PREFACE

The Dominion Bureau of Statistics has published hospital statistics annually since 1932. Up to and including the year 1951 these were issued in the form of a single annual report covering all main aspects of hospital activity. Since 1952 the report has been divided into two parts, Volume I containing information on accommodation, utilization, facilities, and personnel, and Volume II dealing with hospital financial statistics.

The statistics included in the present report have been derived from annual schedules completed by hospitals at the close of the calendar year and transmitted to the Bureau through provincial departments of health. Acknowledgement is expressed to individual hospital staffs and to provincial hospital authorities for their assistance in the preparation of the source data.

The report was prepared in the Institutions Section of the Health and Welfare Division of the Bureau.

WALTER E. DUFFETT,
Dominion Statistician.

PRÉFACE

Le Bureau fédéral de la statistique publie la statistique des hôpitaux annuellement depuis 1932. Jusqu'à l'année 1951 inclusive, la statistique était publiée en un seul rapport qui embrassait tous les aspects principaux de l'activité hospitalière. Depuis 1952, le rapport paraît en deux volumes: le premier porte sur le nombre de lits et leur utilisation, les aménagements et le personnel, et le second, sur les finances des hôpitaux.

La statistique contenue dans le présent rapport est tirée des questionnaires annuels remplis par les hôpitaux à la fin de chaque année civile et envoyés au Bureau fédéral de la statistique par l'entremise des ministères de la Santé. Nous remercions le personnel des hôpitaux, de même que les autorités hospitalières des provinces, de leur collaboration à l'établissement des données de base.

Le rapport a été établi à la Section des institutions de la Division de la santé et du bien-être du Bureau.

WALTER E. DUFFETT,
Statisticien du Dominion.

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- r revised figures.
- x figure deleted to ensure anonymity.

SIGNES CONVENTIONNELS

Voici la signification des signes conventionnels employés dans les tableaux du Rapport:

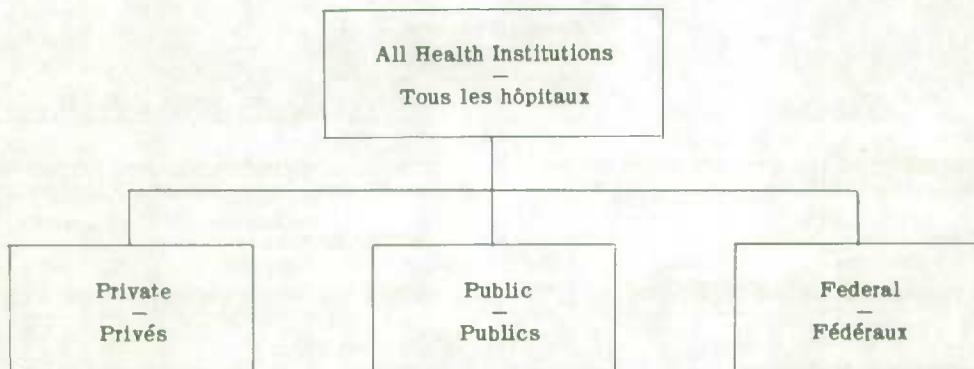

- .. chiffre inconnu.
- ... chiffre qui ne conviennent ou ne s'appliquent pas.
- néant ou zéro.
- montant ou quantité trop faible.
- r chiffre rectifié.
- x chiffre supprimés afin de préserver l'anonymat.

INTRODUCTION

The statistical description of the activities of hospitals in Volume I of Hospital Statistics is supplemented by available data on finances in Volume II. In the first table will be found a general summary of all health institutions which reported finances. The main body of the Report, however, deals with public general and special hospitals, which for brevity in this Report will be referred to as public. The other two main types of hospitals, private and federal, do not submit financial data.

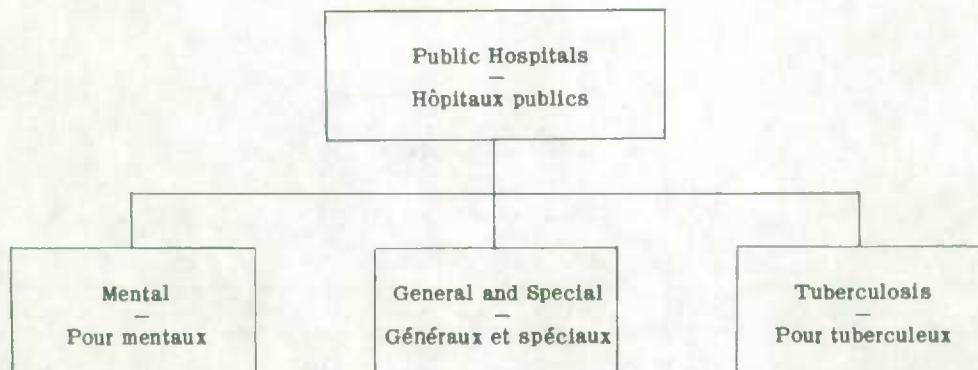

INTRODUCTION

La statistique de l'activité hospitalière contenue dans le volume I de la Statistique des hôpitaux est complétée par les données financières disponibles contenues dans le volume II. Le premier tableau résume la statistique de tous les hôpitaux qui déclarent leurs finances. Le corps même du rapport traite toutefois des hôpitaux généraux et spéciaux qui, pour abréger, seront dits publics. Les deux autres principales catégories d'hôpitaux — privés et fédéraux — ne fournissent pas de données financières.

While the present Report deals only with one type of public hospital, the three main types should be kept in mind: mental; general and special; and tuberculosis. Financial data for the mental hospital group will be found in the Dominion Bureau of Statistics' publication *Mental Health Statistics Financial Supplement* while data for the tuberculosis group are published in *Tuberculosis Statistics Financial Supplement*.

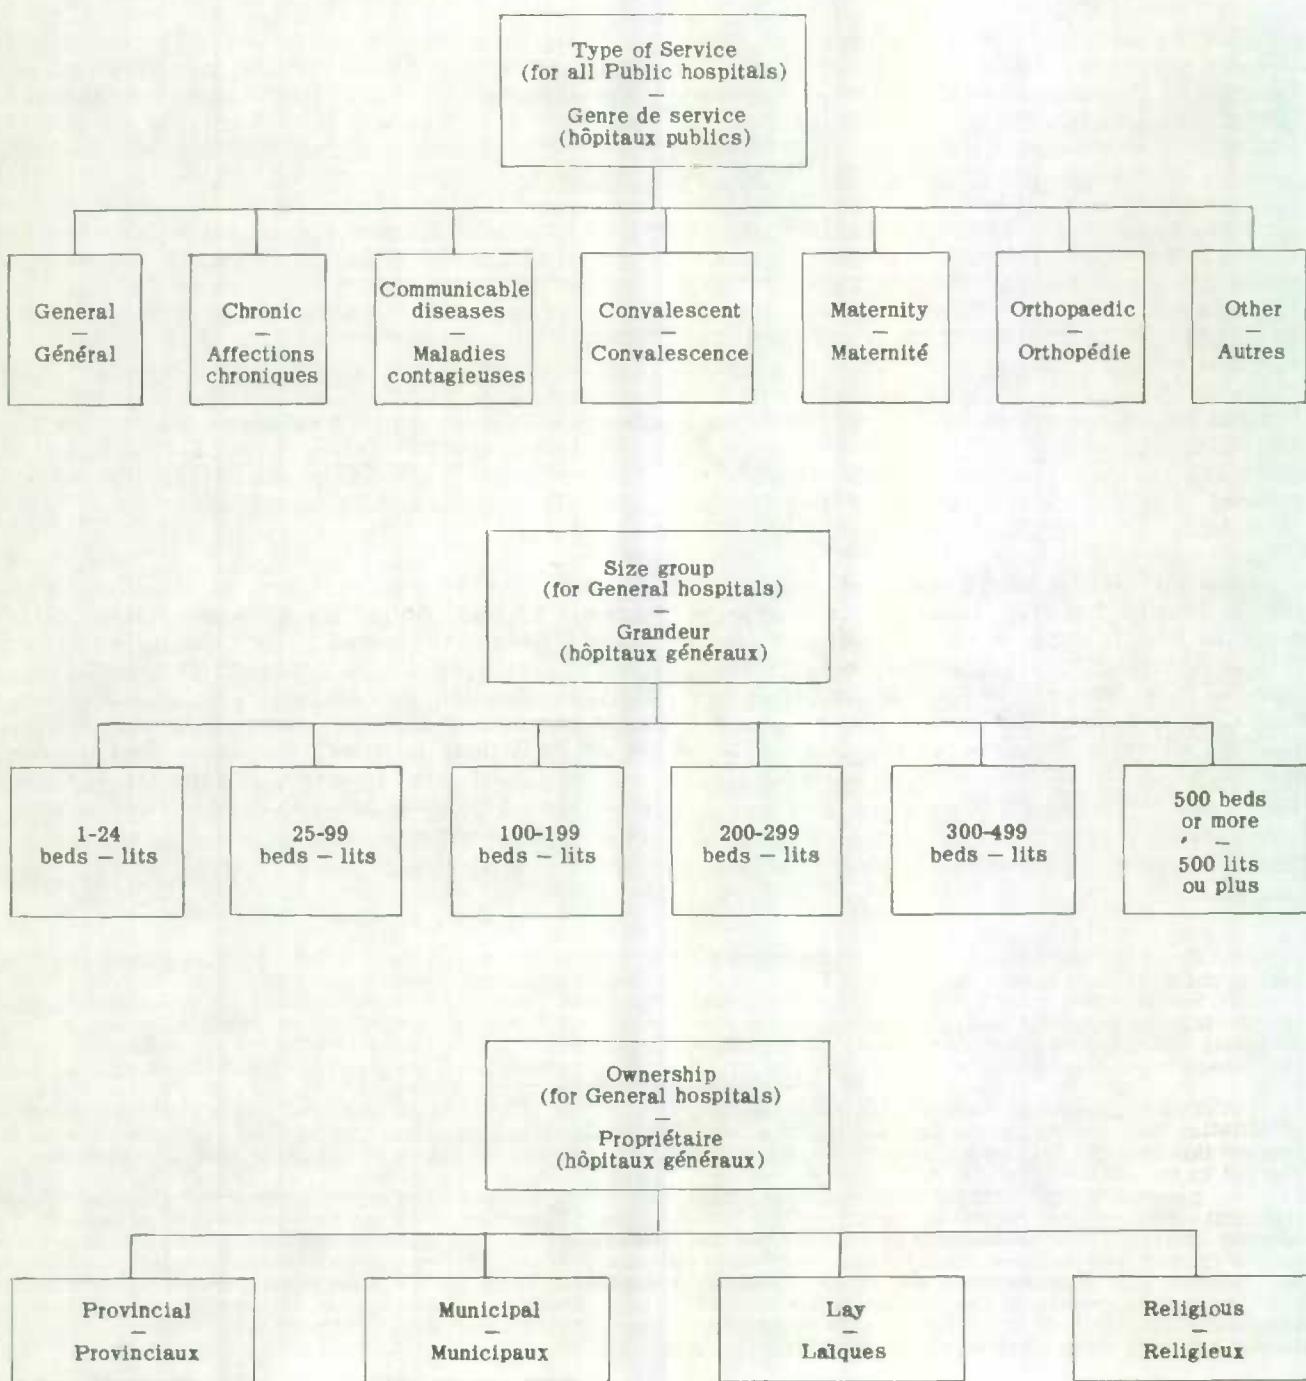

Bien que le présent rapport ne traite que d'un genre d'hôpital public, les trois principales catégories doivent être retenues: pour maladies mentales; généraux et spéciaux; et pour tuberculeux. La statistique financière des hôpitaux pour maladies mentales se trouve dans la publication du Bureau fédéral de la Statistique intitulée: *Statistique de l'hygiène mentale — supplément financier*, et celle des hôpitaux pour tuberculeux dans *Statistique de la tuberculose — supplément financier*.

PUBLIC HOSPITALS

In general the arrangement of the financial data in this report covers a broad, three-fold pattern. The first table in a group will present the data for public hospitals by type of service such as general, chronic, communicable diseases, convalescent, maternity, and orthopaedic. The second table will classify the data for general hospitals by standard bed capacity while the third is concerned with general hospitals by type of ownership such as provincial, municipal, lay, and religious. The three standard axes of classification may be illustrated as follows.

En général, le présent rapport groupe les données financières sous trois grands chefs. Le premier tableau d'un groupe présente les données sur les hôpitaux publics par genre de service, soit les hôpitaux généraux, pour affections chroniques, pour maladies contagieuses, de convalescence, de maternité ou d'orthopédie. Le deuxième tableau donne la statistique des hôpitaux généraux d'après la capacité théorique en lits, tandis que le troisième classe les hôpitaux généraux selon le propriétaire, soit hôpitaux provinciaux, municipaux, laïques et religieux. Voici le schéma des trois chefs de classement:

ALL HEALTH INSTITUTIONS

In 1956 Canada's hospitals reported a further increase in operating revenue and operating expenditure. Revenue rose by 11.5 per cent to \$439,400,000 from \$394,300,000, while expenditure went up to \$456,300,000 from \$408,900,000, an 11.6 per cent increase. (If non-reporting public hospitals had submitted data, it is estimated that the expenditure figure would have been about \$467,500,000, or \$29.13 for each person in the ten provinces.) The reported cost of one day of care was \$8.45¹ in 1956, or 68 cents more than the year before. This 68-cent rise was the largest in any year on record.

