PREFACE

The present is the Nineteenth Annual Report on Vital Statistics to be issued by the Dominion Bureau of Statistics on data obtained under arrangement with Provincial Registration Departments. It is the fourteenth report covering all provinces.

The First, Second and Third Annual Reports contain a full account of the origin and purpose of the agreement between the Dominion and the provinces for the production of vital statistics, together with a sketch of the earlier development of these statistics in Canada. Registration of births, deaths and marriages is carried out by the provincial authorities, each province having passed an act making registration compulsory and prescribing that certain items of information be obtained on a uniform basis. Transcripts of the certificates are forwarded to the Dominion Bureau of Statistics and from these the Annual Reports for Canada are compiled. For the year 1939, in addition to the preparation of tables for the present volume, the Bureau of Statistics issued quarterly reports and a preliminary annual report, and supplied to all provinces the compilations required for their respective reports.

As in past years, the statistics of births, deaths and marriages among the Indian population of the provinces are included in the present report. They are also given separately in Appendix I. A summary of the vital statistics of Yukon and the Northwest Territories forms Appendix II. Appendix III shows the relationship between the Intermediate International List of Causes of Death used in certain tables and the Detailed International List used in others. Appendix IV lists by provinces the number of deaths from all causes and from certain important causes according to the presence or absence of medical attendance. Appendix V presents the number of cases of certain notifiable diseases reported in the provinces of Canada during each month of 1939.

The present volume is issued without text, in this manner resembling previous Annual Reports commencing with the Ninth. In order, however, that the most essential figures for rates and comparisons in time shall be available to the reader, twenty-six tables containing such figures have been included in the report. They comprise the first section, under the title "Comparative and Analytical Tables".

Dominion Statistician.

PREFACE

Le présent rapport annuel sur les Statistiques Vitales du Canada est le dix-neuvième de la série que publie le Bureau Fédéral de la Statistique sur des données obtenues en vertu d'ententes avec les départements provinciaux. C'est le quatorzième rapport couvrant toutes les provinces du Canada.

Le premier, le deuxième et le troisième rapports annuels donnent un aperçu complet de l'origine et du but de cette entente entre le Dominion et les provinces pour la compilation des statistiques vitales et décrivent des progrès de ces statistiques au Canada. L'enregistrement des naissances, décès et mariages est fait par des autorités provinciales, chaque province ayant décreté l'enregistrement obligatoire suivant des formules tendant à établir certaines informations sur des bases uniformes. Des copies de ces actes sont envoyées au Bureau Fédéral de la Statistique et leur compilation sert de base au rapport annuel. En 1939, le Bureau Fédéral de la Statistique, outre la préparation de ces tableaux, a publié des bulletins trimestriels et un rapport annuel préliminaire. Il a de plus fourni à toutes les provinces les compilations dont elles avaient besoin pour leurs rapports respectifs.

Comme par le passé, on a fait entrer dans ce rapport les naissances, décès et mariages de la population indienne des provinces. Ils sont aussi donnés séparément dans l'appendice I. Un résumé des statistiques vitales du Yukon et des Territoires du Nord-Ouest forme l'appendice II. L'appendice III montre la relation entre la liste internationale intermédiaire des causes de décès suivie dans certains tableaux et la liste internationale détaillée suivie dans d'autres. L'appendice IV donne par province le nombre de décès par toutes causes et par certaines causes importantes, avec ou sans l'assistance médicale. L'appendice V représente le nombre de cas de certaines maladies déclarables constatés dans les provinces canadiennes, chaque mois de 1939.

Le présent volume ne contient pas de texte, étant ainsi similaire aux rapports annuels antérieurs, commençant avec le neuvième rapport. Cependant, pour que le lecteur ait toujours les chiffres les plus essentiels des taux et des comparaisons de temps, ces chiffres ont été incorporés en vingt-six tableaux formant la première section et appelés "Tableaux comparatifs et analytiques".

La traduction a été faite par la Branche de Traduction du Bureau: Omer Chaput, chef.

Statisticien du Dominion.

(1) Yukon and the Northwest Territories with a population of 13,953 in 1931 are not included. Tables of births, deaths and marriages for these Territories are however given in Appendix II—Le Yukon et les Territoires du Nord-Ouest, dont la population s'élevait à 13,953 en 1931, sont exclus de ce tableau. Les tableaux des naissances, des décès et des mariages pour ces territoires sont donnés dans l'appendice II.

(2) Comprising all provinces except Quebec—Comprisant toutes les provinces excepté le Québec.

(3) Vital statistics of Kent Co., New Brunswick were not collected until May 1, 1921. Therefore in computing rates for that year, one-third of the population of this county has been excluded, reducing the figure for New Brunswick to 379,904 and that of the Registration Area to 6,400,682—Les statistiques du comté de Kent, Nouveau-Brunswick n'existent que depuis le 1er mai 1921. On a donc dû exclure pour cette année-là un tiers de la population de ce comté, réduisant ainsi la population du Nouveau-Brunswick à 379,904 et celle du territoire d'enregistrement à 6,400,682.

