943
3,000—4,999	3	493	366	12	786	150
1,000—2,999	8	781	360	13	1,041	639
500— 999	28	904	261	14	73	65
Under 500	124	2,005	303	24	1,100	1,180

As a further standard by which to assess the work of the libraries in relation to the student body the number of seats for readers and research workers was compiled and classified by enrolment and districts. See table 15.

TABLE 15.—READERS' SEATS IN LIBRARIES OF UNIVERSITIES AND COLLEGES, 1947

Audio-visual Aids.—In recent years the academic libraries are introducing the use of microfilms. The reports for 1947 show 20 of the libraries with microfilms and the necessary reading machines. This group is not wholly confined to the large institutions. All but one of the universities with more than 3,000 students report microfilms and reading machines. In the smaller institutions four out of 28 with more than 500 students report similar equipment and it is interesting to note that eight of the smaller institutions with enrolment under 500 have installed the equipment for the preservation of records.

Although films, slides, film strips and photoprints are recognized as essential equipment in higher education these teaching aids are rarely located in the libraries. Only 10 of the academic libraries report film projectors, six of these are in the smallest institutions and three in the largest libraries. The latter are probably additional to the equipment of the university proper.

Salaries of Librarians.—The largest universities in recent years have instituted professional salary standards for the librarians but in the main the salaries remain low in comparison with those of the public libraries. The median salary for academic librarians for 1947 was $1,512; that for librarians in public libraries was $1,600 for town libraries, and $2,047 for city libraries. The junior classification of the teaching staff of the universities, that of instructor, reported a median of $2,033 for the same year. However, some progress has been made in

the upward revision of salaries since 1945 when the median for the same institutions worked out at $1,225. The distribution of salaries paid in 1947 compared with that of 1945 was as follows:

Salary range	1947	1945
$3,500 and over	9	3
3,000—3,499	6	2
2,500—2,999	12	5
2,000—2,499	43	10
1,500—1,999	83	24
1,000—1,499	106	59
Under $1,000	44	51
Not stated	117	133
Total	420	287
Median Salary	$1,512	$1,225

On the assumption that the smaller academic libraries would tend to lower the median of the larger institutions an additional compilation was made for the group of libraries paying the highest salaries. Excluding Mount Allison University and McGill, universities from which no returns were received, the median salary paid to the librarians of 18 English-language institutions was $1,643. Within the top range five librarians received over $5,000 in salary. Out of 219 librarians recorded in this group 152 reported a degree or equivalent diploma in library science.

* Information not available.

CHAPTER III

GOVERNMENT, BUSINESS AND TECHNICAL SOCIETY LIBRARIES

The work of special libraries which are largely reference libraries presents a difficult problem in statistical appraisal. The up-to-date reference library contains large quantities of clippings, pamphlets and bulletins that are difficult to enumerate, yet are essential in keeping abreast with current technical, professional and business trends. Not the least important of the contents of these libraries are the maps, graphs, photographs and slides that are used to present information more accurately than verbal descriptions do.

The present survey covers 173 such libraries, and the attempt to obtain information in detail to cover the more obvious items was not completely successful. The data collected is summarized in Table 17.

A—Dominion Government Libraries

Except for four libraries located at Montreal, Toronto, Calgary and Victoria and a few smaller libraries located at the agricultural experimental stations, the Dominion Government libraries are centralized in Ottawa. The Ottawa group contains the Library of Parliament with more than 500,000 volumes and some 30 libraries ranging in size from 2,000 to 190,000 volumes that are in the main departmental libraries. The Ottawa libraries contain well over two million volumes, including the pamphlets recorded, which are used by a restricted or limited group of readers and research workers.

Circulation.—A comparatively small number of these libraries keep records of loans, which are mostly within their respective departments. Among the larger libraries in size, those with 50,000 or more volumes, three libraries report substantial loans—the Department of Agriculture library, the Dominion Bureau of Statistics, and the library of the National Research Council. These three libraries serve large professional staffs. Two of the largest libraries of this group, the Library of Parliament and the Supreme Court of Canada have no statistics on circulation. In all, 17 libraries of the 31 Dominion Government libraries located in Ottawa reported 248,000 loans. On the basis of interlibrary loans 14 of the group reported 12,764 loans *to* other libraries and 4,835 *from* other libraries.