Over the 14-year interval from 1942 until 1956 the total expenditure figure was uninterrupted, and the pace of the increase quickened latterly. From \$77 million in 1942, the amount rose above \$100 million in 1945, \$200 million in 1949, \$300 million in 1953, and \$400 million in 1955. If the 1956 percentage increase were continued into the future, the total would exceed \$500 million in 1957, \$600 million in 1959, and \$700 million in 1960. On a per capita basis the increase over the 1942-1956 period was also unbroken, moving from \$6.62 in 1942 to \$28.43² in 1956. Between 1955 and 1956 the rate rose by \$2.33, another record. If the per capita figure is adjusted by an index based on hospital charges for basic service³, interruptions in the increase appear in 1945 and in 1948 and again in 1951 and 1952. On this basis, the 1956 figure is reduced to \$16.77, lower than the 1950 and 1951 rates but still the highest since then (Fig. 1).

PUBLIC HOSPITALS

Public general and special hospitals, referred to as "public" hospitals, form the principal subject of this report (see "Introduction", above). More hospitals submitted usable revenue and expenditure statements (*i.e.*, reported) in 1956 than ever before, the total rising to 819 from 793 in 1955. Public hospitals known to be operating, but failing to report⁴, were less numerous in 1956;

1. Based on total patient days, including days of adults, children, and newborn.

2. For reporting public general, special, mental, and tuberculosis hospitals only. The \$29.13 cited in the preceding paragraph incorporates estimated expenditure of non-reporting public hospitals.

3. Thereby removing, approximately, the effect of inflation from the rising per capita cost. The base year for this index is 1949, and its source is room rates charged by hospitals.

4. Non-report, with respect to this volume, may represent (1) complete failure to report; or (2) submission of an illogical or basically incomplete schedule; or (3) very late submission (schedules received by the Dominion Bureau of Statistics as late as November, 1957, have been included). The Territories are omitted completely from the body of the report, such information as was available being presented in an appendix.

ENSEMBLE DES HÔPITAUX

En 1956, les recettes et les dépenses de gestion déclarées par les hôpitaux du Canada ont encore augmenté. Les recettes se sont accrues de 11.5 p. 100, soit à \$439,400,000 au regard de \$394,300,000, et les dépenses, à \$456,300,000 contre \$408,900,000 (11.6 p. 100). (Si tous les hôpitaux publics avaient fourni une déclaration, le chiffre national des dépenses serait d'environ \$467,500,000 ou de \$29.13 par habitant.) Les frais déclarés par jour de soins se sont chiffrés par \$8.45¹ en 1956, ou 68c. de plus qu'en 1956, soit une augmentation sans précédent.

Durant la période de 14 ans (1942 à 1956), le chiffre des dépenses totales n'a jamais diminué et l'avance s'en est accélérée ces dernières années. Il était de 77 millions de dollars en 1942, et il a dépassé 100 millions en 1945, 200 millions en 1949, 300 millions en 1953 et 400 millions en 1955. Si l'augmentation procentuelle de 1956 se continue, le total dépassera 500 millions en 1957, 600 millions en 1959 et 700 millions en 1960. L'augmentation par habitant au cours de 1942-1956 n'a jamais cessé non plus, passant de \$6.62 en 1942 à \$28.43² en 1956. De 1955 à 1956, elle a été de \$2.33, chiffre sans précédent. Si le chiffre par habitant est ajusté au moyen de l'indice du tarif du service de base³, l'avance a été interrompue en 1945 et 1948 et de nouveau en 1951 et 1952; le chiffre de 1956 est réduit à \$16.77, soit un chiffre inférieur à ceux de 1950 et de 1951 mais le plus élevé depuis (graphique 1).

HÔPITAUX PUBLICS

Les hôpitaux publics généraux et spéciaux, indiqués par "publics", forment l'élément principal du rapport (voir "Introduction" ci-dessus). Un nombre plus grand que jamais d'hôpitaux ont fourni un état (statistiquement exploitable) de leurs recettes et de leurs dépenses en 1956 (793 en 1955 et 819 en 1956). Les hôpitaux publics actifs qui n'ont pas fait rapport⁴ ont été moins nombreux en 1956 (91 en 1955, mais

1. D'après le nombre total de jours-malade (adultes, enfants et nouveau-nés).

2. Quant aux seuls hôpitaux publics généraux, spéciaux, pour malades mentaux et pour tuberculeux qui ont fait rapport. Les \$29.13 mentionnés au paragraphe précédent comprennent les dépenses estimatives des hôpitaux publics non répondants.

3. Éliminant ainsi à peu près l'effet de l'inflation tenant aux frais accusés par habitant. L'année de base de l'indice est 1949 et sa source est le tarif des chambres.

4. Ne pas faire rapport, en ce qui concerne le présent rapport, signifie: 1° ne pas envoyer de rapport; 2° envoyer un rapport illogique ou fondamentalement incomplet; ou 3° envoyer un rapport très tardivement (les rapports reçus par le Bureau jusqu'en novembre 1957 ont été comptés). La statistique des hôpitaux des Territoires est donnée à part dans un appendice.

there were 91 in 1955 but only 78 the next year. Thus the percentage of hospitals omitted fell from 10.3 to 8.7, or by almost one-sixth. In terms of bed capacity there was also an improvement of coverage; non-reporting hospitals had contained 4.5 per cent of operated capacity in 1955, but had only 3.9 per cent in 1956. Reporting hospitals averaged 118 beds in 1956, while non-reporting hospitals had an average of only 50 beds. Newfoundland and Quebec together accounted for 52 of the 78 non-reporting hospitals, and for 2,706 of the 3,933 unreported beds.

REVENUE

Total revenue

All principal categories of income shared in the overall revenue increase. In 1956 the 819 reporting hospitals took in \$329,400,000, or 11.7 per cent¹ more in the aggregate than the \$295,000,000 of the year before.

Earnings

Income per bed stood at \$3,397 for the year 1956 (or \$3,936 excluding bassinets), compared with \$3,219 (or \$3,733) the year before, a rise of 5.5 per cent. General service earnings from care of in-patients rose by 15.0 per cent to \$227,000,000. Primarily this figure represents earnings from provision of room, board, and routine services, but incorporates an indeterminate component of "special service" earnings from hospitals which operate on an inclusive rate basis and include in the basic room rate a pro-rated component representing the cost of providing special services. Making up the total were \$34,280,000 from private rooms, a rise of 6.2 per cent; \$54,630,000 from semi-private rooms, 17.8 per cent more than in 1955; \$130,700,000 from standard wards, up 15.6 per cent; and \$7,369,000 from nursery accommodation for newborn, a 29.1 per cent increase. General service earnings from care of out-patients, an item added to the reporting form in 1955 to cover nursing services given to out-patients, rose 18.2 per cent in 1956 from its initial \$928,100 to \$1,097,000. Earnings from special services to in-patients rose to \$76,250,000 from \$71,530,000, a rise of 6.6 per cent, while the corresponding figure for out-patients went up by 16.2 per cent to \$18,430,000 from \$15,850,000. Every individually tabulated special service showed an increase in both the in-patient and the out-patient accounts, except² for in-patient physiotherapy (down by 8.6 per cent) and in-patient ambulance service (down by 25.6 per cent). All the

seulement 78 en 1956). Ainsi, le pourcentage d'hôpitaux omis est tombé de 10.3 à 8.7 ou de presque le sixième. La capacité en lits est aussi plus complète; les hôpitaux non répondants comptaient 4.5 p. 100 des lits installés en 1955, contre 3.9 p. 100 seulement en 1956. Les hôpitaux répondants comptaient en moyenne 118 lits en 1956 et les hôpitaux non répondants, seulement 50 lits. Terre-Neuve et Québec ensemble comprennent 52 des 78 hôpitaux non répondants et comptent 2,706 des 3,933 lits non déclarés.

RECETTES

Recettes globales

Toutes les principales catégories de revenu ont augmenté. En 1956, les 819 hôpitaux répondants ont reçu \$329,400,000, soit 11.7 p. 100¹ de plus que les \$295,000,000 de 1955.

Détail

La recette par lit a été de \$3,397 en 1956 (ou \$3,936 sans les berceaux), contre \$3,219 (ou \$3,733) en 1955, soit une augmentation de 5.5 p. 100. Les recettes (\$227,000,000) provenant des services généraux aux malades hospitalisés ont augmenté de 15 p. 100. Elles comprennent surtout le prix des chambres, de la pension et des services ordinaires, mais elles comprennent aussi un élément indéterminé de recettes provenant des "services spéciaux" déclarés par les hôpitaux qui ont un tarif global et qui comprennent dans le tarif de base des chambres une quote-part représentant les services spéciaux. Le total était formé de \$34,280,000 provenant des chambres privées (augmentation de 6.2 p. 100), \$54,630,000 provenant des chambres semi-privées (17.8 p. 100 de plus), \$130,700,000 provenant des salles communes (15.6 p. 100 de plus) et \$7,369,000 provenant des pouponnières (29.1 p. 100 de plus). Les recettes des services généraux rendus aux malades externes (article ajouté au questionnaire de 1955 pour couvrir les soins donnés aux malades externes) ont augmenté de 18.2 p. 100 en 1956, soit de \$928,100 à \$1,097,000. Les recettes provenant des services spéciaux rendus aux malades hospitalisés ont augmenté de \$71,530,000 à \$76,250,000 (6.6 p. 100); elles ont augmenté de \$15,850,000 à \$18,430,000 (16 p. 100) dans le cas des malades externes. Chaque service spécial comptabilisé séparément accuse une augmentation dans le cas des malades hospitalisés et des externes, sauf² la physiothérapie dans le cas des hospitalisés (baisse de 8.6 p. 100) et le service ambulancier dans le

1. Figures cited are rounded to four significant figures but percentage changes and computed ratios are based on figures to the nearest single dollar; therefore calculations based on rounded figures may not in all instances agree with results shown.

