INTRODUCTION

Purposes and Data Sources

Hospital statistics constitute part of the essential requirements of several federal departments as well as the various provincial departments of health and welfare. Hospital expenditures represent a significant component of the Gross Domestic Product figures. The data are further used for the administration, evaluation and planning of major provincial and federal programs as well as satisfying many of the needs of hospital administrators, researchers and large special interest groups in the community.

The target universe is all public, private and federal hospitals operating in the ten provinces and two territories.

Data collected are on beds and patient movement, ambulatory care, diagnostic and therapeutic services, administrative and support services, personnel, expenditures and income. Tables are available in summary (Annual Hospital Statistics) or indicator (Annual Return of Hospitals - Hospital Indicators) format by province, type and size of hospital.

Methodology

Data Collection

The survey of Health Care Facilities - Hospitals is a mandatory annual survey, included under the jurisdiction of the Statistics Act in 1918, encompassing all facilities in Canada licensed to operate as a hospital. These facilities are licensed by provincial ministries of health and federal government departments. The survey was made annual in 1932 and periodically reviewed at the request of Health and Welfare Canada and the provinces to meet new requirements for administration, analysis, policy planning and decisions on new programs. Statistics Canada has been responsible for the design of the forms and for the processing and dissemination of the data and the update and maintenance of the program.

Quebec, Alberta and British Columbia use their own reporting form. Hospitals in other provinces complete a 28 page document which is returned to Statistics Canada via the provincial Ministry of Health. Forms are mailed to the provinces who in turn send them to the hospitals. This takes place in mid-March. By the end of June the first complete reports are returned to Statistics Canada. It can take up to 18 months to receive all the documents. Provinces have the option of returning the reporting forms to Statistics Canada or sending the data on magnetic tape. At the present time, Quebec, Ontario, Alberta and British Columbia choose to report on tape.

At the end of November of the reporting year a follow-up letter is sent to the provinces listing the outstanding facilities and requesting a time for their receipt. Subsequent follow-ups are done by phone.

But et sources de données

La statistique hospitalière constitue un élément d'information essentiel à plusieurs ministères fédéraux et aux ministères provinciaux de la santé et du bien-être. Les dépenses des hôpitaux sont une importante composante du produit intérieur brut. Les données servent également à l'administration, à l'évaluation et à la planification des principaux programmes provinciaux et fédéraux et répondent à bon nombre de besoins des directeurs des hôpitaux, des chercheurs et des grands groupes d'intérêts spéciaux de la collectivité.

L'univers visé est l'ensemble des hôpitaux publics, privés et fédéraux en activité dans les dix provinces et les deux territoires.

On réunit des données sur les lits et le mouvement des malades, les soins ambulatoires, les services diagnostiques et thérapeutiques, les services d'administration et de soutien, le personnel, les dépenses et les revenus. Les tableaux sont présentés sous forme de sommaires (statistique hospitalière annuelle) ou d'indicateurs (Rapport annuel des hôpitaux - indicateurs des hôpitaux) selon la province et selon le genre et la taille de l'hôpital.

Méthodologie

Collecte des données

L'enquête sur les établissements de santé et les hôpitaux est une enquête annuelle obligatoire en vertu de la Loi sur la statistique de 1918 et elle englobe tous les établissements au Canada qui possèdent une licence pour exploiter un hôpital. La licence est accordée par les ministères provinciaux de la santé et les ministères fédéraux. L'enquête est devenue annuelle en 1932. Elle est revue périodiquement à la demande de Santé et Bien-être social Canada et des provinces afin de répondre aux nouvelles exigences relatives aux nouveaux programmes, soit leur administration et leur analyse ainsi que l'élaboration des politiques et la prise de décisions les concernant. Statistique Canada est responsable de la conception des formulaires, du traitement et de la diffusion des données et, enfin, de la mise à jour et du maintien du programme.