TABLE 17.—SUMMARIZED STATISTICS OF GOVERNMENT BUSINESS AND TECHNICAL SOCIETY LIBRARIES, 1947

Median Salary	$2,500	$1,766	$1,850	$1,725	$1,575	$1,321

Catalogues.—Some measure of the adequacy of Government libraries may be obtained from the size of the catalogues which provide the librarian with a subject index for ready reference. The questionnaire asks for the number of cards in the main catalogues and other catalogues. The latter catalogues include correlative references to material which may be obtained from other sources. The broader technical and professional fields require meticulous cross indexing with resulting large complex catalogues. It is therefore possible to find large catalogues in libraries with comparatively few volumes. The libraries with catalogues of 20,000 cards and over are listed below with the volumes and pamphlets reported.

Library	Volumes and pamphlets	Catalogues	
		Main	Other
Department of Agriculture	105,600	482,775	171,600
Division of Botany	7,600	77,941	–
Division of Entomology	21,000	24,000	7,000
Public Archives	59,500	24,353	–
Bank of Canada	23,700	76,800	–
Dominion Bureau of Statistics	190,500	80,186	1,525
Department of Labour	122,700	222,000	307,000
Geological Survey and National Museum	95,000	211,170	22,100
Mines Branch	49,000	40,704	108,000
Dominion Observatory	24,200	115,000	–
Forest Products Laboratory	32,000	52,833	–
Department of National Health and Welfare	11,100	22,000	20,000
National Research Council	82,000	71,300	295,000
Department of Transport	33,600	26,770	8,354

Seats for Workers.—The use of Dominion Government libraries for research and reference is related to the number of seats in the library and space for work. In this respect there is some improvement since the 1945 survey. Libraries with seating accommodation for more than 20 people include those of the Department of Agriculture, the Public Archives, the Geological Survey and National Museum, the Department of National Health and Welfare, the National Research Council, the Library of Parliament and the Department of Transport. The Department of Labour reports 15 seats in the library and the category "five to 10 seats" includes the Chemistry and Botany divisions of the Department of Agriculture, the Department of External Affairs, the Dominion Bureau of Statistics, the Mines Branch, Forest Products Laboratory and the Geodetic survey. The remaining libraries report from two to four seats for reference workers. Examination of the group with the largest number of seats suggests that the seating accommodation must in some cases be inadequate for the use of the departmental staffs or encouragement of outside research workers. The libraries closely associated with scientific and statistical research are in constant use by staffs of several hundred people. The Library of Parliament reports 50 seats for the use of the Senate and House of Commons, the Parliamentary Press, the various staffs associated with sessional work, and such outsiders as are authorized to use the library. In the Public Archives Library where research often necessitates prolonged sessions of study for a scholar, space permits a maximum of 30 seats.

Maps, Photographs and Slides, etc.—Out of 27,260 maps reported, the Dominion Archives library reported 20,000 and the Geological Survey 5,000. The balance are located as follows: Division of Botany 319; Division of Entomology 170; Bank of Canada 110; Dominion Bureau of Statistics 517; Department of Justice 50; Department of Labour 65; Dominion Observatory 720; Department of Transport 201; the Supreme Court of Canada 50; and the Unemployment Insurance Commission 58.

Only four libraries reported photographs, the Archives library again leading with 60,000. The Department of Transport reported 212; the Dominion Observatory 120, and the Dominion Bureau of Statistics 30.

Slides are reported by the Geological Survey and National Museum library (8,000); and the Dominion Observatory library (2,700).

The comparatively recent microfilm services are reported by the libraries of the Department of Agriculture, the Library of Parliament, the Dominion Bureau of Statistics, and the Department of Transport.

Staffs and Salaries.—Of the 31 libraries included at Ottawa 22 are in charge of full-time librarians. The Library of Parliament requires two chief librarians. Returns were not received from four libraries, and the balance are in charge of clerical staffs of the Department or Division as a part-time duty. In addition to the above the libraries making returns reported 110 full-time assistants. Of the 133 full-time employees, 53 had training in library science. The median salary for Dominion Government librarians was $2,500.