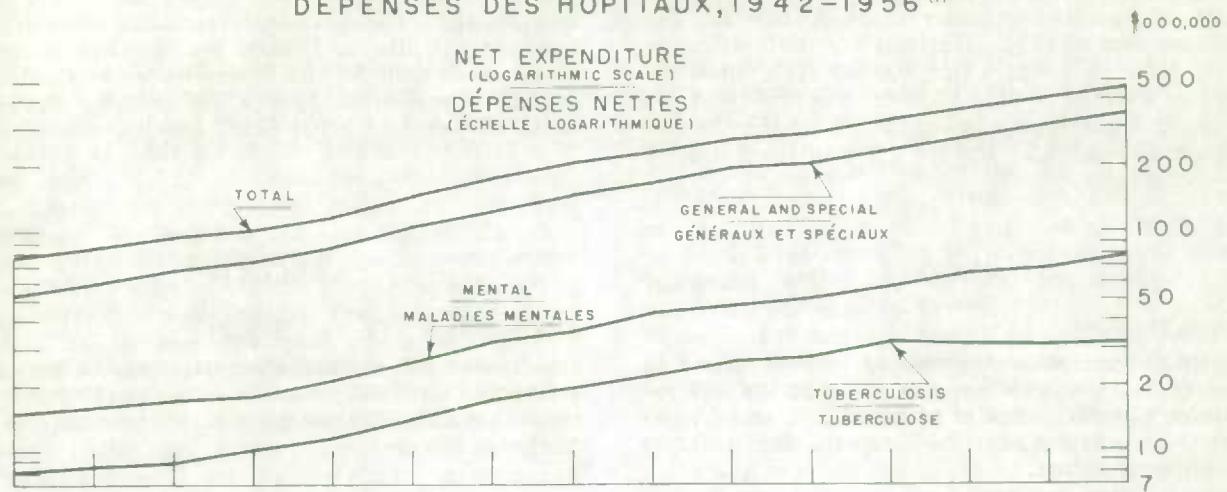

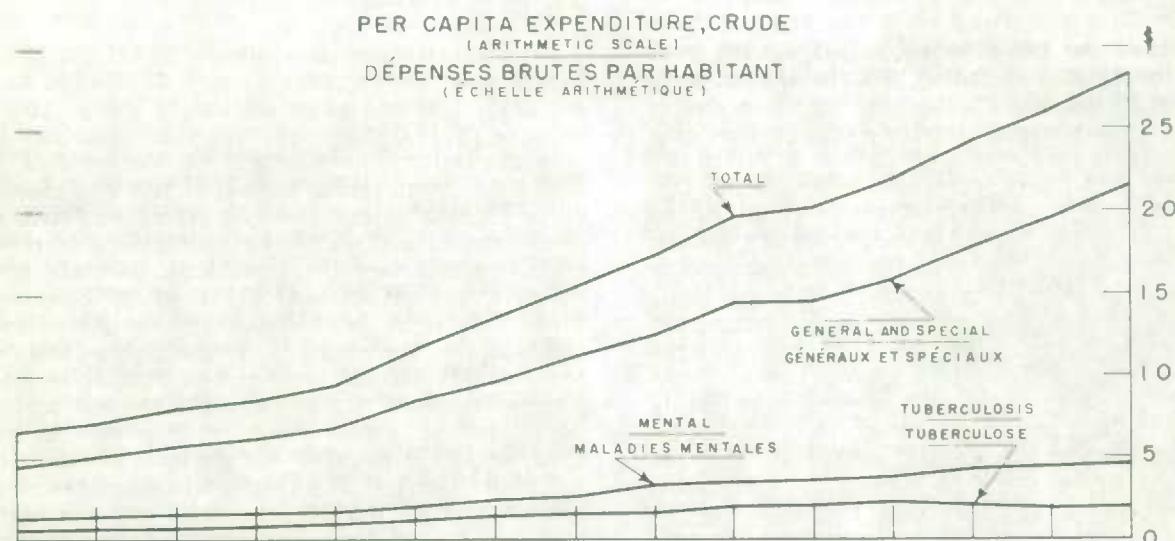

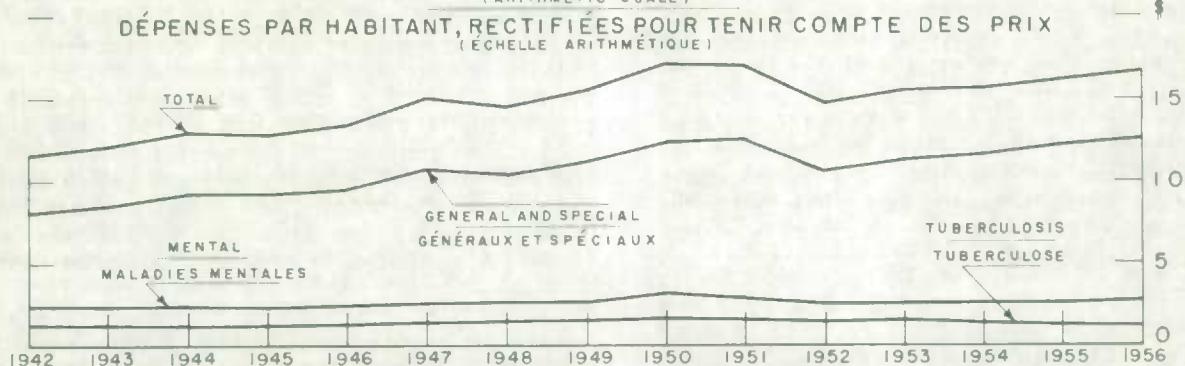

2. A small sum (\$8,317) was reported as out-patient delivery room earnings in 1955, and nil in 1956.

1. Les chiffres indiqués sont arrondis au millier, mais les changements procentuels et les moyennes sont basés sur des chiffres arrondis au dollar; par conséquent, les calculs basés sur des chiffres arrondis peuvent parfois ne pas correspondre exactement aux chiffres indiqués.

2. Une somme peu importante (\$8,317) a été déclarée en 1955 pour la salle d'accouchement dans le cas des externes, contre zéro en 1956.

preceding categories constitute what is designated as gross earnings; from \$285,800,000 in 1955 this figure rose 12.9 per cent to \$322,800,000 the next year.

Deductions

Not every dollar earned by a hospital is actually received by it; the difference between gross and net earnings in 1956 amounted to \$28,770,000, or 98 cents for every \$100 which accrued to the hospitals as net earnings. The year before, the amount of the deductions had been smaller, at \$27,730,000, but their ratio to net earnings had been somewhat higher, at 107 cents per \$100. Hospital accounting practice recognizes four categories of deductions. Three of these are matters of policy; rebates, which are discounts allowed to hospital care plans by hospitals; courtesy, which represents credits allowed on the accounts of patients who are hospital employees, medical staff members, trustees, and the like; and free, which is service provided to indigents and for which the hospital does not expect to collect payment. Bad debts—the fourth category—represent loss due to uncollectible accounts, which the hospital originally expected would be paid. In 1955 bad debts cost hospitals \$6,775,000, and in 1956 slightly more, at \$7,073,000.

A more meaningful depiction of the bad debt situation may be presented by measuring the loss ratio due to bad debts; that is to say, by answering the question, "How much higher would net earnings have been if the bad debts had been collected in full?" For convenience, the answer can be presented in terms of cents of bad debts per hundred dollars of net earnings. We have already seen that this amount in 1956 was 98 cents for all forms of deductions combined; in general hospitals alone, the ratio was 91 cents. Of this 91 cents bad debts accounted for 24.5. In 1953 (earliest year for which comparable information is available) the ratio had been 29.6 cents, and it was unchanged in 1954. The next year it fell sharply to 26.4 cents. When hospitals are classified according to size, the smallest (1-24 bed) and the largest (500 or more bed) hospitals are seen to have considerably lower bad debt ratios, generally speaking, than the medium-sized institutions. In 1956 the range was from 33.7 cents in hospitals with 200-299 beds to 22.3 cents in those with 500 or more and only 18.7 cents in those with less than 25 beds (Fig. 2). Interprovincial variation is even greater. In Prince Edward Island the loss ratio was 109.4 cents, and in New Brunswick 80.5 cents; at the other extreme were Saskatchewan with 7.0 cents and British Columbia with 4.7 cents. When province and size are considered together, Prince Edward Island and New Brunswick show ratios above 50 cents in every size class. The only other ratio so high is recorded by hospitals in Ontario with less than 25 beds; their bad debt loss ratio was 89.4 cents per \$100. Two size groups (Nova Scotia under 25 beds and British Columbia 300-499 beds) have credit entries (collections of written-off bad debts exceeding new bad debts) (Fig. 3).

cas des hospitalisés (25.6 p. 100). Tous ces chiffres constituent les recettes brutes qui se sont accrues de \$285,800,000 en 1955 à \$322,800,000 en 1956 (12.9 p. 100).

Déductions

L'hôpital ne touche pas chaque dollar gagné; la différence entre les recettes brutes et les recettes nettes en 1956 se chiffrait par \$28,770,000, soit 98c. pour \$100 de recettes nettes. En 1955, le montant des déductions avait été inférieur (\$27,730,000), mais la proportion par rapport aux recettes nettes était un peu plus élevée (\$1.07). La comptabilité des hôpitaux admet quatre catégories de déductions. Trois relèvent de la discréption de l'hôpital: rabais (remises accordées aux caisses d'hospitalisation); faveurs (déductions accordées aux employés de l'hôpital, au personnel médical, aux administrateurs et autres); et gratuités (services rendus aux indigents et éventuellement gratuits). Les mauvaises créances,—la quatrième catégorie,—représentent les pertes provenant de comptes irrécouvrables. En 1955, les mauvaises créances ont totalisé \$6,775,000 et, en 1956, un peu plus, soit \$7,073,000.

La situation des mauvaises créances se voit mieux en établissant la proportion des pertes dues aux mauvaises créances, c'est-à-dire en répondant à la question: "Combien plus élevées seraient les recettes nettes si les mauvaises créances avaient été perçues en entier?" Pour plus de commodité, nous exprimerons les mauvaises créances en cents par centaine de dollars de recettes nettes. Nous avons déjà indiqué que les déductions atteignaient 98c. en 1956; pour les seuls hôpitaux généraux, elles se chiffraient par 91c. dont 24.5c. de mauvaises créances. En 1953 (début de cette statistique), la proportion a été de 29.6c.; elle n'a pas changé en 1954. L'année suivante, elle est tombée à 26.4c. Les hôpitaux les plus petits (1-24 lits) et les plus grands (500 lits ou plus) accusent en général une proportion beaucoup moins considérable de mauvaises créances que les hôpitaux moyens. En 1956, la proportion a varié de 33.7c. pour les hôpitaux de 200-299 lits à 22.3c. pour ceux de 500 lits ou plus et à seulement 18.7c. pour ceux de moins de 25 lits (graphique 2). La variation interprovinciale est encore plus marquée. Dans l'Île-du-Prince-Édouard, la proportion est de 109.4c. et, au Nouveau-Brunswick, de 80.5c.; à l'autre extrême se trouvent la Saskatchewan (7c.) et la Colombie-Britannique (4.7c.). L'Île-du-Prince-Édouard et le Nouveau-Brunswick accusent une proportion supérieure à 50c. pour chaque groupe d'importance. La seule autre proportion aussi élevée est celle des hôpitaux d'Ontario qui comptent moins de 25 lits (89.4c. pour \$100). Deux groupes (moins de 25 lits en Nouvelle-Écosse et 300-499 en Colombie-Britannique) ont un chiffre positif à l'item des mauvaises créances (c'est-à-dire que les recouvrements de mauvaises créances déjà défaillées dépassent les nouvelles mauvaises créances) (graphique 3).

Net earnings

Net earnings of public general and special hospitals in 1956 amounted to \$294,000,000, a rise of 13.9 per cent from the \$258,000,000 recorded in 1955. General hospitals accounted for most of the sum, their net earnings rising to \$280,000,000 from \$244,800,000, or by 14.4 per cent, over the same period. Further information on net earnings of general hospitals is presented below (see Source analysis of net earnings).

Grants

Grant revenue¹ was reduced sharply in 1956, falling 11.9 per cent to \$21,640,000 from \$24,570,000 the year before, after having increased in 1955 from \$24,350,000 in 1954. The reduction was confined to certain provinces and to certain classes of grants. Much of it resulted from the fact that one hospital in Newfoundland with a very large amount of revenue from provincial grants did not report its 1956 finances in a usable fashion and so had to be excluded from all totals. If it had been included, the 1956 grant figure would have been \$23,530,000, a reduction of only 4.2 per cent from 1955. Furthermore, instead of declining by 83.6 per cent, the Newfoundland provincial grant figure would have increased by 10.6 per cent. Elsewhere, total grants increased in every province except on The Prairies. An especially sharp reduction (81.4 per cent) occurred in Manitoba, and figures there were virtually complete in both 1955 and 1956. Ontario and Prince Edward Island reported reductions in municipal grants, but in each instance the declines were outweighed by increases in provincial grants.

Other income

In addition to some \$294,000,000 in net earnings from services to patients and \$21,640,000 in grants, public hospitals also had during 1956 a total of \$13,750,000 in miscellaneous income. This amount, up by 11.0 per cent from 1955's \$12,390,000, comprised \$6,098,000 of donations (up 14.6 per cent), \$940,900 in contributed services of personnel (up 1 per cent), \$2,118,000 from ancillary operations² (up 10.2 per cent), and smaller and residual items making up the remainder.

Of the \$6,098,000 in donations in 1956, general hospitals received \$5,003,000. Over the five-

1. This excludes payments by governments for the care of specific individuals (included with gross earnings) and payments by governments for capital purposes (included with plant funds). It includes only "grants intended to assist the hospital in maintaining services and in covering operating deficits".

2. Ancillary operations are non-hospital enterprises carried on by hospitals as conveniences to patients or visitors, as means of economizing, or as additional sources of income. They commonly include barber shops, florist shops, candy or gift shops, and hospital farms. Only the profit is included as revenue. If such an operation shows a loss, the loss is treated as an expenditure.

Recettes nettes

Les recettes nettes des hôpitaux publics généraux et spéciaux en 1956 ont atteint \$294,000,000, soit 13.9 p. 100 de plus qu'en 1955 (\$258,000,000). La majeure partie en revient aux hôpitaux généraux qui accusent une augmentation de \$244,800,000 à \$280,000,000 (14.4 p. 100). D'autres chiffres sont donnés ci-dessous (voir Sources des recettes nettes).

Subventions

L'apport des subventions¹ a été fort réduit en 1956, tombant de 11.9 p. 100 à \$21,640,000 (\$24,570,000 en 1955 et \$24,350,000 en 1954). La réduction n'a touché que certaines provinces et certaines classes de subventions. La baisse tient beaucoup à ce qu'un hôpital de Terre-Neuve, très subventionné par la province, a envoyé un rapport financier impropre à la statistique et dont les chiffres ont dû, par conséquent, être omis; les subventions de 1956 auraient autrement atteint \$23,530,000, soit une réduction de 4.2 p. 100 seulement sur 1955. De plus, au lieu de baisser de 83.6 p. 100, le montant des subventions provinciales à Terre-Neuve aurait augmenté de 10.6 p. 100. Le total des subventions a augmenté dans toutes les autres provinces sauf celles des Prairies. La réduction est particulièrement prononcée (81.4 p. 100) au Manitoba dont la statistique est pour ainsi dire complète quant à 1955 et 1956. Dans l'Ontario et l'Île-du-Prince-Édouard, les subventions municipales ont subi une baisse, compensée par l'augmentation des subventions provinciales.

Autres recettes

Outre les quelque 294 millions de dollars (nets) provenant des services rendus aux malades et les \$21,640,000 de subventions, les hôpitaux publics ont reçu en 1956 un total de \$13,750,000 de recettes diverses. Ce montant, de 11 p. 100 plus élevé qu'en 1955 (\$12,390,000), comprend \$6,098,000 de dons (14.6 p. 100 de plus), \$940,900 de services non rémunérés fournis par le personnel (1 p. 100 de plus), \$2,118,000 provenant de services auxiliaires² (10.2 p. 100 de plus) et diverses autres petites recettes.

Sur les \$6,098,000 de dons en 1956, les hôpitaux généraux en ont obtenu \$5,003,000. Au cours de 1952-

1. Ne sont pas comprises les contributions (figurant aux recettes brutes) versées par les gouvernements pour le soin de certaines personnes ni les subventions d'investissement des gouvernements (figurant au fonds des installations et du matériel). Ne sont comprises que les "subventions pour aider l'hôpital à maintenir ses services et à combler le déficit de gestion".

