## INTRODUCTION

Statistics on hospitals have been compiled and published annually, in varying degrees of detail by Statistics Canada since 1931. From 1931 to 1975 the annual hospital statistics included a wide range of indicators. We have recently completed a series of 119 hospital indicators covering the period 1976 to 1980-81. This report contains indicators for the 1977-78 reporting year (April 1, 1977 - March 31, 1978). These indicators have been calculated using data from the annual return of hospitals, a census of general and allied special hospitals in operation in Canada, and they provide a picture of hospital utilization, workload and costs. Broken down by province and hospital type and size, the mean, standard deviation, first and third quartiles are calculated for each indicator. Definitions of the terminology used in this report may be found in the glossary at the end of the tables. More detailed definitions may be found in the manuals "Instructions and Definitions for the Annual Return of Health Care Facilities - Hospitals".

Data for hospitals located in the Yukon and Northwest Territories do not appear as such in tabular presentations due to constraints imposed by tabular planning requirements but are included in the Canada totals.

Analysis or interpretation of these indicators should be undertaken with care. The figures presented in this report are averages and are not intended to make statements regarding the relative efficiency or cost-effectiveness of one group of hospitals as compared to another. Hospitals classified together are similar but they certainly are not identical.

Depuis 1931, Statistique Canada recueille tous les ans des données sur les hôpitaux et les présente dans des publications plus ou moins détaillées. Entre 1931 et 1975 les statistiques annuelles des hôpitaux comprenaient une grande variété d'indicateurs. Nous avons complété récemment une série de 119 indicateurs hospitaliers couvrant la période de 1976 à 1980-81. Ce cahier comprend les indicateurs pour l'année de déclaration 1977-78 (le 1<sup>er</sup> avril 1977 au 31 mars 1978). Ces indicateurs ont été calculés au moyen des données provenant du rapport annuel des hôpitaux; il s'agit d'un recensement des hôpitaux généraux et spéciaux divers en activité au Canada. Ces indicateurs révèlent l'utilisation, la charge de travail et les coûts des hôpitaux. On calcule pour chaque indicateur la moyenne, l'écart-type et les premier et troisième quartiles ventilés selon la province, la taille et le genre d'hôpital. Les définitions des termes utilisés dans le rapport figurent dans le glossaire à la fin des tableaux. Des définitions plus détaillées se trouvent dans les "Directives et définitions pour le rapport annuel des établissements de santé - Hôpitaux".

Les données sur les hôpitaux situés au Yukon et dans les Territoires du Nord-Ouest ne figurent pas dans les tableaux en raison des contraintes imposées par les exigences de la planification des tableaux, mais figurent dans le total pour le Canada.

Il faut faire preuve de prudence au moment de l'analyse ou de l'interprétation de ces indicateurs. Les chiffres présentés dans le rapport sont des moyennes et ne visent pas à comparer l'efficacité ou la rentabilité relatives d'un groupe d'hôpitaux à celles d'un autre. Les hôpitaux classés ensemble sont semblables, mais ils ne sont certainement pas

Factors such as location, size, age and organization of the facility may account for some variation in indicator values. Also the modalities of the hospital or health care delivery systems will vary from province to province. As a result, inter-provincial comparisons may reveal some systematic variations in indicator values. This report has been prepared under the direction of Louis de G. Fournier, Chief, Institutional Statistics Section. The 119 indicators in this publication were developed by F. Norman Dawson, Senior Analyst. The team responsible for the development and production of these tables was managed by W. Neil Palmer, Project Manager. The computer programs were the responsibility of George Ramsey, Head of Computer Operations and the actual production was overseen by Garry MacDonald, Production Manager. Additional indicators and other forms of hospital indicators are available on a request basis from the:

identiques. Les facteurs comme l'endroit, la taille, l'âge et l'organisation de l'établissement peuvent expliquer en partie la différence entre les valeurs des indicateurs. Les modalités de la distribution des services hospitaliers ou des services de santé en général peuvent également expliquer les variations d'une province à l'autre. C'est pourquoi la comparaison des données des provinces peut révéler certaines différences systématiques des valeurs des indicateurs. Ce rapport a été préparé sous la direction de Louis de G. Fournier, Chef de la Section de la statistique des établissements. Les 119 Indicateurs ont été préparés par F. Norman Dawson, analyste principal. L'équipe responsable de l'élaboration et de la production des tableaux était conduite par W. Neil Palmer, gestionnaire de projets. Les programmes d'ordinateur ont été élaborés sous la surveillance de George Ramsey, chef des opérations informatiques; et Garry MacDonald, gestionnaire de la production, a assuré la coordination de la production comme telle.
