## PREFACE

This is Volume I of the thirty-second annual report on mental health statistics which are derived from the records of psychiatric institutions. It deals with the characteristics of those inpatients who either began or terminated treatment (admissions and separations) during 1963 in psychiatric institutions and psychiatric units of other hospitals.

In addition it contains historical statistical tables as well as a table of general data (Table I), a summary on outpatient statistics for the year, and a directory of psychiatric inpatient and outpatient facilities. Volume II deals with inpatients that were enrolled at the end of the year; the tables are derived from individual reports of hospital admissions. Volumes I and II are prepared in the Public Health Section.

Volume III shows statistics on personnel, services, facilities, and finances. The data are compiled from annual reports of the hospitals and the report prepared in the Institutions Section.

We gratefully acknowledge the co-operation of the staffs of the institutions and of the provincial departments of health who provided the data.

Comments on the contents and their arrangement and requests for further information should be addressed to the Public Health Section, Dominion Bureau of Statistics, Ottawa 3, Ontario.

## PRÉFACE

La présente publication, Volume I du trente-deuxième rapport statistique annuel sur l'hygiène mentale, se fonde sur les dossiers des établissements psychiatriques. Il fournit des données détaillées sur les caractéristiques des malades hospitalisés dont le traitement a commencé ou s'est terminé (admissions et radiations) en 1963, dans les établissements psychiatriques et les quartiers psychiatriques d'autres hôpitaux.

Il contient, en outre, des tableaux statistiques chronologiques et aussi, un tableau de données générales (tableau 1), un sommaire pour l'année statistique relative aux malades externes et un répertoire des installations de psychiatrie pour hospitalisés et malades externes. Le Volume II traite des malades hospitalisés inscrits à la fin de l'année; les tableaux se fondent sur les rapports individuels d'admission aux hôpitaux. Les Volumes I et II sont rédigés à la Section de la santé publique.

Le Volume III présente la statistique relative au personnel, aux services, aux installations et aux finances. Les données sont tirées des rapports annuels des hôpitaux et le rapport est établi à la Section des institutions.

Nous remercions de leur collaboration le personnel des institutions et des ministères provinciaux de la Santé qui ont fourni les données.

Les commentaires sur la matière et la disposition de la présente publication, ainsi que les demandes de renseignements s'adressent à la Section de la santé publique du Bureau fédéral de la statistique, Ottawa - 3 (Ont.).

## EXPLANATORY NOTES

The diagnostic classification is based on the "International classification of diseases", 1955 revision.

Population figures are taken from the "Census of Canada" and from the "Population estimates" of the Census Division of the Dominion Bureau of Statistics.

### Types of Institution

*Mental hospital*—Institutions that provide treatment for all types of psychiatric conditions.

*Psychiatric hospital*—Institutions that provide short-term intensive psychiatric treatment.

*Hospital for mental defectives*—Institutions that provide care for mental defective patients. Included are training schools for the mentally defective.

*Aged and senile home*—Institutions for the cure and treatment of the aged who suffer from psychosis, senility, or other psychiatric disorders.

*Psychiatric units*—Units within hospitals that are organized for the treatment of patients with psychiatric disorders.

*Other types*—Special hospitals for epileptics, for emotionally disturbed children, and for addicts.

### Type of Movement

*First admission*—The admission of a person as an inpatient to a psychiatric institution (including psychiatric unit) who has never before been an inpatient in any psychiatric institution.

*Readmission*—The admission of a person as an inpatient who had been discharged from a psychiatric institution anywhere, but who is not directly transferred from another psychiatric institution. For exceptions see "transfer-in" below.

*Transfer-in*—The direct admission from another mental institution, except where the sending institution did not report on morbidity cards; such movements (70 in 1963) are counted as readmissions.

*Discharge*—The removal of a live patient's name from the books of the hospital. Included are transfers from card-reporting institutions to non-card-reporting institutions.

## NOTES EXPLICATIVES

La classification des diagnostics se fonde sur "Classification internationale des maladies", révision de 1955.

Les chiffres de la population sont tirés du "Recensement du Canada" et des "Estimations de la population" établies à la Division du recensement du Bureau fédéral de la statistique.

### Classes d'institutions

*Hôpital pour maladies mentales*—Institution qui traite tous les troubles psychiatriques.

*Hôpital psychiatrique*—Institution qui fournit des traitements psychiatriques intensifs et de courte durée.

*Hôpital pour déficients mentaux*—Institution qui pourvoit au soin des déficients mentaux, y compris les écoles de formation pour ceux-ci.

*Hospice pour vieillards*—Institution aménagée pour le soin et le traitement des personnes âgées souffrant de psychose, de sénilité ou d'autres troubles psychiatriques.

*Quartier psychiatrique*—Quartier aménagé dans un hôpital pour le traitement des malades affectés de troubles psychiatriques.

*Divers*—Hôpitaux spéciaux pour épileptiques, enfants atteints de troubles émotifs et toxicomanes.