2. Les services auxiliaires sont des entreprises extra-hospitalières maintenus au bénéfice des malades ou des visiteurs ou encore pour permettre à l'hôpital d'économiser ou d'ajouter à son revenu (boutiques de barbier, magasins de fleurs, de bonbons ou de variétés, ferme, etc.). Les bénéfices seuls figurent aux recettes. Si l'entreprise accuse un déficit, ce dernier figure aux dépenses.

year period commencing in 1952 this total increased steadily, rising from \$2,442,000. It is of interest to relate these sums to total revenue and also to patient days, and to make interprovincial comparisons of the relationships.

On a national basis, donations have made up about 1.5 per cent of total general hospital revenue. For convenience, the relationship may be expressed as dollars of donations per thousand dollars of total revenue. In these terms the ratio rises from \$13.07 in 1952 to \$17.43 in 1954, and then falls to \$16.58 in 1955 and \$16.10 in 1956. Five provinces had ratios above the national average in 1956. Highest was Quebec, with \$30.32; the others were Newfoundland, Prince Edward Island, Nova Scotia, and Ontario. The three westernmost provinces had the lowest donation-to-revenue ratio; Alberta's was \$1.50 per \$1,000, British Columbia's, \$2.66, and Saskatchewan's, \$6.00². Of all ten provinces, only Saskatchewan and British Columbia had increased ratios of donations to total revenue in 1956 over 1955 (Fig. 4A).

Donations per adult and child patient day are most conveniently expressed in cents. Interprovincial variation here is extreme. In four provinces — New Brunswick, Saskatchewan, Alberta, and British Columbia — the ratio was consistently below 10 cents in each of the five years ending in 1956, and the five-year averages were all below eight cents. The other six provinces had five-year average rates all in excess of 22 cents. The range in the five-year average was from Quebec's 40.7 cents per day to Alberta's 3.1 cents (Fig. 4B).

Excess of current expenditure over current revenue

This excess in 1956 amounted to \$17,970,000, up by 21.9 per cent from the \$14,740,000 reported for 1955. General hospitals alone had an increase of 23.2 per cent here and accounted for \$16,010,000 of the 1956 total. A mixed pattern is exhibited by the various size groups of general hospitals. All had more expenditure than revenue, but in three size groups the difference increased and in three it declined in 1956 compared with 1955. The decreases were in the 1-24 group (10.6 per cent), the 25-99 group (10.1 per cent), and the 300-499 group (13.3 per cent), and the increases occurred in the 100-199 group (5.0 per cent), the 200-299 group (62.5 per cent), and the 500-and-over group (44.4 per cent). Of the provinces, Newfoundland, Manitoba, Saskatchewan, and British Columbia had reduced general hospital expenditure excesses in 1956 compared with 1955.

1. The \$6.00 in Saskatchewan was mainly due to a very large amount of donations received in 1956 by a single small hospital. Had this hospital received only the same amount of donations in 1956 as it had done in 1955, the Saskatchewan ratio for 1956 would be only \$1.42, and would have continued a downward trend which occurred from 1952 to 1955.

1956, les dons n'ont cessé d'augmenter (\$2,442,000 en 1952). Il est intéressant de rapprocher ces sommes des recettes totales ainsi que du nombre de jours-malade et d'établir des comparaisons interprovinciales.

A l'échelon national, les dons forment environ 1.5 p. 100 des recettes des hôpitaux généraux. Le rapport entre dons et recettes apparaît plus clairement si l'on prend un millier de dollars de recettes totales comme base. La proportion est passée de \$13.07 en 1952 à \$17.43 en 1954 pour tomber à \$16.58 en 1955 et à \$16.10 en 1956. Cinq provinces accusent une proportion supérieure à la moyenne nationale en 1956. La plus élevée est celle du Québec (\$30.32), suivie de celles de Terre-Neuve, de l'Île-du-Prince-Édouard, de la Nouvelle-Écosse et de l'Ontario. Les trois provinces situées le plus à l'ouest accusent la plus faible proportion: Alberta, \$1.50; Colombie-Britannique, \$2.66; et Saskatchewan, \$6². Seules, parmi toutes les provinces, la Saskatchewan et la Colombie-Britannique accusent une proportion plus élevée en 1956 (graphique 4A).

Il est plus commode d'exprimer en cents les dons par jour-malade (adulte et enfant). Les variations interprovinciales sont extrêmes. Pour quatre provinces (Nouveau-Brunswick, Saskatchewan, Alberta et Colombie-Britannique), le chiffre est inférieur à 10c. depuis 1952 et la moyenne des cinq années est inférieure à 8c. La moyenne quinquennale est inférieure à 22c. pour les six autres provinces. La moyenne quinquennale s'échelonne de 40.7c. au Québec à 3.1c. en Alberta (graphique 4B).

Excédent des dépenses courantes sur les recettes courantes

En 1956, l'excédent s'est chiffré par \$17,970,000, soit une augmentation de 21.9 p. 100 sur 1955 (\$14,740,000). Les hôpitaux généraux accusent seuls une augmentation de 23.2 p. 100 et répondent pour \$16,010,000 du total. La situation n'est pas la même pour tous les groupes d'hôpitaux (selon l'importance). Les dépenses ont surpassé les recettes dans chaque groupe, mais l'excédent a augmenté dans trois groupes et diminué dans trois groupes par rapport à 1955. Il y a diminution pour les hôpitaux de 1 à 24 lits (10.6 p. 100), de 25 à 99 (10.1) et de 300 à 499 (13.3 p. 100) et augmentation pour ceux de 100 à 199 (5 p. 100), de 200 à 299 (62.5) et de 500 et plus (44.4 p. 100). Les hôpitaux généraux de Terre-Neuve, du Manitoba, de la Saskatchewan et de la Colombie-Britannique ont déclaré un excédent moins élevé qu'en 1955.

1. Le chiffre de \$6 en Saskatchewan tient surtout au montant très considérable des dons reçus en 1956 par un seul petit hôpital. Si cet hôpital avait reçu en 1956 le même montant qu'en 1955, la proportion de la Saskatchewan n'aurait été que de \$1.42 en 1956, continuant ainsi de baisser depuis 1952.

Source analysis of net earnings

Of the \$13.22 net earnings per patient day by Canadian general hospitals¹, \$4.18 was paid by private individuals, \$2.77 by Blue Cross, \$1.77 by contracts and other group plans², and \$2.83 by provincial government hospital care plans. The remaining \$1.67 came from other sources³. There was wide interprovincial variation in the relative importance of the various sources. Payments by individuals were generally higher in the East than in the West, reaching a maximum \$6.64 per adult-and-child day in Quebec and coming within a few cents of that figure in New Brunswick and Newfoundland, and accounting for only 98 cents in Saskatchewan and \$2.07 in British Columbia. (In comparing the last two figures, it should be noted that British Columbia residents who are insured under the British Columbia Hospital Insurance Service must pay \$1.00 per day of care received, by way of co-insurance. This is not the case in Saskatchewan.) In Quebec and the Atlantic Provinces, and also (by a narrow margin over Blue Cross) in Manitoba, payment by individuals is the principal source of net earnings in hospitals. Blue Cross is the principal source in Ontario (by another narrow margin over individuals' payments), and accounts for at least \$1.43 per day in each eastern province and in Manitoba. Contracts and other group plans provide \$2.93 per day in Ontario and \$2.59 in Newfoundland (of the Newfoundland sum the Workmen's Compensation Board provides \$1.74—more than triple the amount in any other province) but less than \$2.00 everywhere else. Provincial government hospital care plans during 1956 are of course concentrated in Saskatchewan (accounting for \$11.09 per day) and British Columbia (\$12.45), with small amounts in Alberta and Manitoba and a trace, too small to show on the graph, in Ontario⁴. Residual sources account for less than \$2.50 per day everywhere except in Alberta. In that province the \$6.82 shown as residual includes \$2.63 paid by the provincial government on behalf of individuals and \$2.61 paid by municipal government hospital care plans (Fig. 5).

1. By the 633 general hospitals which reported the source analysis of net earnings; there were also 122 general hospitals which reported the amount of net earnings but did not give the source analysis. General hospitals reporting source data had 84.4 per cent of the total net earnings of all 755 general hospitals which supplied total data. In computing cost per patient day, the days of care given by only the source-reporting institutions have been counted. Days of care of newborn have been excluded from all calculations.

2. Of this \$1.77, 44 cents came from the Workmen's Compensation Board.

3. Of this \$1.67, municipal hospital care plans provided 25 cents and the remainder represented governmental payments on behalf of individuals (federal, 25 cents; provincial, 64 cents; municipal, 54 cents).

4. Amounts attributed to provincial government hospital insurance plans by hospitals in provinces without such plans represent amounts obtained on account of visitors from provinces which have such plans in effect and allow benefits to be claimed for care in out-of-province hospitals.

Sources des recettes nettes

Sur les \$13.22 de recettes nettes par jour-malade des hôpitaux généraux¹, les particuliers ont fourni \$4.18, la Croix-Bleue \$2.77, les paiements en vertu de contrats et ceux d'autres caisses \$1.77², et les caisses d'hospitalisation provinciales \$2.83. Le solde (\$1.67) est venu d'autres sources³. L'importance relative des différentes sources varie beaucoup d'une province à l'autre. Les paiements des particuliers sont généralement plus élevés dans l'Est que dans l'Ouest; ils atteignent un maximum de \$6.64 par jour-malade (adultes et enfants compris) au Québec et presque autant au Nouveau-Brunswick et à Terre-Neuve et ne s'élèvent qu'à 98c. en Saskatchewan et à \$2.07 en Colombie-Britannique. (Les résidents de la Colombie-Britannique qui sont assurés par la Service d'assurance hospitalière provincial doivent payer \$1 par jour de soin indemnisé; il n'en est pas ainsi en Saskatchewan.) Les paiements des particuliers sont la principale source des recettes nettes des hôpitaux au Québec, dans les provinces de l'Atlantique et au Manitoba (où ils dépassent légèrement ceux de la Croix-Bleue). La Croix-Bleue en est la principale source en Ontario (où ses paiements dépassent également un peu les paiements des particuliers) et elle fournit au moins \$1.43 par jour dans les provinces de l'Est et au Manitoba. Les paiements en vertu de contrats et les paiements d'autres caisses fournissent \$2.93 par jour en Ontario et \$2.59 à Terre-Neuve (où la Commission des accidents du travail en fournit \$1.74, soit plus du triple du montant fourni dans tout autre province), mais moins de \$2 ailleurs. En 1956, les caisses d'hospitalisation provinciales ont payé \$11.09 par jour en Saskatchewan et \$12.45 en Colombie-Britannique; elles ont payé de petits montants en Alberta et au Manitoba et un montant infime (trop petit pour figurer au graphique) en Ontario⁴. Les autres sources répondent pour moins de \$2.50 par jour partout, sauf en Alberta où le solde de \$6.82 comprend \$2.63 payés par le gouvernement provincial au bénéfice des particuliers et \$2.61 payés par les caisses d'hospitalisation municipales (graphique 5).

1. Les 633 hôpitaux généraux qui ont donné le détail de leurs recettes nettes; 122 hôpitaux généraux ont déclaré leurs recettes nettes, mais n'en ont pas donné le détail. Les premiers répondent pour 84.4 p. 100 des recettes nettes des 755 hôpitaux généraux qui ont déclaré le total de leurs recettes. Pour le coût par jour-malade, seuls sont comptés les jours de soins fournis par les hôpitaux qui ont donné le détail de leurs recettes nettes. Les jours de soin des nouveau-nés sont omis.

2. Dont 44c. payés par les Commissions des accidents du travail.

3. Les caisses d'hospitalisation municipales en ont fourni 25c.; le reste représente les paiements gouvernementaux pour le compte des particuliers (fédéraux, 25c.; provinciaux, 64c.; municipaux, 54c.).