B—Provincial Legislative Libraries

Libraries under control of the Provincial Governments include nine legislative libraries, the Provincial Archives and Museums of Nova Scotia, New Brunswick, Ontario, Saskatchewan and British Columbia, and several departmental libraries including Education, Health and Welfare, Agriculture and Mines. The Province of Ontario, and the Province of Nova Scotia, also report libraries of provincial Research Foundations.

The legislative libraries of the nine provinces contain more than a million volumes and pamphlets, some 2,000 maps, 700 photographs and 900 slides. Just two of the libraries, Manitoba and British Columbia, report microfilms.

Returns on loans were incomplete but in seating accommodation the Legislative libraries are in better circumstances than the Dominion libraries. Seven of the nine libraries report more than 20 seats for readers and the British Columbia library with 54 seats is better equipped in this respect than the Library of Parliament in Ottawa.

Just five of the Legislative libraries report inter-library loans. Ontario leads with 50 loans *to* other libraries and 25 *from* other libraries. The total number of inter-library loans is insignificant for the type of material available in these libraries.

All Legislative libraries report full-time librarians. The total full-time personnel was 65, and 17 of them had training in library science. The median salary was $1,766.

The provincial departmental libraries range in size from 12,000 volumes to 28,000 volumes. Ontario leads in the number of departmental libraries. The Departments of Education have the greatest size with a total of 44,000 volumes for the five provinces reporting departmental libraries in this field. It is of interest to note that the library of the Quebec Department of Agriculture reports the highest number of loans to other libraries recorded by all provincial libraries, viz, 293 out of 463 loans recorded.

C—Business Libraries

The special libraries classified as business libraries in this survey include those of 5 banks; 11 insurance companies; 8 representative public utility and transportation companies; 6 manufacturing and industrial companies and 3 newspapers. This group is fairly representative but it is not comprehensive due to lack of data from other libraries. With the cooperation of the special librarians and the sponsoring business organizations data on this branch of library service may be more complete in future surveys.

Bank Libraries.—Five major banking systems, the Bank of Montreal, the Royal Bank of Canada, the Canadian Bank of Commerce, the Dominion Bank of Canada, and the Bank of Nova Scotia report about 65,000 volumes and 900 periodicals. Loans reported by the first three libraries total 32,500 to some 2,300 individuals. Of the total full-time staff reported, 12 in number, three had training in library science. Data on salaries were provided by only one library.

Insurance Libraries.—The provinces of Quebec, Ontario and Manitoba were represented by 12 insurance libraries. Volumes and pamphlets reported were approximately 100,000 in number. There were 27 full-time employees in the libraries—8 full-time librarians and 19 assistants—and five of the group had library science training. The average salary was $1,365.

Public Utilities and Transportation Libraries.—The libraries on this group reported 28,654 volumes. Four libraries had full-time librarians. The total full-time staff was 7. The median salary for librarians with professional training was $1,875.

Manufacturing and Industrial Libraries.—There were six libraries included in this group, two are substantial in contents—the library of the Imperial Oil Company at Sarnia, Ontario, and that of the Consolidated Mining and Smelting Company of Trail, B.C., with 14,100 volumes and 21,800 volumes respectively. Out of 14 full-time employees in the group only one had professional training. Information on salaries was given for only two libraries.

Newspaper Libraries.—The three libraries reporting contain about 20,000 volumes. There are 15 full-time employees, three of whom have professional training. Salaries were reported for only one library.

Catalogues of Business Libraries:

—	No.	Catalogue cards	Loans recorded	Borrowers recorded	Seats in libraries
Bank libraries	3	150,000	32,487	2,350	6
Insurance libraries	4	153,350	95,824	1,200	28
Individual libraries	3	225,850	*	*	22
Public utilities	3	20,000	23,690	10,111	70

In addition to the above table, which emphasizes the use of the libraries and the numerous subjects covered by the catalogues, the entire group of business libraries reports some 12,000 maps, more than 37,000 photographs, 900 slides and 80 reels of microfilms. The libraries reported 654 loans *to* other libraries and 499 *from* other libraries.

D—Technical and Professional Society Libraries

A wide variety of association libraries comprise this group including Law and Justice; Mining and Engineering; Health, Medicine and Public Welfare; Astronomy; Chartered Accountancy; International Affairs; Education, Literary Societies and Art. Numerically the largest group is that of Law libraries.