### Mouvement hospitalier

*Première admission*—Admission, dans une institution psychiatrique (quartier compris), d'une personne qui n'a jamais été hospitalisée dans pareille institution.

*Réadmission*—Admission, comme patient d'un malade précédemment radié d'une institution psychiatrique. Exclure les transfères directs d'une autre institution psychiatrique. Voir les exceptions à "transfèrement d'ailleurs".

*Transfèrement d'ailleurs*—Admission directe d'un malade d'une autre institution psychiatrique qui soumet des fiches de morbidité; si ce rapport n'a pas lieu, le transfèrement est calculé comme réadmission (70 en 1963).

*Sortie*—Radiation du nom d'un malade vivant du rôle de l'hôpital. Entre, ici, le transfèrement du malade d'une institution soumettant des fiches de morbidité à une institution n'en soumettant pas.

*Death*—The death of a patient while on the books of an institution, whether it occurred in hospital or while the patient was on probation or otherwise absent.

*Transfer-out*—The departure of an inpatient from one mental institution to another mental institution. For exceptions see under "discharge" above.

### SCOPE

This volume deals with statistical information on the medical, personal, and social characteristics of those inpatients who either began or terminated treatment (admissions and separations) during 1963 in psychiatric institutions and organized psychiatric units of hospitals.

Details on outpatients, on part-time patients (day or night patients) and data on private psychiatric care are not available.

The source for the data in Volumes I and II are individual morbidity cards which the hospitals issue for each admission and for each separation of a patient.

When the reader compares either tables within this report or tables in this report with those of previous years, he must keep certain limitations in mind; these are as follows:

*Non-reporting institutions*—Some psychiatric institutions did not report in any form. Their combined bed capacity is 955, about 1.5 per cent of the total. These institutions are included in the directory on pp. 112.

Other institutions provided summary data but did not report individual cases. Their data are included in Tables 1-11 but are not contained in the other tables. The bed capacity of the card-reporting institutions was 97 per cent of the total.

### Changes in Reporting and in Administration

The following institutions began card reporting in 1962; New Brunswick: The psychiatric unit of the St. John General Hospital. Ontario: The Ontario Hospitals at Goderich and Owen Sound, the I.O.D.E. Community Psychiatric Hospital at Windsor, and the psychiatric units of the Peel Memorial Hospital at Brampton and of the Sarnia General Hospital.

*Characteristics of patients*—Some items are not reported on the cards from Quebec and from the psychiatric units in Ontario. The corresponding items in the tables are listed as "not stated".

*Further information*—For some of the data in this volume more detailed breakdowns are available on request.

*Décès*—Mort d'un malade inscrit au rôle d'une institution, que ce malade ait été alors hospitalisé, libéré sous surveillance ou autrement absent.

*Transfèrement ailleurs*—Radiation, par une institution psychiatrique, d'un malade partant directement pour une autre institution psychiatrique. Voir les exceptions, ci-dessus, à "sortie".

### PORTEE

Le présent volume donne des renseignements statistiques sur les caractéristiques médicales personnelles et sociales des personnes hospitalisées dans les institutions et quartiers psychiatriques, malades qui ont commencé ou terminé (admissions et radiations) leur traitement en 1963.

N'entrent pas dans l'objet de cette étude, les détails relatifs aux malades externes, aux hospitalisés à temps partiel (jour ou nuit) et aux soins psychiatriques dispensés privément.

Les données des vol. I et II originent des fiches individuelles de morbidité pour chaque admission et radiation.

En comparant les tableaux du présent rapport entre eux ou avec ceux des années précédentes, le lecteur ne doit pas perdre de vue certaines restrictions. Les voici:

*Institutions non répondantes*—Certaines institutions n'ont présenté aucun rapport. L'ensemble de leur capacité est de 955 lits, environ 1.5 p.100 du total. Le répertoire inclut ces institutions dans sa liste à la page 112.

D'autres institutions ont présenté des données récapitulatives, mais n'ont pas déclaré chaque cas. Leurs chiffres sont inclus dans les tableaux 1-11, mais exclus des autres. La capacité des institutions soumettant des fiches s'établit à 97 p.100 de l'ensemble.

### Changements des modes de déclaration et d'administration

Les établissements suivants ont soumis des fiches pour la première fois en 1963: Nouveau-Brunswick: le quartier psychiatrique du *St. John General Hospital*; Ontario: les hôpitaux de Goderich et d'Owen Sound, le *I.O.D.E. Community Psychiatric Hospital* de Windsor, et les quartiers psychiatriques du *Peel Memorial Hospital* de Brampton et du *Sarnia General Hospital*.

*Caractéristiques des malades*—Les fiches du Québec et des quartiers psychiatriques de l'Ontario omettent certains détails. Ceux-ci, aux tableaux, paraissent à la rubrique "sans précision".

*Renseignements additionnels*—Sur demande, nous pouvons donner de plus amples renseignements sur les statistiques du présent volume.