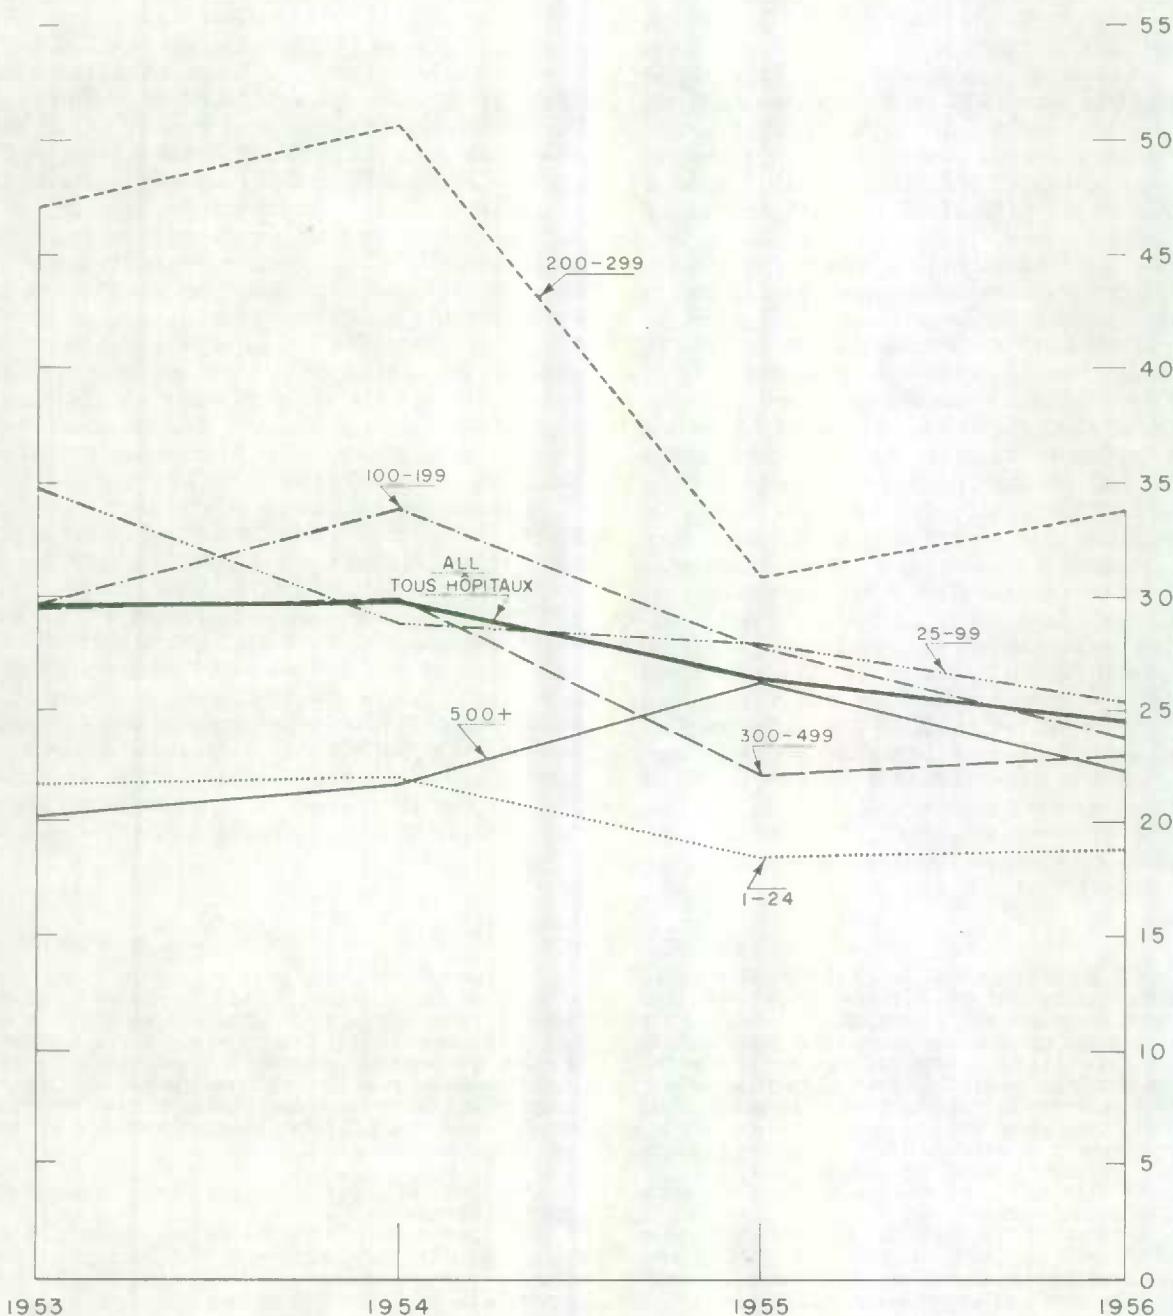

4. Les montants attribués par les hôpitaux aux caisses d'assurance hospitalière provinciales dans les provinces où n'existent pas ces caisses représentent les montants reçus des autres provinces à l'égard de leurs résidents hospitalisés en dehors de leur territoire.

LE RÉSIDU COMPREND LES PLANS MUNICIPAUX ET LES PAIEMENTS FÉDÉRAUX, PROVINCIAUX ET MUNICIPAUX AU TITRE DES PARTICULIERS.

EXPENDITURE

One-third of a billion dollars was spent by Canada's 819 reporting public general and special hospitals during 1956. This sum—\$347,400,000—represented a net average spending of \$424,100 per hospital, \$3,583 per hospital bed (\$4,150 if bassinets are omitted from calculation), or \$13.00 for each day of patient care given (\$14.31 omitting newborn). The average cost of public hospitals per capita of the population of Canada's ten provinces was \$21.64 in 1956.

All these figures represented increases over 1955 and continued long-term upward trends. In 1955 the net expenditure had been \$309,700,000, with 793 hospitals reporting. This gives expenditure ratios of \$390,600 per hospital, \$3,379 per bed (\$3,919 without bassinets), \$12.26 per patient day (\$13.50 without newborn), and \$19.77 per capita. When records began in 1932 the 547 hospitals had spent \$29,170,000, or \$53,320 per hospital, \$2.73 per patient day, and \$2.78 per capita.

Classification

Before proceeding to an examination of the breakdown of hospital expenditures, it will be well to note the two ways in which they are classified. Expenditure is classified by department, according to a predetermined list; this is the first means, or "axis", of classification. Expenditure is also of various natures; as, salaries, drugs and medical supplies¹, other supplies and items chargeable directly to departments (hence the terminology "direct expenditure"), and other expenses such as depreciation, interest, and taxes; this is the second axis. Ideally, it would be possible to cross-classify expenditure by department and nature and show, for example, the amount of salaries and wages required by hospital laboratories. In many hospitals, however, departmentalization is not complete; and in others detailed accounting records by individual departments are not segregated. It is therefore not possible to determine with accuracy the amounts attributable to individual departments cross-classified by nature. Of the 1956 gross salary and wage total of \$213,300,000², for

DÉPENSES

Un total de 819 hôpitaux généraux et spéciaux ont déclaré des dépenses atteignant en 1956 le tiers d'un milliard de dollars (\$347,400,000), soit une moyenne nette de \$424,100 par hôpital, de \$3,583 par lit (\$4,150 sans les berceaux) et de \$13 par jour de soin (\$14.31 sans les nouveau-nés). Le coût national par habitant (dix provinces) a été de \$21.64 en 1956 pour les hôpitaux publics.

Tous ces chiffres sont en augmentation sur 1955 et continuent leur ascension polyennale. En 1955, les dépenses nettes s'étaient élevées à \$309,700,000 (793 hôpitaux), soit \$390,600 par hôpital, \$3,379 par lit (\$3,919 sans les berceaux), \$12.26 par jour-malade (\$13.50 sans les nouveau-nés) et \$19.77 par habitant. En 1932, début de la statistique, les 547 hôpitaux avaient dépensé \$29,170,000 ou \$53,320 par hôpital, \$2.73 par jour-malade et \$2.78 par habitant.

Classement

Avant de procéder à la ventilation des dépenses des hôpitaux, il est bon de remarquer les deux modes de classement. Les dépenses sont classées selon le service (d'après une liste déterminée). Elles sont aussi divisées selon leur nature (second axe du classement): salaires, drogues et fournitures médicales¹, autres fournitures et articles directement portés au compte des services (d'où l'expression "dépenses directes") et autres dépenses telles que la dépréciation, les intérêts et les taxes. En théorie, il serait possible de recouper les dépenses selon le service et leur nature et de montrer, par exemple, le montant des traitements et salaires tenant aux laboratoires. Dans plusieurs hôpitaux, cependant, la division par service n'est pas complète; ailleurs, il n'est pas tenu de comptabilité pour chaque service. On ne peut donc déterminer avec exactitude et selon leur nature les dépenses de chaque service. Sur les \$213,300,000² de traitements et salaires bruts en 1956, par exemple, le détail par service, n'est pas connu pour \$21,300,000 (près de un dixième). Les renseignements disponibles sont présentés au ta-

1. This term, wherever it appears, includes drugs and medicines (including prescribed items) and medical, surgical, and sterile supplies.

2. A distinction is made between gross salaries and wages and net salaries and wages. Gross salaries and wages represent the figures before deduction of included staff perquisites (board, room, laundry, as applicable) and of revenue from board supplied. Net salaries and wages are the remainder after deduction. In the tabular material, gross payroll data are shown, and the deductions are also given. In taking all the deductions off salaries and wages, a small error is involved, in that revenue from special duty nurses' board is deducted although special duty nurses are of course not hospital employees. Special duty nurse board revenue is not, however, accounted for separately from the much larger amount of staff board revenue, and the error in logic involved in deducting the entire amount of board revenue is less than that which would occur if the entire amount were not deducted.

1. Les drogues et fournitures médicales comprennent, dans le présent rapport, les drogues et médicaments (y compris les ordonnances) et les fournitures médicales, chirurgicales et aseptiques.

2. On fait une distinction entre les salaires et traitements bruts et nets. Les traitements et salaires bruts comprennent les priviléges accordés au personnel (pension, chambre, blanchissage, selon le cas) et le revenu provenant de la pension fournie; les traitements et salaires nets égalent le reste après déduction de ces deux postes. Dans les tableaux, le chiffre brut de la rémunération est donnée et les déductions sont aussi indiquées. La soustraction de toutes les déductions entraîne une petite erreur: en effet, le revenu provenant de la pension des infirmières en service spécial est déduit bien que ces dernières ne soient pas des employées de l'hôpital. Le revenu provenant de la pension des infirmières en service spécial n'est pas comptabilisé séparément du revenu (beaucoup plus élevé) de la pension des employés et l'erreur qui résulte de la déduction de l'ensemble du revenu provenant de la pension est moins grande que si cet ensemble n'était pas soustrait.

instance, \$21,300,000 or almost one-tenth was not distributed departmentally. Available information is presented in Table 52, but the absolute amounts shown must be read in the light of the considerable amount of non-distribution. A compromise arrangement has been adopted in most of the expenditure tables. Salaries and wages are shown in total, as are drugs and medical supplies; direct expenditure is presented departmentally; finally appear figures on depreciation, interest, and taxes.

Major components

Of the \$347,400,000 net expenditure, \$200,400,000 or 57.7 per cent was represented by net salaries and wages, \$29,020,000 or 8.4 per cent was for drugs and medical supplies, \$88,300,000 or 25.4 per cent went into direct expenditures for departments, and the remaining \$29,600,000 was divided among building depreciation (\$12,300,000), depreciation on furniture and equipment (\$7,902,000), interest charges (\$7,578,000), taxes on property (\$292,100), and sundry expenses (\$1,533,000). Every item cited represented an increase in amount over 1955. The total absolute increase was \$37,730,000, of which \$22,710,000 or 60.3 per cent was for net salaries and wages.

In terms of cost per patient day¹, a means of calculation which eliminates the difficulty of the small proportion of non-reporting hospitals, expenditure components present some interesting contrasts. Overall cost per patient day in public hospitals stood at \$14.31 in 1956; in general hospitals only, the cost was somewhat higher at \$15.38. General hospitals may appropriately be classified by size² and differences noted. Tabulations have been made according to six size groupings, but these appear to combine into four in terms of cost per patient day. It is \$12.41 in hospitals with less than 25 beds, and is \$12.27 in those with 25-99 beds. In those with more than 99 but less than 200 it is \$14.38. At the 200-299 level it is \$15.71, and in the 300-499 category it is \$15.70—almost the same. In hospitals with 500 or more beds it is considerably higher, at \$17.35.

Examination of the cost of salaries and wages per patient day over the 1952-1956 period in the six size groups of general hospitals reveals steady increases in every group. The cost for all general hospitals rose from \$6.40 in 1952 to \$8.38 in 1955 and \$8.88 in 1956. By and large the amount spent on salaries and wages per patient day increased with increasing hospital size; the 1952 range was from \$4.97 in the smallest, to \$8.10 in the largest hospitals, and in 1956 from \$6.66 to \$10.54. Some clustering of the groups is apparent here also; the per diem wage bill is but slightly higher in the 25-

1. For uniformity, costs per patient day, in this section, are based on patient days of adults and children only excluding days' stay of newborn. The phrase "adult days" will be used for brevity, with the meaning of days of adults and children.

2. For structure of classification, see the Introduction (pp. 7-8).

bleau 52, mais il faut retenir que le détail n'est pas connu à l'égard d'un montant considérable de dépenses. Nous avons adopté la présentation suivante dans la plupart des tableaux de dépenses: traitements et salaires, total; drogues et fournitures médicales, total; dépenses directes, par service; dépréciation, intérêts et taxes.

Principaux éléments

Sur les \$347,400,000 de dépenses nettes, \$200,400,000 (57.7 p. 100) tiennent aux traitements et salaires nets, \$29,020,000 (8.4 p. 100) aux drogues et fournitures médicales, et \$88,300,000 (25.4 p. 100) aux dépenses directes des services; le reste (\$29,600,000) se répartit entre la dépréciation des édifices (\$12,300,000), la dépréciation du mobilier et de l'équipement (\$8,902,000), les intérêts (\$7,578,000), les taxes foncières (\$292,100) et les dépenses diverses (\$1,533,000). Chaque poste est en augmentation sur 1955. L'augmentation totale a été de \$37,730,000, dont \$22,710,000 ou 60.3 p. 100 sont absorbés par les traitements et salaires nets.