Note.—Populations for 1921 and 1931 and those of Manitoba, Saskatchewan and Alberta for 1926 and 1936 are census figures. Remaining figures are estimates to the nearest thousand—Les populations de 1921 et 1931 et celles de 1926 et 1936 pour le Manitoba, la Saskatchewan et l'Alberta sont celles des recensements; les chiffres des autres années sont estimatifs à un millier près.

APPENDIX I

BIRTHS AND DEATHS AMONGST THE INDIAN POPULATION

APPENDICE I

NAISSANCES ET DECES DE LA POPULATION INDIENNE

APPENDIX I

BIRTHS AND DEATHS AMONGST THE INDIAN POPULATION

The totals of births, deaths and marriages presented in the general tables of the present report include returns for Indians, resembling in this respect the corresponding tables of previous reports. The births and deaths of Indians in Canada form only an inconsiderable portion of the whole but this is not so true of certain provinces considered individually. Moreover, in particular aspects of Vital Statistics, e.g., deaths from tuberculosis, the figures for Indians assume an importance beyond the numerical proportion of this class in the population. In the present volume, therefore, as in several previous, it has been thought well to supplement the general tables with an appendix containing the salient features of births and deaths of Indians. Not only will these tabulations enable a special study of the vital statistics of the Indian population, but they will also place the reader in a position to eliminate from the general tables the influence of Indian births or deaths.

Indian marriages cannot be separately tabulated since the racial origin of bride and groom is not given on the marriage certificate.

The term "Indian" as used in these tables includes half-breeds, whenever the statement of racial origin on the birth or death certificate allows their recognition.

The statistics for Indians cannot be considered as having the same degree of completeness as those for the white population. With regard to the accuracy of particular phases of the statistics such as ages, it is probable that in many cases the knowledge of the informants is vague. As to reported causes of death, a large proportion of these are from others than physicians.

APPENDICE I

NAISSANCES ET DECES DE LA POPULATION INDIENNE

Les totaux des naissances, décès et mariages dans les tableaux d'ensemble du présent rapport comprennent ceux des Indiens, comme dans les tableaux correspondants des rapports antérieurs. Les naissances et décès d'Indiens au Canada ne forment qu'une portion minime du total, mais il n'en est pas ainsi quand chaque province est considérée séparément. De plus, sous certains aspects des statistiques vitales, comme dans les décès causés par la tuberculose, les chiffres des Indiens prennent une importance dépassant leur proportion numérique de la population. Dans le présent volume, il a été jugé opportun, comme dans les derniers rapports, d'ajouter aux tableaux d'ensemble de ce volume un appendice contenant les données principales sur les naissances et les décès d'Indiens. Non seulement ces tableaux permettent de faire une étude spéciale des statistiques vitales de la population indienne, mais ils mettent aussi le lecteur en état de les éliminer des tableaux d'ensemble, pour l'influence que peuvent y avoir les naissances et décès d'Indiens.

Il est impossible de computrer séparément les mariages d'Indiens, parce que l'origine raciale de l'époux et de l'épouse, n'est pas donnée sur le certificat de mariage.

Le terme "Indien", dans ces tableaux comprend aussi les métis dans chaque cas où l'entrée de l'origine raciale dans le certificat de naissance ou de décès permet cette classification.

Les statistiques des Indiens ne peuvent pas être considérées comme aussi complètes que celles de la population blanche. Pour ce qui est de l'exactitude de certaines phases particulières des statistiques, comme les âges, il est probable que, dans plusieurs cas, la connaissance de ceux fournissant l'information était plutôt vague. Pour ce qui est des causes de décès, telles que données, il faut aussi se rappeler qu'une forte proportion de ces causes sont données par des personnes autres que des médecins.

APPENDIX II

**VITAL STATISTICS OF YUKON AND THE NORTHWEST
TERRITORIES**

APPENDICE II

**STATISTIQUES VITALES DU YUKON ET DES TERRITOIRES
DU NORD-OUEST**

APPENDIX II

VITAL STATISTICS OF YUKON AND NORTHWEST TERRITORIES

The births, deaths and marriages reported for Yukon Territory and the Northwest Territories of Canada for the year 1939 are listed in the following tables. The statistics of these territories are presented separately from those of the provinces because the figures are not regarded as complete. Moreover, the population of the territories is so small that the omission of their births, deaths and marriages makes no material difference to the total for Canada. The inclusion of the territories with the remainder of Canada in the more detailed tables would also increase out of all proportion to the importance of the territories, the number of cases for which information under a given rubric was not available.

APPENDICE II

STATISTIQUES VITALES DU YUKON ET DES TERRITOIRES DU NORD-OUEST

Les naissances, décès et mariages constatés au Yukon et dans les Territoires du Nord-Ouest en 1939 sont énumérés dans les tableaux suivants. Les statistiques de ces territoires sont séparées de celles des provinces parce que les données sont incomplètes. De plus, la population des territoires est tellement infime que l'omission de leurs naissances, décès et mariages n'affecterait guère le total du Canada. L'inclusion de ces territoires avec les autres provinces du Canada dans les tableaux détaillés aurait comme conséquence d'augmenter, hors de toute proportion à l'importance des territoires, le nombre de cas non donnés sous une rubrique spécifique.
