## INTRODUCTION

Statistics on residential care facilities have been compiled and made available since 1975. The term "residential facilities" refers to facilities with four beds or more which are funded, licensed or approved by provincial/territorial departments of health and/or social services. Among the facilities included are homes for the aged, physically handicapped, developmentally delayed, psychiatrically disabled, facilities for clients with alcohol and drug problems, emotionally disturbed children, transients, delinquents, shelters for families in crisis,<sup>and others.</sup>

Statistics Canada wishes to express its indebtedness to the administrators/owners of the individual facilities across the nation who have prepared and submitted data for inclusion in this report and to the provincial health and social service officials who have provided lists of facilities.

Statistique Canada établit et publie des statistiques sur les établissements de soins pour bénéficiaires internes depuis 1975. L'expression "établissements de soins pour bénéficiaires internes" désigne les établissements dotés de quatre lits ou plus qui sont financés, approuvés, ou titulaires d'un permis délivré par le ministère provincial/territorial des services sociaux et/ou de la santé. Sont inclus dans ces établissements les résidences pour les personnes âgées, les personnes souffrant d'un handicap physique, les handicapés développementaux, les personnes souffrant de troubles psychiatriques, les centres pour les alcooliques et toxicomanes, les enfants souffrant de troubles émotifs, les personnes itinérantes et les délinquants, les refuges pour les victimes de violence familiale, etc.

Statistique Canada désire rendre hommage aux administrateurs et propriétaires de chacun des établissements du pays qui ont établi et présenté les données qui figurent dans le présent rapport et aux responsables des services sociaux et de santé des provinces qui ont fourni les listes des établissements.

## METHODOLOGY

### Objectives

Institutional statistics constitute part of the essential requirements of several federal departments as well as the various provincial departments of health, social services and education. The data are further used for the administrative evaluation of and planning for major provincial and federal programs as well as satisfying many of the needs of administrators, researchers and large special interest groups in the community.

### Coverage

The survey frame is a list of residential care facilities of four or more beds which are approved, funded or licensed by provincial/territorial departments of health and/or social services. Some psychiatric institutions are included here. The remainder are included in the hospital survey. Generally residential care facilities provide a level of care that is below that of hospitals although there is some overlap. There were 4,876 facilities with 234,014 beds operating in Canada at the end of the fiscal year 1987-88. Of these, 4,171 facilities with 198,971 beds responded to the survey.

## MÉTHODOLOGIE

### Objectifs

La statistique des établissements répond aux besoins essentiels de plusieurs ministères fédéraux ainsi que de divers ministères provinciaux de la santé, des services sociaux et de l'éducation. Les données servent en outre à administrer, évaluer et planifier les principaux programmes fédéraux et provinciaux et à répondre à bon nombre des besoins des administrateurs, des chercheurs et des principaux groupes d'intérêt spécial de la collectivité.

### Champ d'observation

La base de sondage est constituée d'une liste des établissements de soins pour bénéficiaires internes dotés de quatre lits ou plus, qui sont approuvés, financés ou titulaires d'un permis délivré par le ministère provincial/territorial des services sociaux et/ou de la santé. Quelques établissements psychiatrique sont inclus ici. Les autres sont inclus dans les enquêtes des hôpitaux. Règle générale, les soins dispensés dans les établissements de soins pour bénéficiaires internes sont d'un niveau inférieur à ceux des hôpitaux, bien qu'il existe un certain chevauchement à cet égard. A la fin de l'exercice financier 1987-88, il y avait 4,876 établissements comptant 234,014 lits en exploitation au Canada. De ce nombre 4,171 établissements comptant 198,971 lits ont participé à l'enquête.

## **Format**

The data for this report were derived from the Annual Return of Residential Care Facilities. Data appearing in this report comprise only a small part of the information available on residential care facilities. All data collected are available in summary by province, principal characteristic of the predominant group of residents, size of facility and type of care.

The release of unpublished data is subject to the confidentiality provisions of the Statistics Act and may entail a charge, depending on the complexity and nature of the tabulations.

## **Data Capture and Editing**

The majority of residential care facilities in the survey frame in Canada receive forms mailed out by Statistics Canada. In New Brunswick, forms are mailed out to nursing homes by provincial officials. In Quebec, all information is provided by the provincial department from data collected by them. The same is true for nursing homes in Alberta. Personal care homes in Manitoba were not included in this survey.

## **Présentation**

Les données du présent rapport proviennent du Rapport annuel des établissements de soins pour bénéficiaires internes. Les données figurant ne comprennent qu'une petite partie des renseignements disponibles sur les établissements de soins pour bénéficiaires internes. Toutes les données recueillies paraissent sous forme sommaire selon la province, la caractéristique principale du groupe prédominant de bénéficiaires, la taille de l'établissement et le genre de soins.

La diffusion des données non publiées est assujettie aux dispositions de la Loi sur la statistique relatives au caractère confidentiel des données, et Statistique Canada peut exiger des frais selon la complexité et la nature des totalisations demandées.

## **Saisie et vérification des données**

La majorité des établissements de soins pour bénéficiaires internes dans la base du sondage du Canada reçoivent les formules que leur envoie Statistique Canada par la poste. Au Nouveau-Brunswick, des fonctionnaires provinciaux envoient les formules par la poste aux maisons de repos. Au Québec, le ministère provincial fournit tous les renseignements à partir des données qu'il recueille. Il en est de même en Alberta pour les maisons de repos. Les établissements de soins au Manitoba, pour personnes âgées ne sont pas compris dans cette enquête.

Manual and computer edits and consistency checks were carried out at Statistics Canada. Problems identified by these editing procedures were resolved by comparison with prior years' forms and by liaison with provincial/territorial authorities.

The Statistics Canada edit program is based on concepts and definitions determined and continuously reviewed by the appropriate provincial/territorial and federal agencies.

## GLOSSARY

### Principal Characteristics

Residents are classified into nine categories. Each category is the principal characteristic of the predominant group which comprises the largest number of residents in the facility.

Aged            Aged (residents who require care principally because of the aging process)

Phs Hand      Physically handicapped and/or disabled, including blind and deaf

Retarded        Mentally retarded, developmentally delayed

Mnt Hand        Mentally handicapped, psychiatrically disabled

Statistique Canada a procédé à des vérifications manuelles et automatisées et à des contrôles de compatibilité. On a résolu les problèmes repérés au cours de ces vérifications en comparant les formules à celles des années précédentes et en restant en contact avec les autorités provinciales/territoriales.

Le programme de vérification de Statistique Canada est fondé sur les concepts et définitions déterminés et constamment révisés par les organismes provinciaux/territoriaux et fédéraux intéressés.