En ce qui concerne le coût par jour-malade¹ (calcul qui élimine la difficulté tenant à la petite proportion des hôpitaux non répondants), les éléments de dépenses présentent quelques contrastes intéressants. Le coût total par jour-malade pour les hôpitaux publics a atteint \$14.31 en 1956; pour les hôpitaux généraux seulement, le coût a été quelque peu plus élevé, soit \$15.38. On peut, sous ce rapport, classer les hôpitaux généraux par groupe d'importance² et noter les différences. Nous avons répartis les hôpitaux en six classes, mais ils semblent ne former que quatre classes quant au coût par jour-malade. Le coût est de \$12.41 pour les hôpitaux de moins de 25 lits et de \$12.27 pour ceux de 25 à 99 lits. Pour ceux de plus de 99 lits mais de moins de 200, il est de \$14.38. Pour ceux de 200 à 299 lits, il atteint \$15.71 et pour ceux de 300 à 499, presque autant (\$15.70). Pour les hôpitaux de 500 lits ou plus, il est beaucoup plus élevé (\$17.35).

Le coût des traitements et salaires par jour-malade n'a cessé d'augmenter au cours de 1952-1956 pour chacun des six groupes d'hôpitaux généraux. Le coût pour tous les hôpitaux généraux a augmenté de \$6.40 en 1952 à \$8.38 en 1955 et \$8.88 en 1956. Le chiffre des traitements et salaires par jour-malade augmente dans l'ensemble selon l'importance de l'hôpital; en 1952, il variait de \$4.97 pour les plus petits à \$8.10 pour les plus grands et en 1956, de \$6.66 à \$10.54. Une certaine agglomération des groupes d'importance est aussi apparente sous ce rapport; le montant des salaires par jour du groupe

1. Pour des raisons d'uniformité, le coût par jour-malade, dans cette section, se fonde sur les jours-malade (adultes et enfants compris; nouveau-nés non compris). L'expression "jour-adulte" sera employée pour fins de concision.

2. Pour le cadre du classement, voir l'Introduction (pp. 7-8).

99 bed group than in the 1-24, while that in the 200-299 group approximates (and prior to 1955 was slightly lower than) that in the hospitals with 100-199 beds (Fig. 6).

During the same five-year period other elements of cost have also risen, and in most cases the increases have been uninterrupted. Largest of the rises, in terms both of amount per patient day over the period and proportionately, was in professional care of patients, which gained 62 per cent from 42 cents to 68 cents per diem. Of the major expenditure categories, only general services—comprising dietary, housekeeping, bedding, and linen services—failed to show an increase in trend, remaining within the limits of \$1.77 and \$1.83 per patient day over the period¹ (Fig. 7).

Non-salary expense per patient day in terms of hospital size reveals some strikingly contrasting profiles. No other component of expenditure follows precisely the salary and wage pattern of direct variance of hospital size and cost per patient day, although professional care of patients comes close; only in that category and in general administration does the 500-and-over bed group have the highest cost. The maximum per diem cost is in the 300-499 category for drugs and medical supplies and for depreciation on furniture and equipment, and occurs at the 200-299 level for general services, building depreciation, and residual² expenditure. No category reaches its maximum per diem cost in the 100-199 or the 25-99 bed group. In the smallest hospitals—under 25 beds—per diem plant maintenance costs are at their highest. Lowest per diem cost occurred in the smallest size group for professional care of patients, building depreciation³, and residual expenditure. Hospitals with 25 to 99 beds were lowest in per diem costs for drugs and medical supplies, general administration, and general services. No minimal costs occurred in the 100-199 or the 200-299 groups. Physical plant maintenance reached its lowest per diem cost rate in 300-499 bed hospitals, while furniture and equipment depreciation per patient day was least in hospitals of 500 or more beds (Fig. 8).

Dietary costs in general hospitals

The cost of food in a hospital represents a major item of hospital expense. Of the \$326,700,000⁴ spent by general hospitals during 1956, no less than \$49,070,000 or 15 cents of each dollar went for dietary service. This figure itself

1. See below for further reference to the dietary service.

2. Includes interest, taxes, ambulance services, and sundry expenses.

3. Precise value 47.9¢.

4. Net expenditure, after deduction of perquisites and board recoveries.

de 25 à 99 lits n'est que légèrement supérieur à celui du groupe de 1 à 24 lits; celui du groupe de 200 à 299 lits est pratiquement égal (avant 1955, il était légèrement inférieur) à celui du groupe de 100 à 199 lits (graphique 6).

Au cours de 1952-1956, d'autres éléments ont aussi augmenté et constamment dans la plupart des cas. La plus forte augmentation tant absolue que proportionnelle est celle du coût des soins professionnels, par jour-malade soit de 42 à 68c. ou de 62 p. 100. Parmi les principales dépenses, seuls les services généraux (diététique, entretien ménager, literie et lingerie) n'ont pas augmenté, elles ont oscillé entre \$1.77 et \$1.83 par jour-malade au cours de la période¹ (graphique 7).

Les dépenses (autres que les salaires) par jour-malade varient beaucoup entre les différents groupes d'hôpitaux. Les traitements et salaires sont le seul élément à varier directement selon l'importance de l'hôpital et le coût par jour-malade, quoique les soins professionnels s'en approchent beaucoup; le groupe de 500 lits et plus accuse le coût le plus élevé seulement dans le cas des soins professionnels et des frais d'administration générale. Le groupe de 300 à 499 lits dépense le plus par jour quant aux drogues et fournitures médicales et à la dépréciation du mobilier et de l'équipement; celui de 200 à 299 lits dépense le plus pour les services généraux, la dépréciation des édifices et les autres dépenses². Il n'y a pas de catégorie de dépenses qui atteigne le maximum par jour dans les groupes de 100 à 199 ou de 25 à 99 lits. C'est dans les plus petits hôpitaux (de moins de 25 lits) que les frais (par jour) d'entretien des édifices sont le plus élevés. Les plus bas sont ceux du groupe des hôpitaux les plus petits dans le cas des soins professionnels, de la dépréciation des édifices³ et des autres dépenses. C'est dans les hôpitaux de 25 à 99 lits que sont le plus bas les frais (par jour) de drogues et fournitures médicales, d'administration générale et de services généraux. Les frais des hôpitaux de 100 à 199 lits et de 200 à 299 lits se situent tous au-dessus du minimum. L'entretien des édifices coûte le moins dans les hôpitaux de 300 à 499 lits, tandis que la dépréciation du mobilier et de l'équipement par jour-malade est à son plus bas dans les hôpitaux de 500 lits et plus (graphique 8).

Frais d'alimentation des hôpitaux généraux

La nourriture est une des principales dépenses des hôpitaux. Sur les \$326,700,000⁴ dépensés par les hôpitaux généraux en 1956, pas moins de \$49,070,000 (15c. pour chaque dollar) ont été consacrés au service de diététique. C'est un chiffre bien inférieur

1. Voir plus loin pour plus de renseignements sur le service de diététique.

2. Comprend intérêts, taxes, service d'ambulance et dépenses diverses.

3. Exactement 47.9¢.

4. Dépenses nettes après déduction des priviléges et des sommes perçues pour repas servis.

may be considerably too small, since it includes dietary salaries and wages in only those hospitals which distributed their salary and wage data by department. For comparative purposes, it will be more accurate to exclude the partial report of dietary salaries and wages (\$17,360,000) and concentrate attention on the remaining \$31,700,000, which represents a reasonably accurate measure of the total cost of raw food and of routine replacement of non-depreciable food service equipment¹. This remainder, which makes up 9.7 per cent of net expenditure, varies with size of hospital and with province. The smallest hospitals report the highest percentage (11.8) and the largest hospitals have the lowest percentage (8.8). The Atlantic Provinces report the highest percentages (all above 12, with Newfoundland's 16.9 highest of all), and British Columbia at 8.2 per cent is lowest in this respect (Fig. 9A).

Percentage figures for dietary service may be misleading, however, since higher expenditures in other departments would have the effect of lowering the dietary percentage without necessarily meaning lower dietary costs. Dietary costs per patient day may be computed—still using the \$31,700,000 total referred to above—in order to obviate this difficulty. On this basis, the ratio for all general hospitals is \$1.44². The correlation between size and dietary costs, apparent in the percentage figures mentioned above, all but disappears here. Hospitals with 25-99 beds have the lowest cost, at \$1.32, while those with 200-299 beds have the highest, at \$1.57. Three size groups (1-24, 100-199, and 300-499 beds) share an identical cost ratio, \$1.40. Provincial figures, on the other hand, show variation in patient-day dietary costs which largely parallels that previously noted in the percentage data. All Atlantic Provinces have costs of \$1.55 or more, Newfoundland's \$2.04 being highest. No other province has a cost above \$1.50, and Saskatchewan's \$1.27 is lowest (Fig. 9B).

VALUE AND DEPRECIATION OF PLANT ASSETS

The net value, after depreciation, of the plant assets of the 754 public hospitals reporting on the subject rose during 1956 by \$53,750,000 or 9.3 per cent to \$632,700,000. Of the year-end total, general hospitals (numbering 705) accounted for \$596,300,000 or 94.2 per cent, and had registered an increase of \$52,090,000 or 9.6 per cent. Because of the incompleteness of the data, the absolute figures are not accurate.

1. Depreciable equipment would be capital, rather than current, expense.

2. Based on adult days plus one-third of newborn days. This still is not truly the well-known "cost per meal day", since it is not known how many meal days are provided to hospital employees and visitors. The true "cost per meal day" would be somewhat lower than the \$1.44 cited.

peut-être à la réalité puisqu'il comprend les traitements et salaires du service de diététique des seuls hôpitaux qui ventilent leurs traitements et salaires par service. Il vaut peut-être mieux passer outre au chiffre incomplet des traitements et salaires (\$18,360,000) et se concentrer sur les \$31,700,000 qui constituent une mesure assez exacte du coût de la nourriture et du renouvellement courant de l'équipement non dépréciable du service de diététique¹. Ce chiffre, soit 9.7 p. 100 des dépenses nettes, varie selon l'importance de l'hôpital et la province. Les plus petits hôpitaux déclarent le plus haut pourcentage (11.8) et les plus grands, le plus bas (8.8). C'est dans les provinces de l'Atlantique que le pourcentage est le plus élevé (au-dessus de 12 p. 100; celui de Terre-Neuve, 16.9, est le plus élevé) et en Colombie-Britannique (8.2 p. 100) qu'il est le plus bas (graphique 9A).

Le pourcentage des services de diététique peut induire en erreur puisque des dépenses plus élevées dans d'autres services peuvent le faire baisser sans que les frais d'alimentation soient nécessairement moins élevés. Pour parer à cette difficulté, on peut calculer les frais d'alimentation par jour-malade en se fondant sur les \$31,700,000 susmentionnés. On obtient ainsi, pour les hôpitaux généraux, une moyenne de \$1.44². La corrélation, d'après les pourcentages ci-dessus, entre l'importance des hôpitaux et les frais du service de diététique disparaît presque entièrement ici. Les hôpitaux de 25 à 99 lits déclarent les frais les plus bas (\$1.32) et ceux de 200 à 299 lits, les plus élevés (\$1.57). Trois groupes (1 à 24, 100 à 199 et 300 à 499 lits) ont la même moyenne (\$1.40). La moyenne provinciale présente des variations fort semblables à celles des données procentuelles. Toutes les provinces de l'Atlantique ont des frais de \$1.55 ou plus; c'est Terre-Neuve qui est en tête (\$2.04). Aucune autre province ne dépasse \$1.50. La Saskatchewan est au dernier rang (\$1.27)—(graphique 9B).

VALEUR ET DÉPRÉCIATION DES INSTALLATIONS ET DU MATÉRIEL

La valeur nette (déduction faite de la dépréciation) des installations et du matériel des 754 hôpitaux publics qui ont fourni des chiffres à ce sujet a augmenté de 9.3 p. 100 (\$53,750,000) en 1956 pour atteindre \$632,700,000. A la fin de l'année, les hôpitaux généraux (705) y figuraient pour 94.2 p. 100 (\$596,300,000), soit une hausse de 9.6 p. 100 (\$52,090,000). Les chiffres absolus ne sont pas exacts faute de données complètes.