Le Québec, l'Alberta et la Colombie-Britannique utilisent leur propre formulaire de déclaration. Les hôpitaux des autres provinces remplissent un document de 28 pages qu'ils retournent à Statistique Canada par l'intermédiaire du ministère de la santé de leur province. À la mi-mars, les formulaires sont envoyés par la poste aux ministères provinciaux qui les transmettent à leur tour aux hôpitaux. À la fin de juin, Statistique Canada reçoit les premiers rapports remplis. Il peut s'écouler jusqu'à 18 mois avant que Statistique Canada n'ait reçu tous les documents. Les provinces ont le choix entre remplir les formulaires de déclaration ou envoyer les données sur ruban magnétique. À l'heure actuelle, le Québec, l'Ontario, l'Alberta et la Colombie-Britannique fournissent les données sur ruban magnétique.

À la fin de novembre de l'année de déclaration, une lettre de suivi est envoyée aux provinces où se trouvent des établissements n'ayant pas fourni de déclaration et on leur demande de préciser la date à laquelle les données seront transmises. Les suivis subséquents sont faits par téléphone.

Data Definition

The statistical data collected adheres to the Instructions and Definitions Parts I and II developed for the reporting of hospitals to Statistics Canada. Uniform accounting information is available from hospitals as a result of the acceptance of the Canadian Hospital Accounting Manual (CHAM) for reporting under the federal provincial hospital insurance program.

The definitions of terms for the hospital database are as follows:

Hospital

Is defined as an institution where patients are accommodated on the basis of medical need and are provided with continuing medical care and supporting diagnostic and therapeutic services, and which is licensed or approved as a hospital by a provincial government, or is operated by the Government of Canada. This definition includes mental institutions.

Type of Hospital

Public (including voluntary, provincial and municipal). Applies to a hospital recognized by the province as a "public hospital". Such a hospital generally is not operated for profit.

Proprietary. Applies to a hospital owned by an individual or by a private organization, operated for a profit and recognized by the province as a "proprietary hospital".

Federal. Applies to a hospital owned by a department or agency of the Government of Canada and operated on a non-profit basis.

Type of Unit

Short-term units - Adults and children. Are those inpatient units provided for patients who, at the time of admission, require diagnostic and therapeutic services and/or skilled nursing care and medical attention.

Long-term units - Adults and children. Are those inpatient units provided for patients who, at the time of admission, require regular services and continuing nursing care.

Type of Service

General

No long-term units. Refers to a hospital which provides primarily for the diagnosis and short-term treatment of patients for a wide range of diseases or injuries. The services of a general hospital are not restricted to a specific age group or sex.

With long-term units. Refers to a hospital with a group of beds or rooms or a separate wing or building which is recognized as a distinct and separate treatment unit of the hospital. Admission normally requires formal admission procedures even when transferred from another part of the hospital.

Définition des données

Les données statistiques réunies sont conformes aux Directives et définitions, 1^{re} et 2^e parties, élaborées en vue de la déclaration que fournissent les hôpitaux à Statistique Canada. Les renseignements comptables sont uniformes car les hôpitaux se servent du Manuel de comptabilité des hôpitaux du Canada (MCHC) pour leur déclaration, conformément aux programmes d'assurance-hospitalisation fédéral et provinciaux.

Les définitions utilisées pour la base de données sur les hôpitaux sont les suivantes:

Hôpital

Par définition, un hôpital est un établissement qui reçoit des personnes requérant des soins médicaux et leur dispense de façon continue ces soins ainsi que des services diagnostiques et thérapeutiques d'appoint, et qui est enregistré ou reconnu comme hôpital par une province ou est administré par le gouvernement du Canada. Cette définition englobe les établissements psychiatriques.

Genre d'hôpital

Hôpital public (s'applique aux hôpitaux sans but lucratif, aux hôpitaux provinciaux et aux hôpitaux municipaux). Hôpital reconnu par la province comme "public". Un tel hôpital ne vise ordinairement pas à réaliser des bénéfices.

Hôpital privé à but lucratif. Cette définition s'applique aux hôpitaux reconnus comme "privés à but lucratif"; il s'agit des hôpitaux que des particuliers ou des organismes privés possèdent et exploitent en vue de réaliser des bénéfices.

Hôpital fédéral. Hôpital appartenant à un ministère ou un organisme du gouvernement du Canada et ne visant pas à réaliser des bénéfices.

Genre d'unité

Unités de soins de courte durée - Adultes et enfants. Il s'agit des unités d'hospitalisation où sont traités les malades dont l'état, au moment de leur admission, requiert des services diagnostiques et thérapeutiques et (ou) des soins infirmiers spécialisés et une surveillance médicale.