Law Libraries.—Included in the group are the libraries of six provincial Law Societies of Prince Edward Island, Nova Scotia, New Brunswick, Ontario, Manitoba and Alberta; the municipal law societies of Montreal, Quebec and Calgary; and the county or regional societies of York and Carleton in Ontario. There are two separate libraries for judges in Alberta located at Calgary and Edmonton. The 13 libraries report just over 32,000 volumes and some 200 periodicals. Loans are reported by six. Total circulation for these six libraries was 23,648 to 2,062 individuals. The seating capacity ranges from 12 to 67. Total full-time staff was 20 including 7 full-time librarians. Exactly one-quarter of the staff had training in library science. The median salary for the group was $1,850. Three of the librarians received over $3,000 each per year. Inter-library loans were reported in Ontario only, a total of 9 *to* other libraries and 5 *from* other libraries.

Other Technical and Professional Libraries.—The 22 libraries included here reported 206,342 volumes; 380 maps; 28,000 photographs; 5,237 slides and some 1,600 periodicals. Circulation was reported by 10 libraries as 19,759 loans to 2,514 individuals. The smaller libraries of the group function with voluntary or part-time staffs. The 10 larger libraries with full-time librarians report a total of 16 employees, 10 of whom had training in library science. The median salary was $1,725.

E—Other Special Libraries

Classification of the special libraries by types as above leaves a small group of libraries consisting of fraternal societies, libraries for the blind, co-operative organizations and a few small museums. There are 19 such libraries, only three with full-time librarians, two of whom had training in library science.

CHAPTER IV

PROFESSIONAL PROGRESS

Within the past two years the Canadian Library Association (Association canadienne des bibliothèques) implemented a program of activities of national and international scope that is significant of professional development and recognition.

Since the establishment of the United Nations Educational, Scientific and Cultural Organization (UNESCO) the C.L.A. has taken an active part in the projects of reconstruction and education inaugurated by the international organization. Early in 1948 the Canadian Council for Reconstruction through UNESCO and the Canadian Library Association jointly established a Canadian Book Centre at Halifax, where collections of scientific and technical books were sorted for shipment to libraries suffering from the effects of the war. More than 200,000 items have been distributed as a contribution from Canada to the reconstruction of libraries overseas, in large measure due to the efforts of the librarians.

The Canadian Library Association participated in the International Library School convened in the summer of 1948 by UNESCO and the International Federation of Library Associations. A librarian was included among the Canadian delegates to the Second General Conference of UNESCO in Mexico, 1947, and the Third in Lebanon, 1948.

A recent recognition of the place of librarians within the national cultural field was an invitation to the Canadian Library Association to present a brief on a National Library to the Royal Commission on National Development in the Arts, Letters and Sciences, established by Order in Council of April, 1949.

Within their own field the librarians have been active in devising plans for self education and self help through the Association. Special projects have included the publication of 30 sets of bio-bibliographies, the annual Canadian Index of Publications, and a catalogue of microfilmed newspapers photographed by the C.L.A. and available for distribution.

The annual conferences have included an Institute of Personnel with discussions on job classification and personnel selection as related to library service, and constructive programs relating to standards of library service for the community.

The library schools of Canada have conducted a campaign to obtain more recruits for the profession with some success. The enrolment and graduates from library schools from 1937 to 1948 at two-year intervals follows:

Academic Year	Enrolment				Graduates	
	Full time		Part time		Men	Women
	Men	Women	Men	Women		
1937	–	51	–	–	1	42
1939	4	54	19	29	4	56
1941	6	46	15	20	5	48
1943	4	38	33	29	4	32
1945	7	39	40	40	4	41
1947	17	93	8	14	56	48
1948	15	67	12	27	11	68

TABLE 19.—SUMMARY OF LIBRARY PERSONNEL, 1947

Total	1,022	281	747	1,073	121	241	12	287	462	767

The library schools have reported 1,189 graduates from 1929 to 1948 inclusive. A summary of the librarians included in the 1947 survey records 1,354 full-time employees on library work. The libraries of the survey comprise the major source of employment for professional librarians in Canada.