1. L'équipement déprécié figurerait plutôt aux dépenses de capital qu'aux dépenses courantes.

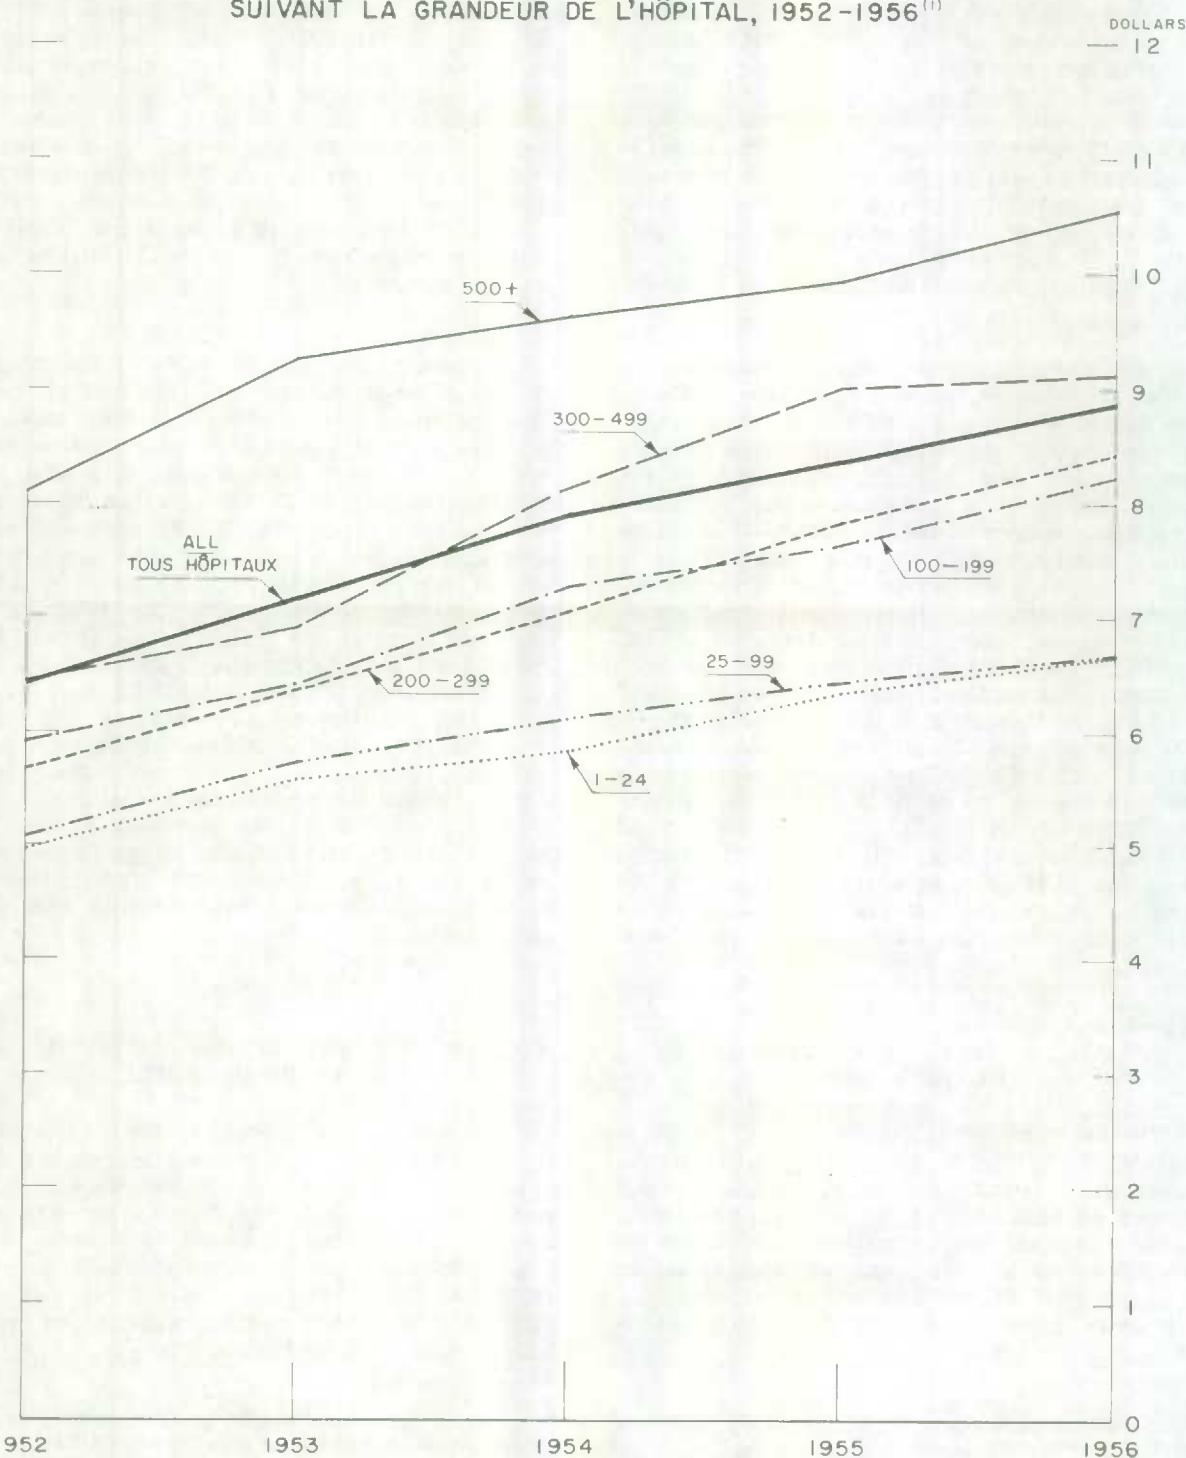

2. Moyenne fondée sur les jours-adulte plus le tiers des jours d'hospitalisation des nouveau-nés. Cette moyenne n'est encore qu'une approximation, puisqu'on ignore combien de repas par jour sont servis aux employés et visiteurs. Le coût exact par jour serait un peu inférieur à \$1.44.

The overall 9.3 per cent rise in public hospitals during 1956 was the resultant of several changes. These may conveniently be expressed as ratios per \$1,000 of the January 1 net value so as to produce \$1,093 net value at December 31. Before the year began, each \$1,000 of net assets had accumulated \$237 of depreciation. This \$1,237 gross value at January 1 was increased during the year by \$129 in added assets and reduced by \$9 in assets written off, producing a gross value at December 31 of \$1,357. At the same time depreciation for the current year brought the \$237 initial amount up by \$34, while partially offsetting this was \$7 in depreciation on the assets written off, producing a December 31 accumulated depreciation amount of \$264. Reducing the \$1,357 by the \$264 gives the \$1,093 net value at December 31.

SOURCE AND APPLICATION OF PLANT FUNDS

Construction and additions

Public hospitals received \$71,320,000 for new construction and additions to capital goods during 1956 and spent \$70,430,000. During 1955 they had received \$82,570,000 and spent \$75,280,000. Thus receipts in 1956 represented a drop of 13.6 per cent, while spendings showed a reduction of 6.4 per cent. Receipts for plant purposes do not necessarily equal spending in any one year, since often a hospital will receive money in one year but not spend it until later; furthermore, construction and addition funds received may not even in the long run equal funds disbursed for construction and additions, since there might be (in certain circumstances) diversion of funds to or from the retirement of debt. The 1956 revenue for construction and additions represented \$4.44 per capita. Of the per capita sum, private grants and donations accounted for the largest share, \$1.32, and provincial governments provided another \$1.13. Mortgages and debentures raised 74 cents, while hospitals provided 66 cents out of their own funds. The remainder came from the federal government (29.0 cents), municipal governments (28.6 cents), and hospital care plans (1.3 cents). Principal sources of money for construction and additions varied from province to province. Only Prince Edward Island, Ontario, and Manitoba reflected the national pattern in recording private grants and donations as their main source. In Nova Scotia the hospitals' own funds accounted for almost two-thirds. New Brunswick and Quebec hospitals raised their largest amounts in mortgages and debentures. Provincial governments were the main contributors in Newfoundland, Saskatchewan, Alberta, and British Columbia.

It is of interest to compare the amounts provided for construction and additions during 1956 by private grants and donations per capita in the several provinces, the national ratio being \$1.32 as mentioned above. Ratios were: Prince Edward Island, \$3.06; Manitoba, \$2.96; Ontario, \$2.10; Quebec, \$1.11; British Columbia, 80 cents; New Brunswick, 53 cents; Alberta, 31 cents; Saskatchewan, 15 cents; Nova Scotia, three cents; and Newfoundland, nil.

L'augmentation globale (9.3 p. 100) en 1956 résulte de plusieurs changements que l'on peut exprimer en proportions de \$1,000 de valeur nette (1^{er} janvier) donnant une valeur nette de \$1,093 le 31 décembre. Avant le début de l'année, il existait une dépréciation de \$237 pour chaque millier de dollars de valeur nette. Cette valeur brute de \$1,237, au 1^{er} janvier, s'est accrue au cours de l'année de \$129 de rajouts et a été réduite de \$9 de radiations, de sorte que la valeur brute était de \$1,357 le 31 décembre. Durant le même temps, la dépréciation de l'année courante a fait monter de \$34 la dépréciation initiale (\$237), mais des radiations de \$7 ont partiellement contrebalancé cette augmentation, si bien que, le 31 décembre, la dépréciation accumulée était de \$264. En soustrayant \$264 de \$1,357, on obtient la valeur nette au 31 décembre (\$1,093).

SOURCE ET EMPLOI DU FONDS DES INSTALLATIONS ET DU MÉTIERIEL

Bâtiments et matériel

Les hôpitaux ont reçu en 1956 une somme de \$71,320,000 à affecter aux bâtiments et au matériel et ont dépensé \$70,430,000 (\$82,570,000 et \$75,280,000 en 1955), soit une baisse de 13.6 et 6.4 p. 100, respectivement. Les fonds reçus n'égalent pas nécessairement les dépenses parce que les hôpitaux réservent souvent les montants qu'ils reçoivent; en outre, même au cours d'une longue période, les fonds reçus pour les bâtiments et le matériel peuvent ne pas égaler les dépenses parce que dans certains cas les hôpitaux utilisent ces fonds pour amortir leur dette ou consacrent aux bâtiments et au matériel des fonds qui seraient normalement affectés à l'amortissement de leur dette. Les fonds reçus en 1956 s'établissent à \$4.44 par habitant. Les dons privés y figurent pour la plus large part (\$1.32), tandis que les subventions provinciales atteignent \$1.13. Les hypothèques et obligations ont fourni 74c., tandis que 66c. ont été fournis par les hôpitaux eux-mêmes. Le reste provient des gouvernements fédéral (29c.) et municipaux (28.6c.) et des caisses d'assurance-hospitalisation (1.3c.). Les principales sources de fonds varient d'une province à l'autre. Ce n'est que dans l'Île-du-Prince-Édouard, l'Ontario et le Manitoba que les dons privés sont, comme dans l'ensemble du pays, la plus importante source. En Nouvelle-Écosse, les ressources propres des hôpitaux forment presque les deux tiers des fonds. Au Nouveau-Brunswick et au Québec, les hypothèques et obligations sont la source principale. A Terre-Neuve, en Saskatchewan, en Alberta et en Colombie-Britannique, le gouvernement provincial est la source principale.

Il est intéressant de comparer les dons par habitant en 1956 dans les différentes provinces. La moyenne pour le Canada, on l'a vu, est de \$1.32. Voici celles des provinces: Île-du-Prince-Édouard, \$3.06; Manitoba, \$2.96; Ontario, \$2.10; Québec, \$1.11; Colombie-Britannique, 80c.; Nouveau-Brunswick, 53c.; Alberta, 31c.; Saskatchewan, 15c.; Nouvelle-Écosse, 3c.; et Terre-Neuve, rien.

Of the \$70,430,000 spent for construction and additions, \$57,010,000 or 80.9 per cent went for buildings. This was a slightly lower percentage than in 1955, and a smaller amount; then, the proportion had been 81.1 per cent and the amount \$61,080,000. Furniture and equipment required \$12,040,000 in 1956—slightly more than 1955's \$11,880,000, while the amount spent for land and improvements to grounds fell sharply to \$1,376,000 from \$2,318,000 the year before. Everywhere except Prince Edward Island, where more was spent on furniture and equipment, buildings accounted for the greater part of the construction and addition funds disbursed during 1956.

Debt retirement

Of the \$6,250,000 provided to hospitals for the retirement of debts owed by the hospital, \$2,034,000 or 32.5 per cent came from municipal governments and \$1,717,000 or 27.5 per cent was made available by provincial governments. The remaining \$2,499,000 was taken from the hospitals' own revenue and special funds or from miscellaneous sources. Provincial government grants here were confined to Quebec and Ontario, while Ontario and Saskatchewan together accounted for slightly more than three-quarters of all municipal debt retirement grants.

Principal instalments on debentures and bonded debt required \$5,222,000 or 61.5 per cent of the total debt retirement disbursements, which amounted to \$8,495,000. Mortgage principal payments took another \$2,933,000 or 34.5 per cent. In Quebec and (narrowly) British Columbia, mortgage principal payments exceeded debenture and bond instalments; elsewhere the national pattern prevailed.

BALANCE SHEETS

Assets of Canadian public hospitals submitting balance sheets aggregated \$953,400,000 as at December 31, 1956. This was an increase of 14.6 per cent from the \$831,600,000 reported one year earlier. A budgetary surplus of \$488,200,000 at the end of 1955—which amounted to 58.7 per cent of total assets at that time—had risen by 16.5 per cent to \$568,500,000 when 1956 closed. The new surplus was 59.6 per cent of the new asset total.

Under the uniform system of accounting used in Canadian hospitals the balance sheets are divided into four funds, *viz.*, revenue; sinking; endowment, bequest, and trust; and plant. Few hospitals operate sinking or endowment funds, but virtually all have revenue and plant funds¹.

1. Of the 51 public hospitals which reported statements of revenue and expenditure but did not submit revenue fund balance sheets, only eight were general hospitals of 100 beds or more (one in Nova Scotia, six in Quebec, one in Ontario); and of the 58 public hospitals which reported revenue and expenditure statements but failed to submit plant fund balance sheets, only eight were general hospitals of 100 beds or more (one in each of Newfoundland, Nova Scotia, and Ontario and five in Quebec).