Avec unités de soins de longue durée. Hôpital comprenant un groupe de lits ou de chambres ou encore une aile ou un bâtiment séparé qui est considéré comme quartier de traitement distinct. Pour y être admis, il faut en général remplir les formalités de demande d'admission, même s'il s'agit d'un transfert d'un autre quartier de l'hôpital.

Teaching hospital. Applies to a hospital which provides medical education programs, approved by the appropriate authorities, for the major clinical instruction in at least the medical disciplines of internal medicine and general surgery to undergraduate medical students in their final two years.

Allied Special Hospitals

Specialty. Applies to a hospital which provides primarily for the diagnosis and short-term treatment of patients for a limited range of diseases or injuries, or a broad range of services to a specific age group.

Full-time. Refers to persons employed on a full-time basis, i.e. regularly employed throughout the department's full workweek.

Part-time. Refers to persons employed on a part-time basis, i.e. regularly employed on selected days or partial days in the department's workweek.

Journée d'hospitalisation. Période de soins fournis à un hospitalisé entre les heures du recensement quotidien sur deux jours consécutifs; le jour de l'admission compte comme journée d'hospitalisation, mais non le jour de la radiation.

Malade externe. Malade inscrit au registre de l'hôpital, à des fins diagnostiques ou thérapeutiques, sans être hospitalisé. Cette catégorie comprend les malades qui se présentent à une unité de soins de jour ou de nuit.

Unité de laboratoire. Mesure du travail fait en laboratoire : une unité équivaut à une minute de travail technique, de travail de bureau ou de travail auxiliaire consacré à la production des résultats de tests subis par les malades.

Radiologie. Un examen radiologique est défini comme étant une seule opération diagnostique, effectuée pendant une visite du malade, à l'aide d'un des procédés suivants :

- (a) examen fluoroscopique ou examen par amplificateur de brillance;
- (b) production d'un ou de plusieurs clichés radiographiques;
- (c) une combinaison de (a) et (b);
- (d) examens faits à l'aide d'autres appareils (l'ECG par exemple) par le personnel du service de radiologie.

Bloc opératoire et unité de soins thérapeutiques aux malades ambulatoires. Une visite est définie comme étant une présence d'un malade pour une durée continue, pendant laquelle une (des) intervention(s), un (des) traitement(s) ou un (des) examen(s) sont effectués.

Visites au service de physiothérapie et d'ergothérapie. Un jour de visite est inscrit seulement lorsque le malade reçoit des soins directs pendant ce jour-là. Lorsqu'un malade n'a reçu que des soins indirects un jour donné, on n'inscrit pas de jour de visite pour ce malade. (Les soins indirects aux malades sont les activités venant soutenir ou compléter le diagnostic, l'évaluation ou le traitement pour lesquels la présence du malade n'est pas nécessaire). La visite d'un malade n'est comptée qu'une seule fois pour chaque 24 heures de traitement, même si le malade :

- s'est rendu au service plus d'une fois durant la journée;
- est traité à l'unité d'hospitalisation plus d'une fois durant la journée;
- est traité au service de même qu'à l'unité d'hospitalisation durant la journée;
- est traité durant la journée dans plusieurs secteurs (piscine, gymnase, électrothérapie, etc.) du service par différents employés du service.

Personnel

À temps plein. Personnes employées à temps plein, c'est-à-dire employées régulièrement pendant toute la semaine de travail du service.

À temps partiel. Personnes employées à temps partiel, c'est-à-dire employées régulièrement certains jours ou certaines plages de la journée durant la semaine de travail du service.

Paid hours. Include those for all full-time, part-time and casual employees excluding the medical staff of the hospital who, during the year, have had salaries or wages payable to them by the hospital. Hours covering paid holiday time and other paid leave are to be included for all categories of personnel.

Operating Expense

The cost, on an accrual basis of operating and maintaining the hospital during the year.

Gross salaries and wages including all medical staff remuneration. These are distributed to two sub-categories:

Medical staff. Includes all types of hospital remuneration earned during the year by paid medical staff, i.e. salaries, wages, fees, contract rates, honorarium, etc.

Other gross salaries and wages. Includes gross salaries and wages earned during the year by all other staff including non-medical teaching staff and regular employees involved in extramural or on-the-job training.

Employee benefits. The facility's contribution to the cost of various fringe benefits provided to its employees. These do not include perquisites such as room and board provided for employees, which are a part of salaries and wages.

Supplies and other expenses. These are distributed to three sub-categories:

Supplies and other expenses (excluding medical and surgical supplies and drugs). Includes all of the hospital's operating expenses other than gross salaries and wages and excluding the cost of medical and surgical supplies, drugs and employee benefits.

Medical and surgical supplies. Items used in the treatment and examination of patients such as sutures, dressings, clinical thermometers, sterile supplies, catheters, needles and syringes, etc.

Drugs. All drugs, as well as medicines, anesthetic gases, oxygen and other medical gases, intravenous solutions, etc.

Operating Income

Operating income is the revenue that accrues during the year for the purpose of operation and maintenance of the hospital.

Gross income. This includes the amounts earned by the hospital for the rendering of services to patients. These amounts are represented by the regular income earned by the hospital for such services, regardless of the terms of any special contract, agreement, or understanding as to the basis of rates to be paid.

Net income. Net income comprises the difference between gross income and deductions such as courtesy, rebates and free service, and bad debts, less recoveries.

Heures rémunérées. Comprend les heures des employés à temps plein ou partiel et des employés occasionnels dont les traitements et les salaires, durant l'année, ont été rémunérés par l'hôpital, à l'exclusion du personnel médical de l'hôpital. Les heures pour les vacances et les autres congés rémunérés de toutes les catégories d'employés sont comprises.

Dépenses d'exploitation

Les dépenses d'exploitation et d'entretien de l'hôpital au cours de l'année, établies d'après la comptabilité d'exercice.

Rémunération brute, y compris la rémunération du personnel médical. Est divisée en deux sous-catégories :

Rémunération du personnel médical. Comprend tous les genres de rémunération versée par l'hôpital et gagnée au cours de l'année par le personnel médical, c.-à-d. traitements, salaires, honoraires, gains provenant d'un contrat, etc.

Autre rémunération brute. Comprend la rémunération brute gagnée durant l'année par tous les autres membres du personnel, y compris le personnel enseignant non médical et les employés permanents recevant une formation à l'extérieur ou une formation en cours d'emploi.

Avantages sociaux. Contribution de l'hôpital aux avantages sociaux dont bénéficient les employés. Ne comprennent pas les avantages indirects, tels le logement et la nourriture, qui sont intégrés aux traitements et salaires.

Fournitures et autres dépenses. Sont divisées en trois sous-catégories :

Fournitures et autres dépenses (sauf les fournitures médicales et chirurgicales, et les médicaments). Comprend toutes les dépenses d'exploitation de l'hôpital autres que la rémunération brute, le coût des fournitures médicales et chirurgicales, les médicaments et les avantages sociaux.

Fournitures médicales et chirurgicales. Articles utilisés pour le traitement et l'examen des malades, comme les fils de suture, les pansements, les thermomètres médicaux, les articles stériles, les cathétér, les aiguilles et les seringues.

Médicaments. Tous les médicaments ainsi que les remèdes, les gaz anesthésiques, l'oxygène et autres gaz médicaux, les solutions intraveineuses, etc.

Revenu d'exploitation

Les revenus d'exploitation sont les revenus qui s'accumulent durant l'année aux fins de l'exploitation et de l'entretien de l'hôpital.

Revenu brut. Comprend les sommes provenant des services fournis aux malades. Il s'agit des sommes que l'hôpital reçoit ordinairement pour ces services, sans tenir compte des conditions applicables en vertu d'un contrat, d'une convention ou d'une entente sur le taux à payer.

Revenu net. Est égal à la différence entre le revenu brut et les déductions comme les faveurs, les rabais, les soins gratuits et les mauvaises créances, moins les recouvrements.

Data Processing

After the forms are keyed, an edit is done on the data and a list of validity and correlation errors is produced. Senior staff will check these and make corrections where necessary. Some errors must be corrected while others can be overridden. Turnaround documents will be run until all errors are corrected or overridden.

When the data file has passed the edits, liaison staff requests extracts of specific data such as patient days, total income, total expenditures, etc. to ensure values in selected cells are correct. Further updates to the system are done and edits are produced to ensure there are no errors produced by the updates. If there are errors further updates must be made.