Sur les \$70,430,000 consacrés aux immeubles et au matériel, \$57,010,000 (80.9 p. 100) ont été affectés aux bâtiments, soit un pourcentage et un montant légèrement inférieurs à ceux de 1955 (81.1 p. 100 et \$61,080,000). Le mobilier et l'équipement ont totalisé \$12,040,000 en 1956 (\$11,880,000 en 1955) tandis que l'acquisition et l'amélioration de terrains ont beaucoup fléchi (de \$2,318,000 à \$1,376,000). Partout, sauf dans l'Île-du-Prince-Édouard où l'on a dépensé plus pour le mobilier et l'équipement, les bâtiments figurent pour la majeure partie des fonds dépensés en 1956.

Amortissement de la dette

Sur les \$6,250,000 fournis aux hôpitaux pour amortir leur dette, \$2,034,000 (32.5 p. 100) proviennent des municipalités et \$1,717,000 (27.5 p. 100) des provinces. Le reste (\$2,499,000) vient des recettes propres ou des fonds spéciaux des hôpitaux ou de sources diverses. Les subventions provinciales se limitent au Québec et à l'Ontario. L'Ontario et la Saskatchewan répondent ensemble pour plus des trois quarts de toutes les subventions municipales pour amortissement de la dette.

Les remboursements de la dette obligataire ou garantie ont exigé \$5,222,000 ou 61.5 p. 100 du total des paiements pour amortissement (\$8,495,000). Les remboursements d'hypothèques en ont pris 34.5 p. 100 ou \$2,933,000. Les remboursements d'hypothèques ont dépassé les remboursements de la dette obligataire et garantie au Québec et (tout juste) en Colombie-Britannique; partout ailleurs, la répartition des remboursements est semblable à celle de l'ensemble du pays.

BILAN

L'actif des hôpitaux publics canadiens qui ont communiqué leur bilan se totalisait à \$953,400,000 le 31 décembre 1956, soit 14.6 p. 100 de plus qu'un an auparavant (\$831,600,000). Le surplus budgétaire (\$488,200,000 à la fin de 1955 ou 58.7 p. 100 de l'actif) a augmenté de 16.5 p. 100 pour atteindre \$568,500,000 à la fin de 1956 (59.6 p. 100 de l'actif):

D'après la comptabilité uniforme en usage dans les hôpitaux canadiens, le bilan comprend les quatre fonds suivants: revenu; amortissement; dotations, legs et fiducie; et installations et matériel. Peu d'hôpitaux ont un fonds d'amortissement ou un fonds de dotations, mais presque tous ont un fonds de revenu et un fonds d'installations et matériel¹.

1. Sur les 51 hôpitaux publics qui ont déclaré leurs recettes et dépenses, mais n'ont pas communiqué le bilan de leurs fonds de revenu, 8 seulement étaient des hôpitaux généraux de 100 lits ou plus (1 en Nouvelle-Écosse, 6 au Québec et 1 en Ontario); sur les 58 hôpitaux publics qui ont déclaré leurs recettes et dépenses, mais n'ont pas communiqué le bilan de leurs fonds d'installations et matériel, 8 seulement étaient des hôpitaux généraux de 100 lits ou plus (1 à Terre-Neuve, en Nouvelle-Écosse et en Ontario et 5 au Québec).

Revenue fund assets rose during the year by 13.4 per cent to \$105,900,000 at the end of 1956, while plant fund assets rose more swiftly (by 15.9 per cent) to \$803,700,000. Sinking fund assets dropped radically from \$472,700 to \$154,400, or 67.3 per cent¹. Endowment fund assets were slightly reduced at \$43,600,000 instead of \$44,230,000. Overall surpluses rose during 1956 in the sinking, endowment, and plant funds, while the revenue fund surplus was reduced by approximately \$1,000,000 to \$18,960,000.

Several revenue fund items underwent notable adjustments during 1956. Accounts receivable by public hospitals from all sources rose in value from \$46,730,000 by 15.8 per cent to \$54,130,000, while accounts receivable from patients increased by 18.1 per cent from \$32,940,000 to \$38,900,000. Inventory holdings were increased by \$1,636,000 or 11.5 per cent and stood at \$15,920,000 at the end of the period. When 1955 ended revenue fund cash totalled \$11,150,000 and overdrafts totalled \$10,940,000—a credit balance of approximately \$210,000. One year later the picture was reversed: overdrafts amounted to \$12,340,000 and cash held to only \$11,890,000—a debit balance more than twice the previous credit.

1. Much of the sinking fund drop was due to one general hospital in Quebec, which had a \$213,800 sinking fund in 1955 but none in 1956. Had this hospital not had its 1955 sinking fund the decline would have been only 40.4 per cent.

L'actif du fonds de revenu s'est élevé de 13.4 p. 100 en 1956 pour toucher \$105,900,000, tandis que l'actif du fonds d'installations et matériel s'est accru de 15.9 p. 100 pour atteindre \$803,700,000. L'actif du fonds d'amortissement a baissé de \$472,700 à \$154,400 (67.3 p. 100)¹. L'actif du fonds de dotations a décrû légèrement (\$43,600,000 contre \$44,230,000). L'excédent des fonds d'amortissement, de dotations et d'installations et matériel s'est accru en 1956, mais celui du fonds de revenu est tombé d'environ 1 million de dollars (\$18,960,000).

Plusieurs items du fonds de revenu ont grandement changé en 1956. La valeur des effets à recevoir de toutes sources s'est élevée de \$46,730,000 à \$54,130,000 (65.8 p. 100), tandis que les effets à recevoir des malades ont augmenté de \$32,940,000 à \$38,900,000 (18.1 p. 100). La valeur des stocks s'est accrue de \$1,636,000 (11.5 p. 100) pour s'établir à \$15,920,000. A la fin de 1955, l'encaisse du fonds de revenu se chiffrait par \$11,150,000 et le découvert à la banque, par \$10,940,000, soit un solde créditeur d'environ \$210,000. A la fin de 1956, au contraire, le découvert atteignait \$12,340,000 et l'encaisse, \$11,890,000 seulement, le solde débiteur étant ainsi plus du double du solde créditeur d'un an auparavant.

I. La baisse du fonds d'amortissement tient en grande partie à un hôpital général du Québec qui, en 1955, avait un fonds d'amortissement de \$213,800, mais n'en avait plus en 1956. Sans cet hôpital, la baisse serait de 40.4 p. 100 seulement.

1. Territories excluded throughout; Newfoundland excluded 1932-1952; chronic hospitals excluded 1943-1949; public general hospitals for women and public general hospitals for children included with "other special" 1932-1951; figures may not cross-check because of rounding; cost per patient day is based on total patient days and includes out-patient expenditure. Comparable figures for 1942 are given in Table 1, Volume II, 1955. — Sauf pour ceux des territoires pour toutes les années observées et ceux de Terre-Neuve pour les années 1932-1952. Les hôpitaux pour malades chroniques sont exclus pour 1943-1949. Les hôpitaux généraux publics pour femmes ou enfants sont inclus dans "autres spéciaux" pour 1932-1951. Vu l'arrondissement des chiffres, la contre-épreuve peut être impossible. Le coût du jour-malade se base sur l'ensemble des jours-malade et inclut les dépenses relatives aux malades externes. Le tableau 1 du volume II (1955) donne les chiffres comparables pour 1942.

1. Territories excluded throughout; Newfoundland excluded 1932-1952; chronic hospitals excluded 1943-1949; figures may not cross-check because of rounding; cost per patient day is based on total patient days and includes out-patient expenditure. Comparable figures for 1942 are given in Table 2, Volume II, 1955. — Sauf pour les hôpitaux des Territoires pour toutes les années observées et ceux de Terre-Neuve pour 1932-1952. On exclut les hôpitaux pour maladies chroniques pour 1943-1949. Vu l'arrondissement des chiffres, la contre-épreuve peut être impossible. Le coût du jour-malade se base sur l'ensemble des jours-malade et inclut les dépenses relatives aux malades externes. Le tableau 2 du volume II (1955) donne les chiffres comparables pour 1942.

1. Excludes 12 hospitals in The Territories with a gross capacity of 740 beds, cribs and bassinets. Of these, 9 hospitals, with a capacity of 505, submitted partial financial data. Neither the operating nor the reporting figures for these hospitals are included in this or any subsequent tables of the main body of the present report. They are all shown separately, with such data as they did provide, in the Appendix. — A l'exclusion, dans les Territoires, de 12 hôpitaux d'une capacité globale de 740 lits d'adulte ou d'enfant, et berceaux. Neuf de ces hôpitaux, d'une capacité de 505 ont fourni partiellement des données financières. Relativement à ces hôpitaux, — actifs ou répondants, — on n'inclut pas leurs données dans le présent tableau ni dans les tableaux subséquents, mais on les présente séparément dans l'Appendice.

1. Includes rebates, courtesy, free, and net provision for doubtful accounts.

2. This item includes the items formerly tabulated as "Medical, surgical, and sterile supplies" and "Drugs, medicines, and prescriptions". They were not reported separately by many hospitals.

3. Includes depreciation, interest, and taxes.

4. Includes staff perquisites included in salaries and wages, and revenue from special duty nurses' board.

TABLE 6. Percentage components¹ of total income of public hospitals, by type of service
 TABLEAU 6. Décomposition procentuelle¹ du revenu total des hôpitaux publics, par genre de service

Type of service Genres de service	Total income — Revenu total	Net earnings — Gain net		Grants — Subventions			Other income — Autre revenu
		In- patients — Hospitalisés	Out- patients — Malades externes	Provincial — Provinciales	Municipal — Municipales	Hospital care plans — Caisse s d'hospi- talisation	
PUBLIC — PUBLICS	100.0	84.2	5.1	4.8	1.8	--	4.1
General — Généraux	100.0	84.7	5.4	4.3	1.8	--	3.8
Chronic — Affections chroniques	100.0	75.4	--	17.1	0.9	--	6.6
Communicable — Maladies contagieuses	100.0	80.1	--	5.4	14.2	--	0.3
Convalescent — Convalescence	100.0	58.6	0.3	11.0	0.1	--	30.0
Maternity — Maternité	100.0	84.0	0.3	3.3	0.7	--	11.7
Orthopaedic — Orthopédie	100.0	6.2	--	13.1	--	--	80.7
Other — Autres	100.0	91.8	- 0.05 ²	4.9	3.4	--	0.4

1. Calculated to nearest tenth of one per cent for each component; total may not add to precisely 100.0. — Chacun des éléments est calculé au dixième pour cent près; le total peut ne pas donner 100.
 2. Minus quantity results from the writing off during 1956, of a large backlog of accounts incurred in a previous year in a division of one hospital. — Le chiffre négatif provient de ce que, en 1956, un service d'un hôpital a inscrit au compte des profits et pertes un nombre considérable de mauvaises créances reportées d'une année antérieure.

TABLE 7. Percentage components¹ of total income of general hospitals, by size
TABLEAU 7. Décomposition procentuelle¹ du revenu total des hôpitaux généraux, par grandeur

Size — Grandeur	Total income — Revenu total	Net earnings — Gain net		Grants — Subventions			Other income — Autre revenu
		In- patients — Hospitalisés	Out- patients — Malades externes	Provincial — Provinciales	Municipal — Municipales	Hospital care plans — Caisses d'hospit- alisation	
GENERAL — GÉNÉRAUX	100.0	84.7	5.4	4.3	1.8	--	4.1

APPENDIX. Financial data, The Territories
APPENDICE. Données financières des territoires

	Yukon	N.W.T. - T.N.O.
REVENUE – RECETTES		
Hospitals reporting – Hôpitaux faisant rapport	3	6
Earnings from general services – Gain provenant de services généraux:		
Private rooms – Chambres privées	3,320	5,103
Semi-private rooms – Chambres semi-privées	2,531	740
Standard wards – Salles communes	262,794	367,553
Nursery (newborn) – Pouponnières (nouveau-nés)	203	46
Earnings from special services – Gain provenant de services spéciaux:		
In-patient services – Services aux hospitalisés	45,101	19,472
Out-patient services – Services aux malades externes	21,192	695
Deductions from earnings – Déductions du gain:		
Rebates – Rabais	- 27,577	- 60
Courtesy – Faveurs	- 608	-
Free – Gratuités	- 1,664	- 60
Bad debts – Mauvaises créances	+ 497 (cr.)	- 2,610
Grants – Subventions:		
Federal – Fédérales	-	116,704
Territorial – Territoriales	73,534	1,297
Municipal – Municipales	-	6,823
Other revenue – Autres recettes:		
Donations – Dons	404	365
Residual – Résiduelles	7,362	-
TOTAL	387,089	516,068
EXPENDITURES – DÉPENSES		
Hospitals reporting – Hôpitaux faisant rapport	3	6
Gross salaries and wages – Traitements et salaires bruts	375,341	209,150
Drugs, medicines, surgical, and sterile supplies ¹ – Drogues, médicaments, fournitures chirurgicales et aseptiques	30,912	167,191
Direct expenditure – Dépenses directes:		
General administration – Administration générale	6,369	14,954
Professional care of patients – Soins professionnels aux malades	7,463	6,521
General services – Services généraux	63,349	89,318
Physical plant – Immeubles	43,089	71,814
Motor service and ambulance – Service automobile et ambulancier	1,765	2,676
Unclassified direct expenditure – Dépenses directes non réparties	-	110,065
Depreciation – Dépréciation	15,107	8,011
Other expenditure – Autres dépenses	528	-
Unclassified expenditure – Dépenses non-réparties	-	99,618
Less perquisites – Moins priviléges	- 22,949	- 3,064
TOTAL	354,783	567,104

Rates – Taux