Any problems that are cannot be resolved are listed and queries are sent by mail to the provincial contacts for clarification.

After the extracts are run and the data file is relatively free from error, summary tables are run. These are compared to the previous year. Large discrepancies are noted along with areas that are blank but had data the previous year or vice-versa. The changes are then identified by further extracts to ensure the data are correct.

Four provinces send their data on a magnetic tape. Ontario, Alberta and British Columbia edit the forms in their offices, key the data and send the tape in our format to us. The data tapes are merged with the rest of Canada and turnaround is updated by the same method as keyed reports. At the first run of turnaround, an edit is done on the reports to ensure that the data are reported in the correct areas. It should be noted that the provinces only edit the portions of the report that pertain to their needs. In Ontario the financial data on the Part I are not edited by Information, Resource and Services Branch. They are only interested in statistical data. The Part II is edited by Fiscal Resources Branch. When British Columbia runs turnaround, many of the edits are suppressed. Keying errors etc. are not corrected by the province. Alberta does a complete edit of the form. All editing errors overlooked by the provinces are corrected by Statistics Canada.

Quebec does not complete our form but has its own reporting document. This document is keyed and sent to Statistics Canada on tape. A concordance is also sent telling us what cells to use on their tape. These pages are compared to the Quebec document to ensure the correct cells are extracted. Updates to the program may have to be made at that time.

Traitement des données

Une fois les formulaires saisis, on vérifie les données et produit une liste des erreurs de corrélation et de validité. Les cadres supérieurs examinent cette liste et apportent les corrections nécessaires. On corrige certaines erreurs alors qu'on annule certaines autres. Les documents-navettes circulent jusqu'à ce que toutes les erreurs soient corrigées ou annulées.

Lorsque le fichier de données a subi avec succès les vérifications, les employés de liaison demandent des extraits de données sur des sujets précis - comme les journées d'hospitalisation, le revenu total et les dépenses totales - afin de s'assurer que les valeurs des cellules choisies sont correctes. On effectue alors d'autres mises à jour du système et procède à des vérifications afin de garantir que les mises à jour n'ont pas introduit d'erreurs. Lorsque l'on relève des erreurs, on doit à nouveau effectuer des mises à jour.

On dresse la liste des problèmes ne pouvant être résolus et on envoie par la poste des demandes de renseignements aux personnes-ressources des provinces.

Lorsque les extraits ont été exécutés et que le fichier de données est relativement exempt d'erreurs, on produit les tableaux sommaires, qui sont comparés à ceux des années précédentes. On prend note des différences importantes et des zones laissées en blanc qui comportaient des données l'année précédente (ou des zones comportant des données et qui étaient laissées en blanc l'année précédente). Les modifications sont alors établies au moyen d'autres extraits, ce qui garantit l'exactitude des données.

Quatre provinces envoient leurs données sur ruban magnétique. L'Ontario, l'Alberta et la Colombie-Britannique vérifient elles-mêmes les formulaires, saisissent les données et envoient le ruban qui est structuré selon la disposition adoptée par Statistique Canada. Ces données sont fusionnées à celles du reste du Canada et le document-navette est mis à jour avec la même méthode que celle utilisée pour les rapports saisis. Lors du premier passage du document-navette, on vérifie les rapports afin de s'assurer que les données sont déclarées dans la bonne zone. Il faut remarquer que les provinces ne vérifient que les secteurs dont elles ont besoin. En Ontario, les données financières de la 1^{re} partie ne sont pas contrôlées par la Direction des ressources et des services d'information, car seules les données statistiques l'intéressent. La 2^e partie est vérifiée par la Direction des ressources fiscales. Lorsque la Colombie-Britannique fait passer le document-navette, elle supprime bon nombre de vérifications. Les erreurs de saisie, entre autres, ne sont pas corrigées par la province. L'Alberta fait une vérification complète du formulaire. Toutes les erreurs à la vérification n'ayant pas été corrigées par les provinces le sont par Statistique Canada.

Le Québec ne remplit le formulaire de Statistique Canada car il a son propre document de déclaration. Ce document est saisi et envoyé sur ruban à Statistique Canada, avec un tableau de concordance où sont précisées les cellules à utiliser sur le ruban. Ces pages sont comparées au document du Québec afin de s'assurer que les bonnes cellules sont extraites. Les mises à jour au programme peuvent être apportées à ce moment-là.

Completed Quebec reporting forms for two hospitals are sent along with the tape. Statistics Canada forms are then produced manually using required information taken from the Quebec forms. The forms are then compared to data taken from the tape. When the correct data appears, all hospitals are run and a new file created. There are no data for page 1. This information is extracted from the inventory (Category, Service, Ownership, Operation). The rated beds are the same as the approved beds on page 2 part 1. The file is then merged with the rest of Canada and turnaround run.

Quality Assessment of the File

The Annual Hospital reporting form was the document accepted by the federal and provincial governments for hospital insurance purposes and thus ensured completeness of response. Response to this survey has always been very high, approximately 95% for most years usually representing 97% of the beds.

The data collection, data capture, editing of the information and finally the release of the data, cover a two year period. For example, the collection of data for the fiscal year 1986-87 began in March and April of 1987. The data were released in March of 1989.

Private and Federal hospitals, which together make up only 14% of all hospitals, are not required to report financial information on this survey. The only data available for these hospitals are on beds and hospital utilization. Consequently, tables referring to revenues and expenditures represent data from public hospitals only. For this report, no attempt was made to adjust the data to account for hospitals not responding to the survey or for item non-response for those facilities which did report. In order to indicate more precisely what the data represent, the number of hospitals reporting the particular variables being tabulated are incorporated into the tables.

All financial data reported by public hospitals have undergone a professional audit.

Some items are reported in more than one area of the form and because of editing procedures data may not always agree. An example of this would be newborn admissions reported on pages 2 and 7. Page 7 provides a breakdown of admissions by weight and postnatal admissions but during editing if a breakdown is not available the total on page 7 is deleted and will not agree with page 2.

Hospital data are used by other Statistics Canada divisions and government departments such as Input-Output division, Labour division and Health and Welfare Canada. Many of these departments will use their own calculations to adjust for non-response so care should be taken if comparing their final output to reported data.

Des formules de déclaration du Québec remplies pour deux hôpitaux sont envoyées avec le ruban. Les formulaires de Statistique Canada sont alors remplis à la main à partir des renseignements figurant sur les formules. On compare ensuite les données des formulaires à celles du ruban. Lorsque toutes les données concordent, les renseignements relatifs à tous les hôpitaux sont passés et un nouveau fichier créé. Il n'y a pas de données pour la page 1 : celles-ci sont tirées du répertoire (catégorie, service, propriété et gestion). Les lits basés sur la capacité théorique correspondent aux lits approuvés de la page 2, 1^{re} partie. Les données du fichier sont alors fusionnées avec celles du reste du Canada et on fait passer le document-navette.

Évaluation de la qualité du fichier

Le formulaire de déclaration annuelle des hôpitaux est le document accepté par les administrations fédérale et provinciales aux fins de l'assurance-hospitalisation, ce qui garantit l'exhaustivité de la réponse. Le taux de réponse à l'enquête a toujours été très élevé, environ 95 % la plupart des années, ce qui représente normalement 97 % des lits.

Les activités de collecte, de saisie, de vérification et de diffusion des données durent deux ans. Par exemple, les données pour l'exercice financier 1986-1987 ont été recueillies en mars-avril 1987 et diffusées en mars 1989.

Les hôpitaux privés et fédéraux, qui ensemble représentent seulement 14 % de tous les hôpitaux, n'ont pas à déclarer les renseignements financiers. Les seules données fournies par ces hôpitaux sont celles relatives aux lits et à l'utilisation des hôpitaux. En conséquence, les tableaux sur les recettes et dépenses comprennent uniquement les données des hôpitaux publics. Pour le rapport, on n'a pas rajusté les données pour tenir compte des hôpitaux ne répondant pas à l'enquête ou des postes sans données pour les établissements ayant fourni une déclaration. Le nombre d'hôpitaux ayant fourni une déclaration pour les diverses variables est intégré aux tableaux afin de mieux préciser la portée des données.

Toutes les données financières déclarées par les hôpitaux publics ont été vérifiées par des professionnels.

Certains postes sont déclarés dans plus d'une zone du formulaire et les données les concernant ne correspondront pas toujours en raison des méthodes de vérification. En voici un exemple : les admissions des nouveau-nés sont déclarées aux pages 2 et 7. À la page 7, il y a une ventilation des admissions selon le poids et les admissions postnatales mais si, au cours de la vérification, la ventilation n'est pas disponible, le total de la page 7 sera supprimé et ne correspondra pas à celui de la page 2.

Les données sur les hôpitaux servent à d'autres divisions de Statistique Canada, comme la Division des entrées-sorties et la Division du travail, et aux ministères, entre autres Santé et Bien-être social Canada. Bon nombre de ministères se serviront de leurs propres calculs de rajustement des données pour tenir compte de la non-réponse : il faut donc faire preuve de prudence lorsque l'on compare leur produit final aux données déclarées.

The reporting form was last revised in 1976 with the introduction of a supplement to the Canadian Hospital Accounting Manual and the identification of new user requirements. The only major change in reporting procedures was in 1977 when the survey switched from a calendar year to a fiscal year (April-March). for the transition period, data was collected then for 15 months January 1977 to March 1978 and for the 12 months April 1977 to March 1978.

Catalogue publications (Annual Hospital Statistics and Hospital Indicators) were produced until 1985-86. Thereafter formal publications were discontinued and replaced by tables on a request only basis.

Le formulaire de déclaration a été révisé pour la dernière fois en 1976 afin d'y inclure un supplément au Manuel de comptabilité des hôpitaux du Canada et de répondre aux nouvelles exigences des utilisateurs. La seule modification importante apportée aux procédures de déclaration remonte à 1977, année où l'enquête a commencé à porter sur l'exercice financier (avril à mars) plutôt que sur l'année civile. Durant la période de transition, les données ont été réunies pour quinze mois (janvier 1977 à mars 1978) et pour douze mois (avril 1977 à mars 1978).

Les publications au catalogue (Statistique annuelle des hôpitaux et Indicateurs des hôpitaux) sont parues jusqu'en 1985-1986. Après, les publications ont été interrompues et remplacées par des tableaux disponibles sur demande uniquement.

Over three million Canadian adults have a disability ...

The Health and Activity Limitation Survey (HALS) interviewed over 120,000 disabled Canadians residing in households and institutions. The result is a unique and detailed database on the barriers faced by more than 1 in 10 Canadians during the conduct of their daily activities.

Whether you plan and develop policies and programs for persons with disabilities, employ disabled people, or design accommodation facilities or transportation services, HALS can provide you with the information you need to make better decisions.

A comprehensive profile of the disabled population is available for each province and territory. Special studies are also underway and cover issues such as:

- characteristics of disabled persons who are not in the labour force
- special needs of seniors with disabilities
- socio-economic conditions specific to women with disabilities

Call your nearest Statistics Canada Regional Reference Centre and find out more about the publications, special request service and microdata files from HALS. Our centres are listed in this publication.

Plus de trois millions d'adultes canadiens ont une incapacité ...

Pour l'Enquête sur la santé et les limitations d'activités, on a interviewé plus de 120 000 Canadiens atteints d'incapacité qui faisaient partie d'un ménage ou habitaient en institution. On a ainsi obtenu une base de données unique et détaillée sur les barrières que doit surmonter plus d'un Canadien sur dix dans ses activités quotidiennes.

Vous employez des personnes ayant une incapacité? Vous planifiez ou élaborez des politiques et des programmes à leur intention? Ou vous concevez des installations ou des services de transport? Alors, les résultats de l'Enquête peuvent vous aider à prendre des décisions éclairées.

Vous pouvez vous procurer un profil détaillé de la population ayant une incapacité pour chaque province et territoire. Des études spéciales sont également en cours et portent sur :

- les caractéristiques des personnes inactives ayant une incapacité
- les besoins particuliers des personnes âgées ayant une incapacité
- les conditions socio-économiques particulières aux femmes ayant une incapacité

Pour en savoir davantage sur les publications, le service de demandes spéciales et les fichiers de microdonnées de l'Enquête, téléphonez au Centre régional de consultation de Statistique Canada le plus près. Vous en trouverez la liste dans cette publication.
